

## SCHEDULE 2

### ANNEX II OF THE PPE DIRECTIVE

## **BASIC HEALTH AND SAFETY REQUIREMENTS**

### *Mechanical vibration*

**3.1.3.** PPE designed to prevent the effects of mechanical vibrations must be capable of ensuring adequate attenuation of harmful vibration components for the part of the body at risk.

Under no circumstances must the effective value of the accelerations transmitted to the user by those vibrations exceed the limit values recommended in the light of the maximum foreseeable daily exposure of the part of the body at risk.
