

## SCHEDULE 2

### **Information to be included in applications for consent to release or market organisms other than genetically modified higher plants**

## **PART II**

### **Information relating to the organisms**

#### *Characteristics of the modified organisms*

19. The methods used for the modification.
20. The methods used—
  - (a) to construct the insert or inserts and to introduce it or them into the recipient organism;
  - (b) to delete a sequence.
21. The description of any insert and/or vector construction.
22. The purity of the insert from any unknown sequence and information on the degree to which the inserted sequence is limited to the DNA required to perform the intended function.
23. The methods and criteria used for selection;
24. The sequence, functional identity and location of the altered, inserted or deleted nucleic acid segment or segments in question, and in particular any known harmful sequence.
