

## SCHEDULE 12

### VEHICLES PROPELLED BY COMPRESSED NATURAL GAS SYSTEMS

#### *Unions and joints*

**8.**—(1) Every union and joint on a pipeline or gas container must be constructed and fitted so that it will—

- (a) not be liable to work loose or leak when in use; and
- (b) be readily accessible for inspection and maintenance.

(2) Every union on a medium or high pressure pipeline or on a gas container must be made of suitable metal; but such a union may contain non-metal washers and seals provided that such washers and seals are supported and constrained by metal components.
