(6) In the event of a notice served under paragraph (5) not being complied with an inspector may seize any animal to which it relates and arrange for the requirements of the notice to be complied with.

(7) Where a check at a border inspection post involves the taking of a sample for testing and the test result is not immediately available, the official veterinarian may, by notice served on the owner or the person appearing to him to be in charge of an animal, permit the owner or person so served to move the animal from the border inspection post, and require that owner or person to keep the animal in accordance with such conditions as may be specified in the notice until the test results are available; and if the test reveals that the animal does not comply with the provisions of Article 5 of Council Directive 91/496/EEC then the provisions of regulation 22 shall apply as they apply at a border inspection post.

(8) In the event of a notice served under paragraph (5)(b) or (7) not being complied with a veterinary inspector may seize any animal to which it relates, and arrange for the requirements of the notice to be complied with.

(4) For the purposes of testing and analysis of samples described in paragraph (3), the Veterinary Laboratories Agency (an executive agency of Defra) is designated the official laboratory and may make any charge as provided for in Part III of Schedule 8 for carrying out such testing and analysis.

(5) A demand for payment of charges made by the Veterinary Laboratories Agency under this regulation may be addressed to the importer concerned at his last known address, whether or not it is his address for business.

(11) “Quarantine manager” means the person in charge of a quarantine centre or quarantine facility for which approval is required under the Decision.

Payment of fees

20. The official veterinarian shall not authorise the release of animals from a quarantine centre or border inspection post unless he is satisfied that all veterinary checks for which a charge is made have been paid for, and that, where relevant, a deposit covering any cost provided for in Article 9(1)(a), 9(2), the second and third indents of Article 10(1), Article 10(6) and Article 12(2) of Council Directive 91/496/EEC has been lodged.

Consignments constituting a danger to health

21.—(1) Subject to paragraph (2), where checks at a quarantine centre, quarantine facility or border inspection post or the test results referred to in regulation 18(7) reveal that an animal or a consignment of animals is likely to constitute a danger to animal or human health, the official veterinarian shall immediately seize and destroy the animal or consignment (as the case may be) and the costs of such action shall be payable by the importer or his representative.

(2) Where the presence of avian influenza or Newcastle disease is found at a quarantine centre or quarantine facility as described in Article 4(4) of Commission Decision 2000/666/EC, a veterinary inspector shall—

- (b) extend the period of quarantine as required under Article 5 of Commission Decision 2000/666/EC.

(4) A veterinary inspector serving a notice under paragraphs (2) and (3) shall serve it upon the quarantine manager or other person appearing to be in charge of the centre or facility at the time of service; and shall as soon as he practically can send a copy by way of information to the importer of the birds concerned.

Illegal consignments

22.—(1) Where checks at the quarantine centre, quarantine facility or border inspection post reveal that the animals do not comply with the provisions of Article 5 of Council Directive 91/496/EEC or Articles 3, 4 or 5 of Council Directive 91/628/EEC on the protection of animals during transport and amending Directives 90/425/EEC and 91/496/EEC(a), as amended by Council Directive 95/29/EC(b), a veterinary inspector shall, by notice served on the person appearing to him to be in charge of those animals, require that person to—

(2) Before exercising any of the powers in paragraph (1) the veterinary inspector shall consult the importer or his representative.

(3) If the animals are re-despatched in accordance with sub-paragraph (1)(c), the official veterinarian shall cancel the veterinary certificate accompanying the rejected consignment and complete the box 'details of re-consignment' in part 3 of the common veterinary entry document in accordance with the second indent of Article 3(1) of Commission Regulation (EC) No. 282/2004 as soon as the relevant information is known.

(4) If in the opinion of the veterinary inspector re-despatch is not possible, in particular for reasons of the welfare of animals, he shall serve a notice on the person appearing to him to be in charge of the animals in accordance with the following paragraph.

(5) A notice served under the preceding paragraph may authorise slaughter of the animals for human consumption if the animals comply with all legislative requirements which must be complied with before slaughter for human consumption is permitted but, if this is not possible, shall either—

- (a) order the slaughter of the animals for purposes other than human consumption, or
- (b) order the slaughter of the animals and destruction of the carcasses, specifying in each case the conditions regarding control of the use of the products obtained.

(6) In the event of a notice served under paragraph (1) or (4) not being complied with a veterinary inspector may seize any animal to which it relates, and arrange for the requirements of the notice to be complied with.

(7) The importer or his representative shall be liable for the costs incurred in measures under this regulation, but shall be entitled, after deduction of costs, to the proceeds of any sale.

Arrival at the place of destination

23.—(1) On arrival at their place of destination, elephants and animals of the order Artiodactyla (and their crossbreeds) that are for breeding, production or fattening, or that are intended for zoos, amusement parks or hunting or wildlife reserves, shall be detained at the premises by the person having control of those premises for at least 30 days and he shall not release them until authorised in writing by an authorised officer of the Secretary of State.

Post-import controls

24.—(1) Where a veterinary inspector knows or suspects that import conditions (including requirements for the quarantine of imported animals) have not been complied with or there is doubt as to the identity of an animal, he may carry out any veterinary checks on that animal that he deems appropriate.

(2) If the checks confirm that import conditions were not complied with, then the provisions of regulation 22 shall apply as they apply at a border inspection post and, in the case of the exercise of a power to place the animals in quarantine or to isolate them, a veterinary inspector may additionally require the placing in quarantine or isolation of other animals which have been in contact with the imported animals.

PART II

SPECIFIC REQUIREMENTS FOR THE QUARANTINE OF CAPTIVE BIRDS WHICH QUARANTINE MANAGERS MUST ENSURE ARE MET

1. In this Part “unit” in relation to a quarantine centre has the same meaning as it has in the Decision.

2. Birds shall be quarantined for a period (“the quarantine period”) of at least 30 days at the quarantine centre or quarantine facility to which they have been conveyed from the border inspection post and in the case of a quarantine facility at which consignments arriving at different dates are quarantined, the quarantine period shall be extended to expire no sooner than 30 days after the last consignment arrived at the quarantine facility.

3. No bird at a quarantine centre may share a unit with any other bird unless that other bird arrived in the same consignment as the first bird, and in the event that one bird shares a unit with another, the quarantine period for any bird in the unit shall be extended to expire no sooner than 30 days after the last bird was placed in the unit.

9. The destruction, cleansing and disinfection and post-infection sampling from sentinel chickens or other birds in other units (in the case of quarantine centres), and the restrictions on movements onto or off the quarantine centre or quarantine facility shall conform with Article 4(4) of the Decision, unless notice is served under regulation 21(2)(b).

10. Cages and crates used for the transport of birds to the quarantine centre or quarantine facility shall be destroyed by the quarantine manager in such a way as to avoid the spread of disease, unless the cages or crates are made of a material which allows effective cleaning and disinfection, in which case they may be cleansed, disinfected and re-used.

11. Litter and waste material from the quarantine centre or quarantine facility shall be collected, stored and treated as approved or required in writing by the official veterinarian in accordance with paragraph 9 of Part A of Chapter 2 of Annex B to the Decision and in any event so as to avoid spread of disease.

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations revoke and re-make with changes the Animals and Animal Products (Import and Export) (England) Regulations 2005 (S.I. 2005/2002) (“the 2005 Regulations”).

They implement Council Directive 90/425/EEC (concerning veterinary and zootechnical checks applicable in intra-Community trade in certain live animals and products with a view to the completion of the internal market) (OJ No. L224, 18.8.90, p. 29) and Council Directive 91/496/EEC (laying down the principles governing the organisation of veterinary checks on animals entering the Community from third countries) (OJ No. L268, 24.9.91, p. 56).

They continue to include the following provisions—

Intra-Community trade

With respect to intra-Community trade, the Regulations make it an offence to export, import or transport for intra-Community trade any animal or animal product to which Directive 90/425/EEC applies except in accordance with the provisions of regulations 5, 6 and 7 which give effect to the veterinary check and transport requirements for such trade under Directive 90/425/EEC. Part I of Schedule 3 lists individual instruments governing trade of specific types, identifying relevant provisions and specifying any additional requirements which must be complied with pursuant to regulations 5 and 6.

These Regulations provide a statutory basis for the Poultry Health Scheme, which is a means of approving and monitoring poultry establishments engaging in intra-Community trade of poultry and hatching eggs. The approval and monitoring of such establishments is a requirement of Council Directive 90/539/EEC. Regulation 5(5) prohibits exports unless the commodities originate from an establishment which is a member of the Poultry Health Scheme and conforms to the requirements of Directive 90/539/EEC. Schedule 4 sets out how the fees for membership and registration are calculated and provides for re-inspection fees. It also provides for powers for suspension or revocation of membership under specified circumstances.

The Regulations set out the procedures and requirements for the registration of dealers in animals and animal products (regulation 8), and the approval of centres and teams engaging in intra-Community trade in animals and animal products (regulation 9). Regulation 9, with Schedule 5, provides for approval of laboratories to carry out specified poultry health tests. Powers in regulation 10 provide for checks on intra-community trade at the place of destination as required under Directive 90/425. The Regulations also place duties on consignees of animals and animal products (regulation 11), and provide for the approval of assembly centres (regulation 12). They specify the procedure to be followed in the case of illegal consignments (regulation 13).

Imports from third countries

These Regulations prohibit the importation of any animal from a third country unless the conditions of Council Directive 91/496/EEC are complied with and the relevant provisions of numerous EU instruments, and any additional requirements, identified in Part II of Schedule 7 are complied with (regulation 16). Regulation 16, with Part I of Schedule 7 prescribes the third countries from which animals may be imported. Regulation 17, with Schedule 2, specifies the places at which animals may be imported through Border Inspection Posts. The procedure for importation is provided for in regulation 18, and the payment of fees in that connection at regulation 20. Procedures to be followed where a consignment constitutes a danger to health or is otherwise illegal are set out in regulations 21 and 22. Regulation 23 requires that, at the place of destination, certain animals (elephants and other Artiodactyla) may not be released until authorised by an authorised officer of the Secretary of State. Post-import controls are provided for in regulation 24.

Part 4 makes provision for imports from third countries which undergo the requisite veterinary border checks on arrival at another member State.

General provisions

The Regulations also give powers to the Secretary of State to take action in the event of an outbreak of disease in another state (regulation 28) and make provision for the notification of decisions (regulation 29), inspectors' powers of entry (regulation 30) and the recovery of expenses (regulation 31). Obstruction of any person acting in the execution of the Regulations is made an offence (regulation 32), and it is an offence under regulation 34 to contravene the Regulations (excepting certain fees provisions). Penalties are provided for (regulation 34). Disapplication of other legislation relating to the import of animals continues to be provided for (regulation 35, with Schedule 9). Regulation 35 contains transitional provisions (with Part IV of Schedule 8). The revocation of the 2005 Regulations is provided for at regulation 36.

Principal changes made by these Regulations

New provisions are included to implement (for the first time in these Regulations), Commission Decision 2000/666/EC (OJ No. L 278, 31.10.2000, p. 26), in relation to imports of captive birds. Schedules 3 and 7 have also been revised and updated in order to bring the implementation of Community instruments up-to-date at the time of making.

Imports of captive birds from third countries

A new regulation 19 has been inserted to provide for the arrangements for quarantine of captive birds imported from third countries, as required under Commission Decision 2000/666/EC. Specific requirements are imposed on quarantine managers as to the running of quarantine centres and facilities under regulation 19(2) and Part II of Schedule 8, and there are general prohibitions applying to any persons in respect of entry to a quarantine centre or facility, and removal of birds and carcasses from quarantine without the authorisation of a veterinary inspector. Regulation 19 also gives inspectors supplementary powers of entry, and powers of inspection and sampling, and provides for the Veterinary Laboratories Agency (an executive agency of Defra) to act as the official laboratory and make charges for laboratory testing carried out in connection with Commission Decision 2000/666/EC as set out in Part III to Schedule 8.

Regulations 16, 18 and 21 (previously regulation 20) have been amended to reflect the implementation in these Regulations of Commission Decision 2000/666/EC, in particular, the provisions now in regulation 21(2) to (4) prescribing the measures which must be taken when avian influenza, Newcastle disease or *Chlamydia psittaci* is found in an imported captive bird at a quarantine centre or facility.

Transitional arrangements are provided for in regulation 35 and Part IV of Schedule 8 in respect of quarantine approvals currently held by avian quarantine centres or facilities and captive bird imports generally. Such imports are currently subject of a temporary ban pursuant to EU legislation. Regulation 16(4) provides that regulation 16(2) and (3), as read with relevant parts of Schedule 7, shall not apply to permit the import of captive birds from third countries until 1st August 2006, when the EU ban is due to be lifted. The disapplication provisions in regulation 35 have been revised to reflect disapplication of the Importation of Birds, Poultry and Hatching Eggs Order 1979 (SI 1979/1702) in relation to imports of captive birds from third countries.

Changes to lists of instruments and "additional requirements" in Schedules 3 and 7

The changes made to Part I of Schedule 3 are in paragraphs 1, 6, 7, 8(1), 9 and 10. The "additional requirement" (d) in paragraph 1, now specifically identifies special conditions on exports of cattle to Germany, Denmark, Italy, Austria, Finland and Sweden.

New paragraphs have been added to Part I of Schedule 7 in relation to the countries from which imports are permitted of bees, captive birds, and cats, dogs and ferrets going to approved bodies, institutes or centres. The list in that Part for cloven hoofed animals, elephants and zoo ungulates has also been described more completely and it and the list for finfish have both been updated.

In Part II of Schedule 7, paragraphs 1, 2, 3(4) (previously paragraph 6), 5 (previously paragraph 10), 8 (previously paragraph 11), and 10 (previously paragraph 13) have also been revised and updated. New paragraphs list instruments covering trade in bees, captive birds and cats, dogs and

ferrets going to approved bodies, institutes or centres. The repeal of Council Directive 72/462/EEC has necessitated removal of paragraph 1 from Part II of Schedule 7 of the revoked 2005 Regulations. A new paragraph (now paragraph 2) further implements Council Directive 2004/68/EC, in relation to zoo ungulates (aspects of the Directive having been implemented in the 2005 Regulations).

No regulatory impact assessment has been produced for these Regulations as the impact on businesses is considered to be minimal.
