

**EXPLANATORY MEMORANDUM TO**  
**THE BLOOD SAFETY AND QUALITY (FEES AMENDMENT) REGULATIONS 2009**

**2009 No. 372**

1. This explanatory memorandum has been prepared by the Medicines and Healthcare products Regulatory Agency (MHRA), an executive agency of the Department of Health, and is laid before Parliament by Command of Her Majesty.

This memorandum contains information for the Joint Committee on Statutory Instruments.

2. **Purpose of the instrument**

- 2.1 This SI amends relevant regulations which set out the fees payable by hospital blood banks and blood establishments in relation to services the Medicines and Healthcare products Regulatory Agency (MHRA) undertakes as the Competent Authority acting on behalf of the Secretary of State for Health for regulating blood banks and establishments.

3. **Matters of special interest to the Joint Committee on Statutory Instruments**

- 3.1 Under the Regulations, the Secretary of State for Health is responsible for authorising and inspecting blood establishments, monitoring compliance of hospital blood banks and carrying out haemovigilance and is the Competent Authority for the purposes of the EC directives relating to the safety and quality of blood. The Secretary of State's functions are performed by the MHRA.
- 3.2 The MHRA is a Government Trading Fund and does not receive any central funding for this area of its work. Therefore, any work it does in relation to the performance of functions under the Regulations must be fully funded by fees charged for the work. The MHRA is also the UK medicines and devices regulator and is fully funded for its medicines regulatory work through fees charged to the pharmaceutical industry. The devices part of the work is mostly funded by central funds (via the Department of Health) because it does not have the ability to charge fees for all of its work. However, it does raise some funding directly through fees charged for specific services.
- 3.3 The fee increases in this instrument are made in order to ensure that the fees charged for each area of activity properly reflect the cost of that activity in line with Treasury guidance on fees and charges. There is no opportunity to fund this work from elsewhere (including central funds), no subsidies are available and it is not possible to cross-subsidise from other income. Individual fees for blood establishments are proposed to be increased by around 4%.
- 3.4 There are no associated policy costs or administration costs from these proposals. These regulations implement an increase in fees that already exist. There are therefore no associated additional administration costs for companies as there are no new fees or new procedures being implemented.

4. **Legislative Context**

- 4.1 This instrument amends regulation 22 of the Blood Safety and Quality Regulations 2005 (S.I. 2005/50), in order to increase the fees payable by blood establishments and hospital blood banks, for the reasons given elsewhere in this memorandum.

5. **Territorial Extent and Application**

- 5.1 This instrument applies to all of the United Kingdom.

## **6. European Convention on Human Rights**

As the instrument is subject to negative resolution procedure and does not amend primary legislation, no statement is required.

## **7. Policy background**

- *What is being done and why*

- 7.1 By virtue of the Government Trading Funds Act 1973, the MHRA has an obligation to at least break even taking one year with another and to set fee levels to achieve this.
- 7.2 The fees charged by the MHRA are monitored and reviewed annually to ensure, as far as possible, that the fees charged for a particular service, reflect the cost of the work undertaken. This is in line with Treasury guidance on Fees and Charges. It has taken measures to deliver efficiencies and continues to do so. This instrument amends the level of fees charged by MHRA in order to ensure that the full cost of the work undertaken is recovered.
- 7.3 The cost of compliance associated with this instrument is estimated to be in the region of an additional £23,600. In addition, the Agency is also proposing efficiency gains from within its current running costs. There are no associated recurring or non-recurring costs for those affected.

- *Consolidation*

- 7.4 The Department does not intend to consolidate the Blood Safety and Quality Regulations 2005.

## **8. Consultation outcome**

- 8.1 These proposals have been considered at length with Department of Health officials and with Treasury. Both have approved the proposals and are satisfied that the Agency is making every effort to match fees with costs and that these changes serve to ensure that this is the case. A 12 week public consultation exercise was carried out between October 2008 and January 2009. One response was received specifically about these fees and expressed concern on the impact the increases would have on the cost the NHS and the National Blood Service of inspections. The Agency will be responding by explaining that monitoring will continue to ensure every effort is being made to match fees with costs. As a result of the consultation the proposed costs have not needed to be amended.

## **9. Guidance**

- 9.1 Guidance and information on these Regulations is available on the MHRA website at: [www.mhra.gov.uk](http://www.mhra.gov.uk) and will be updated to reflect these changes from 1 April 2009.

## **10. Impact**

- 10.1 A full Impact Assessment has been prepared and is attached to the memorandum. Copies can also be obtained from Karen Salawu, Fees Policy Unit, Room 16-159 Market Towers, 1 Nine Elms Lane, London SW8 5NQ, Tel: 020 7084 2216, e-mail: [karen.salawu@mhra.gsi.gov.uk](mailto:karen.salawu@mhra.gsi.gov.uk).

## **11. Regulating small business**

- 11.1 There are no 'small' businesses' as such involved in these areas of work.

## **12. Monitoring & review**

- 12.1 These regulations are amended each year to achieve full cost recovery of the work undertaken by the MHRA as the Competent Authority

## **13. Contact**

Tracy Murray at MHRA Tel: 020 7084 2329 or e-mail: [tracy.murray@mhra.gsi.gov.uk](mailto:tracy.murray@mhra.gsi.gov.uk) can answer any queries regarding this instrument.

## Summary: Intervention & Options

<b>Department /Agency:</b> <b>Medicines and Healthcare products Regulatory Agency (MHRA)</b>	<b>Title:</b> <b>Impact Assessment of The Blood Safety and Quality (Fees Amendment) Regulations 2009</b>	
<b>Stage: Final</b>	<b>Version: 2</b>	<b>Date: 21 January 2009</b>
<b>Related Publications:</b>		

### Available to view or download at:

**Contact for enquiries:** Karen Salawu

**Telephone:** 020 7084 2216

### What is the problem under consideration? Why is government intervention necessary?

Changes are proposed to existing legislation governing levels of fees paid by blood banks and establishments in relation to the regulation by the UK Competent Authority for Blood. Fees are being increased overall in order to cover estimated unavoidable increases in costs for the Medicines and Healthcare products Regulatory Agency (MHRA - UK Competent Authority for Blood and blood products) from April 2009. Under the Blood Safety and Quality Regulations 2005 the Secretary of State for Health is responsible for authorising and inspecting blood establishments, monitoring compliance of hospital blood banks and carrying out haemovigilance.

### What are the policy objectives and the intended effects?

The objectives are to ensure the MHRA can recover its costs in relation to this work and thus continue its role to protect public health.

### What policy options have been considered? Please justify any preferred option.

- 1 Do not increase fees.
2. Increase fees to ensure only essential unavoidable costs can be met. This is our preferred option.
3. Increase fees across the board by inflation. This would overrecover estimated costs associated with essential regulatory functions for 2009/2010.

### When will the policy be reviewed to establish the actual costs and benefits and the achievement of the desired effects?

Fees and costs are subject to ongoing monitoring and review throughout each year on a cyclical basis.

### **Ministerial Sign-off** For final proposal/implementation stage Impact Assessments:

*I have read the Impact Assessment and I am satisfied that, given the available evidence, it represents a reasonable view of the likely costs, benefits and impact of the leading options.*

Signed by the responsible Minister:

**Dawn Primarolo** .....**Date: 26th January 2009**

## Summary: Analysis & Evidence

<b>Policy Option: 1</b>	<b>Description: Do not increase fees</b>
-------------------------	--

<b>COSTS</b>	<b>ANNUAL COSTS</b>	Description and scale of <b>key monetised costs</b> by 'main affected groups'  This figure represents the status quo. On 2008/2009 fee levels, the budgeted income for MHRA blood related work is £590,000. All blood bank and blood establishments are liable for fees.			
	<b>One-off</b> (Transition) <span style="float: right;"><b>Yrs</b></span>				
	<b>£ NIL</b>				
	<b>Average Annual Cost</b> (excluding one-off)				
	<b>£ nil</b>	<b>Total Cost (PV)</b>	<b>£ nil</b>		
Other <b>key non-monetised costs</b> by 'main affected groups' If we implement this option, the MHRA will suffer a shortfall in funding with no other means to make up the difference. Efforts to tackle other risks could be curtailed, with potential harm to public health and safety.					

<b>BENEFITS</b>	<b>ANNUAL BENEFITS</b>	Description and scale of <b>key monetised benefits</b> by 'main affected groups' Whilst the MHRA would be able to meet most of its commitments with a limited budget, it would be working with fees below actual costs. This would be contrary to Treasury guidance and against the Trading Fund.			
	<b>One-off</b> <span style="float: right;"><b>Yrs</b></span>				
	<b>£ NIL</b>				
	<b>Average Annual Benefit</b> (excluding one-off)				
	<b>£ nil</b>	<b>Total Benefit (PV)</b>	<b>£ nil</b>		
Other <b>key non-monetised benefits</b> by 'main affected groups' Lower costs for companies. The Agency would have to seek to make cuts. Its biggest cost is for staff costs and a freeze on recruitment for vacancies might be considered. But this is likely to result in areas of the Agency being understaffed. Performance would be affected and public health protection may suffer as a result.					

**Key Assumptions/Sensitivities/Risks** Requirements of the Trading Fund Order to break even taking one year with another;. Treasury guidance on ensuring fees match costs; Responsibility to protect public health

[Use this space (with a recommended maximum of 30 pages) to set out the evidence, analysis and detailed narrative from which you have generated your policy options or proposal. Ensure that the information is organised in such a way as to explain clearly the summary information on the preceding pages of this form.]

### 1. Background

1.1 The Medicines and Healthcare products Regulatory Agency (MHRA) is an Executive Agency of the Department of Health. The Agency is the UK regulator for medicines and also medical devices. Under the Blood Safety and Quality Regulations 2005 the Secretary of State for Health is responsible for authorising and inspecting blood establishments, monitoring compliance of hospital blood banks and carrying out haemovigilance. These functions are also carried out by the MHRA acting as the Competent Authority on behalf of the Secretary of State. The fees charged by the MHRA for these services are monitored and reviewed annually to ensure, as far as possible, that the fees charged reflect the cost of the work undertaken. This is in line with Treasury guidance on Fees and Charges.

1.2 The proposed amendments fulfil the obligation that the MHRA, a Government Trading Fund established under the Government Trading Fund Act 1973, is required to recover the full costs of the services it provides and cross subsidy is not permitted.

### 2. Objectives

2.1 These Regulations amend existing legislation in connection with the regulation of blood banks and other blood establishments. The proposal for 2008/2009 is to achieve full cost recovery of the work undertaken by the MHRA as the Competent Authority.

### 3. Rationale for Government intervention

3.1 The quality and safety of blood and blood products in the UK is already amongst the best in the world but their use, like most medicinal procedures, can never be free of risk. The implementation of SI 2005 (No 50) and subsequent amendments further improved the safety and quality of the blood supply.

#### Health Impact

3.2 Ultimately, if the MHRA were to be insufficiently resourced to carry out its responsibilities, the Agency could be unable to fulfil its obligations in relation to its role as Competent Authority and the protection of public health. The Agency, as a Trading Fund (TF), would be unable to sustain its financial position. Staff numbers may have to be cut to be able to break even taking one year with another as required by the TF Order. If the MHRA is not adequately resourced for the work it undertakes there could be a risk to human health in the long term through inadequate regulation and inspection of blood banks and blood establishments. This could occur, for example through bad clinical practices not being spotted and remedied and thus contaminated blood products being released for patient use.

#### Economic Impact

3.3 It is therefore important that the MHRA is able to gain sufficient income from fees to resource its functions effectively. However, it is also recognised that the Agency must carry out its responsibilities efficiently and in accordance with the Government's principles on Better Regulation, so that regulation is proportionate, targeted and risk-based. Hospital blood bank inspections are targeted according to assessed risk and will generally take place every few years.

3.4 The MHRA's main areas of work are the regulation of medicines and medical devices. It covers the cost of all the work carried out in relation to medicines regulation (and a small proportion of the work relating to devices regulation) through fees charged. It has an established fees system which is regularly monitored to ensure that fees charged for specific services are targeted accordingly.

3.5 The rationale behind these fee proposals is therefore to ensure a fee regime that enables the Agency to recover its costs, fulfil its role in safeguarding public health; and also uses the resources from fee income to target improvement in this area of the Agency's business.

## 4. Consultation

4.1 These proposals have been considered at length with Department of Health officials and with Treasury. Both have approved the proposals and are satisfied that the Agency is making every effort to match fees with costs and that these changes serve to ensure that this is the case. A 12 week public consultation exercise was carried out between October 2008 and January 2009. One response was received specifically about these fees and expressed concern on the impact the increases would have on the cost the NHS and the National Blood Service of inspections. The end result being that the proposed costs have not needed to be amended as a result of the consultation.

## 5. Options

5.1 Three options for the main proposals have been identified:

Option 1 Do nothing option i.e. makes no increases to fees. This is a “do nothing” option in the pure sense, although it would amount to a real terms cut in Agency funding, which would therefore leave the Agency significantly less well resourced in real terms than currently.

Option 2 Increase fees as proposed to cover costs

Option 3 Increase fees by an inflationary figure (4.7% as at August 2008) across-the-board.

5.2 Option 1 would freeze most licensing costs at 2008/2009 levels. This would mean that the Agency would not be fully recovering the cost of this work.

5.3 Option 2 will ensure that the correct fee is charged to cover the cost of each area of work undertaken and ensure that MHRA’s obligations as a Trading Fund to recover full costs of the service it provides without cross subsidy.

5.4 Option 3 would mean that costs were not targeted, and would over recover costs.

## 6. Costs and Benefits

### Sectors and groups affected

6.1 The NHS and other organisations that store or manufacture blood products would be affected.

- An NHS hospital blood bank requiring to pay annual haemovigilance fee, an annual compliance fee and has a short inspection in year would have paid £3,570 in 2008/2009 but for the same services in 2009/2010 would pay £3,726 – a difference of £156. Hospital blood bank inspections are targeted according to assessed risk and will generally take place every few years. The same hospital blood bank, if there were no inspection in year, would pay £1,163 in 2009/10 instead of £1,118 in 2008/9 – an increase of £45.
- A new establishment applying for an application for authorisation would have been charged £2,927 in 2008/2009, but would pay £3,044 in 2009/2010 – an increase of £117.
- An existing large sized blood establishment paying an annual haemovigilance fee and receiving an inspection in year (assuming it would be a 5 day inspection) would pay £12,728 in 2008/2009 but this would be £13,302 in 2009/2010, an increase of £574.

### Benefits

6.2 The key benefit is the protection of public health in ensuring the safety and quality of the supply of blood in the UK. In addition stakeholders will continue to see benefit from improvements in service levels from the MHRA.

### Costs

6.3 The MHRA reviews its fees on an annual basis and makes proposals for changes to take place in April each year. Individual fees for blood establishments are proposed to be increased by around 4%.

6.4 There are no associated policy costs or administration costs from these proposals. These regulations implement an increase in fees that already exist. There are therefore no associated additional administration costs for companies as there are no new fees or new procedures being implemented.

### Impact on Small Business

6.5 These regulations will impact on all organisations within this sector equally. There are no “small businesses”, as such, involved in this area of work but NHS and other public health organisations will be affected by these regulations. The increase in income for the MHRA from the whole of this sector in 2009/2010, using estimated projections of numbers of inspections is around £23k over the amount charged through fees in 2008/09.

## **7. Competition Assessment**

7.1 The market for the supply of human blood and blood products – including its collection, testing and processing, storage and distribution of human blood and blood components has been studied by the National Audit Office (NAO). It is not believed that these proposals will increase any existing barriers to entry and harmonisation. The Regulations introduce no change in existing UK practice.

## **8. Equality Impact Assessment:**

8.1 An initial Equality Impact screening assessment has been carried out, which has shown that a full assessment is not required as the proposed policy has no disproportionate impact on race or other relevant equalities. The proposed policy will not have any disproportionate impact on rural populations.

## **9. Enforcement, Sanctions, and Monitoring**

9.1 These Regulations will be enforced by the Competent Authority through a system of licensing, inspection and compliance verification. Breaching these provisions would constitute an offence. The Finance Division of the Agency is responsible for raising invoices and collecting revenue for the Agency. There are certain sanctions where some fees are paid late. The MHRA monitors and assesses costs against fees on an annual basis and proposals for change are made through a consultative process and are subject to parliamentary approval. The MHRA is working to improve its efficiency and the introduction of more risk-based inspections ensures that compliant bodies are not inspected unnecessarily. More compliant bodies will have lower costs.

## **10. Implementation and delivery plan**

10.1 The new fees will apply to relevant MHRA services undertaken on or after the 1<sup>st</sup> April 2009. The new fees will be advertised on the MHRA's website and all those affected will be made aware through the consultation exercise that changes are imminent.

## **11. Post-implementation review**

11.1 The new fees and the anticipated income through estimated volumes have been matched with the Agency's budget plan for 2009/2010.

11.2 MHRA fee levels are subject to continuous rigorous monitoring and review with a view to making annual amendments (where necessary) to ensure that, as far as possible, the cost of the work undertaken by the MHRA is reflected in the fees charged to industry, NHS and other establishments. In addition, the Agency is seeking efficiencies from within its working practices to provide a better standard of service from within current resources.

## **12. Summary and Recommendations**

12.1 Option 2 best achieves the objective of ensuring that costs reflect the actual cost of the work undertaken by the MHRA. It will allow the MHRA to undertake its responsibilities for protecting public health. It will help to target resources.

## Specific Impact Tests: Checklist

Use the table below to demonstrate how broadly you have considered the potential impacts of your policy options.

**Ensure that the results of any tests that impact on the cost-benefit analysis are contained within the main evidence base; other results may be annexed.**
