

SCHEDULE

COMMUNICATIONS DATA TO BE RETAINED

PART 3

INTERNET ACCESS, INTERNET E-MAIL OR INTERNET TELEPHONY

Data necessary to identify the date, time and duration of a communication

13.—(1) In the case of internet access—

- (a) The date and time of the log-in to and log-off from the internet access service, based on a specified time zone,
- (b) The IP address, whether dynamic or static, allocated by the internet access service provider to the communication, and
- (c) The user ID of the subscriber or registered user of the internet access service.

(2) In the case of internet e-mail or internet telephony, the date and time of the log-in to and log-off from the internet e-mail or internet telephony service, based on a specified time zone.
