

**EXPLANATORY MEMORANDUM TO
THE PLANT HEALTH (FEES) (ENGLAND) REGULATIONS 2012**

2012 No. 745

1. This explanatory memorandum has been prepared by The Food and Environment Research Agency (Fera) (an executive agency of the Department for Environment, Food and Rural Affairs) and is laid before Parliament by Command of Her Majesty.

This memorandum contains information for the Joint Committee on Statutory Instruments.

2. **Purpose of the instrument**

- 2.1 The purpose of this instrument is to provide for an increase in the fees payable in relation to plant health services provided by the Food and Environment Research Agency, as part of a move towards full cost recovery of such fees, and in doing so, to consolidate several separate fees instruments into one new instrument covering all plant health fees payable in England (except export certification fees).

3. **Matters of special interest to the Joint Committee on Statutory Instruments**

- 3.1 Fees for plant health statutory services have not increased for many years and the current fees do not reflect the true cost to Government of providing the services; with income received from business users currently less than 35% of the cost of the service provision. This instrument introduces the first stage of a phased, above inflation increase towards fees which achieve cost recovery.

4. **Legislative Context**

- 4.1 Council Directive 2000/29/EC on protective measures against the introduction into the EU of organisms harmful to plants or plant products and against their spread within the EU (“the Plant Health Directive”) establishes the EU plant health regime. It contains measures to be taken in order to prevent the introduction into, and spread within, the EU of serious pests and diseases of plants and plant produce. The Plant Health Directive is implemented in England, for non-forestry matters, by the Plant Health (England) (Order) 2005. Similar but separate legislation operates in Scotland, Wales and Northern Ireland.
- 4.2 Article 13d of the Plant Health Directive requires Member States to recover the cost of the import inspections required by the Directive through fees. The Plant Health (Import Inspection Fees) (England) Regulations 2010 (S.I. 2010/2693) implement that requirement in England. Where reduced checks have been set for trade in a particular commodity from a particular country, on the basis of the compliance record of that trade, a reduced fee is charged.

- 4.3 In line with the principle that the costs of statutory services should be borne by users who benefit directly from a service, charges also apply for the following activities required by the Plant Health Directive:
- Import inspections on potatoes imported from Egypt through the Potatoes Originating in Egypt (England) Regulations 2004 (S.I. 2004/1165)
 - Plant health licensing services through the Plant Health (Licence Fees) (England and Wales) Regulations 1996 (S.I. 1996/26)
 - Plant passporting services through the Plant Health (Plant Passport Fees) (England) Regulations 2007 (S.I. 2007/720)
 - Seed potato certification services through the Seed Potatoes (Fees) (England) Regulations 2006 (S.I. 2006/1160).
- 4.4 The reason for making this instrument is to provide for increases in fees payable in relation to plant health, as part of a phased move towards full cost recovery of such fees, and, whilst doing so, to consolidate the various fees instruments specified above into one new instrument.

5. Territorial Extent and Application

- 5.1 This instrument applies to England only.

6. European Convention on Human Rights

- 6.1 As the instrument is subject to negative resolution procedure and does not amend primary legislation, no statement is required.

7. Policy background

- *What is being done and why*

- 7.1 Fera is responsible in England, on behalf of Defra, for provision of plant health statutory services to facilitate trade and prevent the introduction and spread of plant pests and diseases.
- 7.2 Charging for these services is consistent with the principle that businesses using the service should bear the costs of any measures to prevent harm that they might otherwise cause by their actions or non-actions, since most serious pests and diseases that arrive in this country do so via commercial trade in plants and plant produce. Fees for plant health statutory services have not increased for many years and the current fees do not reflect the true cost to Government of providing the services; with income received from business users currently less than 35% of the cost of the service provision.
- 7.3 Following a public consultation a phased increase in fees is being introduced to achieve full cost recovery over three years, with 50% of the gap being closed in 2012

and the remainder in two stages in 2013 and 2014. The Plant Health (Fees) (England) Regulations 2012 implement the first stage of the move towards cost recovery.

- 7.4 Most fees are substantially increased: import inspection fees by 229%, fees in relation to seed potatoes by 52%, licensing fees by 160%, fees for inspection of Egyptian potatoes by 184% and fees for plant passporting services by 55%. Full details of the old and new fees are given in the Annex.

- **Consolidation**

- 7.5 This instrument consolidates the Plant Health (Licence Fees) (England and Wales) Regulations 1996, the Seed Potatoes (Fees) (England) Regulations 2006, the Plant Health (Plant Passport Fees) (England) Regulations 2007 and the Plant Health (Import Inspection Fees) (England) Regulations 2010, and the charging provisions of the Potatoes Originating in Egypt (England) Regulations 2004 into a single statutory instrument covering all five fee regimes.

8. Consultation outcome

- 8.1 A consultation on proposals to revise fees for five plant health services ran from 11 October to 5 December 2011. The majority of respondents, although opposed to any increase in fees, favoured a phased increase in fees to achieve full cost recovery over three years.
- 8.2 Details of the consultation on the Food and Environment Research Agency's review of fees for statutory plant health services, including a summary of responses, can be found at: <http://www.fera.defra.gov.uk/plants/feesChargingReview/consultation.cfm>

9. Guidance

- 9.1 Details of the new fees will be included on the Fera website; they are also specified in the instrument itself.

10. Impact

- 10.1 No impact on charities or voluntary bodies is foreseen.
- 10.2 No impact on the public sector is foreseen.
- 10.3 Impact assessments have been prepared for each of the five services involved and copies can be found at:

11. Regulating small business

- 11.1 The legislation applies equally to all businesses trading in plant health controlled material, including small businesses.

12. Monitoring & review

- 12.1 In addition to pre-consultation workshops it has held, Fera is committed to setting up government-businesses taskforces whose main aim will be the development of more efficient services with simple and transparent charges. This collaborative approach has been broadly welcomed by the industry.
- 12.2 The levels of fees will be reviewed over the course of the next year with a view to making a further instrument for commencement in April 2013 to implement the next stage of the move towards full cost recovery.
- 12.3 Fees for export certification, which are not included in this instrument, will be the subject of a separate review and consultation later in the year.
