

SCHEDULE

Authorised fuels

9. Brazier briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise anthracite (as to approximately 60 to 80% of the total weight), petroleum coke (as to approximately 10 to 30% of the total weight) and a molasses and phosphoric acid binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at approximately 300°C;
- (c) are either unmarked pillow-shaped briquettes or pillow-shaped briquettes marked with a single indented line running longitudinally along each face, the line on each face being separated from the line on the opposite face by 10 millimetres;
- (d) have an average weight of either 55 or 80 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight on a dry basis.

Changes to legislation:

There are currently no known outstanding effects for the The Smoke Control Areas (Authorised Fuels) (England) (No. 2) Regulations 2014, Paragraph 9.
