

## SCHEDULE 1

### Licensing

#### **Licence applications: indicative list of information**

2. The information referred to in paragraph 1(2) is information relating to—
- (a) responsibilities and organisational arrangements for protection and safety;
  - (b) staff competences, including information and training;
  - (c) design features of the radiological installation and of radiation sources;
  - (d) anticipated occupational and public exposures in normal operation;
  - (e) safety assessment of the activities and the facility in order to—
    - (i) identify ways in which potential exposures or accidental and unintended medical exposures could occur;
    - (ii) estimate, to the extent practicable, the probabilities and magnitude of potential exposures;
    - (iii) assess the quality and extent of protection and safety provisions, including engineering features, as well as administrative procedures;
    - (iv) define the operational limits and conditions of operation;
  - (f) emergency procedures;
  - (g) maintenance, testing, inspection and servicing so as to ensure that the radiation source and the facility continue to meet the design requirements, operational limits and conditions of operation throughout their lifetime;
  - (h) management of radioactive waste and arrangements for the disposal of such waste, in accordance with applicable regulatory requirements;
  - (i) management of disused sources;
  - (j) quality assurance.

---

#### **Commencement Information**

- II** Sch. 1 para. 2 in force at 6.2.2018, see [reg. 1](#)

**Changes to legislation:**

There are currently no known outstanding effects for the The Ionising Radiation (Medical Exposure) Regulations 2017, Paragraph 2.
