“PART 3

Waste operations: management and technical competence conditions

Written management system conditions

1.—(1) An environmental permit which meets each of the following criteria is subject to conditions A and B—
(a) the permit was granted before 6th April 2008;
(b) the permit does not authorise a waste operation carried on at an installation or by means of a Part B mobile plant; and
(c) the permit does not, immediately before 7th April 2019, contain a condition referring to a management system recorded in writing relating to risks relating to pollution.

(2) Condition A is that the operator must manage and operate the waste operation in accordance with a system (a “written management system”), described in a document or documents, which identifies and minimises the risks of pollution arising from the waste operation, including (but not limited to) those—
(a) arising from operations (including maintenance);
(b) arising from an accident or other incident;
(c) arising from a failure to comply with or from a contravention of the environmental permit in question;
(d) identified following a complaint; or
(e) arising from the closure of the operation.

(3) Condition B is that the operator must—
(a) from time to time, review the written management system and keep it up to date; and
(b) keep a written record of—
(i) activities carried out in accordance with the written management system; and
(ii) any review or update under paragraph (a).

(4) If the regulator varies an environmental permit which meets the criteria in paragraph (1) so as to include a condition referring to a management system recorded in writing relating to risks relating to pollution, this paragraph ceases to apply to that environmental permit.

Technical competence: notification condition

2.—(1) An environmental permit is subject to the condition in sub-paragraph (6) if it meets one or both of the following criteria.

(2) The first criterion is that the permit authorises a waste operation which is not carried on at an installation or by means of a Part B mobile plant.

(3) The second criterion is that the permit authorises a specified waste management activity.

(4) Each of the following activities is a specified waste management activity—
(a) the disposal of waste in a landfill falling within Section 5.2 of Part 2 of Schedule 1;
(b) the disposal of hazardous waste falling within Section 5.3 of Part 2 of Schedule 1;
(c) the recovery of hazardous waste falling within Part A(1)(a)(i), (ii), (iii), (iv), (v), (viii) or (x) of Section 5.3 of Part 2 of Schedule 1;
(d) the disposal of non-hazardous waste falling within Part A(1)(a) of Section 5.4 of Part 2 of Schedule 1;
(e) the recovery or a mix of recovery and disposal of non-hazardous waste falling within of Part A(1)(b) of Section 5.4 of Part 2 of Schedule 1;

(f) the temporary or underground storage of hazardous waste falling within Section 5.6 of Part 2 of Schedule 1.

(5) But an activity falling within sub-paragraph (4)(b) to (f) is not a specified waste management activity if that activity—

(a) is carried on at the same installation as a Part A(1) activity not mentioned in sub-paragraph (4); and

(b) is not the activity which constitutes the primary purpose for operating the installation.

(6) The condition is that the operator must periodically give to the regulator—

(a) information demonstrating the operator’s compliance with one of the following standards during the relevant period; or

(b) if the operator did not comply with one of the following standards during the relevant period, information to that effect.

(7) The first standard is the CIWM/WAMITAB Operator Competence Scheme, Version 9, September 2018, published by WAMITAB(9).

(9) In sub-paragraph (6)—

(a) the reference to giving information periodically is a reference to giving information in each quarterly or annual return (as the case may be) for giving information about waste acceptance or removal in accordance with the environmental permit in question;

(b) “relevant period” means—

(i) in relation to the first period, the period beginning with 7th April 2019 and ending with the end of the period to which the first return relates;

(ii) in relation to each subsequent period, the quarter or year (as the case may be) to which the return relates.

(10) The regulator may amend the form for giving information about waste acceptance or removal in accordance with an environmental permit so as to enable information to be given in accordance with this paragraph.”.

(6) In Schedule 23 (radioactive substances activities), in Part 4, in paragraph 7—

(a) after sub-paragraph (1) insert—

“(1A) Paragraph (1)(d) does not apply in relation to waste that is a sealed source.”;

(b) for sub-paragraph (2) substitute—

“radioactive waste adviser” means an individual, or group of individuals, with the knowledge, training and experience needed to give radioactive waste management and environmental radiation protection advice in relation to

---

radioactive waste in order to ensure the effective protection of members of the public, and whose competence in that respect is recognised by the regulator; “sealed source” has the same meaning as in the Basic Safety Standards Directive(11).”.

(7) In Schedule 25 (flood risk activities and excluded flood risk activities), in Part 2, in paragraph 5—

(a) for the heading, substitute “Ladders, scaffold towers and other similar apparatus”;

(b) in sub-paragraph (1), for “and scaffold towers” substitute “, scaffold towers and other similar apparatus used for access, maintenance or repair”.

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations make amendments to the Environmental Protection Act 1990 (c. 43) and the Environmental Permitting (England and Wales) Regulations 2016 (S.I. 2016/1154).

Part 2 amends Part 2 of the Environmental Protection Act 1990 by inserting provisions conferring power on certain authorities in England to give notices offering a person the opportunity of discharging any liability to conviction for the offence of failing to comply with section 34(2A) of that Act (duty to take measures to secure that transfer of household waste is only to certain authorised persons).

Part 3 amends various provisions of the Environmental Permitting (England and Wales) Regulations 2016. In summary—

(a) regulation 4(2) and (5) contains amendments relating to new conditions for environmental permits authorising certain waste operations;
(b) regulation 4(3) and (7) contains amendments relating to flood risk activities;
(c) regulation 4(6) contains an amendment relating to radioactive substances activities.

A full impact assessment of the effect that regulation 4(2) and (5) will have on the costs of business, the voluntary sector and the public sector is available from Waste Regulation and Crime, Department for Environment, Food and Rural Affairs, Seacole Building, 2 Marsham Street, London, SW1P 4DF or at www.legislation.gov.uk.

A full impact assessment has not been produced for the remainder of this instrument as no, or no significant, impact on the private, voluntary or public sector is foreseen in relation to the remainder of this instrument.

The Welsh Ministers’ Code of Practice on the carrying out of Regulatory Impact Assessments was considered in relation to these Regulations. As a result, a regulatory impact assessment in relation to Wales has been prepared as to the likely costs and benefits of complying with regulations 4(2) and (5) of these Regulations. A copy is available from Waste & Resource Efficiency Division of the Economy, Skills and Natural Resource Group, Welsh Government, Cathays Park, Cardiff, CF10 3NQ or at www.assembly.wales. It was not considered necessary to carry out a regulatory impact assessment as to the likely costs and benefits of complying with the remainder of these Regulations.
