

## SCHEDULE 2

### The public health criteria

1. The existence and robustness in the third country of legislation covering—
  - (a) products of animal origin;
  - (b) the use of veterinary medicinal products, including rules on their prohibition or authorisation, their distribution, their placing on the market and the rules covering administration and inspection;
  - (c) the preparation and use of feedingstuffs, including the procedures for using additives and the preparation and use of medicated feedingstuffs, as well as the hygiene quality of the raw materials used for preparing feedingstuffs and of the final product.
