Deductions from the quota volume

12.—(1) Deductions from the quota volume must be made in the order in which Customs accept the request to benefit from the relevant quota, together with the associated declaration for a customs procedure.

(2) For the purposes of paragraph (1), the order of acceptance of the goods by Customs is determined by reference to the date of acceptance by Customs of the declaration for a customs procedure.

(3) Where the declaration for a customs procedure is accepted by Customs on 1st, 2nd or 3rd January of any year, the declaration is deemed to have been accepted on 3rd January of the same year or, if 3rd January is not a working day, on the next working day following 3rd January.

(4) Where acceptance by Customs of any request referred to in paragraph (1) occurs on the same day as acceptance by Customs of the associated declaration for a customs procedure for the goods, acceptance of the request and of the declaration is to be treated as having occurred simultaneously.

(5) Subject to paragraph (7), the quantity to be deducted from the quota volume is the quantity of goods for which Customs has accepted the request to benefit from the relevant quota.

(6) When the quantity of quota goods deducted from the quota volume for those goods in any quota period is equal to the quota volume, the quota is exhausted.

(7) On a day when the total quantity of goods for which requests under paragraph (1) are accepted exceeds the remaining quota volume, deductions must be apportioned between all such requests on a pro rata basis calculated by reference to the quantity of goods requested in each case.

(8) For the purposes of this regulation, where a quota (“a linked quota”) is linked to one or more other quotas by virtue of being entered in the Quota Table against the same corresponding quota volume, a deduction from quota volume for the linked quota in respect of a quantity of imported quota goods is also to operate as a deduction in respect of the same quantity of goods from each of the other quotas.

[^{F12}(9) Where the entry for a linked quota in column 1 of the Quota Table is followed by a reference to a “coefficient”, the quantity of imported quota goods which is to be deducted from quota volume for the purposes of paragraph (8) is subject to the application of the coefficient specified for that entry.]

(2) Allocation of the quota volume by Customs must take account of all requests to benefit from the quota which have been accepted by Customs together with declarations for a customs procedure up to and including the working day prior to the day of allocation of the relevant quota.

(3) Where, on any day, the total quantity of any quota goods in respect of which requests to benefit from the quota have been accepted by Customs together with declarations for a customs procedure exceeds the quota volume, or remaining quota volume for the goods, the quota volume, or

remaining quota volume, must be allocated on a pro rata basis calculated by reference to the requests for quantities of goods to be treated as quota goods and declared for a customs procedure.

(4) Where a quantity of goods has been allocated to a quota on the basis of incorrect information or an error by the person making a Customs declaration or Customs, the remaining quota volume must be adjusted accordingly to take account of the incorrect information or error.

(2) Subject to paragraphs (3) and (4), a quota becomes critical when HMRC gives notice that 90 percent of the whole quota volume has been allocated.

(3) HMRC may publish a notice—

- (a) varying the percentage figure to be applied under paragraph (2) in respect of the goods for the period specified in the notice; or
- (b) providing for other cases where a quota becomes critical in respect of specific goods.

Allocation of quota

36.—(1) On the grant of an import licence, the Secretary of State must specify in the licence the quantity of quota goods to be imported under the licence.

- (2) The quantity of quota goods to be imported is to be determined by—
 - (a) calculating an allocation coefficient in respect of the quota concerned; and

- (3) The allocation coefficient is to be calculated for each quota as follows—
(available quantity/requested quantity) × 100%.

- (5) The allocation coefficient is to be applied to the application quantity as follows—
(application quantity × allocation coefficient).
- (6) [^{F25}Unless the additional allocation procedure under regulation 36A applies,] the figure resulting from the application of the allocation coefficient is the quantity of quota goods to be imported under the licence, rounded down to the nearest unit.

 - (bb) 50 tonnes of garlic which have been exported to a territory outside the United Kingdom; and
 - (ii) for these purposes, the meaning of “relevant preceding period” in regulation 29(4)(b) is modified to mean—

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations make provision under Part 1 of the Taxation (Cross-border Trade) Act 2018 (“the Act”) as a consequence of the United Kingdom leaving the European Union. They are to be brought into force by way of a separate statutory instrument made under the Act.

The Regulations specify the rate of import duty which is applicable to quota goods (“the quota duty rate”) for the purposes of Part 2 of these Regulations. For the purposes of Chapter 2 of Part 2, “quota goods” are goods which meet the qualifying criteria in regulation 9; these criteria include a requirement to meet any conditions for the goods concerned which are specified in Part A of Schedule 1. For the purposes of Chapter 3 of Part 2, “quota goods” are goods which meet the qualifying criteria in regulation 17; these criteria include a requirement to meet any conditions for the goods concerned which are specified in Part B of Schedule 1. Each quota is subject to a total volume (“quota volume”) of goods which may be imported (regulation 6) and applies for a specified period (“the quota period”) (regulation 7). The particulars for the quota duty rate, quota volume, and quota period which apply in respect of each quota are specified in the Table contained in the document entitled “Tariff Quotas, version 1.0”, dated 9th December 2020, (defined in regulation 2 as the “Quota Table”).

Chapter 2 of Part 2 provides that quota goods which are listed in Part A and Part B of the Quota Table are each subject to the quota duty rate, provided, in the case of goods which are listed in Part B, that the goods have also been declared for an authorised use procedure in accordance with the Customs (Special Procedures and Outward Processing) (EU Exit) Regulations 2018 (S.I. 2018/1249) (“the Special Procedures Regulations”) (regulation 11). The Special Procedures Regulations make provision for the end-use of the goods concerned.

Chapter 2 of Part 2 also makes provision for the allocation of quotas in respect of the quota goods specified in Part A and Part B of the Quota Table. Deductions from quota volumes are allocated against the quantity of imported goods (regulation 12) and quota is allocated against requests received to benefit from the quotas (regulation 13). Regulation 14 identifies quotas for which there is more than one quota period where unused quota volume can be carried into the next quota period. Provision is made for the lodging of a security where quota becomes critical (regulation 15).

Chapter 3 of Part 2 provides that quota goods which are listed in Part C of the Quota Table are subject to the quota duty rate, provided, in the case of goods which are listed in the second section of Part C, that the goods have also been declared for an authorised use procedure in accordance with the Special Procedures Regulations.

Part 3 establishes a licensing system under which applications can be made to the Secretary of State for a licence to import quota goods. The quotas to which this Part applies are identified in Part C of the Quota Table and in specified quotas listed in the “Preferential Quota Table” so defined in the Customs Tariff (Preferential Trade Arrangements) (EU Exit) Regulations 2020. Regulation 23 sets out the requirements for the grant of a licence. These include not applying for more than the available quantity of quota goods, qualification as an operator (regulation 24), time limits and the number of applications which may be made for a quota (regulation 25); and lodging the applicable security specified in the Licensing Table set out in Schedule 2 for the quota concerned (regulation 26). Regulation 23 also identifies quotas which attract additional conditions for the grant of a licence, as indicated in the Licensing Table. These conditions are detailed in regulations 27 to 33. The Secretary of State may suspend licence applications where the available quantity published under regulation 22 has been allocated (regulation 34).

Regulation 35 provides for the issue and period of validity of the import licence. The Secretary of State must specify the volume of quota goods to be imported under the licence by applying an

allocation coefficient (regulation 36). The licence may be made subject to terms and conditions as the Secretary of State considers necessary (regulation 37). A licence may be transferred to another person if that person meets the conditions specified in regulation 38 and may be surrendered by returning it to the Secretary of State (regulation 39). Regulation 40 sets conditions for the return of any security held by the Secretary of State following the grant of an import licence. The Secretary of State must give notification of any decision to refuse the grant of an import licence (regulation 41) and may apply penalties where any information or document submitted by an applicant for a licence or its transfer is materially incorrect or misleading (regulation 42). In either case, the Secretary of State must notify the person concerned of the right to appeal under regulation 43.

In Part 4, the Special Procedures Regulations are amended (regulation 45). Regulation 46 gives effect to provisions of the Act and of these Regulations as modified by Schedule 4 in relation to the Crown Dependencies.
