Article 2(4)

Note to column 1

- (1) For the marketing year 1999/ 2000 this refers to land which is set-aside under Article 2(5) of Council Regulation 1765/92, except where such land is used (in accordance with Article 7(4) of Council Regulation 1765/92) for the provision of materials for the manufacture within the Community of products not primarily intended for human or animal consumption.
From 1st July 2000 this refers to land which is set-aside under Article 2(3) of Council Regulation 1251/99, except where such land is used (in accordance with Article 6(3) of Council Regulation 1251/99) for the provision of materials for the manufacture within the Community of products not primarily intended for human or animal consumption.

Notes to column 3

- (1) Deduct £103 from this figure in the case of animals for which the net annual income does not include a sum in respect of the premium for maintaining suckler cows (suckler cow premium) provided for in Article 4d of Council Regulation 805/68 (Article 6 of Council Regulation 1254/99)10.
Add £26 to the figure in column 3 in the case of animals for which the net annual income includes a sum in respect of the lower rate of extensification premium provided for in Article 4h of Council Regulation 805/68 (Article 13 of Council Regulation 1254/99)10.
Add £37 to the figure in column 3 in the case of animals for which the net annual income includes a sum in respect of the higher rate of extensification premium provided for in Article 4h of Council Regulation 805/68 (Article 13 of Council Regulation 1254/99)10.
- (2) This is the figure for animals which are kept for 12 months.
Deduct £82 in the case of animals which are kept for 12 months and for which the net annual income does not include a sum in respect of the special premium for holding male bovine animals (beef special premium) provided for in Article 4b of Council Regulation 805/68 (Article 4 of Council Regulation 1254/99)10.

Status: This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

Add £26 to the figure in column 3 in the case of animals which are kept for 12 months and for which the net annual income includes a sum in respect of the lower rate of extensification premium.
 Add £37 to the figure in column 3 in the case of animals which would be kept for that period and for which the net annual income includes a sum in respect of the higher rate of extensification premium.
 In the case of animals which are kept for less than 12 months and for which the net annual income does not include a sum in respect of beef special premium, the net annual income is to be calculated by deducting £82 from the figure in column 3 and then making a pro rata adjustment of the resulting figure.
 In the case of animals which are kept for less than 12 months and for which the net annual income includes a sum in respect of beef special premium, the net annual income is to be calculated by first deducting £82 from the figure in column 3, then making a pro rata adjustment of the resulting figure, then adding to that figure the sum of £82 and (where the net annual income includes a sum in respect of extensification premium) the sum of £26 (where the extensification premium is paid at the lower rate) or £37 (where the extensification premium is paid at the higher rate).

- (3) This indicates the figure for animals (irrespective of age) which are kept for 12 months. In the case of animals which are kept for less than 12 months a pro rata adjustment of this figure is to be made.

EXPLANATORY NOTE

(This note is not part of the Order)

This Order prescribes units of production for the assessment of the productive capacity of agricultural land situated in Wales and sets out the amount which is to be regarded as the net annual income from each such unit for the year 12th September 1999 to 11th September 2000 inclusive. This Order revokes the Agricultural Holdings (Units of Production) Order 1998 in so far as it relates to Wales.

An assessment of the productive capacity of agricultural land is required in determining whether or not the land in question is a “commercial unit of agricultural land” for the purposes of the succession provisions in the Agricultural Holdings Act 1986: see in particular sections 36(3) and 50(2). A “commercial unit of agricultural land” is land which, when farmed under competent management, is capable of producing a net annual income which is not less than the aggregate of the average annual earnings of two full-time male agricultural workers aged 20 years or over (paragraph 3 of Schedule 6 to the 1986 Act). In determining this annual income figure, neither the system of farming carried

out on a particular holding nor historical data from that holding will necessarily be used. Instead, whenever a particular farming use mentioned in column 1 of the Schedule to this Order is relevant to this determination, the units of production and the net annual income specified in columns 2 and 3 respectively will form the basis of the assessment of the productive capacity of the land in question.

The net annual income figures in column 3 of the Schedule specify the net annual income from one unit of production. In some cases the net annual income is derived from a unit which would have been on the land for the full twelve-month period. In other cases the net annual income is derived from a unit which would have been on the land for only part of the year, and there may be more than one production cycle in the twelve-month period. The assessment of the productive capacity of the land will take account of the total production in the course of a year.
