NOTES TO THE SCHEDULE

(1) Deduct £120 from the figure in column 3 in the case of animals for which the net annual income does not include a sum in respect of the premium for maintaining suckler cows (suckler cow premium) provided for in Article 6 of Council Regulation 1254/99 on the common organisation of the market in beef and veal.

Add £24 to the figure in column 3 in the case of animals for which the net annual income includes a sum in respect of the lower rate of extensification premium provided for in Article 13 of Council Regulation 1254/99.

Add £48 to the figure in column 3 in the case of animals for which the net annual income includes a sum in respect of the higher rate of extensification premium provided for in Article 13 of Council Regulation 1254/99.

(2) This is the figure for animals which would be kept for 12 months.

Status: This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

Deduct £102 in the case of animals which are kept for 12 months and for which the net annual income does not include a sum in respect of the special premium for holding male bovine animals (beef special premium) provided for in Article 4 of Council Regulation 1254/99.

Add £24 to the figure in column 3 in the case of animals which are kept for 12 months and for which the net annual income includes a sum in respect of the lower rate of extensification premium.

Add £48 to the figure in column 3 in the case of animals which would be kept for that period and for which the net annual income includes a sum in respect of the higher rate of extensification premium.

In the case of animals which are kept for less than 12 months and for which the net annual income does not include a sum in respect of beef special premium, the net annual income is to be calculated by deducting £102 from the figure in column 3 and then making a pro rata adjustment of the resulting figure.

In the case of animals which are kept for less than 12 months and for which the net annual income includes a sum in respect of beef special premium, the net annual income is to be calculated by first deducting £102 from the figure in column 3, then making a pro rata adjustment of the resulting figure, then adding to that figure the sum of £102 and (when the net annual income includes a sum in respect of extensification premium) the sum of £24 (when the extensification premium is paid at the lower rate) or £480 (when the extensification premium is paid at the higher rate).

(3) This indicates the figure for animals (irrespective of age) which are kept for 12 months. In the case of animals which are kept for less than 12 months a pro rata adjustment of this figure is to be made.

(4) Deduct £17 from this figure in the case of animals for which the net annual income does not include a sum in respect of the premium for offsetting income loss sustained by sheep meat producers (sheep annual premium) provided for in Articles 4 and 5 of Council Regulation 2529/01 on the common organisation of the market in sheepmeat and goatmeat.

(5) Deduct £13 from the figure in column 3 in the case of animals for which the net annual income does not include a sum in respect of sheep annual premium.

(6) Deduct £227 from the figure in column 3 in the case of land for which the net annual income does not include a sum in respect of the compensatory payment for which producers of arable crops may apply (area payment) provided for in Article 2 of Council Regulation 1251/99.

(11) Deduct £228 from the figure in column 3 in the case of land for which the net annual income does not include a sum in respect of area payment.

EXPLANATORY NOTE

(This note is not part of the Order)

This Order prescribes units of production for the assessment of the productive capacity of agricultural land situated in Wales and sets out the amount which is to be regarded as the net annual income from each such unit for the year 12th September 2002 to 11th September 2003 inclusive.

An assessment of the productive capacity of agricultural land is required in determining whether or not the land in question is a “commercial unit of agricultural land” for the purposes of the succession provisions in the Agricultural Holdings Act 1986: see in particular sections 36(3) and 50(2).

A “commercial unit of agricultural land” is land which, when farmed under competent management, is capable of producing a net annual income which is not less than the aggregate of the average annual earnings of two full-time male agricultural workers aged 20 years or over (paragraph 3 of Schedule 6 to the 1986 Act). In determining this annual income figure, neither the system of farming carried out on a particular holding nor historical data from that holding will necessarily be used. Instead, whenever a particular farming use mentioned in column 1 of the Schedule to this Order is relevant to this determination, the units of production and the net annual income specified in columns 2 and 3 respectively will form the basis of the assessment of the productive capacity of the land in question.

The net annual income figures in column 3 of the Schedule specify the net annual income from one unit of production. In some cases the net annual income is derived from a unit which will be on the land for the full twelve-month period. In other cases the net annual income is derived from a unit which will be on the land for only part of the year, and there may be more than one production cycle in the twelve-month period. The assessment of the productive capacity of the land will take account of the total production in the course of a year.
