

SCHEDULE 5

Location of sampling points

PART 1

Macroscale siting for Group A pollutants

Sampling points for the protection of human health

2. Sampling points should in general be sited to avoid measuring very small micro-environments in their immediate vicinity. As a guideline, a sampling point should be sited to be representative of air quality in a surrounding area of no less than 200 m² at traffic-orientated sites and of several square kilometres at urban-background sites.
