- (3) For the purposes of this Part, the development value of part of a valued area shall be so much of the amount of the development value of the land which forms that area as might reasonably have been attributed to that part if the Ministry had been required to apportion it between that part and the residue of the valued area in accordance with sections 1 to 3, but so that the aggregate of the development values of all the parts of a valued area shall equal the development value of that area.

9 ^{F5}**Reduction or extinguishment of development value following planning compensation.**

- (1) Where at any time any such compensation as is mentioned in subsection (2) has been paid or becomes payable, then, for the purpose of determining whether the land in question or any part thereof has or had a balance of development value at any subsequent time—
- (a) the amount of the compensation shall be deducted from the development value of that land; and
 - (b) the development value of that land or that part thereof shall be treated as having been reduced or extinguished accordingly immediately before that subsequent time.
- (2) The said compensation is either—

10 ^{F6}**Reduction or extinguishment of development value on initiation of new development.**

- (1) Where any land has a development value and any new development of that land to which this section applies, is or was initiated, then for the purpose of determining whether that land or any part thereof has or had a balance of development value at any subsequent time:—
- (a) if the development relates or related only to that land the value (ascertained in accordance with Schedule 3) of that development; or
 - (b) if the development relates or related to that land together with other land, so much of the value (so ascertained) of that development as is or was attributable to that land;

shall be deducted from the development value of that land, and that value shall be treated as having been reduced or extinguished accordingly immediately before that subsequent time.

Status: Point in time view as at 01/01/2006.

Changes to legislation: There are currently no known outstanding effects for the Land Development Values (Compensation) Act (Northern Ireland) 1965, PART II. (See end of Document for details)

- (2) This section applies to new development other than—
- (a) development which, when determining the state of the land for the purposes of section 3, was taken to have been completed at the date of the passing of this Act;
 - (b) development initiated in pursuance of a planning decision given (whether with or without conditions) before the passing of this Act on an application for planning permission made before 26th February 1963.
- (3) Where, under subsection (1), it becomes necessary to determine whether any land had a balance of development value by reference to a date occurring before the passing of this Act, for the references in subsection (2) to the passing of this Act there shall be substituted references to that date.

11 ^{F7}**Reduction or extinguishment of development value following severance or injurious affection.**

- (1) Where—
- (a) at any time after the passing of this Act, any land is acquired by or sold to a public body; and
 - (b) compensation is or was payable, or an amount is or was included in the purchase price, in respect of a compensatable estate in land other than the acquired land for damage sustained by reason that the acquired land is or was severed from other land held therewith, or that any other land (whether held with the acquired land or not) is or was injuriously affected;

then for the purpose of determining whether that other land or any part thereof has a balance of development value at any subsequent time, there shall be deducted from the development value of that other land an amount calculated in accordance with subsection (2) and the development value of that land, or of the part thereof in question, as the case may be, shall be treated as having been reduced or extinguished accordingly immediately before that subsequent time.

- (2) The amount required under subsection (1) to be deducted shall be the amount, if any, by which the compensation payable, or amount included in the purchase price as therein mentioned exceeds or exceeded the compensation which would have been so payable or the amount which would have been so included, if the extent of the damage sustained in respect of the other land in question had fallen to be ascertained on the assumption that planning permission would not be granted for any new development of that land, but would be granted for any development thereof other than new development.
- (3) In this section “the acquired land”, in relation to an acquisition or sale, means the land acquired or sold.

then (without prejudice to the operation of any of the preceding provisions of this Part with respect to any part of the land taken separately) the land taken as a whole shall be treated as not having (or as not having had) any such balance at that subsequent time.

- (2) Where in accordance with any of the preceding provisions of this Part an amount is required to be deducted from the development value of any land, there shall be attributed to the various parts of that land so much of that amount as might reasonably be expected to have been attributed thereto if the authority determining the amount had been required to apportion it between those parts in accordance with the same principles as applied to its determination.

- (4) Where the issue of a certificate under this section with respect to any land involves a new apportionment, then—

 - (b) the certificate may be issued before the end of that further period if every such objection has been withdrawn;
 - (c) the certificate shall be issued at the end of that further period notwithstanding that every such objection has not been withdrawn, if a requirement has not been made within that period under paragraph (a).
- (6) Where, on a reference to the Lands Tribunal under this section, it is shown—

MEASURE OF COMPENSATION

- (1) Where compensation is payable under this Part in respect of a compensatable estate subsisting in land which is the subject of a planning decision depreciating the value of that compensatable estate, the amount of the compensation shall, subject to subsections (2) to (5), be whichever is the lesser of the following amounts:—
 - (a) the amount by which the value of that compensatable estate (if it is a compensatable estate subsisting only in land to which this section applies), or (if it is a compensatable estate extending to other land) the amount by which the value of the compensatable estate in so far as it subsists in land to which this section applies, is depreciated by the decision;

- (b) the amount of the balance of development value, immediately before the decision, of so much of the land in which the compensatable estate subsists as is land to which this section applies.
- (2) Land to which this section applies, in relation to a planning decision, is land which—
- (a) constitutes or forms part of the decision area; and
- (b) at the time of the decision has a balance of development value.
- (3) If in relation to any land to which this section applies—
- (a) compensation is payable under this Part in respect of two or more compensatable estates in that land by reason of the same planning decision; and
- (b) the aggregate amount of compensation payable apart from this subsection in respect of the compensatable estates referred to in paragraph (a) would exceed the amount mentioned in subsection (1)(b);
- the amount mentioned in subsection (1)(b) shall be allocated between those compensatable estates in proportion to the depreciation of the value of each of them respectively, and the amount of the compensation payable in respect of any of those compensatable estates shall be the sum so allocated to that compensatable estate.
- (4) Where—
- (a) at the date of such a planning decision as is mentioned in section 14(1), a public body are entitled to a compensatable estate in the land constituting or forming part of the decision area; and
- (b) by virtue of section 14(2), compensation is not payable in respect of that compensatable estate;
- then for the purpose of determining the amount of compensation payable in respect of any other compensatable estate in that land, subsection (3) shall have effect as if the public body had made a claim for and were entitled to compensation under this Part.
- (5) Where the land constituting the decision area, taken as a whole, does not satisfy both of the following conditions—
- (a) that at the time of the decision it has a balance of development value; and
- (b) that every compensatable estate subsisting therein, the value of which is depreciated by the decision, subsists in the whole of that land;
- subsection (6) shall have effect for the purpose of assessing the compensation payable under this Part in respect of any compensatable estate subsisting in that land or any part thereof.
- (6) Where this subsection applies in relation to a compensatable estate in land—
- (a) the depreciation of the value of the compensatable estate by the planning decision shall first be ascertained with reference to the whole of the land which constitutes or forms part of the decision area and is land in which that compensatable estate subsists;
- (b) the land referred to in paragraph (a) shall then be treated as divided into as many parts as may be requisite to ensure that each such part consists of land which either—
- (i) satisfies both of the conditions mentioned in subsection (5); or
- (ii) is not land which, at the time of the decision, has a balance of development value;

Status: Point in time view as at 01/01/2006.

Changes to legislation: There are currently no known outstanding effects for the Land Development Values (Compensation) Act (Northern Ireland) 1965, PART II. (See end of Document for details)

- (c) the depreciation of the value of the compensatable estate, ascertained in accordance with paragraph (a), shall then be apportioned between those parts, according to the nature of those parts and the effect of the planning decision in relation to each of them;

and the amount of the compensation shall be the aggregate of the amounts which would be payable by virtue of the preceding provisions of this section if the planning decision had been made separately with respect to each of those parts.

- (7) In this section “the decision area” in relation to a planning decision means the aggregate of the land to which the decision relates.

18 ^{F17}**Assessment of depreciation.**

- (1) For the purposes of this Part, the value of a compensatable estate in land, or of a compensatable estate in so far as it subsists in particular land, shall be taken to be depreciated by a planning decision (in this section referred to as “the relevant decision”) if, and to the extent to which, that value, calculated in accordance with subsections (2) to (5), falls short of what that value, so calculated, would have been if the relevant decision had been a decision to the contrary effect.
- (2) Subject to subsections (3) to (5), any such value shall for the purposes of this section be calculated as at the time of the relevant decision, but—
- (a) as affected by that decision, by any grant of planning permission made in relation to the land in question after that decision and by any [^{F18} direction under Article 69 of the Order of 1972]; and
 - (b) on the assumption that, after the relevant decision, and apart from any such permission or [^{F18} direction] as is mentioned in paragraph (a), planning permission would not be granted for any new development of the land in question but would be granted for any development thereof other than new development.
- (3) If in consequence of another planning decision or of an order under [^{F19} Article 38 of the Planning Order] revoking or modifying any planning permission, being a decision given or order made—
- (a) before the relevant decision; and
 - (b) either in respect of the whole or part of the land to which the relevant decision relates, or in respect of land which includes the whole or part of that land;
- compensation to which this subsection applies has been paid or is payable in respect of a compensatable estate subsisting in land which is the subject of that other planning decision or that order, the calculation to be made under this section shall be made as if that other planning decision had been a decision to the contrary effect, or that order had not been made, as the case may be.
- (4) Where under this section a calculation has to be made as if a planning decision were a decision to the contrary effect or an order under [^{F19} Article 38 of the Planning Order] had not been made the calculation shall be made on the footing that any development must comply with the provisions of any statutory provision (other than the Planning [^{F19} Order]) which would be applicable thereto.

- (6) In this section and in section 19 “a decision to the contrary effect” means—
- (a) in relation to a decision refusing permission, a decision granting the permission subject to such conditions, if any, of a description falling within section 15(4) as the person giving the decision might reasonably have been expected to impose had he not refused the permission;
 - (b) in relation to a decision granting the permission subject to conditions, a decision granting the permission subject only to such of those conditions, if any, as fall within section 15(4).

- (a) where a person entitled to a compensatable estate in the relevant land is also at the date of a relevant decision entitled to a compensatable estate in any other land, the value of the first-mentioned compensatable estate shall be reduced by the amount, if any, by which the value of the second-mentioned compensatable estate would be depreciated if any development permitted by a decision to the contrary effect to the relevant decision were carried out; and
 - (b) the value of the compensatable estate in the relevant land shall be reduced by the amount, if any, of any loss in the nature of disturbance in respect of the purposes for which the relevant land was being used at the date of the relevant decision which would necessarily be involved if any development permitted by a decision to the contrary effect were carried out.
- (2) Where a compensatable estate in any land is vested in any trustees or in the beneficiaries under a settlement, then the trustees or beneficiaries shall not, for the purposes of subsection (1), be taken to be entitled to a compensatable estate in any other land unless that other land and the relevant land are held on trust or settled under the same instrument or series of instruments.
