12.5. Four reservations, one each on packings, commercial vehicles, containers and pallets, shall be entered in respect of Recommended Practice 36. They shall be worded as follows:

Reservation on packings

Community legislation authorizes temporary admission on the basis of an oral declaration accompanied by an inventory, for packings bearing indelible, non-detachable marks and imported full by a person established outside the customs territory of the Community. Written declarations are required for all other types of packings entered under the temporary admission arrangements.

Where re-exportation is not in doubt because of commercial usage, Community legislation also allows temporary admission without a security for packings imported empty and bearing indelible, non-detachable marks. Provision is also made for granting exemptions from the requirement to provide a security in respect of packings imported full and subject to a verbal declaration accompanied by an inventory, unless an express request to the contrary is made to the competent authorities.

Reservation on commercial road vehicles

Community legislation provides that, where there is a serious risk of failure to comply with the obligation to re-export a commercial road vehicle, the temporary admission procedure applies subject to the production of a document of a type laid down in an international Convention or the lodging of a declaration; the customs authority has the option of requiring a security when the declaration is lodged.

Reservation on containers

Containers not fulfilling these conditions may be granted temporary admission to Community customs territory once a written application has been submitted, an authorization issued and, where there are well-founded or serious doubts regarding the obligation to re-export, a list has been produced and/or a security constituted.

Reservation on pallets

As long as pallets are identifiable, Community legislation authorizes their temporary admission without formalities from the time of entry into Community customs territory. Where they are not identifiable, a written application has to be submitted and an authorization issued.

In both cases a written declaration and, where necessary, a security may be required if the customs consider that there is a serious risk of failure to comply with the obligation to re-export.
