

Commission Implementing Regulation (EU) 2015/1759 of 28 September 2015 approving glutaraldehyde as an existing active substance for use in biocidal products for product-types 2, 3, 4, 6, 11 and 12 (Text with EEA relevance)

COMMISSION IMPLEMENTING REGULATION (EU) 2015/1759

of 28 September 2015

approving glutaraldehyde as an existing active substance for use in biocidal products for product-types 2, 3, 4, 6, 11 and 12

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) No 528/2012 of the European Parliament and of the Council of 22 May 2012 concerning the making available on the market and use of biocidal products<sup>(1)</sup>, and in particular the third subparagraph of Article 89(1) thereof,

Whereas:

- (1) Commission Delegated Regulation (EU) No 1062/2014<sup>(2)</sup> establishes a list of existing active substances to be evaluated for their possible approval for use in biocidal products.
- (2) That list includes glutaraldehyde.
- (3) Glutaraldehyde has been evaluated in accordance with Article 16(2) of Directive 98/8/EC of the European Parliament and of the Council<sup>(3)</sup> for use in product-type 2, private area and public health area disinfectants and other biocidal products, product-type 3, veterinary hygiene biocidal products, product-type 4, food and feed area disinfectants, product-type 6, in-can preservatives, product-type 11, preservatives for liquid-cooling and processing systems, and product-type 12, slimicides, as defined in Annex V to that Directive, which correspond respectively to product-types 2, 3, 4, 6, 11 and 12 as defined in Annex V to Regulation (EU) No 528/2012.
- (4) Finland was designated as evaluating competent authority and submitted the assessment reports, together with its recommendations, to the Commission on 30 March 2011 and 31 January 2013 in accordance with paragraphs 4 and 6 of Article 14 of Commission Regulation (EC) No 1451/2007<sup>(4)</sup>.
- (5) In accordance with Article 7(1)(b) of Delegated Regulation (EU) No 1062/2014, the opinions of the European Chemicals Agency were formulated on 1 October 2014 by the Biocidal Product Committee, having regard to the conclusions of the evaluating competent authority.
- (6) According to those opinions, biocidal products used for product-types 2, 3, 4, 6, 11 and 12 and containing glutaraldehyde may be expected to satisfy the requirements of

---

*Changes to legislation: There are currently no known outstanding effects for the  
Commission Implementing Regulation (EU) 2015/1759. (See end of Document for details)*

---

Article 5 of Directive 98/8/EC, provided that certain conditions concerning its use are complied with.

- (7) It is therefore appropriate to approve glutaraldehyde for use in biocidal products for product-types 2, 3, 4, 6, 11 and 12 subject to compliance with the specific conditions in the Annex.
- (8) The opinions conclude that glutaraldehyde meets the criteria for classification as a respiratory sensitiser as defined in point 3.4.1.1 of Annex I to Regulation (EC) No 1272/2008 of the European Parliament and of the Council<sup>(5)</sup>.
- (9) Since, pursuant to Article 90(2) of Regulation (EU) No 528/2012, substances for which the Member States' evaluation has been completed by 1 September 2013 should be approved in accordance with Directive 98/8/EC, the period of approval should be 10 years, in accordance with the practice established under that Directive.
- (10) For the purposes of Article 23 of Regulation (EU) No 528/2012 however, glutaraldehyde meets the conditions of Article 10(1)(b) of that Regulation and should therefore be considered a candidate for substitution.
- (11) For the use in product-type 4, the evaluation did not address the incorporation of biocidal products containing glutaraldehyde in materials and articles intended to come into contact directly or indirectly with food within the meaning of Article 1(1) of Regulation (EC) No 1935/2004 of the European Parliament and of the Council<sup>(6)</sup>. Such materials may require the establishment of specific limits on the migration into food, as referred to in Article 5(1)(e) of Regulation (EC) No 1935/2004. The approval should therefore not cover such use unless the Commission has established such limits or it has been established pursuant to that Regulation that such limits are not necessary.
- (12) Since glutaraldehyde meets the criteria for classification as respiratory sensitiser, and as skin sensitiser sub-category 1A as defined in Annex I to Regulation (EC) No 1272/2008, treated articles treated with or incorporating glutaraldehyde should be appropriately labelled when placed on the market.
- (13) A reasonable period should be allowed to elapse before an active substance is approved, in order to permit interested parties to take the preparatory measures necessary to meet the new requirements.
- (14) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Biocidal Products,

HAS ADOPTED THIS REGULATION:

*Article 1*

Glutaraldehyde is approved as an active substance for use in biocidal products for product-types 2, 3, 4, 6, 11 and 12, subject to the specifications and conditions set out in the Annex.

*Article 2*

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 28 September 2015.

*For the Commission*

*The President*

Jean-Claude JUNCKER
