

2011 CHAPTER 6

PART 2

SPECIAL ADMINISTRATION REGIME
FOR PROTECTED ENERGY COMPANIES

Energy administration orders

Objective of an energy administration

18.—(1) The objective of an energy administration is to secure—

- (a) that the company's system is and continues to be maintained and developed as an efficient, economical and co-ordinated system; and
- (b) that it becomes unnecessary, by one or both of the following means, for the energy administration order to remain in force for that purpose.

(2) Those means are—

- (a) the rescue as a going concern of the company subject to the energy administration order; and
- (b) transfers falling within subsection (3).

(3) A transfer falls within this subsection if it is a transfer as a going concern—

- (a) to another company, or
- (b) as respects different parts of the undertaking of the company subject to the energy administration order, to two or more different companies,

of so much of that undertaking as it is appropriate to transfer for the purpose of achieving the objective of the energy administration.

(4) The means by which transfers falling within subsection (3) may be effected include, in particular—

- (a) a transfer of the undertaking of the company subject to the energy administration order, or of a part of its undertaking, to a wholly-owned subsidiary of that company; and
- (b) a transfer to a company of securities of a wholly-owned subsidiary to which there has been a transfer falling within paragraph (a).

(5) The objective of an energy administration may be achieved by transfers falling within subsection (3) to the extent only that—

- (a) the rescue as a going concern of the company subject to the energy administration order is not reasonably practicable or is not reasonably practicable without such transfers;
- (b) the rescue of that company as a going concern will not achieve that objective or will not do so without such transfers;
- (c) such transfers would produce a result for the company's creditors as a whole that is better than the result that would be produced without them; or
- (d) such transfers would, without prejudicing the interests of those creditors as a whole, produce a result for the company's members as a whole that is better than the result that would be produced without them.

(6) In this section “the company's system”, in relation to an energy administration, means—

- (a) the system of electricity transmission or of electricity distribution, or
- (b) the pipe-line system for the conveyance of gas,

which the company subject to the energy administration order has been maintaining as the holder of a relevant licence.
