

SCHEDULE 2

REQUIREMENTS

Soil audit

18.—(1) In accordance with the soils handling and management scheme, an annual audit of all soil materials is to be completed at the end of each soil moving season and submitted to the county planning authority.

(2) The audit is to include:

- (a) drawings and tables to identify clearly the origin, intermediate storage and final location of the different soil types. The drawings and tables are to be prepared as part of the first soil audit to a format to be agreed with the county planning authority and are to be updated as part of each subsequent audit to provide the most accurate ongoing summary of soil management at the application land; and
- (b) volumetric information which is to be included in the tables.

(3) Any recommendations resulting from each soil audit must be carried out in the timescale to be agreed with the county planning authority
