

Commission Implementing Decision (EU) 2020/1035 of 3 June 2020 confirming or amending the provisional calculation of the average specific emissions of CO₂ and specific emissions targets for manufacturers of passenger cars and light commercial vehicles for the calendar year 2018 pursuant to Regulation (EU) 2019/631 of the European Parliament and of the Council (Only the Czech, Dutch, English, French, German, Hungarian, Italian, Spanish and Swedish texts are authentic) (Text with EEA relevance)

COMMISSION IMPLEMENTING DECISION (EU) 2020/1035

of 3 June 2020

confirming or amending the provisional calculation of the average specific emissions of CO₂ and specific emissions targets for manufacturers of passenger cars and light commercial vehicles for the calendar year 2018 pursuant to Regulation (EU) 2019/631 of the European Parliament and of the Council

(Only the Czech, Dutch, English, French, German, Hungarian, Italian, Spanish and Swedish texts are authentic)

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2019/631 of the European Parliament and of the Council of 17 April 2019 setting emission performance standards for new passenger cars and for new light commercial vehicles and repealing Regulation (EC) No 443/2009 and (EU) No 510/2011⁽¹⁾, and in particular the second subparagraph of Article 7(5) thereof,

Whereas:

- (1) In accordance with Regulation (EU) 2019/631, and, with regard to the specific emission targets and average specific emissions for the calendar year 2018, Regulation (EC) No 443/2009 of the European Parliament and of the Council⁽²⁾ and Regulation (EU) No 510/2011 of the European Parliament and of the Council⁽³⁾, the Commission is required to determine, each year, the average specific emissions of CO₂ and the specific emissions target for each manufacturer of passenger cars and light commercial vehicles in the Union as well as for each pool of manufacturers. On that basis, the performance of manufacturers or pools of manufacturers in complying with their obligation to not exceed their respective specific emission targets is established.
- (2) The detailed data to be used for the calculation of the average specific emissions of CO₂ and the specific emissions targets of manufacturers is based on Member States' registrations of new passenger cars and new light commercial vehicles during the 2018 calendar year.

- (3) All Member States submitted their 2018 data to the Commission, however, with some delays as compared to the reporting deadline of 28 February 2019. Where, as a result of the verification of the data by the Commission, it was evident that certain data were missing or manifestly incorrect, the Commission has contacted the Member States concerned and, subject to the agreement of those Member States, adjusted or completed the data accordingly. Where no agreement could be reached with a Member State, the provisional data submitted by that Member State was not adjusted.
- (4) On 24 June 2019, the Commission published the provisional data and notified 95 manufacturers of passenger cars and 67 manufacturers of light commercial vehicles as well as the respective pools of the provisional calculations of their average specific emissions of CO₂ and their specific emissions targets in 2018.
- (5) The provisional data notified by the Commission included the correction factors, both for cars, calculated in accordance with Article 7(2) of Commission Implementing Regulation (EU) 2017/1153⁽⁴⁾ and for light commercial vehicles, calculated in accordance with Article 6(2) of Commission Implementing Regulation (EU) 2017/1152⁽⁵⁾. The determination of correction factors is part of the correlation procedures set up in order to reflect the change in the regulatory test procedure for measurement of specific emissions of CO₂. They serve to ensure that procedural tolerances necessary for the correlation of the CO₂ emission values are applied as intended and not as a means to artificially lower those values.
- (6) A correction factor is calculated based on deviation and verification factors determined for a statistical sample of vehicles that should be representative of the manufacturer's fleet of new vehicles. In view of the very low number of light commercial vehicles type approved in accordance with the Worldwide Harmonised Light Vehicle Test Procedure set out in Commission Regulation (EU) 2017/1151⁽⁶⁾ in 2018, the sample cannot be considered statistically representative and no correction factors have therefore been applied when establishing the emission performance of manufacturers of light commercial vehicles
- (7) Manufacturers were asked to verify the provisional data in accordance with Article 8(4) of Regulation (EC) No 443/2009 and Article 8(5) of Regulation (EU) No 510/2011 and, in particular, the deviation and verification factors on the basis of which the correction factor is calculated, and to notify the Commission of any errors within three months of receipt of the notification. Sixty manufacturers of passenger cars and 34 manufacturers of light commercial vehicles submitted notifications of errors. For two car manufacturers, the applicability of a correction factor to their average specific emissions was confirmed. For two manufacturers of passenger cars and one manufacturer of light commercial vehicles, all vehicles reported in the provisional dataset were outside the scope of Regulation (EU) 2019/631.
- (8) For the remaining 35 manufacturers of passenger cars and 33 manufacturers of light commercial vehicles that did not notify any errors in the datasets or respond otherwise, the provisional data and provisional calculations of the average specific emissions and the specific emissions targets should be confirmed. For none of those manufacturers a correction factor was applicable.

- (9) The Commission has verified the errors notified by the manufacturers and the reasons for their correction, and the provisional dataset has been confirmed or amended as appropriate. Only those records have been retained that include the values for mass and CO₂ emissions. As a result, for 94 manufacturers of passenger cars and 66 manufacturers of light commercial vehicles the provisional data should be confirmed or amended.
- (10) In accordance with Articles 4 of Regulations (EC) No 443/2009 and (EU) No 510/2011, a manufacturer should be considered as compliant with its specific emissions target where its average specific emissions of CO₂ indicated in this Decision do not exceed its specific emissions target. For manufacturers which are members of a pool, compliance should be assessed at the level of the pool in accordance with Articles 7(7) of those Regulations.
- (11) Records with complete data on mass in running order and CO₂ emissions but with missing or incorrect vehicle identification numbers should be included in the calculation of the specific emission targets and the average specific emissions. However, the fact that manufacturers cannot verify or correct those records should be taken into account. Therefore, it is appropriate to apply an error margin when determining the distance to target of the manufacturer concerned.
- (12) The error margin is calculated as the difference between the distances between the average specific emissions and the specific emissions target calculated including and excluding all vehicle registrations that cannot be verified by the manufacturer. Regardless of whether that difference is positive or negative, the error margin is applied so that it always improves the manufacturer's position with regard to its specific emission target.
- (13) Where, after taking into account the error margin, the distance to target of a manufacturer or a pool, as the case may be, is above zero, an excess emission premium is to be imposed in accordance with Article 8 of Regulation (EU) 2019/631. This is the case for the manufacturer of passenger cars Automobili Lamborghini S.p.A. The excess emission premium is to be calculated in accordance with Article 9(2)(a) of Regulation (EC) No 443/2009.
- (14) In accordance with Articles 2(4) of Regulations (EC) No 443/2009 and (EU) No 510/2011, manufacturers responsible for less than 1 000 new vehicle registrations in the calendar year are exempt from meeting a specific emission target. It is, however, appropriate to calculate and report their average specific emissions as well as the number of new vehicles registered.
- (15) Further clarifications are needed from the manufacturer Dr Ing. h.c. F. Porsche AG with regard to possible irregularities in the CO₂ emissions stated in the emissions type approvals of two vehicle models. As a consequence, the provisional data for the 2014 to 2018 calendar years for the Volkswagen pool and its member Dr Ing. h.c. F. Porsche AG cannot be confirmed or amended.
- (16) The Commission has, in accordance with Article 12 of Commission Implementing Regulation (EU) No 725/2011⁽⁷⁾, performed an ad hoc verification of CO₂ savings

certified by reference to Commission Implementing Decision 2013/341/EU⁽⁸⁾ and Commission Implementing Decision (EU) 2015/158⁽⁹⁾. The verification showed satisfactory results with regard to the CO₂ savings certified by reference to Implementing Decision 2013/341/EU. However, with regard to Implementing Decision (EU) 2015/158, a difference was found between the certified CO₂ savings of two efficient alternators fitted in vehicles manufactured by Daimler AG and those verified by the Commission of 9 % and 23 % respectively. The Commission notified Daimler AG of the deviations found and invited that manufacturer to provide evidence demonstrating the accuracy of the certified CO₂ savings.

- (17) Based on the information provided by Daimler AG, the Commission has found that the difference in savings was due to a difference in how the testing methodology was applied for the purposes of the certification and for the verification of the CO₂ savings. More precisely, a run-in of the efficient alternators was performed prior to the certification test, even though the testing methodology referred to in Implementing Decision (EU) 2015/158 neither prescribes nor allows a specific run-in of the efficient alternators to be performed outside the certification test.
- (18) It follows from Articles 12 of Regulations (EC) No 443/2009 and (EU) No 510/2011 that, in order for CO₂ savings from innovative technologies to be taken into account for the calculation of a manufacturer's specific average emissions in 2018, those savings must make a verified contribution to CO₂ reductions, in accordance with a testing methodology capable of producing verifiable, repeatable and comparable results. As the certified CO₂ savings of two efficient alternators in certain vehicles manufactured by Daimler AG have not been confirmed by the verification performed on the basis of the testing methodology referred to in Implementing Decision (EU) 2015/158, the certified CO₂ savings attributed to those eco-innovations, amounting to 0,429 g CO₂/km at the fleet level, should not be taken into account for the calculation of the average specific emissions of the manufacturer Daimler AG. On the same basis, the CO₂ savings attributed to those eco-innovations, amounting to 0,428 g CO₂/km at the fleet level, should not be taken into account for the calculation of the average specific emissions of the Daimler AG pool.
- (19) The values relating to the performance of a manufacturer as confirmed or amended by this Decision could be revised in the event that the relevant national authorities confirm the existence of irregularities in the CO₂ emission values provided for the purpose of determining the manufacturer's compliance with the specific emissions target,

HAS ADOPTED THIS DECISION:

Article 1

1 The values relating to the performance of manufacturers of passenger cars in respect of the 2018 calendar year are specified in Annex I.

2 The values relating to the performance of manufacturers of light commercial vehicles in respect of the 2018 calendar year are specified in Annex II.

Article 2

This Decision is addressed to the following individual manufacturers and pools formed in accordance with Article 6 of Regulation (EU) 2019/631:

Explanatory notes to Tables 1 and 2:

Column A:

Table 1: ‘Manufacturer name’ means the name of the manufacturer as notified to the Commission by the manufacturer concerned or, where no such notification has taken place, the name reported by the Member State.

Table 2: ‘Pool name’ means the name of the pool as declared by the pool manager.

Column B:

‘D’ means that a derogation has been granted in accordance with Article 10(3) of Regulation (EU) 2019/631 for the calendar year 2018 (small volume manufacturer);

‘ND’ means that a derogation has been granted in accordance with Article 10(4) of Regulation (EU) 2019/631 for the calendar year 2018 (niche manufacturer);

‘DMD’ means that a *de minimis* exemption applies in accordance with Article 2(4) of Regulation (EU) 2019/631, so that the manufacturer does not have to meet a specific emissions target in 2018;

‘P’ means that the manufacturer is a member of a pool (whose number is listed in column B of Table 2) formed pursuant to Article 6 of Regulation (EU) 2019/631 and the pooling agreement is valid for the calendar year 2018.

Column C:

‘Number of registrations’ means the total number of new passenger cars registered in the European Union and Iceland in the calendar year 2018 for which the manufacturer (Table 1) or the members of the pool (Table 2) are responsible.

Column D:

‘Average mass’ (kg) means the average of the mass in running order of all new passenger cars registered in the European Union and Iceland in the calendar year 2018 for which the manufacturer (Table 1) or the members of the pool (Table 2) are responsible.

Column E:

‘Average specific emissions of CO₂’ (g CO₂/km) means the average specific emissions of CO₂ of all new passenger cars registered in the European Union and Iceland in the calendar year 2018 for which the manufacturer (Table 1) or the members of the pool (Table 2) are responsible.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Decision (EU) 2020/1035. (See end of Document for details)

In calculating the average specific emissions of CO₂ account has been taken of the following, where applicable:

- CO₂ emission savings resulting from the use of innovative technologies referred to in Article 11 of Regulation (EU) 2019/631 (Column H),
- the correction factor referred to in Article 7(2) of Implementing Regulation (EU) 2017/1153 (Column I).

Column F:

‘Specific emissions target’ (g CO₂/km) means the specific emissions target of the manufacturer (Table 1) or the pool (Table 2) calculated in accordance with Annex I to Regulation (EC) No 443/2009 and with M0 being 1 392,4 or the derogation target granted pursuant to Article 10 of Regulation (EU) 2019/631. Where the manufacturer benefits from an exemption pursuant to Article 2(4) of Regulation (EU) 2019/631, no specific emissions target is specified.

Column G:

‘Distance to target’ (g CO₂/km) means the difference between the average specific emissions of CO₂ specified in column E and the specific emissions target specified in column F, from which the error margin specified in column J is subtracted.

Where the value in column G is greater than zero, this means that the specific emissions target has been exceeded.

For a manufacturer, which is member of a pool, compliance with the specific emissions target is assessed at the level of the pool.

Column H:

‘CO₂ savings from eco-innovations’ (g CO₂/km) means the emission savings taken into account for the calculation of the average specific emissions of CO₂ listed in column E, resulting from the use of innovative technologies that make a verified contribution to CO₂ reductions and that have been approved by the Commission in accordance with Article 11 of Regulation (EU) 2019/631.

Column I:

‘Correction factor’ means the correction factor calculated in accordance with Article 7(2) of Implementing Regulation (EU) 2017/1153, which was used in calculating the average specific emissions of CO₂ of the manufacturer (Table 1) or the pool (Table 2).

Column J:

‘Error margin’ (g CO₂/km) means the value by which the difference between the average specific emissions of CO₂ (column E) and the specific emissions target (column F) has been adjusted when calculating the distance to target (column G), in order to take into account records notified to the Commission by the manufacturer (Table 1) or the pool (Table 2) with the error code B as set out in Article 9(3) of Regulation (EU) No 1014/2010.

This error margin is calculated in accordance with the following formula:

$$\text{Error margin} = \text{absolute value of } [(AC1 - TG1) - (AC2 - TG2)]$$

AC1 = average specific emissions of CO₂ including the records with error code B;

TG1 = specific emissions target including the records with error code B (as specified in column E);

AC2 = average specific emissions of CO₂ excluding the records with error code B;

TG2 = specific emissions target excluding the records with error code B.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Decision (EU) 2020/1035. (See end of Document for details)

ANNEX II

TABLE I

Performance in the calendar year 2018 of individual manufacturers of light commercial vehicles in accordance with Article 9 of Regulation (EU) 2019/631

VOLKSWAGEN GROUP LCV	P6	212938	1904,20	163,839	187,815	-23,976	0,000	0,000

Explanatory notes to Tables 1 and 2:

Column A:

Table 1: ‘Manufacturer name’ means the name of the manufacturer as notified to the Commission by the manufacturer concerned or, where no such notification has taken place, the name reported by the Member State.

Table 2: ‘Pool name’ means the name of the pool as declared by the pool manager.

Column B:

‘D’ means that a derogation has been granted in accordance with Article 10(3) of Regulation (EU) 2019/631 for the calendar year 2018 (small volume manufacturer);

‘DMD’ means that a *de minimis* exemption applies in accordance with Article 2(4) of Regulation (EU) 2019/631, so that the manufacturer does not have to meet a specific emissions target in 2018;

‘P’ means that the manufacturer is a member of a pool (whose number is listed in column B of Table 2) formed pursuant to Article 6 of Regulation (EU) 2019/631 and the pooling agreement is valid for the calendar year 2018.

Column C:

‘Number of registrations’ means the total number of new light commercial vehicles registered in the European Union and Iceland in the calendar year 2018 for which the manufacturer (Table 1) or the members of the pool (Table 2) are responsible.

Column D:

‘Average mass’ (kg) means the average of the mass in running order of all new light commercial vehicles registered in the European Union and Iceland in the calendar year 2018 for which the manufacturer (Table 1) or the members of the pool (Table 2) are responsible.

Column E:

‘Average specific emissions of CO₂’ (g CO₂/km) means the average specific emissions of CO₂ of all new light commercial vehicles registered in the European Union and Iceland in the calendar year 2018 for which the manufacturer (Table 1) or the members of the pool (Table 2) are responsible. In calculating the average specific emissions of CO₂ account has been taken, where applicable, of the CO₂ emission savings resulting from the use of innovative technologies referred to in Article 11 of Regulation (EU) 2019/631 (Column H).

Column F:

‘Specific emissions target’ (g CO₂/km) means the specific emissions target of the manufacturer (Table 1) or the pool (Table 2) calculated in accordance with Annex I to Regulation (EC) No 510/2011 and with M0 being 1 766,4 or the derogation target granted pursuant to Article 10 of Regulation (EU) 2019/631. Where the manufacturer benefits from an exemption pursuant to Article 2(4), no specific emissions target is specified.

Column G:

‘Distance to target’ (g CO₂/km) means the difference between the average specific emissions of CO₂ specified in column E and the specific emissions target specified in column F, from which the error margin specified in column I is subtracted.

Where the value in column G is greater than zero, this means that the specific emissions target has been exceeded.

For a manufacturer, which is member of a pool, compliance with the specific emissions target is assessed at the level of the pool.

Column H:

‘CO₂ savings from eco-innovations’ (g CO₂/km) means the emission savings taken into account for the calculation of the average specific emissions of CO₂ listed in column E, resulting from the use of innovative technologies that make a verified contribution to CO₂ reductions and that have been approved by the Commission in accordance with Article 11 of Regulation (EU) 2019/631.

Column I:

‘Error margin’ (g CO₂/km) means the value by which the difference between the average specific emissions of CO₂ (column E) and the specific emissions target (column F) has been adjusted when calculating the distance to target (column G), in order to take into account records notified to the Commission by the manufacturer (Table 1) or the pool (Table 2) with the error code B as set out in Article 10a(1) of Commission Implementing Regulation (EU) No 293/2012⁽¹⁰⁾.

This error margin is calculated in accordance with the following formula:

$$\text{Error margin} = \text{absolute value of } [(AC1 - TG1) - (AC2 - TG2)]$$

AC1 = average specific emissions of CO₂ including the records with error code B;

TG1 = specific emissions target including the records with error code B (as specified in column E);

Changes to legislation: There are currently no known outstanding effects for the
Commission Implementing Decision (EU) 2020/1035. (See end of Document for details)

AC2 = average specific emissions of CO₂ excluding the records with error code B;
TG2 = specific emissions target excluding the records with error code B.

Changes to legislation: There are currently no known outstanding effects for the
Commission Implementing Decision (EU) 2020/1035. (See end of Document for details)
