## COUNCIL DIRECTIVE

of 17 April 1972

**concerning the provision of socio-economic guidance for and the acquisition of occupational skills by persons engaged in agriculture**

(72/161/EEC)

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 43 thereof,

Having regard to the proposal from the Commission;

Having regard to the Opinion of the European Parliament;

Whereas the objectives of the common agricultural policy set out in Article 39 (1) (a) and (b) of the Treaty can only be achieved through a reform of agricultural structures;

Whereas such structural reform is a basic factor in the development of the common agricultural policy; whereas it should therefore be based on a Community concept and on Community criteria;

Whereas, because of the diversity of their causes, nature and gravity, structural problems in agriculture may require solutions which vary according to region and are capable of adjustment over a period of time; whereas such solutions must contribute to the overall economic and social development of each region concerned; whereas the best results can be achieved if, acting on the basis of Community concepts and criteria, Member States implement the common measures individually through their own legislative and administrative procedures, and if, in addition, they themselves determine, on the basis of conditions laid down by the Community, the extent to which such measures should be intensified in or concentrated on certain regions;

Whereas agricultural structures cannot be reformed unless a large number of those working in agriculture make a fundamental change in their occupational orientation;

Whereas the choice involved in any change of orientation within agriculture or in any transference to other occupations must be made with full knowledge of existing opportunities and of the consequences of such a choice;

Whereas, at present, in many regions of the Community it is difficult for those working in agriculture to make such a choice, because they do not have the necessary information available to them.

Whereas, if agriculture is to develop and specialise, a considerable rise will be required in the level of general, technical and economic training of the agricultural working population, particularly where, as a result of technical progress and changing market requirements, changes of policy in management, production and marketing have become essential;

Whereas in many regions the inadequacy of vocational training facilities is a bar to the efforts required to turn farmers into modern business managers and in general to provide farmers and their labour, whether hired or family, with occupational skills;

Whereas, in order to meet the needs of a developing agricultural industry, vocational training centres must draw up and adapt their programmes, and set and adjust the level and type of training required of their teaching staff, in accordance with minimum criteria laid down by Member States;

Whereas persons leaving agriculture are generally obliged to acquire new vocational skills and are able to do this only if an income is guaranteed to them during the period which they have to devote to retraining courses;

## ▼B

Whereas the proposed measures are in the Community's interest and are intended to achieve the objectives set out in by Article 39 (1) (a) of the Treaty, including the structural changes necessary for the proper functioning of the common market; whereas they therefore constitute common measures within the meaning of Article 6 of Council Regulation (EEC) No 729/70 <sup>(1)</sup> on the financing of the common agricultural policy;

Whereas, inasmuch as the Community contributes to the financing of the common measures, it must be in a position to ascertain that the provisions adopted by Member States for the implementation of those measures will contribute towards achievement of the objectives thereof; whereas, to this end, provision should be made for a procedure establishing close cooperation between Member States and the Commission within the Standing Committee on Agricultural Structure set up by Article 1 of the Council Decision of 4 December 1962 <sup>(2)</sup> on the coordination of policies on agricultural structure, and involving, as regards financial aspects, consultation with the EAGGF Committee referred to in Articles 11 to 15 of Regulation (EEC) No 729/70;

Whereas it is desirable that the European Parliament and the Council be able, on the basis of a report submitted by the Commission, to examine annually the effects of the national and Community measures taken, so that they may assess the need to supplement or adapt the system introduced hereunder;

HAS ADOPTED THIS DIRECTIVE:
