COUNCIL

COUNCIL DIRECTIVE

of 7 March 1988

complying with the judgment of the Court of Justice in Case 131/86 (annulment of Council Directive 86/113/EEC of 25 March 1986 laying down minimum standards for the protection of laying hens kept in battery cages)

(88/166/EEC)

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community and in particular Article 176 thereof,

Whereas, in its judgment of 23 February 1988 ⁽¹⁾, the Court of Justice of the European Communities declared void Council Directive 86/113/EEC of 25 March 1986 laying down minimum standards for the protection of laying hens kept in battery cages owing to certain textual amendments made to the notified version of that act following its adoption ;

Whereas, pursuant to Article 176 of the Treaty, the Institution whose act has been declared void is required to take the necessary measures to comply with the judgment of the Court of Justice ; whereas it is sufficient for that purpose to confirm the text of the Directive declared void, as adopted by the Council,

HAS ADOPTED THIS DIRECTIVE :

Article 1

The text of Directive 86/113/EEC laying down minimum standards for the protection of laying hens kept in battery cages shall be deemed adopted in the form given in the Annex hereto.

Article 2

This Directive is addressed to the Member States.

Done at Brussels, 7 March 1988.

For the Council

The President

I. KIECHLE

⁽¹⁾ Judgment 131/86 not yet published

ANNEX

COUNCIL DIRECTIVE

laying down minimum standards for the protection of laying hens kept in battery cages

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 43 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament⁽¹⁾,

Having regard to the opinion of the Economic and Social Committee⁽²⁾,

Whereas most Member States have ratified the European Convention for the Protection of Animals kept for Farming Purposes, whereas the Community has also approved this Convention by Decision 78/923/EEC⁽³⁾; whereas the keeping of laying hens in battery cages is the most widely used means of egg production in the Community and makes a very large contribution to the high productivity of this sector; whereas, however, this means of housing may, in certain cases, lead to unnecessary and excessive suffering on the part of the animal;

Whereas, however, the national laws at present in force in the field of the protection of animals kept for farming purposes present differences which may distort conditions of competition and in consequence interfere with the smooth running of the organization of the common market in eggs and poultry;

Whereas there is therefore a need to establish priority parameters and to define common minimum requirements applicable in all intensive housing systems, in order to enable the market to operate satisfactorily in comparison, in particular, with Article 39 of the Treaty, while bearing in mind the need to protect animals; whereas it is necessary for this purpose, as a first step, to establish Community measures for laying hens in battery cages;

Whereas, to provide the basis for further Community measures, the studies on poultry protection must be continued, not only as regards the keeping of poultry in battery cages but also in possible alternative systems of housing;

Whereas, in certain Member States, the adjustment of existing structures to the standards laid down by this Directive will entail a reduction in production; whereas such adjustment should therefore be facilitated under the conditions laid down in this Directive without creating structural and market imbalances,

HAS ADOPTED THIS DIRECTIVE:

Article 1

This Directive lays down the minimum standards for the protection of laying hens kept in battery cages.

Article 2

For the purpose of this Directive:

1. 'Laying hens' means adult hens of the species *Gallus gallus* which are kept for egg production.
2. 'Battery cage' means any enclosed space intended for laying hens in a battery system.
3. 'Battery system' means an arrangement of cages beside and/or on top of each other.

⁽²⁾ OJ No C 343, 31. 12. 1981, p. 48.

⁽³⁾ OJ No L 323, 17. 11. 1978, p. 12.

Article 3

1. Member States shall ensure that from 1 January 1988 :
 - all newly built cages for use within the Community,
 - all cages brought into use for the first time,at least comply with the following requirements :
 - (a) at least 450 cm² of cage area, measured in a horizontal plane which may be used without restriction, in particular not including non-waste deflection plates liable to restrict the area available, shall be provided for each laying hen ;
 - (b) a feed trough which may be used without restriction shall be provided. Its length shall be at least 10 cm multiplied by the number of animals in the cage ;
 - (c) unless nipple drinkers or drinking cups are provided, each battery cage shall have a continuous drinking channel of the same length as the feed trough mentioned in point (b). Where drinking points are plumbed in, at least two nipple drinkers or two drinking cups shall be within reach of each cage ;
 - (d) battery cages shall be at least 40 cm high over 65 % of the cage area and not less than 35 cm at any point ;
 - (e) floors of battery cages must be constructed so as to support adequately each of the forward-facing claws of each foot. Floor slope shall not exceed 14 % or 8°. In the case of floors using other than rectangular wire mesh, Member States may permit steeper slopes.
2. Moreover, Member States shall ensure that from 1 January 1995, the minimum requirements laid down in points (a) to (e) of paragraph 1 apply to all battery cages.

Article 4

Member States shall ensure that conditions for laying hens kept in battery cages are in accordance with the general requirements laid down in the Annex.

Article 5

The provisions of the Annex may be amended in accordance with the procedure laid down in Article 8 in order to take account of scientific developments.

Article 6

Member States shall arrange for inspections to be made by the competent authority to ensure that this Directive, including the Annex, is complied with.

Article 7

1. Furthermore, in order to ensure that this Directive is complied with and that it is uniformly applied by the Member States, the Commission shall check on its application on the spot regularly and in an appropriate manner, in conjunction with the relevant national departments.
2. To that end, Commission experts shall carry out inspection operations jointly with national departments under inspection programmes adopted in cooperation with the competent authorities of the Member State concerned.

Where it is established that this Directive is not being complied with the Commission will inform the relevant national authorities.

The Commission will prepare periodical general reports on the results of the inspections carried out. Those reports shall be communicated to the Member States.

3. The Community shall in an appropriate manner bear the cost of participation by the Commission in the checks provided for in paragraph 1.
4. The general provisions for implementing this Article shall be determined in accordance with the procedure laid down in Article 8. In accordance with the same procedure, a code may be established containing the rules to be followed for the purpose of the checks provided for in paragraph 1 of this Article.

Article 8

1. Where the procedure laid down in this Article is referred to, matters shall without delay be referred by the Chairman, either on his own initiative or at the request of a Member State, to the Standing Veterinary Committee (hereinafter called 'Committee').

2. Within the Committee the votes of Member States shall be weighted as provided in Article 148 (2) of the Treaty. The Chairman shall not vote.

3. The Commission representative shall submit a draft of the measures to be adopted. The Committee shall deliver its opinion on such measures within two days. Opinions shall be delivered by a qualified majority as provided in Article 148 (2) of the Treaty.

4. The Commission shall adopt the measures and apply them immediately where they are in accordance with the opinion of the Committee. If they are not in accordance with the opinion of the Committee or if no opinion is delivered, the Commission shall without delay submit to the Council a proposal concerning the measures to be adopted.

The Council shall adopt the measures by a qualified majority.

If, within three months of the date on which the proposal was submitted to it, the Council has not adopted any measures, the Commission shall adopt the proposed measures and apply them immediately save where the Council has decided by a simple majority against those measures.

Article 9

Before 1 January 1993 the Commission shall submit a report on scientific developments regarding the welfare of hens under various systems of rearing and on the provisions in the Annex, accompanied by any appropriate adjustment proposals.

Article 10

From the date on which this Directive takes effect until the end of the transitional period, national aid intended for the functional extension of buildings housing the battery cages necessary for rearing the same number of hens may be considered compatible with the common market, under Articles 92 to 94 of the Treaty, account being taken also of the depreciation of these buildings.

Article 11

Member States shall bring into force the laws, regulations and administrative provisions required in order to comply with this Directive by 1 July 1987 at the latest. They shall immediately inform the Commission thereof.

Article 12

This Directive is addressed to the Member States.

ANNEX

1. The form and type of materials employed for constructing the cages and the construction and characteristics of the latter must be such as to prevent any injury to the animals to the extent possible in the existing state of technology.
2. The design and size of the cage opening must be such that an adult hen can be removed without causing unnecessary suffering or injury.
3. The cages must be suitably equipped to prevent the poultry escaping.
4. All poultry shall have access to adequate, nutritious and hygienic feed each day and to adequate fresh water at all times, except in the case of therapeutic or prophylactic treatment.
5. Insulation and ventilation of the building must ensure that air velocity, dust level, temperature, relative air humidity and gas concentrations are kept within limits that are not harmful to the poultry.
6. In the case of artificial lighting, the poultry must have an appropriate resting period each day during which the light intensity must be reduced in such a way that the poultry can rest properly.
7. It shall be ensured that the hens are cared for by a sufficient number of personnel with adequate knowledge and experience of laying hens and of the production system used.
8. The flock or group of poultry shall be inspected at least once a day and for this purpose a source of light shall be available which is strong enough for each bird to be seen clearly and, if need be, thoroughly inspected.
9. Accommodation comprising more than three tiers of cages shall be permitted only if suitable devices or measures make it possible to inspect all tiers without difficulty.
10. For poultry appearing not to be in good health, including behavioural changes, steps shall be taken to establish the cause and appropriate remedial measures shall be implemented, e.g. treatment, isolation, culling or attention to environmental factors. If the cause is traced to an environmental factor in the production unit which it is not essential to remedy immediately, this should be corrected when the accommodation is emptied and before the next batch of poultry is put in.
11. All automatic equipment essential for the animals' health and welfare must be inspected at least once daily. Where defects are discovered these must be rectified immediately or, if this is impracticable, appropriate steps taken to safeguard the health and welfare of the animals until the defect has been rectified. Alternative ways of feeding and of maintaining a satisfactory environment must be available for use in the event of a breakdown.

There must be an alarm system to warn the stock-keeper of failure of any essential automated ventilation equipment.
12. Those parts of the cage which are in contact with the poultry shall be thoroughly cleansed and disinfected every time the cage is emptied and before a new batch of poultry is brought in. While the cage is occupied, the surfaces and all equipment shall be kept satisfactorily clean.
