DIRECTIVE 2002/46/EC OF THE EUROPEAN PARLIAMENT
AND OF THE COUNCIL
of 10 June 2002

on the approximation of the laws of the Member States relating to
food supplements

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE
EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and
in particular Article 95 thereof,

Having regard to the proposal from the Commission (1),

Having regard to the opinion of the Economic and Social
Committee (2),

Acting in accordance with the procedure laid down in Article 251 of the
Treaty (3),

Whereas:

(1) There is an increasing number of products marketed in the
Community as foods containing concentrated sources of
nutrients and presented for supplementing the intake of those
nutrients from the normal diet.

(2) Those products are regulated in Member States by differing
national rules that may impede their free movement, create
unequal conditions of competition, and thus have a direct
impact on the functioning of the internal market. It is therefore
necessary to adopt Community rules on those products marketed
as foodstuffs.

(3) An adequate and varied diet could, under normal circumstances,
provide all necessary nutrients for normal development and main-
tenance of a healthy life in quantities which meet those estab-
lished and recommended by generally acceptable scientific data.
However, surveys show that this ideal situation is not being
achieved for all nutrients and by all groups of the population
across the Community.

(4) Consumers, because of their particular lifestyles or for other
reasons, may choose to supplement their intake of some
nutrients through food supplements.

(5) In order to ensure a high level of protection for consumers and
facilitate their choice, the products that will be put on to the
market must be safe and bear adequate and appropriate labelling.

(6) There is a wide range of nutrients and other ingredients that
might be present in food supplements including, but not limited
to, vitamins, minerals, amino acids, essential fatty acids, fibre and
various plants and herbal extracts.

(7) As a first stage, this Directive should lay down specific rules for
vitamins and minerals used as ingredients of food supplements.
Food supplements containing vitamins or minerals as well as
other ingredients should also be in conformity with the specific
rules on vitamins and minerals laid down in this Directive.

(1) OJ C 311 E, 31.10.2000, p. 207 and
(3) Opinion of the European Parliament of 14 February 2001 (OJ C 276,
90 E, 16.4.2002, p. 1) and Decision of the European Parliament of 13 March
(8) Specific rules concerning nutrients, other than vitamins and minerals, or other substances with a nutritional or physiological effect used as ingredients of food supplements should be laid down at a later stage, provided that adequate and appropriate scientific data about them become available. Until such specific Community rules are adopted and without prejudice to the provisions of the Treaty, national rules concerning nutrients or other substances with nutritional or physiological effect used as ingredients of food supplements, for which no Community specific rules have been adopted, may be applicable.

(9) Only vitamins and minerals normally found in, and consumed as part of, the diet should be allowed to be present in food supplements although this does not mean that their presence therein is necessary. Controversy as to the identity of those nutrients that could potentially arise should be avoided. Therefore, it is appropriate to establish a positive list of those vitamins and minerals.

(10) There is a wide range of vitamin preparations and mineral substances used in the manufacture of food supplements currently marketed in some Member States that have not been evaluated by the Scientific Committee on Food and consequently are not included in the positive lists. These should be submitted to the European Food Safety Authority for urgent evaluation, as soon as appropriate files are presented by the interested parties.

(11) The chemical substances used as sources of vitamins and minerals in the manufacture of food supplements should be safe and also be available to be used by the body. For this reason, a positive list of those substances should also be established. Such substances as have been approved by the Scientific Committee on Food, on the basis of the said criteria, for use in the manufacture of foods intended for infants and young children and other foods for particular nutritional uses can also be used in the manufacture of food supplements.

(12) In order to keep up with scientific and technological developments it is important to revise the lists promptly, when necessary. Such revisions would be implementing measures of a technical nature and their adoption should be entrusted to the Commission in order to simplify and expedite the procedure.

(13) Excessive intake of vitamins and minerals may result in adverse effects and therefore necessitate the setting of maximum safe levels for them in food supplements, as appropriate. Those levels must ensure that the normal use of the products under the instructions of use provided by the manufacturer will be safe for the consumer.

(14) When maximum levels are set, therefore, account should be taken of the upper safe levels of the vitamins and minerals, as established by scientific risk assessment based on generally acceptable scientific data, and of intakes of those nutrients from the normal diet. Due account should also be taken of reference intake amounts when setting maximum levels.

(15) Food supplements are purchased by consumers for supplementing intakes from the diet. In order to ensure that this aim is achieved, if vitamins and minerals are declared on the label of food supplements, they should be present in the product in a significant amount.

(16) The adoption of the specific values for maximum and minimum levels for vitamins and minerals present in food supplements, based on the criteria set out in this Directive and appropriate scientific advice, would be an implementing measure and should be entrusted to the Commission.
(17) General labelling provisions and definitions are contained in Directive 2000/13/EC of the European Parliament and of the Council of 20 March 2000 on the approximation of the laws of the Member States relating to the labelling, presentation and advertising of foodstuffs (1), and do not need to be repeated. This Directive should therefore be confined to the necessary additional provisions.

(18) Council Directive 90/496/EEC of 24 September 1990 on nutrition labelling for foodstuffs (2) does not apply to food supplements. Information relating to nutrient content in food supplements is essential for allowing the consumer who purchases them to make an informed choice and use them properly and safely. That information should, in view of the nature of those products, be confined to the nutrients actually present and be compulsory.

(19) Given the particular nature of food supplements, additional means to those usually available to monitoring bodies should be available in order to facilitate efficient monitoring of those products.

(20) The measures necessary for the implementation of this Directive should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission (3),

HAVE ADOPTED THIS DIRECTIVE:

Article 1

1. This Directive concerns food supplements marketed as foodstuffs and presented as such. These products shall be delivered to the ultimate consumer only in a pre-packaged form.

Article 2

For the purposes of this Directive:

(a) ‘food supplements’ means foodstuffs the purpose of which is to supplement the normal diet and which are concentrated sources of nutrients or other substances with a nutritional or physiological effect, alone or in combination, marketed in dose form, namely forms such as capsules, pastilles, tablets, pills and other similar forms, sachets of powder, ampoules of liquids, drop dispensing bottles, and other similar forms of liquids and powders designed to be taken in measured small unit quantities;

(b) ‘nutrients’ means the following substances:

(i) vitamins,

(ii) minerals.

(1) OJ L 109, 6.5.2000, p. 29.
**Article 3**

Member States shall ensure that food supplements may be marketed within the Community only if they comply with the rules laid down in this Directive.

**Article 4**

1. Only vitamins and minerals listed in Annex I, in the forms listed in Annex II, may be used for the manufacture of food supplements, subject to paragraph 6.

2. The purity criteria for substances listed in Annex II to this Directive shall be adopted by the Commission, except where such criteria apply pursuant to paragraph 3. Those measures, designed to amend non-essential elements of this Directive by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 13(3).

3. Purity criteria for substances listed in Annex II, specified by Community legislation for their use in the manufacture of foodstuffs for purposes other than those covered by this Directive, shall apply.

4. For those substances listed in Annex II for which purity criteria are not specified by Community legislation, and until such specifications are adopted, generally acceptable purity criteria recommended by international bodies shall be applicable and national rules setting stricter purity criteria may be maintained.

5. Modifications to the lists referred to in paragraph 1, designed to amend non-essential elements of this Directive, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 13(3). On imperative grounds of urgency, the Commission may have recourse to the urgency procedure referred to in Article 13(4) in order to remove a vitamin or a mineral from the list referred to in paragraph 1 of this Article.

6. By way of derogation from paragraph 1 and until 31 December 2009, Member States may allow in their territory the use of vitamins and minerals not listed in Annex I, or in forms not listed in Annex II, provided that:
   
   (a) the substance in question is used in one or more food supplements marketed in the Community on the date of entry into force of this Directive,

   (b) the European Food Safety Authority has not given an unfavourable opinion in respect of the use of that substance, or its use in that form, in the manufacture of food supplements, on the basis of a dossier supporting use of the substance in question to be submitted to the Commission by the Member State not later than 12 July 2005.

7. Notwithstanding paragraph 6, Member States may, in compliance with the rules of the Treaty, continue to apply existing national restrictions or bans on trade in food supplements containing vitamins and minerals not included in the list in Annex I or in the forms not listed in Annex II.

8. Not later than 12 July 2007, the Commission shall submit to the European Parliament and the Council a report on the advisability of establishing specific rules, including, where appropriate, positive lists, on categories of nutrients or of substances with a nutritional or physiological effect other than those referred to in paragraph 1, accompanied by any proposals for amendment to this Directive which the Commission deems necessary.
Article 5

1. Maximum amounts of vitamins and minerals present in food supplements per daily portion of consumption as recommended by the manufacturer shall be set, taking the following into account:

(a) upper safe levels of vitamins and minerals established by scientific risk assessment based on generally accepted scientific data, taking into account, as appropriate, the varying degrees of sensitivity of different consumer groups;

(b) intake of vitamins and minerals from other dietary sources.

2. When the maximum levels referred to in paragraph 1 are set, due account should also be taken of reference intakes of vitamins and minerals for the population.

3. To ensure that significant amounts of vitamins and minerals are present in food supplements, minimum amounts per daily portion of consumption as recommended by the manufacturer shall be set, as appropriate.

Article 6

1. For the purposes of Article 5(1) of Directive 2000/13/EC, the name under which products covered by this Directive are sold shall be ‘food supplement’.

2. The labelling, presentation and advertising must not attribute to food supplements the property of preventing, treating or curing a human disease, or refer to such properties.

3. Without prejudice to Directive 2000/13/EC, the labelling shall bear the following particulars:

(a) the names of the categories of nutrients or substances that characterise the product or an indication of the nature of those nutrients or substances;

(b) the portion of the product recommended for daily consumption;

(c) a warning not to exceed the stated recommended daily dose;

(d) a statement to the effect that food supplements should not be used as a substitute for a varied diet;

(e) a statement to the effect that the products should be stored out of the reach of young children.

Article 7

The labelling, presentation and advertising of food supplements shall not include any mention stating or implying that a balanced and varied diet cannot provide appropriate quantities of nutrients in general.

Rules for implementing this Article may be specified in accordance with the procedure referred to in Article 13(2).
Article 8

1. The amount of the nutrients or substances with a nutritional or physiological effect present in the product shall be declared on the labelling in numerical form. The units to be used for vitamins and minerals shall be those specified in Annex I.

Rules for implementing this paragraph may be specified in accordance with the procedure referred to in Article 13(2).

2. The amounts of the nutrients or other substances declared shall be those per portion of the product as recommended for daily consumption on the labelling.

3. Information on vitamins and minerals shall also be expressed as a percentage of the reference values mentioned, as the case may be, in the Annex to Directive 90/496/EEC.

Article 9

1. The declared values mentioned in Article 8(1) and (2) shall be average values based on the manufacturer's analysis of the product.

Further rules for implementing this paragraph with regard in particular to the differences between the declared values and those established in the course of official checks shall be decided upon in accordance with the procedure referred to in Article 13(2).

2. The percentage of the reference values for vitamins and minerals mentioned in Article 8(3) may also be given in graphical form.

Rules for implementing this paragraph may be adopted in accordance with the procedure referred to in Article 13(2).

Article 10

To facilitate efficient monitoring of food supplements, Member States may require the manufacturer or the person placing the product on the market in their territory to notify the competent authority of that placing on the market by forwarding it a model of the label used for the product.

Article 11

1. Without prejudice to Article 4(7), Member States shall not, for reasons related to their composition, manufacturing specifications, presentation or labelling, prohibit or restrict trade in products referred to in Article 1 which comply with this Directive and, where appropriate, with Community acts adopted in implementation of this Directive.

2. Without prejudice to the Treaty, in particular Articles 28 and 30 thereof, paragraph 1 shall not affect national provisions which are applicable in the absence of Community acts adopted under this Directive.

Article 12

1. Where a Member State, as a result of new information or of a reassessment of existing information made since this Directive or one of the implementing Community acts was adopted, has detailed grounds for establishing that a product referred to in Article 1 endangers human health though it complies with the said Directive or said acts, that Member State may temporarily suspend or restrict application of the provisions in question within its territory. It shall immediately inform the other Member States and the Commission thereof and give reasons for its decision.
2. The Commission shall examine as soon as possible the grounds adduced by the Member State concerned and shall consult the Member States within the Standing Committee on the Food Chain and Animal Health, and shall then deliver its opinion without delay and take appropriate measures.

3. In order to remedy the difficulties described in paragraph 1 and to ensure the protection of human health, adaptations of this Directive or of its implementing measures shall be adopted by the Commission. Those measures, designed to amend non-essential elements of this Directive, *inter alia*, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 13(3). On imperative grounds of urgency, the Commission may have recourse to the urgency procedure referred to in Article 13(4) in order to adopt those adaptations. The Member State that has adopted safeguard measures may in that event retain such measures until the adoption of the adaptations.

**Article 13**

2. Where reference is made to this paragraph, Articles 5 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

The period provided for in Article 5(6) of Decision 1999/468/EC shall be set at three months.

3. Where reference is made to this paragraph, Article 5a(1) to (4) and Article 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

4. Where reference is made to this paragraph, Article 5a(1), (2), (4) and (6) and Article 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

**Article 14**

Provisions that may have an effect upon public health shall be adopted after consultation with the European Food Safety Authority.

**Article 15**

Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive by 31 July 2003. They shall forthwith inform the Commission thereof.

Those laws, regulations and administrative provisions shall be applied in such a way as to:

(a) permit trade in products complying with this Directive, from 1 August 2003 at the latest;

(b) prohibit trade in products which do not comply with the Directive, from 1 August 2005 at the latest.

When Member States adopt these measures, they shall contain a reference to this Directive or be accompanied by such a reference on the occasion of their official publication. The methods of making such reference shall be adopted by the Member States.

Article 16

This Directive shall enter into force on the day of its publication in the "Official Journal of the European Communities."

Article 17

This Directive is addressed to the Member States.
ANNEX I

Vitamins and minerals which may be used in the manufacture of food supplements

1. Vitamins
   - Vitamin A (µg RE)
   - Vitamin D (µg)
   - Vitamin E (mg α-TE)
   - Vitamin K (µg)
   - Vitamin B1 (mg)
   - Vitamin B2 (mg)
   - Niacin (mg NE)
   - Pantothenic acid (mg)
   - Vitamin B6 (mg)
   - Folic acid (µg) (1)
   - Vitamin B12 (µg)
   - Biotin (µg)
   - Vitamin C (mg)

2. Minerals
   - Calcium (mg)
   - Magnesium (mg)
   - Iron (mg)
   - Copper (µg)
   - Iodine (µg)
   - Zinc (mg)
   - Manganese (mg)
   - Sodium (mg)
   - Potassium (mg)
   - Selenium (µg)
   - Chromium (µg)
   - Molybdenum (µg)
   - Fluoride (mg)
   - Chloride (mg)
   - Phosphorus (mg)
   - Boron (mg)
   - Silicon (mg)

ANNEX II

Vitamin and mineral substances which may be used in the manufacture of food supplements

A. Vitamins

1. VITAMIN A
   (a) retinol
   (b) retinyl acetate
   (c) retinyl palmitate
   (d) beta-carotene

2. VITAMIN D
   (a) cholecalciferol
   (b) ergocalciferol

3. VITAMIN E
   (a) D-alpha-tocopherol
   (b) DL-alpha-tocopherol
   (c) D-alpha-tocopheryl acetate
   (d) DL-alpha-tocopheryl acetate
   (e) D-alpha-tocopheryl acid succinate
   (f) mixed tocopherols (1)
   (g) tocotrienol tocopherol (2)

4. VITAMIN K
   (a) phylloquinone (phytomenadione)
   (b) menaquinone (3)

5. VITAMIN B1
   (a) thiamin hydrochloride
   (b) thiamin mononitrate
   (c) thiamine monophosphate chloride
   (d) thiamine pyrophosphate chloride

6. VITAMIN B2
   (a) riboflavin
   (b) riboflavin 5′-phosphate, sodium

7. NIACIN
   (a) nicotinic acid
   (b) nicotinamide
   (c) inositol hexanicotinate (inositol hexaniacinate)

(1) alpha-tocopherol < 20 %, beta-tocopherol < 10 %, gamma-tocopherol 50-70 % and delta-tocopherol 10-30 %

(2) Typical levels of individual tocopherols and tocotrienols:
   — 115 mg/g alpha-tocopherol (101 mg/g minimum),
   — 5 mg/g beta-tocopherol (< 1 mg/g minimum),
   — 45 mg/g gamma-tocopherol (25 mg/g minimum),
   — 12 mg/g delta-tocopherol (3 mg/g minimum),
   — 67 mg/g alpha-tocotrienol (30 mg/g minimum),
   — < 1 mg/g beta-tocotrienol (< 1 mg/g minimum),
   — 82 mg/g gamma-tocotrienol (45 mg/g minimum),
   — 5 mg/g delta-tocotrienol (< 1 mg/g minimum),

(3) Menaquinone occurring principally as menaquinone-7 and, to a minor extent, menaquinone-6.
8. PANTOTHENIC ACID  
   (a) D-pantothenate, calcium  
   (b) D-pantothenate, sodium  
   (c) dexpanthenol  
   (d) pantethine  

9. VITAMIN B6  
   (a) pyridoxine hydrochloride  
   (b) pyridoxine 5′-phosphate  
   (c) pyridoxal 5′-phosphate  

10. FOLATE  
    (a) pteroylmonoglutamic acid  
    (b) calcium-L-methylfolate  

11. VITAMIN B12  
    (a) cyanocobalamin  
    (b) hydroxocobalamin  
    (c) 5′-deoxyadenosylcobalamin  
    (d) methylcobalamin  

12. BIOTIN  
    (a) D-biotin  

13. VITAMIN C  
    (a) L-ascorbic acid  
    (b) sodium-L-ascorbate  
    (c) calcium-L-ascorbate (1)  
    (d) potassium-L-ascorbate  
    (e) L-ascorbyl 6-palmitate  
    (f) magnesium L-ascorbate  
    (g) zinc L-ascorbate  

B. Minerals  
calcium acetate  
calcium L-ascorbate  
calcium bisglycinate  
calcium carbonate  
calcium chloride  
calcium citrate malate  
calcium salts of citric acid  
calcium gluconate  
calcium glycerophosphophate  
calcium lactate  
calcium pyruvate  
calcium salts of orthophosphoric acid  
calcium succinate  

(1) May contain up to 2 % of threonate.
 calcium hydroxide
 calcium L-lysinate
 calcium malate
 calcium oxide
 calcium L-pidolate
 calcium L-threonate
 calcium sulphate
 magnesium acetate
 magnesium L-ascorbate
 magnesium bisglycinate
 magnesium carbonate
 magnesium chloride
 magnesium salts of citric acid
 magnesium gluconate
 magnesium glycerophosphate
 magnesium salts of orthophosphoric acid
 magnesium lactate
 magnesium L-lysinate
 magnesium hydroxide
 magnesium malate
 magnesium oxide
 magnesium L-pidolate
 magnesium potassium citrate
 magnesium pyruvate
 magnesium succinate
 magnesium sulphate
 magnesium taurate
 magnesium acetyl taurate
 ferrous carbonate
 ferrous citrate
 ferric ammonium citrate
 ferrous gluconate
 ferrous fumarate
 ferric sodium diphosphate
 ferrous lactate
 ferrous sulphate
 ferric diphosphate (ferric pyrophosphate)
 ferric saccharate
 elemental iron (carbonyl + electrolytic + hydrogen reduced)
 ferrous biglycinate
 ferrous L-pidolate
 ferrous phosphate
 iron (II) taurate
 cupric carbonate
cupric citrate
cupric gluconate
cupric sulphate
copper L-aspartate
copper bisglycinate
copper lysine complex
copper (II) oxide
sodium iodide
sodium iodate
potassium iodide
potassium iodate
zinc acetate
zinc L-ascorbate
zinc L-aspartate
zinc bisglycinate
zinc chloride
zinc citrate
zinc gluconate
zinc lactate
zinc L-lysinate
zinc malate
zinc mono-L-methionine sulphate
zinc oxide
zinc carbonate
zinc L-pidonolate
zinc picolinate
zinc sulphate
manganese ascorbate
manganese L-aspartate
manganese bisglycinate
manganese carbonate
manganese chloride
manganese citrate
manganese gluconate
manganese glycerophosphate
manganese pidolate
manganese sulphate
sodium bicarbonate
sodium carbonate
sodium chloride
sodium citrate
sodium gluconate
sodium lactate
sodium hydroxide
sodium salts of orthophosphoric acid
potassium bicarbonate
potassium carbonate
potassium chloride
potassium citrate
potassium gluconate
potassium glycerophosphate
potassium lactate
potassium hydroxide
potassium L-pidolate
potassium malate
potassium salts of orthophosphoric acid
L-selenomethionine
selenium enriched yeast (1)
selenious acid
sodium selenate
sodium hydrogen selenite
sodium selenite
chromium (III) chloride
chromium (III) lactate trihydrate
chromium nitrate
chromium picolinate
chromium (III) sulphate
ammonium molybdate (molybdenum (VI))
potassium molybdate (molybdenum (VI))
sodium molybdate (molybdenum (VI))
calcium fluoride
potassium fluoride
sodium fluoride
sodium monofluorophosphate
boric acid
sodium borate
choline-stabilised orthosilicic acid
silicon dioxide
silicic acid (2)

(1) Selenium-enriched yeasts produced by culture in the presence of sodium selenite as selenium source and containing, in the dried form as marketed, not more than 2.5 mg Se/g. The predominant organic selenium species present in the yeast is selenomethionine (between 60 and 85 % of the total extracted selenium in the product). The content of other organic selenium compounds including selenocysteine shall not exceed 10 % of total extracted selenium. Levels of inorganic selenium normally shall not exceed 1 % of total extracted selenium.

(2) In the form of gel.
