

ANNEX I U.K.

REQUIREMENTS APPLICABLE TO HOLDINGS

In addition to the relevant provisions of other relevant Community legislation, the following requirements shall apply:

Drinkers

1. Drinkers shall be positioned and maintained in such a way that spillage is minimised.

Feeding

2. Feed shall be either continuously available or be meal fed and must not be withdrawn from chickens more than 12 hours before the expected slaughter time.

Litter

3. All chickens shall have permanent access to litter which is dry and friable on the surface.

Ventilation and heating

4. Ventilation shall be sufficient to avoid overheating and, where necessary, in combination with heating systems to remove excessive moisture.

Noise

5. The sound level shall be minimised. Ventilation fans, feeding machinery or other equipment shall be constructed, placed, operated and maintained in such a way that they cause the least possible amount of noise.

Light

6. All buildings shall have lighting with an intensity of at least 20 lux during the lighting periods, measured at bird eye level and illuminating at least 80 % of the useable area. A temporary reduction in the lighting level may be allowed when necessary following veterinary advice.

7. Within seven days from the time when the chickens are placed in the building and until three days before the foreseen time of slaughter, the lighting must follow a 24-hour rhythm and include periods of darkness lasting at least six hours in total, with at least one uninterrupted period of darkness of at least four hours, excluding dimming periods.

Inspection

8. All chickens kept on the holding must be inspected at least twice a day. Special attention should be paid to signs indicating a reduced level of animal welfare and/or animal health.
9. Chickens that are seriously injured or show evident signs of health disorder, such as those having difficulties in walking, severe ascites or severe malformations, and are likely to suffer, shall receive appropriate treatment or be culled immediately. A veterinarian shall be contacted whenever necessary.

Cleaning

10. Those parts of buildings, equipment or utensils which are in contact with the chickens shall be thoroughly cleaned and disinfected every time after final depopulation is carried out, before a new flock is introduced into the house. After the final depopulation of a house, all litter must be removed, and clean litter must be provided.

Record keeping

11. The owner or keeper shall maintain a record for each house of a holding of: U.K.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- (a) the number of chickens introduced;
- (b) the useable area;
- (c) the hybrid or breed of the chickens, if known;
- (d) by each control, the number of birds found dead with an indication of the causes, if known as well as the number of birds culled with cause;
- (e) the number of chickens remaining in the flock following the removal of chickens for sale or for slaughter.

Those records shall be retained for a period of at least three years and shall be made available to the competent authority when carrying out an inspection or when otherwise requested.

Surgical interventions

12. All surgical interventions carried out for reasons other than therapeutic or diagnostic purposes which result in damage to or the loss of a sensitive part of the body or the alteration of bone structure shall be prohibited. **U.K.**

However, beak trimming may be authorised by Member States when other measures to prevent feather pecking and cannibalism are exhausted. In such cases, it shall be carried out only after consultation and on the advice of a veterinarian and shall be carried out by qualified staff on chickens that are less than 10 days old. In addition, Member States may authorise the castration of chickens. The castration shall only be carried out under veterinary supervision by personnel who have received a specific training.
