

Council Directive 2008/114/EC of 8 December 2008 on the identification and designation of European critical infrastructures and the assessment of the need to improve their protection (Text with EEA relevance)

Article 7

Reporting

1 Each Member State shall conduct a threat assessment in relation to ECI subsectors within one year following the designation of critical infrastructure on its territory as an ECI within those subsectors.

2 Each Member State shall report every two years to the Commission generic data on a summary basis on the types of risks, threats and vulnerabilities encountered per ECI sector in which an ECI has been designated pursuant to Article 4 and is located on its territory.

A common template for these reports may be developed by the Commission in cooperation with the Member States.

Each report shall be classified at an appropriate level as deemed necessary by the originating Member State.

3 Based on the reports referred to in paragraph 2, the Commission and the Member States shall assess on a sectoral basis whether further protection measures at Community level should be considered for ECIs. This process shall be undertaken in conjunction with the review of this Directive as laid down in Article 11.

4 Common methodological guidelines for carrying out risk analyses in respect of ECIs may be developed by the Commission in cooperation with the Member States. The use of such guidelines shall be optional for the Member States.
