

Directive 2009/126/EC of the European Parliament and of
the Council of 21 October 2009 on Stage II petrol vapour
recovery during refuelling of motor vehicles at service stations

DIRECTIVE 2009/126/EC OF THE EUROPEAN
PARLIAMENT AND OF THE COUNCIL

of 21 October 2009

on Stage II petrol vapour recovery during
refuelling of motor vehicles at service stations

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 175(1) thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Economic and Social Committee⁽¹⁾,

After consulting the Committee of the Regions,

Acting in accordance with the procedure laid down in Article 251 of the Treaty⁽²⁾,

Whereas:

- (1) Decision No 1600/2002/EC of the European Parliament and of the Council of 22 July 2002 laying down the Sixth Community Environment Action Programme⁽³⁾ established the need to reduce air pollution to levels which minimise harmful effects on human health and the environment.
- (2) The Geneva Protocol on the control of emissions of volatile organic compounds or their transboundary fluxes sets emission reduction targets for volatile organic compounds (VOCs) and the Gothenburg Protocol to abate acidification, eutrophication and ground-level ozone⁽⁴⁾ sets emission ceilings for four pollutants — sulphur dioxide, nitrogen oxides, VOCs and ammonia — and requires best available techniques to be used to keep emissions down.
- (3) Directive 2008/50/EC of the European Parliament and of the Council of 21 May 2008 on ambient air quality and cleaner air for Europe⁽⁵⁾ lays down air quality objectives for ground-level ozone and benzene and Directive 2001/81/EC of the European Parliament and of the Council of 23 October 2001 on national emission ceilings for certain atmospheric pollutants⁽⁶⁾ lays down national emission ceilings for VOCs which contribute to the formation of ground-level ozone. Emissions of VOCs, including petrol vapour, in one Member State can contribute to air quality problems in other Member States.
- (4) Ozone is also a greenhouse gas and contributes to atmospheric warming and climate change.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- (5) Directive 94/63/EC of the European Parliament and of the Council of 20 December 1994 on the control of volatile organic compound (VOC) emissions resulting from the storage of petrol and its distribution from terminals to service stations⁽⁷⁾ (Stage I petrol vapour recovery) aims to recover petrol vapour emitted from the storage and distribution of petrol between oil terminals and service stations.
- (6) Petrol vapour is also emitted during the refuelling of motor vehicles at service stations and should be recovered in a manner consistent with the provisions of Directive 94/63/EC.
- (7) Various Community instruments have been developed and implemented to limit VOC emissions. However, further action is necessary to achieve the objectives for health and the environment established in the Sixth Community Environmental Action Programme and Directive 2001/81/EC.
- (8) With a view to reducing lifecycle greenhouse gas emissions from road transport fuels, Directive 98/70/EC of the European Parliament and of the Council of 13 October 1998 relating to the quality of petrol and diesel fuels⁽⁸⁾ will, from 1 January 2011, permit the placing on the market of petrol containing a larger proportion of biofuel components than was previously the case. This may lead to an increase in VOC emissions, because of the possibility for Member States to implement limited derogations from the vapour pressure requirements of that Directive.
- (9) Existing service stations may need to adapt existing infrastructure and it is preferable to install vapour recovery equipment when they undergo major refurbishment of the fuelling system (that is to say, significant alteration or renewal of the station infrastructure, particularly tanks and pipes), since this significantly reduces the cost of the necessary adaptations. However, larger existing stations are better able to adapt and should install petrol vapour recovery earlier, given that they make a greater contribution to emissions. New service stations can integrate petrol vapour recovery equipment during the design and construction of the service station and can therefore install such equipment immediately.
- (10) The fuel tanks of newly manufactured motor vehicles contain no petrol vapour. A derogation is therefore appropriate for the first fuelling of such vehicles.
- (11) Although several Member States have national requirements concerning Stage II petrol vapour recovery systems, there is no Community legislation. Therefore, it is appropriate to establish a uniform minimum level of petrol vapour recovery in order to deliver a high level of environmental benefit and to facilitate trade in petrol vapour recovery equipment.
- (12) Periodic checks of all installed Stage II petrol vapour recovery equipment should be performed in order to ensure that petrol vapour recovery equipment produces real reductions in emissions. Member States may decide that checks are to be performed by one or more of the following: official inspection services, the operator itself or a third party. In the case of official inspections, Member States should have regard to Recommendation 2001/331/EC of the European Parliament and of the Council of

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- 4 April 2001 providing for minimum criteria for environmental inspections in the Member States⁽⁹⁾.
- (13) Stage II petrol vapour recovery equipment should be tested regularly. The European Committee for Standardisation (CEN) should be encouraged to develop a harmonised testing methodology.
- (14) Member States should lay down rules on penalties applicable to infringements of the national provisions adopted pursuant to this Directive and ensure that they are implemented. Those penalties should be effective, proportionate and dissuasive, since non-compliance can result in damage to human health and the environment.
- (15) In accordance with point 34 of the Interinstitutional Agreement on better law-making⁽¹⁰⁾, Member States are encouraged to draw up, for themselves and in the interests of the Community, their own tables illustrating, as far as possible, the correlation between this Directive and the transposition measures, and to make them public.
- (16) Since it is adopted pursuant to Article 175 of the Treaty, this Directive does not prevent Member States from maintaining or introducing more stringent protective measures that are compatible with the Treaty. Pursuant to Article 176 of the Treaty, Member States are to notify the Commission of any such measures.
- (17) The measures necessary for the implementation of this Directive should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission⁽¹¹⁾.
- (18) In particular, the Commission should be empowered to adopt implementing measures concerning harmonised methods and standards. Since those measures are of general scope and are designed to amend non-essential elements of this Directive, inter alia, by supplementing it with new non-essential elements, they must be adopted in accordance with the regulatory procedure with scrutiny provided for in Article 5a of Decision 1999/468/EC.
- (19) Since the objective of this Directive, namely to reduce emissions of petrol vapour to the atmosphere, cannot be sufficiently achieved by the Member States and can therefore, due to the transboundary nature of air pollution, be better achieved at Community level, the Community may adopt measures in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty. In accordance with the principle of proportionality as set out in that Article, this Directive does not go beyond what is necessary in order to achieve that objective,

HAVE ADOPTED THIS DIRECTIVE:

Article 1

Subject matter

This Directive lays down measures aimed at reducing the amount of petrol vapour emitted to the atmosphere during the refuelling of motor vehicles at service stations.

Article 2

Definitions

For the purposes of this Directive:

1. 'petrol' means petrol as defined in Article 2(a) of Directive 94/63/EC;
2. 'petrol vapour' means any gaseous compound which evaporates from petrol;
3. 'service station' means a service station as defined in Article 2(f) of Directive 94/63/EC;
4. 'existing service station' means a service station which is built or for which an individual planning permission, construction licence or operating licence is granted before 1 January 2012;
5. 'new service station' means a service station which is built or for which an individual planning permission, construction licence or operating licence is granted on or after 1 January 2012;
6. 'Stage II petrol vapour recovery system' means equipment aimed at recovering the petrol vapour displaced from the fuel tank of a motor vehicle during refuelling at a service station and which transfers that petrol vapour to a storage tank at the service station or back to the petrol dispenser for resale;
7. 'petrol vapour capture efficiency' means the amount of petrol vapour captured by the Stage II petrol vapour recovery system compared to the amount of petrol vapour that would otherwise be emitted to the atmosphere in the absence of such a system and expressed as a percentage;
8. 'vapour/petrol ratio' means the ratio between the volume at atmospheric pressure of petrol vapour passing through the Stage II petrol vapour recovery system and the volume of petrol dispensed;
9. 'throughput' means the total annual quantity of petrol unloaded from mobile containers into a service station.

Article 3

Service stations

- 1 Member States shall ensure that any new service station shall be equipped with a Stage II petrol vapour recovery system if:
 - a its actual or intended throughput is greater than 500 m³/year; or
 - b its actual or intended throughput is greater than 100 m³/year and it is situated under permanent living quarters or working areas.
- 2 Member States shall ensure that any existing service station which undergoes a major refurbishment shall be equipped with a Stage II petrol vapour recovery system at the time of the refurbishment if:
 - a its actual or intended throughput is greater than 500 m³/year; or

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

b its actual or intended throughput is greater than 100 m³/year and it is situated under permanent living quarters or working areas.

3 Member States shall ensure that any existing service station with a throughput in excess of 3 000 m³/year shall be equipped with a Stage II petrol vapour recovery system by no later than 31 December 2018.

4 Paragraphs 1, 2 and 3 shall not apply to service stations exclusively used in association with the construction and delivery of new motor vehicles.

Article 4

Minimum level of petrol vapour recovery

[^{F1} Member States shall ensure, with effect from the date on which Stage II petrol vapour recovery systems become mandatory pursuant to Article 3, that the petrol vapour capture efficiency of such systems is equal to or greater than 85 % as certified by the manufacturer in accordance with Standard EN 16321-1:2013.]

2 With effect from the date on which Stage II petrol vapour recovery systems become mandatory pursuant to Article 3, where the recovered petrol vapour is transferred to a storage tank at the service station, the vapour/petrol ratio shall be equal to or greater than 0,95 but less than or equal to 1,05.

Textual Amendments

F1 Substituted by [Commission Directive 2014/99/EU of 21 October 2014 amending, for the purposes of its adaptation to technical progress, Directive 2009/126/EC on Stage II petrol vapour recovery during refuelling of motor vehicles at service stations.](#)

Article 5

Periodic checks and consumer information

[^{F1} Member States shall ensure that the in-service petrol vapour capture efficiency of Stage II petrol vapour recovery systems is tested at least once each year in accordance with Standard EN 16321-2:2013.]

2 Where an automatic monitoring system has been installed, Member States shall ensure that the petrol vapour capture efficiency is tested at least once every three years. Any such automatic monitoring system shall automatically detect faults in the proper functioning of the Stage II petrol vapour recovery system and in the automatic monitoring system itself, indicate faults to the service station operator and automatically stop the flow of petrol from the faulty dispenser if the fault is not rectified within seven days.

3 When a service station has installed a Stage II petrol vapour recovery system, Member States shall ensure that it displays a sign, sticker or other notification on, or in the vicinity of, the petrol dispenser, informing consumers of that fact.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

Textual Amendments

- F1** Substituted by [Commission Directive 2014/99/EU of 21 October 2014 amending, for the purposes of its adaptation to technical progress, Directive 2009/126/EC on Stage II petrol vapour recovery during refuelling of motor vehicles at service stations.](#)

Article 6

Penalties

Member States shall lay down the rules on penalties applicable to infringements of the national provisions adopted pursuant to this Directive and shall take all measures necessary to ensure that they are implemented. The penalties provided for must be effective, proportionate and dissuasive. Member States shall notify those provisions to the Commission by 1 January 2012 and shall notify it without delay of any subsequent amendment affecting them.

Article 7

Review

The Commission shall, by 31 December 2014, review the implementation of this Directive and, in particular:

- (a) the 100 m³/year threshold referred to in Article 3(1)(b) and (2)(b) of this Directive and Article 6(3) of Directive 94/63/EC;
- (b) the in-service compliance record of Stage II petrol vapour recovery systems; and
- (c) the need for automatic monitoring equipment.

It shall report the results of that review to the European Parliament and to the Council accompanied, if appropriate, by a legislative proposal.

^{F2}Article 8

Technical adaptations

The Commission is empowered to adopt delegated acts in accordance with Article 8a amending Articles 4 and 5 to adapt them to technical progress where necessary to ensure consistency with any relevant standard drawn up by the European Committee for Standardisation (CEN).

The delegation of power referred to in the first paragraph shall not apply to the petrol vapour capture efficiency and vapour/petrol ratio specified in Article 4 and the time periods specified in Article 5.]

Textual Amendments

- F2** Substituted by [Regulation \(EU\) 2019/1243 of the European Parliament and of the Council of 20 June 2019 adapting a number of legal acts providing for the use of the regulatory procedure with scrutiny](#)

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

to Articles 290 and 291 of the Treaty on the Functioning of the European Union (Text with EEA relevance).

[^{F3} Article 8a

Exercise of the delegation

1 The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.

2 The power to adopt delegated acts referred to in Article 8 shall be conferred on the Commission for a period of five years from 26 July 2019. The Commission shall draw up a report in respect of the delegation of power not later than nine months before the end of the five-year period. The delegation of power shall be tacitly extended for periods of an identical duration, unless the European Parliament or the Council opposes such extension not later than three months before the end of each period.

3 The delegation of power referred to in Article 8 may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4 Before adopting a delegated act, the Commission shall consult experts designated by each Member State in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making⁽¹²⁾.

5 As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

6 A delegated act adopted pursuant to Article 8 shall enter into force only if no objection has been expressed either by the European Parliament or the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.]

Textual Amendments

- F3** Inserted by Regulation (EU) 2019/1243 of the European Parliament and of the Council of 20 June 2019 adapting a number of legal acts providing for the use of the regulatory procedure with scrutiny to Articles 290 and 291 of the Treaty on the Functioning of the European Union (Text with EEA relevance).

^{F4} Article 9

[^{F4} Committee procedure]

.....

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

Textual Amendments

- F4** Deleted by [Regulation \(EU\) 2019/1243](#) of the European Parliament and of the Council of 20 June 2019 adapting a number of legal acts providing for the use of the regulatory procedure with scrutiny to Articles 290 and 291 of the Treaty on the Functioning of the European Union (Text with EEA relevance).

Article 10

Transposition

1 Member States shall bring into force the laws, regulations, and administrative provisions necessary to comply with this Directive before 1 January 2012. They shall forthwith communicate to the Commission the text of those measures.

When Member States adopt those measures, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. The methods of making such reference shall be laid down by Member States.

2 Member States shall communicate to the Commission the text of the main provisions of national law which they adopt in the field covered by this Directive.

Article 11

Entry into force

This Directive shall enter into force on the day of its publication in the *Official Journal of the European Union*.

Article 12

Addressees

This Directive is addressed to the Member States.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- (1) Opinion of 13 May 2009 (not yet published in the Official Journal).
- (2) Opinion of the European Parliament of 5 May 2009 (not yet published in the Official Journal) and Council Decision of 24 September 2009.
- (3) [OJ L 242, 10.9.2002, p. 1.](#)
- (4) [OJ L 179, 17.7.2003, p. 3.](#)
- (5) [OJ L 152, 11.6.2008, p. 1.](#)
- (6) [OJ L 309, 27.11.2001, p. 22.](#)
- (7) [OJ L 365, 31.12.1994, p. 24.](#)
- (8) [OJ L 350, 28.12.1998, p. 58.](#)
- (9) [OJ L 118, 27.4.2001, p. 41.](#)
- (10) [OJ C 321, 31.12.2003, p. 1.](#)
