

Directive 2014/17/EU of the European Parliament and of the Council of 4 February 2014 on credit agreements for consumers relating to residential immovable property and amending Directives 2008/48/EC and 2013/36/EU and Regulation (EU) No 1093/2010 (Text with EEA relevance)

CHAPTER 5

**ANNUAL PERCENTAGE RATE OF CHARGE**

*Article 17*

**Calculation of the APRC**

1 The APRC shall be calculated in accordance with the mathematical formula set out in Annex I.

2 The costs of opening and maintaining a specific account, of using a means of payment for both transactions and drawdowns on that account and of other costs relating to payment transactions shall be included in the total cost of credit to the consumer whenever the opening or maintaining of an account is obligatory in order to obtain the credit or to obtain it on the terms and conditions marketed.

3 The calculation of the APRC shall be based on the assumption that the credit agreement is to remain valid for the period agreed and that the creditor and the consumer will fulfil their obligations under the terms and by the dates specified in the credit agreement.

4 In the case of credit agreements containing clauses allowing variations in the borrowing rate and, where applicable, in the charges contained in the APRC but unquantifiable at the time of calculation, the APRC shall be calculated on the assumption that the borrowing rate and other charges will remain fixed in relation to the level set at the conclusion of the contract.

5 For credit agreements for which a fixed borrowing rate is agreed in relation to the initial period of at least five years, at the end of which a negotiation on the borrowing rate takes place to agree on a new fixed rate for a further material period, the calculation of the additional, illustrative APRC disclosed in the ESIS shall cover only the initial fixed rate period and shall be based on the assumption that, at the end of the fixed borrowing rate period, the capital outstanding is repaid.

6 Where the credit agreement allows for variations in the borrowing rate, Member States shall ensure that the consumer is informed of the possible impacts of variations on the amounts payable and on the APRC at least by means of the ESIS. This shall be done by providing the consumer with an additional APRC which illustrates the possible risks linked to a significant increase in the borrowing rate. Where the borrowing rate is not capped, this information shall be accompanied by a warning highlighting that the total cost of the credit to the consumer, shown by the APRC, may change. This provision shall not apply to credit agreements where the borrowing rate is fixed for an initial period of at least five years, at the end of which a negotiation on the borrowing rate takes place in order to agree on a new fixed rate for a further material period, for which an additional, illustrative APRC is provided for in the ESIS.

7 Where applicable, the additional assumptions set out in Annex I shall be used in calculating the APRC.

---

**Status:** EU Directives are being published on this site to aid cross referencing from UK legislation. After  
IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

---

8 The Commission shall be empowered to adopt delegated acts in accordance with Article 40 in order to amend the remarks or update the assumptions used to calculate the APRC as set out in Annex I, in particular if the remarks or assumptions set out in this Article and in Annex I do not suffice to calculate the APRC in a uniform manner or are no longer adapted to the commercial situation on the market.
