**COUNCIL REGULATION (EEC) No 2377/90**

**of 26 June 1990**

**laying down a Community procedure for the establishment of maximum residue limits of veterinary medicinal products in foodstuffs of animal origin**

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 43 thereof,

Having regard to the proposal from the Commission (<sup>(1)</sup>),

Having regard to the opinion of the European Parliament (<sup>(2)</sup>),

Having regard to the opinion of the Economic and Social Committee (<sup>(3)</sup>),

Whereas the use of veterinary medicinal products in food-producing animals may result in the presence of residues of foodstuffs obtained from treated animals;

Whereas as a result of scientific and technical progress it is possible to detect the presence of residues of veterinary medicines in foodstuffs at ever lower levels; whereas it is therefore necessary to establish maximum residue limits for pharmacologically active substances which are used in veterinary medicinal products in respect of all the various foodstuffs of animal origin, including meat, fish, milk, eggs and honey;

Whereas in order to protect public health, maximum residue limits must be established in accordance with generally recognized principles of safety assessment, taking into account any other scientific assessment of the safety of the substances concerned which may have been undertaken by international organizations, in particular the Codex Alimentarius or, where such substances are used for other purposes, by other scientific committees established within the Community;

Whereas the use of veterinary medicinal products plays an important part in agricultural production; whereas the establishment of maximum residue levels will facilitate the marketing of foodstuffs of animal origin;

Whereas the establishment of different maximum residue levels by Member States may hinder the free movement of foodstuffs and of veterinary medicinal products themselves;

Whereas it is therefore necessary to lay down a procedure for the establishment of maximum residue levels of veterinary medicinal products by the Community, following a single scientific assessment of the highest possible quality;

Whereas the need for the establishment of maximum residue levels throughout the Community is recognized in the Community rules relating to trade in foodstuffs of animal origin;

Whereas provisions must be adopted with a view to the systematic establishment of maximum residue levels for new substances capable of pharmacological action intended for administration to food-producing animals;

Whereas arrangements must also be made for the establishment of maximum residue levels for substances which are currently used in

(<sup>1</sup>) OJ No C 61, 10. 3. 1989. p. 5.

(<sup>2</sup>) OJ No C 96, 17. 4. 1990, p. 273.

(<sup>3</sup>) OJ No C 201, 17. 8. 1989, p. 1.

**▼B**

veterinary medicines administered to food-producing animals; whereas, however, in view of the complexity of this matter and the large number of substances involved, long transitional arrangements are required;

Whereas, after scientific assessment by the Committee for Veterinary Medicinal Products, maximum residue levels must be adopted by a rapid procedure which ensures close cooperation between the Commission and the Member States through the Committee set up under Council Directive 81/852/EEC of 28 September 1981 on the approximation of the laws of the Member States relating to analytical, pharmaco-toxicological and clinical standards and protocols in respect of the testing of veterinary medicinal products (<sup>(1)</sup>), as last amended by Directive 87/20/EEC (<sup>(2)</sup>); whereas an urgent procedure is also required to ensure the swift review of any tolerance which might prove insufficient to protect public health;

Whereas medicinally induced immunological responses are usually indistinguishable from those which arise naturally, and do not affect consumers of food of animal origin;

Whereas the information necessary to assess the safety of residues should be presented in accordance with the principles laid down by Directive 81/852/EEC,

HAS ADOPTED THIS REGULATION:

*Article 1*

1. For the purposes of this Regulation, the following definitions shall apply:

- (a) ‘residues of veterinary medicinal products’: means all pharmacologically active substances, whether active principles, excipients or degradation products, and their metabolites which remain in food-stuffs obtained from animals to which the veterinary medicinal product in question has been administered;
- (b) ‘maximum residue limit’: means the maximum concentration of residue resulting from the use of a veterinary medicinal product (expressed in mg/kg or µg/kg on a fresh weight basis) which may be accepted by the Community to be legally permitted or recognized as acceptable in or on a food.

It is based on the type and amount of residue considered to be without any toxicological hazard for human health as expressed by the acceptable daily intake (ADI), or on the basis of a temporary ADI that utilizes an additional safety factor. It also takes into account other relevant public health risks as well as food technology aspects.

When establishing a maximum residue limit (MRL), consideration is also given to residues that occur in food of plant origin and/or come from the environment. Furthermore, the MRL may be reduced to be consistent with good practices in the use of veterinary drugs and to the extent that practical analytical methods are available.

2. This Regulation shall not apply to active principles of biological origin intended to produce active or passive immunity or to diagnose a state of immunity used in immunological veterinary medicinal products.

*Article 2*

The list of pharmacologically active substances used in veterinary medicinal products in respect of which maximum residue limits have

(<sup>1</sup>) OJ No L 317, 6. 11. 1981, p. 16.

(<sup>2</sup>) OJ No L 15, 17. 1. 1987, p. 34.

**▼B**

been established shall be contained in Annex I, which shall be adopted in accordance with the procedure laid down in Article 8. Except as provided for in Article 9, any amendments to Annex I shall be adopted in accordance with the same procedure.

*Article 3*

Where, following an evaluation of a pharmacologically active substance used in veterinary medicinal products, it appears that it is not necessary for the protection of public health to establish a maximum residue limit, that substance shall be included in a list in Annex II, which shall be adopted in accordance with the procedure laid down in Article 8. Except as provided for in Article 9, any amendments to Annex II shall be adopted in accordance with the same procedure.

*Article 4*

A provisional maximum residue limit may be established for a pharmacologically active substance used in veterinary medicinal products on the date of entry into force of this Regulation, provided that there are no grounds for supposing that residues of the substance concerned at the level proposed present a hazard for the health of the consumer. A provisional maximum residue limit shall apply for a defined period of time, which shall not exceed five years. That period may be extended once only in exceptional cases for a period not in excess of two years if that proves expedient for the completion of scientific studies in progress.

In exceptional circumstances, a provisional maximum residue limit may also be established for a pharmacologically active substance not previously used in veterinary medicinal products on the date of entry into force of this Regulation provided that there are no grounds for supposing that residues of the substance concerned at the limit proposed present a hazard for the health of the consumer.

The list of pharmacologically active substances used in veterinary medicinal products in respect of which provisional maximum residue limits have been established shall be contained in Annex III, which shall be adopted in accordance with the procedure laid down in Article 8. Except as provided for in Article 9, any amendments to Annex III shall be adopted in accordance with the same procedure.

*Article 5*

Where it appears that a maximum residue limit cannot be established in respect of a pharmacologically active substance used in veterinary medicinal products because residues of the substances concerned, at whatever limit, in foodstuffs of animal origin constitute a hazard to the health of the consumer, that substance shall be included in a list in Annex IV, which shall be adopted in accordance with the procedure laid down in Article 8. Except as provided for in Article 9, any amendments to Annex IV shall be adopted in accordance with the same procedure.

The administration of the substances listed in Annex IV to food-producing animals shall be prohibited throughout the Community.

**▼M64***Article 6*

1. In order to obtain the inclusion in Annexes I, II or III of a pharmacologically active substance which is intended for use in veterinary medicinal products for administration to food-producing animals, an application to establish a maximum residue limit shall be submitted to

**▼M64**

the European Agency for the Evaluation of Medicinal Products set up by Council Regulation (EEC) No 2309/93<sup>(1)</sup>, hereinafter referred to as 'the Agency'.

This application shall contain the information and particulars referred to in Annex V of this Regulation and shall conform with the principles laid down in Directive 81/852/EEC.

2. The application shall also be accompanied by the fee payable to the Agency.

*Article 7*

1. The Committee for Veterinary Medicinal Products referred to in Article 27 of Regulation (EC) No 2309/93 (hereinafter 'the Committee') shall be responsible for formulating the Agency's opinion on the classification of substances referred to in Annexes I, II, III or IV to this Regulation.

2. Articles 52 and 53 of Regulation (EEC) No 2309/93 shall be applicable for the purposes of this Regulation.

3. The Agency shall ensure that the Committee's opinion is delivered within a period of 120 days following the reception of a valid application.

If the information submitted by the applicant is not sufficient to enable such an opinion to be prepared, the Committee may ask the applicant to supply additional information within a specific time limit. The deadline for the opinion shall then be deferred until the additional information has been received.

4. The Agency shall forward the opinion to the applicant. Within 15 days of receipt of the opinion, the applicant may provide written notice to the Agency that he wishes to appeal. In that case he shall forward the detailed grounds for his appeal to the Agency within 60 days of receipt of the opinion. Within 60 days of the receipt of the grounds for appeal, the Committee shall consider whether its opinion should be revised and the reasons for the conclusion reached on the appeal shall be annexed to the report referred to in paragraph 5.

5. The Agency shall forward the definitive opinion of the Committee within 30 days of its adoption both to the Commission and to the applicant. The opinion shall be accompanied by a report describing the safety evaluation of the substance by the Committee, which shall give the grounds for its conclusions.

6. The Commission shall prepare draft measures taking account of Community legislation and shall start the procedure provided for in Article 8. The Committee referred to in Article 8 shall adapt its rules of procedure in order to take account of the tasks conferred on it by this Regulation.

**▼M104***Article 8*

1. The Commission shall be assisted by the Standing Committee on Veterinary Medicinal Products.

2. Where reference is made to this Article, Articles 5 and 7 of Decision 1999/468/EC<sup>(2)</sup> shall apply.

The period laid down in Article 5(6) of Decision 1999/468/EC shall be set at three months.

3. The Standing Committee shall adopt its Rules of Procedure.

<sup>(1)</sup> OJ L 214, 24.8.1993, p. 1

<sup>(2)</sup> OJ L 184, 17.7.1999, p. 23.

**▼B***Article 9*

1. Where a Member State, as a result of new information or a reassessment of existing information, considers that the urgent amendment of a provision contained in Annexes I to IV is necessary in order to protect human or animal health, and therefore requires swift action to be taken, that Member State may temporarily suspend the operation of the provision concerned in its own territory. In that case, it shall immediately notify the other Member States and the Commission of the measures, attaching a statement of the reasons therefor.
2. ►M64 The Commission shall as soon as possible examine the grounds given by the Member State concerned and, after consulting the Committee for Veterinary Medicinal Products, it shall then deliver its opinion forthwith and take appropriate measures; the person responsible for marketing may be requested to provide the Committee with oral or written explanations ◀. The Commission shall immediately notify the Council and the Member States of any measures taken. Any Member State may refer the Commission's measures to the Council within 15 days of such notification. The Council, acting by a qualified majority, may take a different decision within 30 days of the date on which the matter was referred to it.

3. If the Commission considers that it is necessary to amend the provision of Annex I to IV concerned in order to resolve the difficulties referred to in paragraph 1 and to ensure the protection of human health, it shall initiate the procedure laid down in Article 10 with a view to adopting those amendments; the Member State which has taken measures under paragraph 1 may maintain them until the Council or the Commission has taken a decision in accordance with the above-mentioned procedure.

**▼M104***Article 10*

1. The Commission shall be assisted by the Standing Committee on Veterinary Medicinal Products.
2. Where reference is made to this Article, Articles 5 and 7 of Decision 1999/468/EC shall apply.

The period laid down in Article 5(6) of Decision 1999/468/EC shall be set at 15 days.

**▼B***Article 11*

Any changes which are necessary to adapt Annex V to take account of scientific and technical progress shall be adopted in accordance with the procedure laid down in Article 2c of Directive 81/852/EEC.

**▼M64***Article 12*

As soon as possible after the amendment of Annexes I, II, III or IV, the Commission shall publish a summary of the assessment of the safety of the substances concerned that have been examined by the Committee for Veterinary Medicinal Products. The confidential nature of any proprietary data shall be respected. The Agency shall provide the competent authorities and the Commission with appropriate methods for identifying pharmacologically active substances for which the MRL's have been determined in ►C5 Annexes I and III. ◀

**▼B***Article 13*

Member States may not prohibit or impede the putting into circulation within their territories of foodstuffs of animal origin originating in other Member States on the grounds that they contain residues of veterinary medicinal products if the quantity of residue does not exceed the maximum residue limit provided for in Annex I or III, or if the substance concerned is listed in Annex II.

*Article 14*

With effect from 1 January 1997, the administration to food-producing animals of veterinary medicinal products containing pharmacologically active substances which are not mentioned in Annexes I, II or III shall be prohibited within the Community, except in the case of clinical trials accepted by the competent authorities following notification or authorization in accordance with the legislation in force and which do not cause foodstuffs obtained from livestock participating in such trials to contain residues which constitute a hazard to human health.

**▼M34**

However, the date referred to in the previous subparagraph shall be deferred for substances the use of which was authorized on the date of entry into force of this Regulation and in respect of which documented applications for the establishment of maximum residue limits have been lodged with the Commission or with the European Agency for the Evaluation of Medicinal Products before 1 January 1996:

**▼M64**

- until 1 January 1998 in the case of pyrazolinones (including pyrazolidinediones and phenylbutazones), nitroimidazoles and arsalinic acid, and

**▼M34**

- until 1 January 2000 in the case of other substances.

The Agency shall publish a list of these substances before 7 June 1997.

**▼B***Article 15*

This Regulation shall in no way prejudice the application of Community legislation prohibiting the use in livestock farming of certain substances having a hormonal action.

Nothing in this Regulation shall prejudice the measures taken by Member States to prevent the unauthorized use of veterinary medicinal products.

*Article 16*

This Regulation shall enter into force on 1 January 1992.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

**▼M58***ANNEX I***LIST OF PHARMACOLOGICALLY ACTIVE SUBSTANCES FOR WHICH MAXIMUM RESIDUE LIMITS HAVE BEEN FIXED**

1. Anti-infectious agents

## 2.2.4. Acyl urea derivatives

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Diffubenzuron	Diffubenzuron	Salmonidae	1 000 µg/kg	Muscle and skin in natural proportions	
Fluazuron	Fluazuron	Bovine <sup>(1)</sup>	200 µg/kg 7 000 µg/kg 500 µg/kg 500 µg/kg	Muscle Fat Liver Kidney	
Teflubenzuron	Teflubenzuron	Salmonidae	500 µg/kg	Muscle and skin in natural proportions	

<sup>(1)</sup> Not for use in animals from which milk is produced for human consumption.

**▼M129**

**▼M76**

## 2.2.5. Pyrimidines derivatives

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Dicyclanil	Sum of dicyclanil and 2, 4, 6-triamino-pyrimidine-5-carbonitrile	Ovine	200 µg/kg ►M78 150 µg/kg	Muscle Fat	Not for use in animals from which milk is produced for human consumption

**▼M86**

## 2.2.6. Triazine derivatives

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Cyromazine	Cyromazine	Ovine	300 µg/kg 300 µg/kg 300 µg/kg	Muscle Fat Liver	Not for use in animals from which milk is produced for human consumption

**▼M58**

## 2.3. Agents acting against endo- and ectoparasites

## 2.3.1. Avermectins

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Abamectin	Avermectin Bla	Bovine	10 µg/kg 20 µg/kg	Fat Liver	

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
	Ovine		20 µg/kg	Muscle	
			50 µg/kg	Fat	Not for use in animals from which milk is produced for human consumption
			25 µg/kg	Liver	
			20 µg/kg	Kidney	
<b>▼M58</b>	Doramectin	Bovine	10 µg/kg	Muscle	Not for use in bovine from which milk is produced for human consumption
			150 µg/kg	Fat	
			100 µg/kg	Liver	
			30 µg/kg	Kidney	
			20 µg/kg	Muscle	
			100 µg/kg	Fat	Not for use in ovine from which milk is produced for human consumption
			50 µg/kg	Liver	
			30 µg/kg	Kidney	
			20 µg/kg	Muscle	
	Deer, reindeer	including	100 µg/kg	Fat	
			50 µg/kg	Liver	
			30 µg/kg	Kidney	

**▼M86****▼M86**

<b>▼M86</b>	Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
<b>▼M106</b>						
Emamectin	Emamectin Bla	Fin fish		100 µg/kg	Muscle and skin in natural proportions	
<b>▼M58</b>	Eprinomectin	Eprinomectin Bla	Bovine	►M67 50 µg/kg ►M67 250 µg/kg ►M67 1 500 µg/kg	Muscle Fat Liver	
				►M67 300 µg/kg ►M67 20 µg/kg	Kidney Milk	
Ivermectin	22, 23-Dihydro-aver-mectin Bla	Bovine		40 µg/kg	Fat	
				100 µg/kg	Liver	
				20 µg/kg	Fat	
				15 µg/kg	Liver	
			Deer, including reindeer	20 µg/kg	Muscle	
				100 µg/kg	Fat	
				50 µg/kg	Liver	
				20 µg/kg	Kidney	

**▼M119**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
	All mammalian food-producing species <sup>(1)</sup>		100 µg/kg Fat		
			100 µg/kg Liver		
			30 µg/kg Kidney		
<b>▼M58</b>					
Moxidectin	Bovine, ovine		50 µg/kg Muscle		
			500 µg/kg Fat		
			100 µg/kg Liver		
			50 µg/kg Kidney		
<b>▼M87</b>					
	Bovine		40 µg/kg Milk		
<b>▼M66</b>	Equidae		50 µg/kg Muscle		
			500 µg/kg Fat		
			100 µg/kg Liver		
			50 µg/kg Kidney		
<b>▼M117</b>	Ovine		40 µg/kg Milk		
<b>▼M119</b>					<sup>(1)</sup> Not for use in animals from which milk is produced for human consumption.

**▼M58** 2.4. Agents acting against protozoa

2.4.1. Triazinetrione derivative

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Toltrazuril	Toltrazuril sulfone	Chicken	100 µg/kg	Muscle	
			200 µg/kg	Skin and fat	
			600 µg/kg	Liver	
			400 µg/kg	Kidney	
		Turkey	100 µg/kg	Muscle	
			200 µg/kg	Skin and fat	
			600 µg/kg	Liver	
			400 µg/kg	Kidney	
		Porcine	100 µg/kg	Muscle	
			150 µg/kg	Skin and fat	
			500 µg/kg	Liver	
			250 µg/kg	Kidney	
All mammalian food producing species (1)			100 µg/kg	Muscle	
			150 µg/kg	Fat (2)	

**▼M80**

**▼M126**

**▼M126**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
		Poultry <sup>(3)</sup>	500 µg/kg 250 µg/kg 100 µg/kg 200 µg/kg 600 µg/kg 400 µg/kg	Liver Kidney Muscle Skin + fat Liver Kidney	

<sup>(1)</sup> Not for use in animals from which milk is produced for human consumption.<sup>(2)</sup> For porcine species this MRL relates to skin and fat in natural proportions.<sup>(3)</sup> Not for use in animals from which eggs are produced for human consumption.**▼M80**

## 2.4.2. Quinazolone derivatives

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Halofuginone	Halofuginone	Bovine	10 µg/kg 25 µg/kg 30 µg/kg 30 µg/kg	Muscle Fat Liver Kidney	Not for use in animals from which milk is produced for human consumption

**▼M91**

## 2.4.3. Carbamides

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Imidocarb	Imidocarb	Bovine	300 µg/kg 50 µg/kg	Muscle Fat	

**▼M91**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
			2 000 µg/kg	Liver	
			1 500 µg/kg	Kidney	
			50 µg/kg	Milk	
<b>▼M109</b>	Ovine <sup>(1)</sup>		300 µg/kg	Muscle	
			50 µg/kg	Fat	
			2 000 µg/kg	Liver	
			1 500 µg/kg	Kidney	

<sup>(1)</sup> Not for use in ovine from which milk is produced for human consumption.

**▼M118****2.4.4. Ionophores**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Lasalocid	Lasalocid A	Poultry	20 µg/kg	Muscle	
			100 µg/kg	Skin + fat	
			100 µg/kg	Liver	
			50 µg/kg	Kidney	

**▼M127**

**▼M58**

3. Agents acting on the nervous system

3.1. Agents acting on the central nervous system

3.1.1. Butyrophenone tranquillisers

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Azaperone	Sum of azaperone and azapetrol	Porcine	100 µg/kg	Muscle	

3.2. Agents acting on the autonomic nervous system

3.2.1. Anti-adrenergics

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Carazolol	Carazolol	Porcine	5 µg/kg 5 µg/kg 25 µg/kg 25 µg/kg	Muscle Skin and fat Liver Kidney	

**▼M72**

**▼M78**

3.2.2.  $\beta_2$  sympathomimetic agents

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Clenbuterol hydrochloride	Clenbuterol	Bovine	0,1 µg/kg 0,5 µg/kg 0,5 µg/kg 0,05 µg/kg	Muscle Liver Kidney Milk	

**▼M58**

4. Anti-inflammatory agents
  - 4.1. Nonsteroidal anti-inflammatory agents
    - 4.1.1. Arylpropionic acid derivative

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Carprofen	Carprofen	Bovine Not for use in animals from which milk is produced for human consumption Equidae	500 µg/kg 1 000 µg/kg 1 000 µg/kg 500 µg/kg 1 000 µg/kg 1 000 µg/kg	Muscle Fat Liver Kidney Muscle Fat Liver Kidney

## 4.1.5. Pyrazolone derivatives

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Metamizole	4-Methylaminoan-tipyrin	Bovine	100 µg/kg	Muscle	
			100 µg/kg	Fat	
			100 µg/kg	Liver	
			100 µg/kg	Kidney	
			50 µg/kg	Milk	
		Porcine	100 µg/kg	Muscle	
			100 µg/kg	Skin and fat	
			100 µg/kg	Liver	
			100 µg/kg	Kidney	
			100 µg/kg	Muscle	
		Equidae	100 µg/kg	Fat	
			100 µg/kg	Liver	
			100 µg/kg	Kidney	

**▼M110**

## 4.1.6. Phenyl acetic acid derivatives

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Diclofenac	Diclofenac	Bovine <sup>(1)</sup>	5 µg/kg 1 µg/kg	Muscle Fat	
			5 µg/kg	Liver	
			10 µg/kg	Kidney	
			5 µg/kg	Muscle	
		Porcine	1 µg/kg	Skin + fat	
			5 µg/kg	Liver	
			10 µg/kg	Kidney	

<sup>(1)</sup> Not for use in animals from which milk is produced for human consumption.

**▼M58**

5. Corticoides  
5.1. Glucocorticoides

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
<b>▼M70</b>					
Betamethasone	Bovine		0,75 µg/kg	Muscle	
			2,0 µg/kg	Liver	
			0,75 µg/kg	Kidney	
			0,3 µg/kg	Milk	
	Porcine		0,75 µg/kg	Muscle	
			2,0 µg/kg	Liver	
			0,75 µg/kg	Kidney	
<b>▼M58</b>					
Dexamethasone	Bovine		0,3 µg/kg	Milk	
	Bovine, equidae	porcine,	0,75 µg/kg	Muscle	
			2 µg/kg	Liver	
			0,75 µg/kg	Kidney	
	Caprine		0,75 µg/kg	Muscle	
			2 µg/kg	Liver	

**▼M113**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
			0,75 µg/kg 0,3 µg/kg	Kidney Milk	
Methylprednisolone	Methylprednisolone	Bovine	10 µg/kg 10 µg/kg 10 µg/kg 10 µg/kg	Muscle Fat Liver Kidney	Not for use in animals from which milk is produced for human consumption

**▼M93**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
			4 µg/kg 4 µg/kg 10 µg/kg 10 µg/kg 6 µg/kg	Muscle Fat Liver Kidney Milk	
Prednisolone	Prednisolone	Bovine	4 µg/kg	Muscle	

**▼M79**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Chlormadinone	Chlormadinone	Bovine	4 µg/kg 2 µg/kg 2,5 µg/kg	Fat Liver Milk	For zootechnical use only

**▼M92**

6. Agents acting on the reproductive system  
 6.1. Progestogens

**▼M92**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Flugestone acetate	Flugestone acetate	Ovine	1 µg/kg	Milk	For intravaginal use for zootechnical purposes only
		Caprine	1 µg/kg	Milk	For intra-vaginal use for zootechnical purposes only
		Ovine, caprine	0,5 µg/kg 0,5 µg/kg 0,5 µg/kg 0,5 µg/kg	Muscle Fat Liver Kidney	For therapeutic and zootechnical purposes only
<b>▼M124</b>					
<b>▼M116</b>	Altenogest <sup>(1)</sup>	Porcine	1 µg/kg 0,4 µg/kg 1 µg/kg 0,9 µg/kg	Skin and fat Liver Fat Liver	
		Equidae			
<b>▼M121</b>	Norgestomet <sup>(2)</sup>	Bovine	0,2 µg/kg 0,2 µg/kg 0,2 µg/kg 0,2 µg/kg 0,12 µg/kg	Muscle Fat Liver Kidney Milk	
<b>▼M116</b>					

<sup>(1)</sup> Only for zootechnical use and in accordance with the provisions of Directive 96/22/EC.

►M121 <sup>(2)</sup> For therapeutic and zootechnical purposes only. ▼

**▼M58****ANNEX II****LIST OF SUBSTANCES NOT SUBJECT TO MAXIMUM RESIDUE LIMITS**

## 1. Inorganic chemicals

Pharmacologically active substance(s)	Animal species	Other provisions
Aluminium distearate	All food-producing species	
Aluminium hydroxide acetate	All food-producing species	
Aluminium phosphate	All food-producing species	
<b>▼M99</b>		
Aluminium salicylate, basic	Bovine	For oral use only; Not for use in animals from which milk is produced for human consumption
<b>▼M58</b>		
Aluminium tristearate	All food-producing species	
Ammonium chloride	All food-producing species	
<b>▼M72</b>		
Barium selenate	Bovine, ovine	
<b>▼M58</b>		
Bismuth subcarbonate	All food-producing species	For oral use only
Bismuth subgallate	All food-producing species	For oral use only
Bismuth subnitrate	All food-producing species	For oral use only
Bismuth subsalicylate	All food-producing species	For oral use only

	Pharmacologically active substance(s)	Animal species	Other provisions
Boric acid and borates	All food-producing species		
<b>▼M65</b>			
Bromide, potassium salt	All food producing species		
<b>▼M58</b>			
Bromide, sodium salt	All mammalian food-producing species	For topical use only	
<b>▼M58</b>			
Calcium acetate	All food-producing species		
Calcium benzoate			
Calcium carbonate			
Calcium chloride			
Calcium gluconate			
Calcium hydroxide			
Calcium hypophosphite			
Calcium malate			
Calcium oxide			
Calcium phosphate			
Calcium polyphosphates			
Calcium propionate			
Calcium silicate			
Calcium stearate			
Calcium sulphate			

**▼M58**

Pharmacologically active substance(s)	Animal species	Other provisions
Calcium glucoheptonate	All food-producing species	
Calcium glucono glucoheptonate	All food-producing species	
Calcium gluconolactate	All food-producing species	
Calcium glutamate	All food-producing species	
<b>▼M80</b>		
Calcium glycerophosphate	All food producing species	
<b>▼M58</b>		
Cobalt carbonate	All food-producing species	
Cobalt dichloride	All food-producing species	
Cobalt gluconate	All food-producing species	
Cobalt oxide	All food-producing species	
Cobalt sulphate	All food-producing species	
Cobalt trioxide	All food-producing species	
Copper chloride	All food-producing species	
Copper gluconate	All food-producing species	
Copper heptanoate	All food-producing species	
Copper methionate	All food-producing species	
Copper oxide	All food-producing species	

**▼M58**

Pharmacologically active substance(s)	Animal species	Other provisions
Copper sulphate	All food-producing species	
Dicopper oxide	All food-producing species	
Hydrochloric acid	All food-producing species	For use as excipient
Hydrogen peroxide	All food-producing species	
Iodine and iodine inorganic compounds including:	All food-producing species	
— Sodium and potassium-iodide		
— Sodium and potassium-iodate		
— Iodophors including polyvinylpyrrolidone-iodine		
Iron dichloride	All food-producing species	
Iron sulphate	All food-producing species	
Magnesium	All food-producing species	
Magnesium sulphate		
Magnesium hydroxide		
Magnesium stearate		
Magnesium glutamate		
Magnesium orotate		
Magnesium aluminium silicate		
Magnesium oxide		
Magnesium carbonate		
Magnesium phosphate		

**▼M58**

Pharmacologically active substance(s)	Animal species	Other provisions
Magnesium glycerophosphate		
Magnesium aspartate		
Magnesium citrate		
Magnesium acetate		
Magnesium trisilicate		
Nickel gluconate	All food-producing species	
Nickel sulphate	All food-producing species	
Potassium DL-aspartate	All food-producing species	
Potassium glucuronate	All food-producing species	
Potassium glycerophosphate	All food-producing species	
Potassium nitrate	All food-producing species	
Potassium selenate	All food-producing species	
Sodium chloride	Bovine For topical use only	
Sodium dichloroisocyanurate	Bovine, ovine, caprine For topical use only	
<b>▼M62</b>		
Sodium glycerophosphate	All food producing species	
Sodium hypophosphite	All food-producing species	
Sodium nitrite	Bovine For topical use only	
<b>▼M129</b>		
Sodium propionate	All food producing species	
Sodium selenate	All food-producing species	
<b>▼M77</b>		
<b>▼M58</b>		

**▼M58**

	Pharmacologically active substance(s)	Animal species	Other provisions
Sodium selenite	All food-producing species		
Sulphur	► <b>M101</b> All food producing species ▼		
Zinc acetate	All food-producing species		
Zinc chloride			
Zinc gluconate			
Zinc oleate			
Zinc stearate			

## 2. Organic compounds

	Pharmacologically active substance(s)	Animal species	Other provisions
17 $\beta$ -Oestradiol	All mammalian food-producing species		For therapeutic and zootechnical uses only
2-Amin ethanol	All food-producing species		
2-Aminethyl dihydrogenphosphate	All food-producing species		
2-Pyrrolidone	All food-producing species		At parenteral doses up to 40 mg/kg bw
8-Hydroxyquinoline	All mammalian food-producing species		For topical use in newborn animals only
Acetyl cysteine	All food-producing species		
Alfacalcidol	Bovine		For parturient cows only
Alfaprostol	Rabbits Bovine, porcine, equidae		
Bacitracin	Bovine		For intramammary use in lactating cows only and for all tissues except milk
Benzalkonium chloride	All food-producing species		For use as an excipient at concentrations up to 0,05 % only
Benzocaine	All food-producing species		For use as local anaesthetic only

**▼M58**

Pharmacologically active substance(s)	Animal species	Other provisions
Benzylalcohol	All food-producing species	For use as excipient
Betaine	All food-producing species	
Bronopol	Salmonidae	For use only on farmed fertilised eggs
Brotizolam	Bovine	For therapeutic uses only
Busereolin	All food-producing species	
Butorphanol tartrate	Equidae	For intravenous administration only
Butyl 4-hydroxybenzoate	All food-producing species	
Butylscopolaminium bromide	All food-producing species	
Caffeine	All food-producing species	
Carbetocin	All mammalian food-producing species	
Cefazolin	Bovine Ovine, caprine	For intramammary use, except if the udder may be used as food for human consumption
Cetostearyl alcohol	All food-producing species	
Cetrimide	All food-producing species	
Chlorhexidine	All food-producing species	For topical use only
Chlorocresol	All food-producing species	
Cleazuril	Pigeon	
Cloprostenol	Bovine, porcine, equidae	
Coco alkyl dimethyl betaines	All food-producing species	For use as excipient
Corticotropin	All food-producing species	
D-Phe 6'-luteinising hormone releasing hormone	All food-producing species	
Dembrexine	Equidae	

**▼M58**

	Pharmacologically active substance(s)	Animal species	Other provisions
Denaverine hydrochloride	Bovine		
Detomidine	Bovine, equidae	For therapeutic uses only	
<b>▼M112</b>			
Diclazuril	All ruminants (1) Porcine (1)		
<b>▼M58</b>			
Diethyl phthalate	All food-producing species		
Diethylene glycol monoethyl ether	Bovine, porcine		
Dimanganese trioxide	All food-producing species	For oral use only	
Dimethyl phthalate	All food-producing species		
Dinoprost	All mammalian food-producing species		
Dinoprost tromethamine	All mammalian food-producing species		
Diprophylline	All food-producing species		
Etamiphylline camsylate	All food-producing species		
Ethanol	All food-producing species	For use as excipient	
Ethyl lactate	All food-producing species		
Etiproston tromethamine	Bovine, porcine		
Fertirelin acetate	Bovine		
Flumethrin	Bees (honey)		
Folic acid	All food-producing species		
Glycerol formal	All food-producing species		
Gonadotrophin releasing hormone	All food-producing species		
Heptaminol	All food-producing species		

**▼M58**

Pharmacologically active substance(s)	Animal species	Other provisions
Hesperidin	Equidae	
Hesperidin methyl chalcone	Equidae	
Hexetidine	Equidae	For topical use only
Human chorion gonadotrophin	All food-producing species	
Human menopausal urinary gonadotrophin	Bovine	
Hydrocortisone	All food-producing species	For topical use only
Iodine organic compounds — Iodoform	All food-producing species	
Isobutane	All food-producing species	
Isoflurane	Equidae	For use as anaesthetic only
Ioxsuprime	Bovine, equidae	For therapeutic use only in accordance with Council Directive 96/22/EEC (OJ L 125, 23.5.1996, p. 3)
Ketamine	All food-producing species	
Ketanserin tartrate	Equidae	
Ketoprofen	Bovine, porcine, equidae	
L-tartaric acid and its mono- and di-basic salt of sodium, potassium and calcium	All food-producing species	For use as excipient
Lactic acid	All food-producing species	
Lecirelin	Bovine, equidae, rabbits	
Lobeline	All food-producing species	
Luprotilol	All mammalian species	
Malic acid	All food-producing species	For use as excipient
Manganese carbonate	All food-producing species	For oral use only
Manganese chloride	All food-producing species	For oral use only

**▼M58**

Pharmacologically active substance(s)	Animal species	Other provisions
Manganese gluconate	All food-producing species	For oral use only
Manganese glycerophosphate	All food-producing species	For oral use only
Manganese oxide	All food-producing species	For oral use only
Manganese pidolate	All food-producing species	For oral use only
Manganese ribonucleate	All food-producing species	For oral use only
Manganese sulphate	All food-producing species	For oral use only
Mecillinam	Bovine	For intratuterine use only
Medroxyprogesterone acetate	Ovine	For intravaginal use for zootechnical purposes only
Melatonin	Ovine, caprine	
Menadione	All food-producing species	
Menbutone	Bovine, ovine, caprine, porcine, equidae	
Menthol	All food-producing species	
Methyl nicotine	Bovine, equidae	For topical use only
Mineral hydrocarbons, low to high viscosity including microcrystalline waxes, approximately C10-C60; aliphatic, branched aliphatic and alicyclic compounds	All food-producing species	Excludes aromatic and unsaturated compounds
N-butane	All food-producing species	
N-butanol	All food-producing species	For use as excipient
Natamycin	Bovine, equidae	For topical use only
Neostigmine	All food-producing species	
Nicoboxidil	Equidae	For topical use only
Nonivamide	Equidae	For topical use only
Oleylolate	All food-producing species	For topical use only
Oxytocin	All mammalian food-producing species	

**▼M58**

	Pharmacologically active substance(s)	Animal species	Other provisions
Pancreatin	All mammalian food-producing species		For topical use only
Papain	All food-producing species		
Papaverine	Bovine	Newborn calves only	
Peracetic acid	All food-producing species		
Phenol	All food-producing species		
Phloroglucinol	All food-producing species		
Phytomenadione	All food-producing species		
Policresulen	All food-producing species		For topical use only
Polyethylene glycol 15 hydroxystearate	All food-producing species		For use as excipient
Polyethylene glycol 7 glyceryl cocate	All food-producing species		For topical use only
Polyethylene glycol stearates with 8-40 oxyethylene units	All food-producing species		For use as excipient
Polysulphated glycosaminoglycan	Equidae		
Praziquantel	Ovine Equidae		For use in non-lactating sheep only
Pregnant mare serum gonadotrophin	All food-producing species		
Prethcamide (crotethamide and cropropamide)	All mammalian food-producing species		
Procaine	All food-producing species		
Propane	All food-producing species		
Propylene glycol	All food-producing species		
Quatresin	All food-producing species		For use as preservative only at concentrations of up to 0,5 %
R-Cloprostetol	Bovine, porcine, equidae		
Rifaximin	All mammalian food-producing species Bovine		For topical use only For intramammary use, except if the udder may be used as food for human consumption

Pharmacologically active substance(s)	Animal species	Other provisions
Romifidine	Equidae	For therapeutic uses only
Sodium 2-methyl-2-phenoxy-propanoate	Bovine, porcine, caprine, equidae	
Sodium benzyl 4-hydroxybenzoate	All food-producing species	
Sodium butyl 4-hydroxybenzoate	All food-producing species	
Sodium ceteostearyl sulphate	All food-producing species	For topical use only
Somatotropin	Salmon	
Tanninum	All food-producing species	
Tau fluvalinate		
Terpin hydrate	Bovine, porcine, ovine, caprine	
Tetracaine	All food-producing species	For use as anaesthetic only
Theobromine	All food-producing species	
Theophylline	All food-producing species	
Thiomersal	All food-producing species	For use only as preservatives in multidose vaccines at a concentration not exceeding 0,02 %
Thymol	All food-producing species	For use only as preservatives in multidose vaccines at a concentration not exceeding 0,02 %
Timerfonate	All food-producing species	
Trimethylphloroglucinol	All food-producing species	
Vitamin D	All food-producing species	
Wool alcohols	All food-producing species	For topical use only
<b>▼M59</b>		
1-Methyl-2-pyrrolidone	Equidae	
Cefacetile	Bovine	For intramammary use only and for all tissues except milk

**▼M59**

Pharmacologically active substance(s)	Animal species	Other provisions
Emiconazole	Bovine, equidae	For topical use only
Etamsylate	All food producing species	
Strychnine	Bovine	For oral use only at dose to 0,1 mg/kg bw
<b>▼M60</b>		
Parconazole	Guinea fowl	
<b>▼M62</b>		
Biotin	All food producing species	
Bromhexine	Bovine Not for use in animals from which milk is produced for human consumption	
	Porcine	
	Poultry Not for use in animals from which eggs are produced for human consumption	
Mercaptamine hydrochloride	All mammalian food-producing species	
Praziquantel	Ovine	
Pyrantel embonate	Equidae	
Vitamin B1	All food-producing species	
Vitamin B12	All food-producing species	
Vitamin B2	All food-producing species	
Vitamin B3	All food-producing species	
Vitamin B5	All food-producing species	
Vitamin B6	All food-producing species	

	Pharmacologically active substance(s)	Animal species	Other provisions
Vitamin E	All food-producing species		
<b>▼M63</b>			
Tiaprost	Bovine, ovine, porcine, equidae		
<b>▼M65</b>			
Apramycin	Porcine, rabbits Ovine	For oral use only	
			Not for use in animals from which milk is produced for human consumption
	Chicken		
			Not for use in animals from which eggs are produced for human consumption
Azamethiphos	Salmonidae		
Doxapram	All mammalian food producing species		
Piperonyl butoxide	Bovine, ovine, caprine, equidae	For topical use only	
Sulfogaiacol	All food producing species		
Vetrabutine hydrochloride	Porcine		
<b>▼M66</b>			
Fenpiramide hydrochloride	Equidae	For intravenous use only	
Hydrochlorothiazide	Bovine		
Levomethadone	Equidae	For intravenous use only	
Tricaine mesilate	Fin fish	For water borne use only	
Trichlormethiazide	All mammalian food producing species	Not for use in animals from which milk is produced for human consumption	

	Pharmacologically active substance(s)	Animal species	Other provisions
Vincamine	Bovine		For use in newborn animals only
<b>▼M67</b>	All food producing species		
Atropine			
Cefoperazone	Bovine		For intramammary use in lactating cows only and for all tissues except milk
<b>▼M69</b>			
2-aminoethanol glucuronate	All food-producing species		
Betaine glucuronate	All food-producing species		
<b>▼M118</b>	All mammalian food producing species		For topical use only
Bituminosulfonates, ammonium and sodium salts	All mammalian food producing species		
<b>▼M69</b>	All mammalian food-producing species		
Chlorphenamine			
Humic acids and their sodium salts	All food-producing species		For oral use only
Paracetamol	Porcine		For oral use only
Tosylchloramide sodium	Fin fish		For water-borne use only
<b>▼M88</b>			
	Bovine		For topical use only
<b>▼M125</b>			
	Equidae		For topical use only
<b>▼M70</b>			
1-methyl-1,2-pyrrolidone	All food-producing species		
Ergometrine maleate	All mammalian food-producing species		For use in parturient animals only
<i>Jecoris oleum</i>	All food-producing species		For topical use only

**▼M70**

Pharmacologically active substance(s)	Animal species	Other provisions
Mepivacaine	Equidae	For intra-articular and epidural use as local anaesthetic only
Novobiocin	Bovine	For intrammary use only and for all tissues except milk
Piperazine dihydrochloride	Chicken	For all tissues except eggs
Polyoxyl castor oil with 30 to 40 oxyethylene units	All food-producing species	For use as excipient
Polyoxyl hydrogenated castor oil with 40 to 60 oxyethylene units	All food-producing species	For use as excipient
Xylazine hydrochloride	Bovine, equidae	Not for use in animals from which milk is produced for human consumption
<b>▼M71</b>		
Butafosfan	Bovine	►M78 For intravenous use only ▶
Cefalonium	Bovine	For intramammary use and eye treatment only, and for all tissues except milk
Furosemide	Bovine, equidae	For intravenous administration only
Lidocaine	Equidae	For local-regional anaesthesia only
<b>▼M72</b>		
3,5-Diiodo-L-thyrosine	All mammalian food-producing species	
Levothyroxine	All mammalian food-producing species	
<b>▼M74</b>		
Aluminium salicylate, basic	All food producing species except fish For topical use only	
Bismuth subnitrate	Bovine	For intramammary use only
Calcium aspartate	All food producing species	
Methyl salicylate	All food producing species except fish	For topical use only

	Pharmacologically active substance(s)	Animal species	Other provisions
Salicylic acid	All food producing species except fish	For topical use only	
<b>▼M115</b>	Sodium salicylate	Bovine, porcine (?)	
<b>▼M74</b>	Zinc aspartate	All food producing species	
<b>▼M75</b>	Toldimfos	All food producing species	
<b>▼M77</b>	Decoquinate	Bovine, ovine	For oral use only. Not for use in animals from which milk is produced for human consumption
	Sodium boroformiate	All food producing species	
<b>▼M81</b>	Thiamylal	All mammalian food producing species	For intravenous administration only
	Thiopental sodium	All food-producing species	For intravenous administration only
<b>▼M105</b>	Acetylsalicylic acid	All food producing species except fish	Not for use in animals from which milk or eggs are produced for human consumption
	Acetylsalicylic acid DL-lysine	All food producing species except fish	Not for use in animals from which milk or eggs are produced for human consumption
	Carbasalate calcium	All food producing species except fish	Not for use in animals from which milk or eggs are produced for human consumption

	Pharmacologically active substance(s)	Animal species	Other provisions
Sodium acetylsalicylate	All food producing species except fish		Not for use in animals from which milk or eggs are produced for human consumption
<b>▼M83</b>			
Linear alkyl benzene sulphonate acids with alkyl chain lengths ranging from C <sub>9</sub> to C <sub>13</sub> , containing less than 2,5 % of chains longer than C <sub>13</sub>	Bovine  Ovine (4)		For topical use only
<b>▼M86</b>			
Amprolium	Poultry		For oral use only
Tiludronic acid, disodium salt	Equidae		For intravenous use only
<b>▼M89</b>			
Sorbitan trioleate	All food-producing species		
<b>▼M90</b>			
Vitamin A	All food producing species		
<b>▼M91</b>			
Ammonium lauryl sulphate	All food-producing species		
Bronopol	Fin fish		
Calcium pantothenate	All food-producing species		
<b>▼M95</b>			
Allantoin	All food producing species		For topical use only
Benzocaine	Salmonidae		
<b>▼M94</b>			
Dexpanthenol	All food producing species		

	Pharmacologically active substance(s)	Animal species	Other provisions
▼M94			
▼M97	Azagly-nafarelin Deslorelin acetate	Salmonidae Equidae	Not for use in fish from which eggs are produced for human consumption
▼M98	Hydroxyethylsalicylate Xylazine hydrochloride	All food producing species except fish Bovine, equidae	For topical use only
▼M99	Omeprazole	Equidae	For oral use only
▼M100	Trichlormethiazide	All mammalian food producing species	
▼M107	Progesterone (*)	Bovine, ovine, caprine, Equidae (female)	
▼M116	Beclometasone dipropionate Cloprostenol R-cloprostenol Sorbitan sesquioleate	Equidae (¹) Caprine Caprine All food producing species	
▼M126	Diethylene glycol monoethyl ether	All ruminants and porcine	
▼M129	Peforelin	Porcine	
▼M107	(*) Only for intravaginal therapeutic or zootechnical use and in accordance with the provisions of Directive 96/22/EC. ►M112 (¹) For oral use only. ▶M115 (²) For oral use; not for use in animals from which milk is produced for human consumption. ▶M116 (³) For inhalation use only. ▶M117 (⁴) For topical use only.		

**▼M58**

## 3. Substances generally recognised as safe

	Pharmacologically active substance(s)	Animal species	Other provisions
Absinthium extract	All food-producing species		
Acetylmethionine	All food-producing species		
Aluminum hydroxide	All food-producing species		
Aluminum monostearate	All food-producing species		
Ammonium sulfate	All food-producing species		
Benzoyl benzoate	All food-producing species		
Benzyl p-hydroxybenzoate	All food-producing species		
Calcium borogluconate	All food-producing species		
Calcium citrate	All food-producing species		
Camphor	All food-producing species		External use only
Cardamon extract	All food-producing species		
Diethyl sebacate	All food-producing species		
Dimethicone	All food-producing species		
Dimethyl acetamide	All food-producing species		
Dimethyl sulphoxide	All food-producing species		
Epinephrine	All food-producing species		
Ethyl oleate	All food-producing species		
Ethylenediaminetetraacetic acid and salts	All food-producing species		
Eucalyptol	All food-producing species		
Follicle stimulating hormone (natural FSH from all species and their synthetic analogues)	All food-producing species		
Formaldehyde	All food-producing species		

**▼M58**

Pharmacologically active substance(s)	Animal species	Other provisions
Formic acid	All food-producing species	
Glutaraldehyde	All food-producing species	
Guaiacol	All food-producing species	
Heparin and its salts	All food-producing species	
Human chorionic gonadotropin (natural HCG and its synthetic analogues)	All food-producing species	
Iron ammonium citrate	All food-producing species	
Iron dextran	All food-producing species	
Iron glucoheptonate	All food-producing species	
Isopropanol	All food-producing species	
Lanolin	All food-producing species	
Luteinising hormone (natural LH from all species and their synthetic analogues)	All food-producing species	
Magnesium chloride	All food-producing species	
Magnesium gluconate	All food-producing species	
Magnesium hypophosphite	All food-producing species	
Mannitol	All food-producing species	
Methylbenzoate	All food-producing species	
Monothioglycerol	All food-producing species	
Montanide	All food-producing species	
Myglyol	All food-producing species	

**▼M58**

	Pharmacologically active substance(s)	Animal species	Other provisions
Orgotein	All food-producing species		
Poloxalene	All food-producing species		
Poloxamer	All food-producing species		
Polyethylene glycols (molecular weight ranging from 200 to 10 000)	All food-producing species		
Polysorbate 80	All food-producing species		
Serotonin	All food-producing species		
Sodium chloride	All food-producing species		
Sodium cromoglycate	All food-producing species		
Sodium diocylsulphosuccinate	All food-producing species		
Sodium formaldehydesulfoxylate	All food-producing species		
Sodium lauryl sulphate	All food-producing species		
Sodium pyrosulphite	All food-producing species		
Sodium stearate	All food-producing species		
Sodium thiosulphate	All food-producing species		
Tragacanth	All food-producing species		
Urea	All food-producing species		
Zinc oxide	All food-producing species		
Zinc sulphate	All food-producing species		
<b>▼M65</b>			
Adenosine and its 5'-mono-, 5'-di- and 5'-triphosphates	All food producing species		
Alanine	All food producing species		
Arginine	All food producing species		

**▼M65**

	Pharmacologically active substance(s)	Animal species	Other provisions
Asparagine	All food producing species		
Aspartic acid	All food producing species		
Carnitine	All food producing species		
Choline	All food producing species		
Chymotrypsin	All food producing species		
Citrulline	All food producing species		
Cysteine	All food producing species		
Cytidine and its 5'-mono-, 5'-di- and 5'-triphosphates	All food producing species		
Glutamic acid	All food producing species		
Glutamine	All food producing species		
Glycine	All food producing species		
Guanosine and its 5'-mono-, 5'-di- and 5'-triphosphates	All food producing species		
Histidine	All food producing species		
Hyaluronic acid	All food producing species		
Inosine and its 5'-mono-, 5'-di- and 5'-triphosphates	All food producing species		
Inositol	All food producing species		
Isoleucine	All food producing species		
Leucine	All food producing species		
Lysine	All food producing species		
Methionine	All food producing species		
Ornithine	All food producing species		
Orotic acid	All food producing species		
Pepsin	All food producing species		

**▼M65**

	Pharmacologically active substance(s)	Animal species	Other provisions
Phenylalanine	All food producing species		
Proline	All food producing species		
Serine	All food producing species		
Thioctic acid	All food producing species		
Threonine	All food producing species		
Thymidine	All food producing species		
Trypsin	All food producing species		
Tryptophan	All food producing species		
Tyrosine	All food producing species		
Uridine and its 5'-mono-, 5'-di- and 5'-triphosphates	All food producing species		
Valine	All food producing species		
<b>▼M126</b>			
Polyoxyethylene sorbitan monoleate	All food producing species		
<b>▼M128</b>			
Polyoxyethylene sorbitan monoleate and trioleate	All food-producing species		

**▼M58** 4. Substances used in homeopathic veterinary medicinal products

Pharmacologically active substance(s)	Animal species	Other provisions
All substances used in homeopathic veterinary medicinal products provided that their concentration in the product does not exceed one part per ten thousand	All food-producing species	
<b>▼M63</b>		
<i>Adonis vernalis</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per hundred only
<i>Acqua levici</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias only
<i>Atropa belladonna</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per hundred only
<i>Convallaria majalis</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per thousand only
<b>▼M66</b>		
<i>Apocynum cannabinum</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per hundred only For oral use only
<i>Harungia madagascariensis</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per hundred only
<i>Selenicereus grandiflorus</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per hundred only

	Pharmacologically active substance(s)	Animal species	Other provisions
<i>Thuja occidentalis</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per hundred only	
<i>Virola sebifera</i>	All food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per thousand only	
<b>▼M68</b>	<i>Ruta graveolens</i>	All food-producing species  Not for use in animals from which milk is produced for human consumption	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per thousand only. Not for use in animals from which milk is produced for human consumption
<b>▼M71</b>	<i>Aesculus hippocastanum</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations in the products not exceeding one part per ten only
	<i>Agnus castus</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
	<i>Ailanthus altissima</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
	<i>Allium cepa</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only

**▼M71**

Pharmacologically active substance(s)	Animal species	Other provisions
<i>Arnicae radix</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding in the products not exceeding one part per ten only
<i>Artemisia abrotanum</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Bellis perennis</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Calendula officinalis</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding in the products not exceeding one part per hundred only.
<i>Camphora</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations in the products not exceeding one part per hundred only.
<i>Cardiospermum halicacabum</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Crataegus</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Echinacea</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only. For topical use only. For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding in the products not exceeding one part per ten only

**▼M71**

Pharmacologically active substance(s)	Animal species	Other provisions
<i>Eucalyptus globulus</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Euphrasia officinalis</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Ginkgo biloba</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations in the products not exceeding one part per thousand only.
<i>Ginseng</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Hamamelis virginiana</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations in the products not exceeding one part per ten only
<i>Harpagophytum procumbens</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Hypericum perforatum</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Lachnanthes tinctoria</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations in the products not exceeding one part per thousand only.
<i>Lobaria pulmonaria</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only

**▼M71**

Pharmacologically active substance(s)	Animal species	Other provisions
<i>Okoubaka aubrevillei</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Prunus laurocerasus</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations in the products not exceeding one part per thousand only.
<i>Serenoa repens</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Silybum marianum</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Solidago virgaurea</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Syzygium cumini</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Turnera diffusa</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only
<i>Viscum album</i>	All-food producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias at concentrations corresponding to the mother tincture and dilutions thereof only

**▼M71**

Pharmacologically active substance(s)	Animal species	Other provisions
---------------------------------------	----------------	------------------

**▼M72**

<i>Phytolacca americana</i>	All food-producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per thousand only
<i>Urginea maritima</i>	All food-producing species	For use in homeopathic veterinary medicinal products prepared according to homeopathic pharmacopoeias, at concentrations in the products not exceeding one part per hundred only For oral use only

**▼M58** 5. Substances used as food additives in foodstuffs for human consumption

Pharmacologically active substance(s)	Animal species	Other provisions
Substances with an E number	All food-producing species	Only substances approved as additives in foodstuffs for human consumption, with the exception of preservatives listed in part C of Annex III to European Parliament and Council Directive 95/2/EC (OJ L 61, 18.3.1995, p. 1).

## 6. Substances of vegetable origin

Pharmacologically active substance(s)	Animal species	Other provisions
Aloe vera gel and whole leaf extract of Aloe vera	All food-producing species	For topical use only
<i>Aloes, Barbados and Capae, their standardised dry extract and preparations thereof</i>	All food-producing species	

<b>▼M71</b>	Pharmacologically active substance(s)	Animal species	Other provisions
<b>▼M58</b>			
<i>Angelicae radix aetheroleum</i>	All food-producing species		
<i>Anisi aetheroleum</i>	All food-producing species		
<b>▼M77</b>			
<i>Anisi stellatae fructus</i> , standardised extracts and preparations thereof	All food producing species		
<b>▼M71</b>			
<i>Arnica montana (arnicae flos and arnicae planta tota)</i>	All food-producing species	For topical use only	
<b>▼M58</b>			
<i>Balsamum peruvianum</i>	All food-producing species	For topical use only	
<b>▼M71</b>			
<i>Boldo folium</i>	All food-producing species		
<b>▼M70</b>			
<i>Calendulae flos</i>	All food-producing species	For topical use only	
<b>▼M68</b>			
<i>Capsici fructus acer</i>	All food-producing species		
<b>▼M71</b>			
<i>Carlinae radix</i>	All food-producing species	For topical use only	
<b>▼M58</b>			
<i>Carvi aetheroleum</i>	All food-producing species		
<i>Caryophylli aetheroleum</i>	All food-producing species		
<b>▼M59</b>			
<i>Centellae asiaticaer extractum</i>	All food producing species	For topical use only	
<b>▼M58</b>			
<i>Chrysanthemi cinerariifoli flos</i>	All food-producing species	For topical use only	

	Pharmacologically active substance(s)	Animal species	Other provisions
<b>▼M70</b>	<i>Cimicifugae racemosae rhizoma</i>	All food-producing species	Not for use in animals from which milk is produced for human consumption
<b>▼M77</b>	<i>Cinchonae cortex</i> , standardised extracts and preparations thereof	All food producing species	
<b>▼M58</b>	<i>Cinnamomi cassiae aetheroleum</i>	All food-producing species	
<b>▼M77</b>	<i>Cinnamomi cassiae cortex</i> , standardised extracts and preparations thereof	All food producing species	
<b>▼M58</b>	<i>Cinnamomi ceylanici aetheroleum</i>	All food-producing species	
<b>▼M77</b>	<i>Cinnamomi ceylanici cortex</i> , standardised extracts and preparations thereof	All food producing species	
<b>▼M58</b>	<i>Citri aetheroleum</i>	All food-producing species	
<b>▼M77</b>	<i>Citronellae aetheroleum</i>	All food-producing species	
<b>▼M58</b>	<i>Condurango cortex</i> , standardised extracts and preparations thereof	All food producing species	
<b>▼M58</b>	<i>Coriandri aetheroleum</i>	All food-producing species	
<b>▼M71</b>	<i>Cupressi aetheroleum</i>	All food-producing species	For topical use only

	Pharmacologically active substance(s)	Animal species	Other provisions
▼ <u>M58</u>	<i>Echinacea purpurea</i>	All food-producing species	For topical use only
	<i>Eucalypti aetheroleum</i>	All food-producing species	
	<i>Foeniculi aetheroleum</i>	All food-producing species	
▼ <u>M77</u>	<i>Frangulae cortex</i> , standardised extracts and preparations thereof	All food producing species	
	<i>Gentianae radix</i> , standardised extracts and preparations thereof	All food producing species	
▼ <u>M58</u>	<i>Hamamelis virginiana</i>	All food-producing species	For topical use only
	<i>Hippocastani semen</i>	All food-producing species	For topical use only
▼ <u>M68</u>	<i>Hyperici oleum</i>	All food-producing species	For topical use only
▼ <u>M58</u>	<i>Juniperi fructus</i>	All food-producing species	
	<i>Lauri folii aetheroleum</i>	All food-producing species	
	<i>Lauri fructus</i>	All food-producing species	
▼ <u>M71</u>	<i>Lavandulae aetheroleum</i>	All food-producing species	For topical use only
▼ <u>M58</u>	<i>Lespedeza capitata</i>	All food-producing species	
	<i>Lini oleum</i>	All food-producing species	
	<i>Majoranae herba</i>	All food-producing species	
▼ <u>M74</u>	<i>Matricaria recutita</i> and preparations thereof	All food producing species	

<b>▼M74</b>	Pharmacologically active substance(s)	Animal species	Other provisions
<b>▼M58</b>			
<i>Matricariae flos</i>	All food-producing species		
<i>Medicago sativa extractum</i>	All food-producing species	For topical use only	
<b>▼M59</b>			
<i>Melissae aetheroleum</i>	All food producing species		
<b>▼M58</b>			
<i>Melissae folium</i>	All food-producing species		
<b>▼M91</b>			
<i>Menthae arvensis aetheroleum</i>	All food-producing species		
<b>▼M58</b>			
<i>Menthae piperita aetheroleum</i>	All food-producing species		
<i>Millefolii herba</i>	All food-producing species		
<i>Myristicæ aetheroleum</i>	All food-producing species	For use in newborn animals only	
<b>▼M125</b>			
<i>Piceae turiones recentes extractum</i>	All food producing species	For oral use only	
<b>▼M58</b>			
Oxidation products of <i>Terebinthinae oleum</i>	Bovine, porcine, ovine, caprine		
<i>Pyrethrum</i> extract	All food-producing species	For topical use only	
<i>Quercus</i> cortex	All food-producing species		
<i>Quillaja saponins</i>	All food-producing species		
<b>▼M74</b>			
<i>Rhei radix</i> , standardised extracts and preparations thereof	All food producing species		
<b>▼M58</b>			
<i>Ricini oleum</i>	All food-producing species	For use as excipient	
<i>Rosmarini aetheroleum</i>	All food-producing species		

	Pharmacologically active substance(s)	Animal species	Other provisions
<b>▼M58</b>	<i>Rosmarini folium</i>	All food-producing species	
<b>▼M68</b>	<i>Ruscus aculeatus</i>	All food-producing species	For topical use only
<b>▼M58</b>	<i>Salviae folium</i>	All food-producing species	
	<i>Sambuci flos</i>	All food-producing species	
	<i>Sinapis nigrae semen</i>	All food-producing species	
<b>▼M68</b>	<i>Strychni semen</i>	Bovine, ovine, caprine	For oral use only at doses up to the equivalent of 0,1 mg strychnine/kg bw
<b>▼M71</b>	<i>Symphyti radix</i>	All food-producing species	For topical use on intact skin only
<b>▼M58</b>	<i>Terebinthinae aetheroleum rectificatum</i>	All food-producing species	For topical use only
	<i>Terebinthinae laricina</i>	All food-producing species	For topical use only
	<i>Thymi aetheroleum</i>	All food-producing species	
	<i>Tiliae flos</i>	All food-producing species	
	<i>Urticae herba</i>	All food-producing species	
<b>▼M111</b>	7. Anti-infectious agents		
	Pharmacologically active substance(s)	Animal species	Other provisions
	Oxalic acid	Honey bees	

**▼M119** 8. Anti-inflammatory agents

	Pharmacologically active substance(s)	Animal species	Other provisions
Carprofen		Bovine <sup>(1)</sup>	

(1) For bovine milk only.

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Toltrazuril	Toltrazuril sulfone	Porcine	100 µg/kg	Muscle	Provisional MRLs expire on 1.1.2001
			150 µg/kg	Skin and fat	
			500 µg/kg	Liver	
			250 µg/kg	Kidney	

**▼M116**

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Toltrazuril (1)	Toltrazuril sulfone	Bovine	100 µg/kg	Muscle	
			150 µg/kg	Fat	
			500 µg/kg	Liver	
			250 µg/kg	Kidney	

(1) Provisional MRLs expire on 1 July 2006. Not for use in animals from which milk is produced for human consumption.

**▼M75****2.4.4. Other anti-protozoal agents**

Pharmacologically active substance(s)	Marker residue	Animal species	MRL	Target tissues	Other provisions
Amprolium	Amprolium	Chicken, turkey	200 µg/kg	Muscle	Provisional MRLs expire on 1.1.2002
			200 µg/kg	Skin and fat	
			200 µg/kg	Liver	
			400 µg/kg	Kidney	
			1 000 µg/kg	Eggs	

**▼M127**

## 2.4.5. Ionophores

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Lasalocid	Lasalocid A	Poultry	150 µg/kg	Eggs <sup>(1)</sup>	

<sup>(1)</sup> Provisional MRLs expire on 1 January 2008.**▼M58**

## 3. Agents acting on the nervous system

## 3.2. Agents acting on the autonomic nervous system

3.2.1.  $\beta$  2 sympathomimetic agents

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Clenbuterol hydrochloride	Clenbuterol	Bovine  Indication: solely for tocolysis in parturient cows	0,1 µg/kg  0,5 µg/kg	Muscle  Liver  Kidney	Provisional MRLs expire on 1 July 2000

**▼M60**

3.2.2. Anti-adrenergics

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Carazolol	Carazolol	Bovine	5 µg/kg 5 µg/kg 15 µg/kg 15 µg/kg 1 µg/kg	Muscle Fat Liver Kidney Milk	Provisional MRLs expire on 1.1.2000

**▼M58**

5. Anti-inflammatory agents

5.1. Nonsteroidal anti-inflammatory agents

5.1.1. Arylpropionic acid derivative

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Carprofen	Carprofen	Bovine	500 µg/kg 500 µg/kg 1 000 µg/kg 1 000 µg/kg 50 µg/kg 100 µg/kg 1 000 µg/kg 1 000 µg/kg	Muscle Fat Liver Kidney Muscle Fat Liver Kidney	Provisional MRLs expire on 1 January 2000

**▼M58**

## 5.1.2. Enolic acid derivates

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Meloxicam	Meloxicam	Bovine	25 µg/kg	Muscle	Provisional MRLs expire on 1 January 2000

**▼M71**

## 5.1.3. Pyrazolone derivatives

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Metamizole	4-Methylaminoantipyrin	Bovine, porcine, equidae	200 µg/kg 200 µg/kg 200 µg/kg 200 µg/kg	Muscle Fat Liver Kidney	Provisional MRLs expire on 1.7.2003. Not for use in animals from which milk is produced for human consumption

**▼M130**

## 5.1.4. Sulfonated phenyl lactones

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Firocoxib		<i>Equidae</i>	10 µg/kg 15 µg/kg 60 µg/kg 10 µg/kg	Muscle Fat Liver Kidney	Provisional MRLs expire on 1 July 2007

**▼M92**

6. Agents acting on the reproductive system  
 6.1. Progestogens

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Altrenogest	Altrenogest	Porcine	3 µg/kg 3 µg/kg	►M97 Skin and fat	►M97 Provisional MRLs expire on 1.1.2005; for zootechnical use only ▼

**▼M102**

Flugestone acetate	Flugestone acetate	Ovine, caprine	0,5 µg/kg 0,5 µg/kg 0,5 µg/kg 0,5 µg/kg	Muscle Fat Liver Kidney	Provisional MRLs expire on 1.1.2008; for therapeutic or zootechnical use only
Norgestomet	Norgestomet	Bovine	0,5 µg/kg 0,5 µg/kg 0,5 µg/kg 0,15 µg/kg	Muscle Fat Liver Kidney Milk	Provisional MRLs expire on 1.1.2008; for therapeutic or zootechnical use only

**▼M74**

7. Corticoids  
 7.1. Glucocorticoids

Pharmacologically active substance(s)	Marker residue	Animal species	MRLs	Target tissues	Other provisions
Methylprednisolone	Methylprednisolone	Bovine	10 µg/kg	Muscle	Provisional MRLs expire on 1.7.2001.
			10 µg/kg	Fat	Not for use in animals from which milk is produced for human consumption
			10 µg/kg	Liver	
			10 µg/kg	Kidney	

**▼M58**

*ANNEX IV*

**LIST OF PHARMACOLOGICALLY ACTIVE SUBSTANCES FOR WHICH NO MAXIMUM LEVELS CAN BE FIXED**

Pharmacologically active substance(s)
<i>Aristolochia</i> spp. and preparations thereof
Chloramphenicol
Chloroform
Chlorpromazine
Colchicine
Dapsone
Dimetridazole
Metronidazole
Nitrofurans (including furazolidone)
Ronidazole

**▼M2***ANNEX V*

**Information and particulars to be included in an application for the establishment of a maximum residue limit for a pharmacologically active substance used in veterinary medicinal products**

*Administrative particulars*

- 1 Name or corporate name and permanent address of the applicant.
- 2 Name of the veterinary medicinal product.
- 3 Qualitative and quantitative composition in terms of active principles, with mention of the international non-proprietary name recommended by the World Health Organization, where such name exists.
- 4 Manufacturing authorization, if any.
- 5 Marketing authorization, if any.
- 6 Summary of the characteristics of the veterinary medicinal product(s) prepared in accordance with Article 5a of Directive 81/851/EEC.

**A. Safety documentation**

**A.0. Expert report**

- A.1. Precise identification of the substance concerned by the application
  - 1.1 International non-proprietary name (INN).
  - 1.2 International Union of Pure and Applied Chemistry (IUPAC) name.
  - 1.3 Chemical Abstract Service (CAS) name.
  - 1.4 Classification:
    - therapeutic;
    - pharmacological.
  - 1.5 Synonyms and abbreviations.
  - 1.6 Structural formula.
  - 1.7 Molecular formula.
  - 1.8 Molecular weight.
  - 1.9 Degree of impurity.
  - 1.10 Qualitative and quantitative composition of impurities.
  - 1.11 Description of physical properties:
    - melting point;
    - boiling point;
    - vapour pressure;
    - solubility in water and organic solvents, expressed in grams per litre, with indication of temperature;
    - density;
    - refractive index, rotation, etc.

A.2. Relevant pharmacological studies

- 2.1 Pharmacodynamics.
- 2.2 Pharmacokinetics.

A.3. Toxicological studies

- 3.1 Single dose toxicity.
- 3.2 Repeated dose toxicity.
- 3.3 Tolerance in the target species of animal.
- 3.4 Reproductive toxicity, including teratogenicity.

**▼M2**

- 3.4.1 Study of the effects on reproduction.
- 3.4.2 Embryotoxicity/fetotoxicity, including teratogenicity.
- 3.5 Mutagenicity.
- 3.6 Carcinogenicity.
- A.4. Studies of other effects
  - 4.1 Immunotoxicity.
  - 4.2 Microbiological properties of residues.
    - 4.2.1 On the human gut flora;
    - 4.2.2 On the organisms and microorganisms used for industrial food-processing.
  - 4.3 Observations in humans.
- B. Residue documentation**
- B.0 Expert report
- B.1 Precise identification of the substance concerned by the application
 

The substance concerned should be identified in accordance with point A.1. However, where the application relates to one or more veterinary medicinal products, the product itself should be identified in detail, including:

  - qualitative and quantitative composition;
  - purity;
  - identification of the manufacturer's batch used in the studies; relationship to the final product;
  - specific activity and radio-purity of labelled substances;
  - position of labelled atoms on the molecule.
- B.2 Residue studies
  - 2.1 Pharmacokinetics  
(absorption, distribution, biotransformation, excretion).
  - 2.2 Depletion of residues.
  - 2.3 Elaboration of maximum residue limits (MRLS).
- B.3 Routine analytical method for the detection of residues
  - 3.1 Description of the method.
  - 3.2 Validation of the method.
    - 3.2.1 specificity;
    - 3.2.2 accuracy, including sensitivity;
    - 3.2.3 precision;
    - 3.2.4 limit of detection;
    - 3.2.5 limit of quantitation;
    - 3.2.6 practicability and applicability under normal laboratory conditions;
    - 3.2.7 susceptibility to interference.
