▼B**COMMISSION REGULATION (EEC) No 2454/93****of 2 July 1993****laying down provisions for the implementation of Council Regulation (EEC) No 2913/92 establishing the Community Customs Code**

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 2913/92 of 12 October 1992 establishing the Community Customs Code ⁽¹⁾, hereinafter referred to as the 'Code', and in particular Article 249 thereof,

Whereas the Code assembled all existing customs legislation in a single legal instrument; whereas at the same time the Code made certain modifications to this legislation to make it more coherent, to simplify it and to plug certain loopholes; whereas it therefore constitutes complete Community legislation in this area;

Whereas the same reasons which led to the adoption of the Code apply equally to the customs implementing legislation; whereas it is therefore desirable to bring together in a single regulation those customs implementing provisions which (SIC! which) are currently scattered over a large number of Community regulations and directives;

Whereas the implementing code for the Community Customs Code hereby established should set out existing customs implementing rules; whereas it is nevertheless necessary, in the light of experience:

- to make some amendments in order to adapt the said rules to the provisions of the Code,
- to extend the scope of certain provisions which currently apply only to specific customs procedures in order to take account of the Code's comprehensive application,
- to formulate certain rules more precisely in order to achieve greater legal security in their application;

Whereas the changes made relate mainly to the provisions concerning customs debt;

Whereas it is appropriate to limit the application of Article 791 (2) until 1 January 1995 and to review the subject matter in the light of experience gained before that time;

Whereas the measures provided for by this Regulation are in accordance with the opinion of the Customs Code Committee,

TITLE IIA

AUTHORISED ECONOMIC OPERATORS*CHAPTER 1**Procedure for granting the certificates*

Section 1

General provisions*Article 14a*

1. Without prejudice to the use of simplifications otherwise provided for under the customs rules, the customs authorities may, following an application by an economic operator and in accordance with Article 5a of the Code, issue the following authorised economic operators' certificates (hereinafter referred to as 'AEO certificates'):

- (a) an AEO certificate — Customs simplifications in respect of economic operators requesting to benefit from simplifications provided for under the customs rules and who fulfil the conditions laid down in Articles 14h, 14i and 14j;
- (b) an AEO certificate — Security and safety in respect of economic operators requesting to benefit from facilitations of customs controls

▼ **M29**

relating to security and safety when the goods enter the customs territory of the Community, or when the goods leave the customs territory of the Community and who fulfil the conditions laid down in Articles 14h to 14k;

- (c) an AEO certificate — Customs Simplifications/security and safety, in respect of economic operators requesting to benefit from the simplifications described in point (a) and from facilitations described in point (b), and who fulfil the conditions laid down in Articles 14h to 14k.

2. The customs authorities shall take due account of the specific characteristics of economic operators, in particular of small and medium-sized companies.

Article 14b

1. If the holder of an AEO certificate referred to in point (a) or (c) of Article 14a(1) applies for one or more of the authorisations referred to in Articles 260, 263, 269, 272, 276, 277, 282, 283, 313a, 313b, 324a, 324e, 372, 454a, 912g, the customs authorities shall not re-examine those conditions which have already been examined when granting the AEO certificate.

4. The holder of an AEO certificate shall be subject to fewer physical and document-based controls than other economic operators. The customs authorities may decide otherwise in order to take into account a specific threat, or control obligations set out in other Community legislation.

Where, following risk analysis, the competent customs authority nevertheless selects for further examination a consignment covered by an entry or exit summary declaration or by a customs declaration lodged by an authorised economic operator, it shall carry out the necessary controls as a matter of priority. If the authorised economic operator so requests, and subject to agreement with the customs authority concerned, these controls may be carried out at a place which is different from the place of the customs office involved.

5. The benefits laid down in paragraphs 1 to 4 shall be subject to the economic operator concerned providing the necessary AEO certificate numbers.

The time limits referred to in Articles 14l(1) and 14o(2) shall run from the date on which the customs authority receives all the necessary information to accept the application. The customs authorities shall inform the economic operator that the application has been accepted and the date from which the time limits will run.

The applicant's main accounts referred to in points (a) and (b) shall include records and documentation enabling the customs authority to verify and monitor the conditions and the criteria necessary for obtaining the AEO certificate.

2. If the competent customs authority can not be determined under paragraph 1, the application shall be submitted to one of the following customs authorities:

- (a) the customs authority of the Member State where the applicant's main accounts related to the customs arrangements involved are held;

An applicant requesting the AEO certificate referred to in point (b) of Article 14a(1) shall not be required to fulfil the requirement laid down in point (c) of the first paragraph of this Article.

Article 14j

1. The condition relating to the financial solvency of the applicant referred to in the third indent of Article 5a(2) of the Code shall be deemed to be met if his solvency can be proven for the past three years.

For the purposes of this Article, financial solvency shall mean a good financial standing which is sufficient to fulfil the commitments of the applicant, with due regard to the characteristics of the type of the business activity.

▼ **M29**

2. If the applicant has been established for less than three years, his financial solvency shall be judged on the basis of records and information that are available.

Article 14k

1. The applicant's security and safety standards referred to in the fourth indent of Article 5a(2) of the Code shall be considered to be appropriate if the following conditions are fulfilled:

- (a) be the holder of an internationally recognised security and/or safety certificate issued on the basis of the international conventions governing the transport sectors concerned;
- (b) be a regulated agent, as referred to in Regulation (EC) No 2320/2002 of the European Parliament and of the Council ⁽¹⁾, and fulfil the requirements laid down in Commission Regulation (EC) No 622/2003 ⁽²⁾;
- (c) be the holder of a certificate issued in a country outside of the customs territory of the Community, where a bilateral agreement concluded between the Community and the third country provides for acceptance of the certificate, subject to the conditions laid down in that agreement.

If the airline or shipping company is the holder of a certificate referred to in point (a) of this paragraph, it shall meet the criteria laid down in paragraph 1. The issuing customs authority shall consider the criteria laid down in paragraph 1 to be met, to the extent that the criteria for issuing the international certificate are identical or correspond to those laid down in paragraph 1.

⁽²⁾ OJ L 89, 5.4.2003, p. 9.

3. If the applicant is established in the Community and is a regulated agent as referred to in Regulation (EC) No 2320/2002 and fulfils the requirements provided for in Regulation (EC) No 622/2003, the criteria laid down in paragraph 1 shall be deemed to be met in relation to the premises for which the economic operator obtained the status of regulated agent.

4. If the applicant, established in the Community, is the holder of an internationally recognised security and/or safety certificate issued on the basis of international conventions, of a European security and/or safety certificate issued on the basis of Community legislation, of an International Standard of the International Organisation for Standardisation, or of a European Standard of the European Standards Organisations, the criteria provided for in paragraph 1 shall be deemed to be met to the extent that the criteria for issuing these certificates are identical or correspond to those laid down in this Regulation.

Section 4

Procedure for issuing AEO certificates*Article 14l*

1. The issuing customs authority shall communicate the application to the customs authorities of all other Member States within five working days starting from the date on which it has received the application in accordance with Article 14c using the communication system referred to in Article 14x.

2. Where the customs authority of any other Member State has relevant information which may prejudice the granting of the certificate, it shall communicate that information to the issuing customs authority within 35 calendar days starting from the date of the communication provided for in paragraph 1, using the communication system referred to in Article 14x.

Article 14m

1. Consultation between the customs authorities of the Member States shall be required if the examination of one or more of the criteria laid down in Articles 14g to 14k cannot be performed by the issuing customs authority due either to a lack of information or to the impossibility of checking it. In these cases, the customs authorities of the Member States shall carry out the consultation within 60 calendar days, starting from the date of the communication of the information by the issuing customs authority, in order to allow for the issuing of the AEO certificate or the rejection of the application within the time limits set out in Article 14o(2).

If the consulted customs authority fails to respond within the 60 calendar days, the consulting authority may assume, at the responsibility of the consulted customs authority, that the criteria for which the consultation took place are met. This period may be extended if the applicant carries out adjustments in order to satisfy those criteria and communicates them to the consulted and the consulting authority.

2. Where, following the examination provided for in Article 14n, the consulted customs authority establishes that the applicant does not fulfil one or more of the criteria, the results, duly documented, shall be transferred to the issuing customs authority which shall reject the application. Article 14o(4), (5) and (6) shall apply.

▼ M29*Article 14n*

1. The issuing customs authority shall examine whether or not the conditions and criteria for issuing the certificate described in Articles 14g to 14k are met. Examination of the criteria laid down in Article 14k shall be carried out for all the premises which are relevant to the customs related activities of the applicant. The examination as well as its results shall be documented by the customs authority.

Where, in the case of a large number of premises, the period for issuing the certificate would not allow for examination of all of the relevant premises, but the customs authority has no doubt that the applicant maintains corporate security standards which are commonly used in all its premises, it may decide only to examine a representative proportion of those premises.

2. The issuing customs authority may accept conclusions provided by an expert in the relevant fields referred to in Articles 14i, 14j and 14k in respect of the conditions and criteria referred to in those Articles respectively. The expert shall not be related to the applicant.

Article 14o

1. The issuing customs authority shall issue the AEO certificate in accordance with the specimen set out in Annex 1D.

2. The AEO certificate shall be issued within 90 calendar days starting from the date of receipt, in accordance with Article 14c, of the application. Where the customs authority is unable to meet the deadline, this period may be extended by one further period of 30 calendar days. In such cases, the customs authority shall, before the expiry of the period of 90 calendar days, inform the applicant of the reasons for the extension.

3. The period provided for in the first sentence of paragraph 2 may be extended if, in the course of the examination of the criteria, the applicant carries out adjustments in order to satisfy those criteria and communicates them to the competent authority.

4. Where the result of the examination performed in accordance with Articles 14l, 14m and 14n is likely to lead to the rejection of the application, the issuing customs authority shall communicate the findings to the applicant and provide him with the opportunity to respond within 30 calendar days, before rejecting the application. The period laid down in the first sentence of paragraph 2 shall be suspended accordingly.

5. The rejection of an application shall not lead to the automatic revocation of any existing authorisation issued under the customs rules.

6. If the application is rejected, the customs authority shall inform the applicant of the grounds on which the decision is based. The decision to reject an application shall be notified to the applicant within the time limits laid down in paragraphs (2), (3) and (4).

Article 14p

The issuing customs authority shall, within five working days, inform the customs authorities of the other Member States that an AEO certificate has been issued, using the communication system referred to in Article 14x. Information shall also be provided within the same time limit if the application is rejected.

The results of the re-assessment shall be made available to the customs authorities of all Member States, using the communication system referred to in Article 14x.Section 2

Suspension of the status of authorised economic operator*Article 14r*

1. The status of authorised economic operator shall be suspended by the issuing customs authority in the following cases:
 - (a) where non-compliance with the conditions or criteria for the AEO certificate has been detected;
 - (b) the customs authorities have sufficient reason to believe that an act, which gives rise to criminal court proceedings and linked to an infringement of the customs rules, has been perpetrated by the authorised economic operator.

However, in the case referred to in point (b) of the first subparagraph, the customs authority may decide not to suspend the status of authorised economic operator if it considers an infringement to be of negligible importance in relation to the number or size of the customs related operations and not to create doubts concerning the good faith of the authorised economic operator.

Before taking a decision, the customs authorities shall communicate their findings to the economic operator concerned. The economic operator concerned shall be entitled to correct the situation and/or express his point of view within 30 calendar days starting from the date of communication.

However, where the nature or the level of the threat to citizens' security and safety, to public health or to the environment so requires, suspension shall take place immediately. The suspending customs authority shall immediately inform the customs authorities of the

▼ **M29**

other Member States, using the communication system referred to in Article 14x, in order to permit them to take appropriate action.

2. If the holder of the AEO certificate does not regularise the situation referred to in point (a) of the first subparagraph of paragraph 1 within the period of 30 calendar days referred to in the third subparagraph of paragraph 1, the competent customs authority shall notify the economic operator concerned that the status of authorised economic operator is suspended for a period of 30 calendar days, to enable the economic operator to take the required measures to regularise the situation. The notification shall also be sent to the customs authorities of the other Member States using the communication system referred to in Article 14x.

3. If the holder of the AEO certificate has committed an act referred to in point (b) of the first subparagraph of paragraph 1, the issuing customs authority shall suspend the status of authorised economic operator for the duration of the court proceedings. It shall notify the holder of the certificate to that effect. Notification shall also be sent to the customs authorities of the other Member States, using the communication system referred to in Article 14x.

4. Where the economic operator concerned has been unable to regularise the situation within 30 calendar days but can provide evidence that the conditions can be met if the suspension period is extended, the issuing customs authority shall suspend the status of authorised economic operator for a further 30 calendar days.

Article 14s

1. The suspension shall not affect any customs procedure already started before the date of suspension and not yet completed.

2. The suspension shall not automatically affect any authorisation which has been granted without reference to the AEO certificate unless the reasons for the suspension also have relevance for that authorisation.

3. The suspension shall not automatically affect any authorisation for use of a customs simplification which has been granted on the basis of the AEO certificate and for which the conditions are still fulfilled.

4. In the case of an AEO certificate referred to in point (c) of Article 14a(1), if the economic operator concerned fails to fulfil only the conditions laid down in Article 14k, the status of authorised economic operator shall be partially suspended and a new AEO certificate, as referred to in point (a) of Article 14a(1) may be issued at his request.

Article 14t

1. When the economic operator concerned has, to the satisfaction of the customs authorities, taken the necessary measures to comply with the conditions and criteria that have to be met by an authorised economic operator, the issuing customs authority shall withdraw the suspension and inform the economic operator concerned and the customs authorities of the other Member States. The suspension may be withdrawn before the expiry of the time limit laid down in Article 14r(2) or (4).

In the situation referred to in Article 14s (4), the suspending customs authority shall reinstate the suspended certificate. It shall subsequently revoke the AEO certificate referred to in point (a) of Article 14a(1).

2. If the economic operator concerned fails to take the necessary measures within the suspension period provided for in Article 14r(2) or (4), the issuing customs authority shall revoke the AEO certificate

▼ M29

and immediately notify the customs authorities of the other Member States, using the communication system referred to in Article 14x.

In the situation referred to in Article 14s (4), the original certificate shall be revoked and only the new AEO certificate as referred to in point (a) of Article 14a(1) issued shall be valid.

Article 14u

1. Where an authorised economic operator is temporarily unable to meet any of the criteria laid down in Article 14a, he may request suspension of the status of authorised economic operator. In such case, the authorised economic operator shall notify the issuing customs authority, specifying the date when he will be able to meet the criteria again. He shall also notify the issuing customs authority of any planned measures and their timescale.

The notified customs authority shall send the notification to the customs authorities of the other Member States using the communication system referred to in Article 14x.

2. If the authorised economic operator fails to regularise the situation within the period set out in his notification, the issuing customs authority may grant a reasonable prolongation, provided that the authorised economic operator has acted in good faith. This prolongation shall be notified to the customs authorities of the other Member States using the communication system referred to in Article 14x.

In all other cases, the AEO certificate shall be revoked and the issuing customs authority shall immediately notify the customs authorities of the other Member States, using the communication system referred to in Article 14x.

- (c) where the authorised economic operator fails to take the necessary measures during the suspension period referred to in Article 14u;
- (d) upon request of the authorised economic operator.

However, in the case referred to in point (b), the customs authority may decide not to revoke the AEO certificate if it considers the infringements to be of negligible importance in relation to the number or size of the customs related operations and not to create doubts concerning the good faith of the authorised economic operator.

2. Revocation shall take effect from the day following its notification.

In the case of an AEO certificate as referred to in point (c) of Article 14a(1), where the economic operator concerned only fails to fulfil the conditions in Article 14k, the certificate shall be revoked by the issuing

▼ M29

customs authority and a new AEO certificate as referred to in point (a) of Article 14a(1) shall be issued.

3. The issuing customs authority shall immediately inform the customs authorities of the other Member States of the revocation of an AEO certificate using the communication system referred to in Article 14x.

4. Apart from cases of revocation referred to in points (c) and (d) of paragraph 1, the economic operator shall not be permitted to submit a new application for an AEO certificate within three years from the date of revocation. CHAPTER 3

2. All relevant information at the disposal of the issuing customs authority shall be made available to the customs authorities of the other Member States where the authorised economic operator carries out customs related activities.

3. If a customs authority revokes a specific authorisation granted to an authorised economic operator, on the basis of his AEO certificate, for the use of a particular customs simplification, as provided for in Articles 260, 263, 269, 272, 276, 277, 282, 283, 313a and 313b, 324a, 324e, 372, 454a, 912g, it shall so notify the customs authority which issued the AEO certificate.

Article 14x

1. An electronic information and communication system, defined by the Commission and the customs authorities in agreement with each other, shall be used for the information and communication process between the customs authorities and for information of the Commission and of the economic operators.

2. The Commission and the customs authorities shall, using the system referred to in paragraph 1, store and have access to the following information:

- (a) the electronically transmitted data of the applications;

TITLE IV

ORIGIN OF GOODS

CHAPTER 1

Non-preferential origin

Section 1

Working or processing conferring origin*Article 35*

This chapter lays down, for textiles and textile articles falling within Section XI of the combined nomenclature, and for certain products other than textiles and textile articles, the working or processing which shall be regarded as satisfying the criteria laid down in Article 24 of the Code and shall confer on the products concerned the origin of the country in which they were carried out.

'Country' means either a third country or the Community as appropriate.

Subsection 1

Textiles and textile articles falling within Section XI of the combined nomenclature*Article 36*

For textiles and textile articles falling within Section XI of the combined nomenclature, a complete process, as specified in Article 37, shall be regarded as a working or processing conferring origin in terms of Article 24 of the Code.

Article 37

Working or processing as a result of which the products obtained receive a classification under a heading of the combined nomenclature other than those covering the various non-originating materials used shall be regarded as complete processes.

However, for products listed in Annex 10, only the specific processes referred to in column 3 of that Annex in connection with each product obtained shall be regarded as complete, whether or not they involve a change of heading.

The method of applying the rules in Annex 10 is described in the introductory notes in Annex 9.

Article 38

For the purposes of the preceding Article, the following shall in any event be considered as insufficient working or processing to confer the status of originating products whether or not there is a change of heading:

- (a) operations to ensure the preservation of products in good condition during transport and storage (ventilation, spreading out, drying, removal of damaged parts and like operations);

▼B

- (b) simple operations consisting of removal of dust, sifting or screening, sorting, classifying, matching (including the making-up of sets of articles), washing, cutting up;
- (c) (i) changes of packing and breaking-up and assembly of consignments;
 - (ii) simple placing in bags, cases, boxes, fixing on cards or boards, etc., and all other simple packing operations;
- (d) the affixing of marks, labels or other like distinguishing signs on products or their packaging;
- (e) simple assembly of parts of products to constitute a complete product;
- (f) a combination of two or more operations specified in (a) to (e).

Subsection 2

Products other than textiles and textile articles falling within Section XI of the combined nomenclature*Article 39*

In the case of products obtained which are listed in Annex 11, the working or processing referred to in column 3 of the Annex shall be regarded as a process or operation conferring origin under Article 24 of the Code.

The method of applying the rules set out in Annex 11 is described in the introductory notes in Annex 9.

Subsection 3

Common provisions for all products*Article 40*

Where the lists in Annexes 10 and 11 provide that origin is conferred if the value of the non-originating materials used does not exceed a given percentage of the ex-works price of the products obtained, such percentage shall be calculated as follows:

- ‘value’ means the customs value at the time of import of the non-originating materials used or, if this is not known and cannot be ascertained, the first ascertainable price paid for such materials in the country of processing,
- ‘ex-works price’ means the ex-works price of the product obtained minus any internal taxes which are, or may be, repaid when such product is exported,
- ‘value acquired as a result of assembly operations’ means the increase in value resulting from the assembly itself, together with any finishing and checking operations, and from the incorporation of any parts originating in the country where the operations in question were carried out, including profit and the general costs borne in that country as a result of the operations.

Section 2

Implementing provisions relating to spare parts*Article 41***▼M1**

1. Accessories, spare parts or tools delivered with any piece of equipment, machine, apparatus or vehicle which form part of its standard equipment shall be deemed to have the same origin as that piece of equipment, machine, apparatus or vehicle.

▼B

►M1 2. ◀ Essential spare parts for use with any piece of equipment, machine, apparatus or vehicle put into free circulation or previously exported shall be deemed to have the same origin as that piece of equipment, machine, apparatus or vehicle provided the conditions laid down in this section are fulfilled.

Article 42

The presumption of origin referred to in the preceding Article shall be accepted only:

- if this is necessary for importation into the country of destination,
- if the incorporation of the said essential spare parts in the piece of equipment, machine, apparatus or vehicle concerned at the production stage would not have prevented the piece of equipment, machine, apparatus or vehicle from having Community origin or that of the country of manufacture.

Article 43

For the purposes of Article 41:

- (a) 'piece of equipment, machine, apparatus or vehicle' means goods listed in Sections XVI, XVII and XVIII of the combined nomenclature;
- (b) 'essential spare parts' means parts which are:
 - components without which the proper operation of the goods referred to in (a) which have been put into free circulation or previously exported cannot be ensured, and
 - characteristic of those goods, and
 - intended for their normal maintenance and to replace parts of the same kind which are damaged or have become unserviceable.

Article 44

Where an application is presented to the competent authorities or authorized agencies of the Member States for a certificate of origin for essential spare parts within the meaning of Article 41, box 6 (Item number, marks, numbers, number and kind of packages, description of goods) of that certificate and the application relating thereto shall include a declaration by the person concerned that the goods mentioned therein are intended for the normal maintenance of a piece of equipment, machine, apparatus or vehicle previously exported, together with the exact particulars of the said piece of equipment, machine, apparatus or vehicle.

Whenever possible, the person concerned shall also give the particulars of the certificate of origin (issuing authority, number and date of certificate) under cover of which was exported the piece of equipment,

▼B

machine, apparatus or vehicle for whose maintenance the parts are intended.

Article 45

Where the origin of essential spare parts within the meaning of Article 41 must be proved for their release for free circulation in the Community by the production of a certificate of origin, the certificate shall include the particulars referred to in Article 44.

Article 46

In order to ensure application of the rules laid down in this section, the competent authorities of the Member States may require additional proof, in particular:

- production of the invoice or a copy of the invoice relating to the piece of equipment, machine, apparatus or vehicle put into free circulation or previously exported,
- the contract or a copy of the contract or any other document showing that delivery is being made as part of the normal maintenance service.

Section 3

Implementing provisions relating to certificates of origin

Subsection 1

Provisions relating to universal certificates of origin*Article 47*

When the origin of a product is or has to be proved on importation by the production of a certificate of origin, that certificate shall fulfil the following conditions:

- (a) it shall be made out by a reliable authority or agency duly authorized for that purpose by the country of issue;
- (b) it shall contain all the particulars necessary for identifying the product to which it relates, in particular:
 - the number of packages, their nature, and the marks and numbers they bear,
 - the type of product,
 - the gross and net weight of the product; these particulars may, however, be replaced by others, such as the number or volume, when the product is subject to appreciable changes in weight during carriage or when its weight cannot be ascertained or when it is normally identified by such other particulars,
 - the name of the consignor;
- (c) it shall certify unambiguously that the product to which it relates originated in a specific country.

Article 48

1. A certificate of origin issued by the competent authorities or authorized agencies of the Member States shall comply with the conditions prescribed by Article 47 (a) and (b).

▼B

2. The certificates and the applications relating to them shall be made out on forms corresponding to the specimens in Annex 12.

3. Such certificates of origin shall certify that the goods originated in the Community.

However, when the exigencies of export trade so require, they may certify that the goods originated in a particular Member State.

If the conditions of Article 24 of the Code are fulfilled only as a result of a series of operations or processes carried out in different Member States, the goods may only be certified as being of Community origin.

Article 49

Certificates of origin shall be issued upon written request of the person concerned.

Where the circumstances so warrant, in particular where the applicant maintains a regular flow of exports, the Member States may decide not to require an application for each export operation, on condition that the provisions concerning origin are complied with.

Where the exigencies of trade so require, one or more extra copies of an origin certificate may be issued.

Such copies shall be made out on forms corresponding to the specimen in Annex 12.

Article 50

1. The certificate shall measure 210 × 297 mm. A tolerance of up to minus 5 mm or plus 8 mm in the length shall be allowed. The paper used shall be white, free of mechanical pulp, dressed for writing purposes and weigh at least 64 g/m² or between 25 and 30 g/m² where air-mail paper is used. It shall have a printed guilloche pattern background in sepia such as to reveal any falsification by mechanical or chemical means.

2. The application form shall be printed in the official language or in one or more of the official languages of the exporting Member State. The certificate of origin form shall be printed in one or more of the official languages of the Community or, depending on the practice and requirements of trade, in any other language.

3. Member States may reserve the right to print the certificate of origin forms or may have them printed by approved printers. In the latter case, each certificate must bear a reference to such approval. Each certificate of origin form must bear the name and address of the printer or a mark by which the printer can be identified. It shall also bear a serial number, either printed or stamped, by which it can be identified.

Article 51

The application form and the certificate of origin shall be completed in typescript or by hand in block capitals, in an identical manner, in one of the official languages of the Community or, depending on the practice and requirements of trade, in any other languages.

Article 52

Each origin certificate referred to in Article 48 shall bear a serial number by which it can be identified. The application for the certificate and all copies of the certificate itself shall bear the same number.

In addition, the competent authorities or authorized agencies of the Member States may number such documents by order of issue.

▼B*Article 53*

The competent authorities of the Member States shall determine what additional particulars, if any, are to be given in the application. Such additional particulars shall be kept to a strict minimum.

Each Member State shall inform the Commission of the provisions it adopts in pursuance of the preceding paragraph. The Commission shall immediately communicate this information to the other Member States.

Article 54

The competent authorities or authorized agencies of the Member States which have issued certificates of origin shall retain the applications for a minimum of two years.

However, applications may also be retained in the form of copies thereof, provided that these have the same probative value under the law of the Member State concerned.

Subsection 2

Specific provisions relating to certificates of origin for certain agricultural products subject to special import arrangements*Article 55*

Articles 56 to 65 lay down the conditions for use of certificates of origin relating to agricultural products originating in third countries for which special non-preferential import arrangements have been established, in so far as these arrangements refer to the following provisions.

(a) *Certificates of origin**Article 56*

1. Certificates of origin relating to agricultural products originating in third countries for which special non-preferential import arrangements are established shall be made out on a form conforming to the specimen in Annex 13.
2. Such certificates shall be issued by the competent governmental authorities of the third countries concerned, hereinafter referred to as the issuing authorities, if the products to which the certificates relate can be considered as products originating in those countries within the meaning of the rules in force in the Community.
3. Such certificates shall also certify all necessary information provided for in the Community legislation governing the special import arrangements referred to in Article 55.
4. Without prejudice to specific provisions under the special import arrangements referred to in Article 55 the period of validity of the certificates of origin shall be ten months from the date of issue by the issuing authorities.

Article 57

1. Certificates of origin drawn up in accordance with the provisions of this subsection shall consist only of a single sheet identified by the word 'original' next to the title of the document.

If additional copies are necessary, they shall bear the designation 'copy' next to the title of the document.

▼B

2. The competent authorities in the Community shall accept as valid only the original of the certificate of origin.

Article 58

1. The certificate of origin shall measure 210 × 297 mm; a tolerance of up to plus 8 mm or minus 5 mm in the length may be allowed. 2. The certificates shall be printed and completed in one of the official languages of the Community.

Article 59

1. The certificate shall be completed in typescript or by means of a mechanical data-processing system, or similar procedure.
2. Entries must not be erased or overwritten. Any changes shall be made by crossing out the wrong entry and if necessary adding the correct particulars. Such changes shall be initialled by the person making them and endorsed by the issuing authorities.

Article 60

1. Box 5 of the certificates of origin issued in accordance with Articles 56 to 59 shall contain any additional particulars which may be required for the implementation of the special import arrangements to which they relate as referred to in Article 56 (3).
2. Unused spaces in boxes 5, 6 and 7 shall be struck through in such a way that nothing can be added at a later stage.

Article 61

Each certificate of origin shall bear a serial number, whether or not printed, by which it can be identified, and shall be stamped by the issuing authority and signed by the person or persons empowered to do so.

The certificate shall be issued when the products to which it relates are exported, and the issuing authority shall keep a copy of each certificate issued.

Article 62

Exceptionally, the certificates of origin referred to above may be issued after the export of the products to which they relate, where the failure to issue them at the time of such export was a result of involuntary error or omission or special circumstances.

The issuing authorities may not issue retrospectively a certificate of origin provided for in Articles 56 to 61 until they have checked that the particulars in the exporter's application correspond to those in the relevant export file.

Certificates issued retrospectively shall bear one of the following:

(b) *Administrative cooperation**Article 63*

1. Where the special import arrangements for certain agricultural products provide for the use of the certificate of origin laid down in Articles 56 to 62, the entitlement to use such arrangements shall be subject to the setting up of an administrative cooperation procedure unless specified otherwise in the arrangements concerned.

To this end the third countries concerned shall send the Commission of the European Communities:

- the names and addresses of the issuing authorities for certificates of origin together with specimens of the stamps used by the said authorities,
- the names and addresses of the government authorities to which requests for the subsequent verification of origin certificates provided for in Article 64 below should be sent.

The Commission shall transmit all the above information to the competent authorities of the Member States.

2. Where the third countries in question fail to send the Commission the information specified in paragraph 1, the competent authorities in the Community shall refuse access entitlement to the special import arrangements.

▼B*Article 64*

1. Subsequent verification of the certificates of origin referred to in Articles 56 to 62 shall be carried out at random and whenever reasonable doubt has arisen as to the authenticity of the certificate or the accuracy of the information it contains.

For origin matters the verification shall be carried out on the initiative of the customs authorities.

For the purposes of agricultural rules, the verification may be carried out, where appropriate, by other competent authorities.

2. For the purposes of paragraph 1, the competent authorities in the Community shall return the certificate of origin or a copy thereof to the governmental authority designated by the exporting country, giving, where appropriate, the reasons of form or substance for an enquiry. If the invoice has been produced, the original or a copy thereof shall be attached to the returned certificate. The authorities shall also provide any information that has been obtained suggesting that the particulars given on the certificates are inaccurate or that the certificate is not authentic.

Should the customs authorities in the Community decide to suspend the application of the special import arrangements concerned pending the results of the verification they shall grant release of the products subject to such precautions as they consider necessary.

Article 65

1. The results of subsequent verifications shall be communicated to the competent authorities in the Community as soon as possible.

The said results must make it possible to determine whether the origin certificates remitted in the conditions laid down in Article 64 above apply to the goods actually exported and whether the latter may actually give rise to application of the special importation arrangements concerned.

2. If there is no reply within a maximum time limit of six months to requests for subsequent verification, the competent authorities in the Community shall definitively refuse to grant entitlement to the special import arrangements.

Section 1

Generalised system of preferences

Subsection 1

Definition of the concept of originating products*Article 67*

1. For the purposes of the provisions concerning generalised tariff preferences granted by the Community to products originating in developing countries (hereinafter referred to as 'beneficiary countries'), the following products shall be considered as originating in a beneficiary country:
 - (a) products wholly obtained in that country within the meaning of Article 68;
 - (b) products obtained in that country in the manufacture of which products other than those referred to in (a) are used, provided that the said products have undergone sufficient working or processing within the meaning of Article 69.
2. For the purposes of this section, products originating in the Community, within the meaning of paragraph 3, which are subject in a beneficiary country to working or processing going beyond that described in Article 70 shall be considered as originating in that beneficiary country.
3. Paragraph 1 shall apply *mutatis mutandis* in order to establish the origin of the products obtained in the Community.
4. In so far as Norway and Switzerland grant generalised tariff preferences to products originating in the beneficiary countries referred to in paragraph 1 and apply a definition of the concept of origin corresponding to that set out in this section, products originating in the Community, Norway or Switzerland which are subject in a beneficiary country to working or processing going beyond that described in Article 70 shall be considered as originating in that beneficiary country.

▼ **M18**

The provisions of the first subparagraph shall apply only to products originating in the Community, Norway or Switzerland (according to the rules of origin relative to the tariff preferences in question) which are exported direct to the beneficiary country.

The provisions of the first subparagraph shall not apply to products falling within Chapters 1 to 24 of the Harmonised System.

The Commission shall publish in the *Official Journal of the European Communities* (C series) the date from which the provisions laid down in the first and second subparagraphs shall apply.

5. The provisions of paragraph 4 shall apply on condition that Norway and Switzerland grant, by reciprocity, the same treatment to Community products.

Article 68

1. The following shall be considered as wholly obtained in a beneficiary country or in the Community:

- (a) mineral products extracted from its soil or from its seabed;
- (b) vegetable products harvested there;
- (c) live animals born and raised there;

- which are registered or recorded in the beneficiary country or in a Member State,
- which sail under the flag of a beneficiary country or of a Member State,

4. Vessels operating on the high seas, including factory ships on which the fish caught is worked or processed, shall be considered as part of the territory of the beneficiary country or of the Member State to which they belong, provided that they satisfy the conditions set out in paragraph 2.

Article 69

For the purposes of Article 67, products which are not wholly obtained in a beneficiary country or in the Community are considered to be sufficiently worked or processed when the conditions set out in the list in Annex 15 are fulfilled.

Those conditions indicate, for all products covered by this section, the working or processing which must be carried out on non-originating materials used in manufacturing, and apply only in relation to such materials.

If a product which has acquired originating status by fulfilling the conditions set out in the list is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated shall not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.

*Article 70***▼M22**

1. Without prejudice to paragraph 2, the following operations shall be considered as insufficient working or processing to confer the status of originating products, whether or not the requirements of Article 69 are satisfied:

- (c) washing, cleaning; removal of dust, oxide, oil, paint or other coverings;

▼M22

considered as originating in a beneficiary country or in the Community;

- (n) simple assembly of parts of articles to constitute a complete article or disassembly of products into parts;
- (o) a combination of two or more of the operations specified in points (a) to (n);
- (p) slaughter of animals.

▼M18

2. All the operations carried out in either a beneficiary country or the Community on a given product shall be considered together when determining whether the working or processing undergone by that product is to be regarded as insufficient within the meaning of paragraph 1.

Article 70a

1. The unit of qualification for the application of the provisions of this section shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonised System.

Accordingly, it follows that:

- (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonised System in a single heading, the whole constitutes the unit of qualification;
- (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonised System, each product must be taken individually when applying the provisions of this section.

2. Where, under general rule 5 of the Harmonised System, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

Article 71

1. By way of derogation from the provisions of Article 69, non-originating materials may be used in the manufacture of a given product, provided that their total value does not exceed 10 % of the ex-works price of the product.

Where, in the list, one or several percentage are given for the maximum value of non-originating materials, such percentages must not be exceeded through the application of the first subparagraph.

2. Paragraph 1 shall not apply to products falling within Chapters 50 to 63 of the Harmonised System.

Article 72

1. By way of derogation from Article 67, for the purposes of determining whether a product manufactured in a beneficiary country which is a member of a regional group originates therein with the meaning of that Article, products originating in any of the countries of that regional group and used in further manufacture in another country of the group shall be treated as if they originated in the country of further manufacture (regional cumulation).

2. The country of origin of the final product shall be determined in accordance with Article 72a.

▼ M22

3. Regional cumulation shall apply to three separate regional groups of beneficiary countries benefiting from the generalised system of preferences:

- (a) Group I: Brunei-Darussalam, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam;
- (b) Group II: Bolivia, Colombia, Costa Rica, Ecuador, El Salvador, Guatemala, Honduras, Nicaragua, Panama, Peru, Venezuela;
- (c) Group III: Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka.

4. The expression 'regional group' shall be taken to mean Group I, Group II or Group III, as the case may be.

▼ M18*Article 72a*

1. When goods originating in a country which is a member of a regional group are worked or processed in another country of the same regional group, they shall have the origin of the country of the regional group where the last working or processing was carried out, provided that:

- (a) the value added there, as defined in paragraph 3, is greater than the highest customs value of the products used originating in any one of the other countries of the regional group, and
- (b) the working or processing carried out there exceeds that set out in Article 70 and, in the case of textile products, also those operations referred to at Annex 16.

2. When the conditions of origin in paragraph 1(a) and (b) are not satisfied, the products shall have the origin of the country of the regional group which accounts for the highest customs value of the originating products coming from other countries of the regional group.

3. 'Value added' means the ex-works price minus the customs value of each of the products incorporated which originated in another country of the regional group.

4. Proof of the originating status of goods exported from a country of a regional group to another country of the same group to be used in further working or processing, or to be re-exported where no further working or processing takes place, shall be established by a certificate of origin Form A issued in the first country.

5. Proof of the originating status, acquired or retained under the terms of Article 72, this Article and Article 72b, of goods exported from a country of a regional group to the Community, shall be established by a certificate of origin Form A issued or an invoice declaration made out in that country on the basis of a certificate of origin Form A issued according to the provisions of paragraph 4.

6. The country of origin shall be marked in box 12 of the certificate of origin Form A or on the invoice declaration, that country being:

- in the case of products exported without further working or processing according to paragraph 4, the country of manufacture;
- in the case of products exported after further working or processing, the country of origin as determined in accordance with paragraph 1.

Article 72b

1. Articles 72 and 72a shall apply only where:

- (a) the rules regulating trade in the context of regional cumulation, as between the countries of the regional group, are identical to those laid down in this section;

▼M18

- (b) each country of the regional group has undertaken to comply or ensure compliance with the terms of this section and to provide the administrative cooperation necessary both to the Community and to the other countries of the regional group in order to ensure the correct issue of certificates of origin Form A and the verification of certificates of origin Form A and invoice declarations.

▼M22

This undertaking shall be transmitted to the Commission through the following Secretariats, as the case may be:

- (i) Group I: the General Secretariat of the Association of South-East Asian Nations (ASEAN);
- (ii) Group II: the Andean Community — Central American Common Market and Panama Permanent Joint Committee on Origin (Comité Conjunto Permanente de Origen Comunidad Andina - Mercado Común Centroamericano y Panamá);
- (iii) Group III: the Secretariat of the South Asian Association for Regional Cooperation (SAARC).

4. Vessels operating on the high seas, including factory ships on which the fish caught is worked or processed, shall be considered as part of the territory of the ►**M21** beneficiary country or territory ◀ or of the Member State to which they belong, provided that they satisfy the conditions set out in paragraph 2.

Article 100

For the purposes of Article 98, products which are not wholly obtained in a ►**M21** beneficiary country or territory ◀ or in the Community are considered to be sufficiently worked or processed when the conditions set out in the list in Annex 15 are fulfilled.

Those conditions indicate, for all products covered by this section, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials.

If a product which has acquired originating status by fulfilling the conditions set out in the list is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.

*Article 101***▼M22**

1. Without prejudice to paragraph 2, the following operations shall be considered as insufficient working or processing to confer the status of originating products, whether or not the requirements of Article 100 are satisfied:

- (o) a combination of two or more of the operations specified in points (a) to (n);
- (p) slaughter of animals.

2. All the operations carried out in either a ► M21 beneficiary country or territory ◀ or the Community on a given product shall be considered together when determining whether the working or processing undergone by that product is to be regarded as insufficient within the meaning of paragraph 1.

Article 101a

1. The unit of qualification for the application of the provisions of this section shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonised System.

Accordingly, it follows that:

- (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonised System in a single heading, the whole constitutes the unit of qualification;
- (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonised System, each product must be taken individually when applying the provisions of this Section.

2. Where, under general rule 5 of the Harmonised System, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

▼ **M18***Article 102*

1. By way of derogation from the provisions of Article 100, non-originating materials may be used in the manufacture of a given product, provided that their total value does not exceed 10 % of the ex-works price of the product.

Where, in the list, one or several percentages are given for the maximum value of non-originating materials, such percentages must not be exceeded through the application of the first subparagraph.

2. Paragraph 1 shall not apply to products falling within Chapters 50 to 63 of the Harmonised System.

Article 103

Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle which are part of the normal equipment and included in the price thereof or which are ► **C6** not separately invoiced, shall be regarded ◀ as one with the piece of equipment, machine, apparatus or vehicle in question.

Article 104

Sets, as defined in general rule 3 of the Harmonised System, shall be regarded as originating when all the ► **C6** component products are originating products ◀. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole shall be regarded as originating provided that the value of the non-originating products does not exceed 15 % of the ex-works price of the set.

Article 105

In order to determine whether a product is an originating product, it shall not be necessary to determine the origin of the following which might be used in its manufacture:

- (a) energy and fuel;
- (b) plant and equipment;
- (c) machines and tools;
- (d) goods which do not enter, and which are not intended to enter, into the final composition of the product.

Article 106

The conditions set out in this section for acquiring originating status must continue to be fulfilled at all times in the ► **M21** beneficiary country or territory ◀ or in the Community.

If originating products exported from the ► **M21** beneficiary country or territory ◀ or from the Community to another country are returned, they shall be considered as non-originating unless it can be demonstrated to the satisfaction of the competent authorities that:

- the products returned are the same as those which were exported, and
- they have not undergone any operation beyond that necessary to preserve them in good condition while in that country or while being exported.

▼ **M18***Article 107*

1. The following shall be considered as transported directly from the ► **M21** beneficiary country or territory ◀ to the Community or from the Community to the ► **M21** beneficiary country or territory ◀:

- (b) products constituting one single consignment transported through the territory of countries other than the ► **M21** beneficiary country or territory ◀ or the Community, with, should the occasion arise, trans-shipment or temporary warehousing in those countries, provided that the products remain under the surveillance of the customs authorities in the country of transit or of warehousing and do not undergo operations other than unloading, reloading or any operation designed to preserve them in good condition;
- (c) products which are transported by pipeline without interruption across a territory other than that of the exporting ► **M21** beneficiary country or territory ◀ or of the Community.

2. Evidence that the conditions set out in paragraph 1(b) are fulfilled shall be supplied to the competent customs authorities by the production of:

2. An invoice declaration may be made out if the products concerned can be considered as originating in the Community or in a ► **M21** beneficiary country or territory ◀ and fulfil the other requirements of this section.
3. The exporter making out an invoice declaration shall be prepared to submit at any time, at the request of the customs or other competent governmental authorities of the exporting country, all appropriate documents proving the originating status of the products concerned as well as the fulfilment of the other requirements of this section.
4. An invoice declaration shall be made out by the exporter by typing, stamping or printing on the invoice, the delivery note or any other commercial document, the declaration, the text of which appears in Annex 22, using one of the linguistic versions set out in that Annex and in accordance with the provisions of the domestic law of the exporting country. If the declaration is handwritten, it shall be written in ink, in printed characters.
5. Invoice declarations shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 117 shall not be required to sign such declarations provided that he gives the customs authorities a written undertaking that he accepts full responsibility for any invoice declaration which identifies him as if it had been signed in manuscript by him.
6. In the cases referred to in paragraph 1(b), the use of an invoice declaration shall be subject to the following special conditions:
 - (a) an invoice declaration shall be made out for each consignment;
 - (b) if the goods contained in the consignment have already been subject to verification in the exporting country by reference to the definition of 'originating products', the exporter may refer to this check in the invoice declaration.

The provisions of the first subparagraph shall not exempt exporters from complying with any other formalities required under customs or postal regulations.

Article 117

1. The customs authorities in the Community may authorise any exporter, hereinafter referred to as an 'approved exporter', who makes frequent shipments of products originating in the Community within the meaning of Article 98(2), and who offers, to the satisfaction of the customs authorities, all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this section, to make out invoice declarations, irrespective of the value of the products concerned.
2. The customs authorities may grant the status of approved exporter subject to any conditions which they consider appropriate.

▼ **M18**

3. The customs authorities shall assign the approved exporter a customs authorisation number which shall appear on the invoice declaration.
4. The customs authorities shall monitor the use of the authorisation by the approved exporter.
5. The customs authorities may withdraw the authorisation at any time. They shall do so where the approved exporter no longer offers the guarantees referred to in paragraph 1, does not fulfil the conditions referred to in paragraph 2, or otherwise makes improper use of the authorisation.

Article 118

1. A proof of origin shall be valid for four months from the date of issue in the exporting country, and shall be submitted within the said period to the customs authorities of the importing country.
2. Proofs of origin which are submitted to the customs authorities of the importing country after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying the tariff preferences referred to in Article 98, where the failure to submit these documents by the final date set is due to exceptional circumstances.
3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.
4. At the request of the importer and having regard to the conditions laid down by the customs authorities of the importing Member State, a single proof of origin may be submitted to the customs authorities at the importation of the first consignment when the goods:

 2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.
- Furthermore, the total value of the products shall not exceed EUR 500 in the case of small packages or EUR 1 200 in the case of products forming part of traveller's personal luggage.

▼ **M18***Article 120*

The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the proof of origin null and void if it is duly established that that document does correspond to the products submitted.

Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in that document.

Subsection 3

This information is for official use; however, when goods are to be released for free circulation, the customs authorities in question may allow the importer or his duly-authorised representative to consult the specimen impressions of stamps mentioned in this paragraph.

2. The Commission shall send, to the ► **M21** beneficiary countries or territories ◀, the specimen impressions of the stamps used by the customs authorities of the Member States for the issue of ► **C6** movement certificates EUR.1 ◀.

2. ▼ **M18**

If the customs authorities in the importing Member State decide to suspend the granting of the tariff preferences referred to in Article 98 while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.

The results shall be such as to establish whether the proof of origin in question applies to the products actually exported and whether these products can be considered as originating in the ►**M21** beneficiary country or territory ◀ or in the Community.

4. If in cases of reasonable doubt there is no reply within the six months specified in paragraph 3 or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, a second communication shall be sent to the competent authorities. If after the second communication the results of the verification are not communicated to the requesting authorities within four months, or if these results do not allow the authenticity of the document in question or the real origin of the products to be determined, the requesting authorities shall, except in exceptional circumstances, refuse entitlement to the tariff preferences.

5. Where the verification procedure or any other available information appears to indicate that the provisions of this section are being contravened, the exporting ►**M21** beneficiary country or territory ◀ shall, on its own initiative or at the request of the Community, carry out appropriate inquiries or arrange for such inquiries to be carried out with due urgency to identify and prevent such contraventions. Article 144

1. For the purposes of determining customs value under Article 29 of the Code of goods in regard to which the price has not actually been paid at the material time for valuation for customs purposes, the price payable for settlement at the said time shall as a general rule be taken as the basis for customs value.

2. The Commission and the Member States shall consult within the Committee concerning the application of paragraph 1.

▼M21*Article 145*

1. Where goods declared for free circulation are part of a larger quantity of the same goods purchased in one transaction, the price actually paid or payable for the purposes of Article 29(1) of the Code shall be that price represented by the proportion of the total price which the quantity so declared bears to the total quantity purchased.

Apportioning the price actually paid or payable shall also apply in the case of the loss of part of a consignment or when the goods being valued have been damaged before entry into free circulation.

2. After release of the goods for free circulation, an adjustment made by the seller, to the benefit of the buyer, of the price actually paid or payable for the goods may be taken into consideration for the determination of the customs value in accordance with Article 29 of the Code, if it is demonstrated to the satisfaction of the customs authorities that:

- (a) the goods were defective at the moment referred to by Article 67 of the Code;
- (b) the seller made the adjustment in performance of a warranty obligation provided for in the contract of sale, concluded before release for free circulation of the goods;
- (c) the defective nature of the goods has not already been taken into account in the relevant sales contract.

▼ M21

3. The price actually paid or payable for the goods, adjusted in accordance with paragraph 2, may be taken into account only if that adjustment was made within a period of 12 months following the date of acceptance of the declaration for entry to free circulation of the goods.

▼ B*Article 146*

Where the price actually paid or payable for the purposes of Article 29 (1) of the Code includes an amount in respect of any internal tax applicable within the country of origin or export in respect of the goods in question, the said amount shall not be incorporated in the customs value provided that it can be demonstrated to the satisfaction of the customs authorities concerned that the goods in question have been or will be relieved therefrom for the benefit of the buyer.

Article 147

1. For the purposes of Article 29 of the Code, the fact that the goods which are the subject of a sale are declared for free circulation shall be regarded as adequate indication that they were sold for export to the customs territory of the Community. ► **M6** In the case of successive sales before valuation, only the last sale, which led to the introduction of the goods into the customs territory of the Community, or a sale taking place in the customs territory of the Community before entry for free circulation of the goods shall constitute such indication. ◀

▼ M6

Where a price is declared which relates to a sale taking place before the last sale on the basis of which the goods were introduced into the customs territory of the Community, it must be demonstrated to the satisfaction of the customs authorities that this sale of goods took place for export to the customs territory in question.

The provisions of Articles 178 to 181a shall apply.

▼ B

2. ► **M6** ————— ◀ Where goods are used in a third country between the time of sale and the time of entry into free circulation the customs value need not be the transaction value.

3. The buyer need satisfy no condition other than that of being a party to the contract of sale.

Article 148

Where, in applying Article 29 (1) (b) of the Code, it is established that the sale or price of imported goods is subject to a condition or consideration the value of which can be determined with respect to the goods being valued, such value shall be regarded as an indirect payment by the buyer to the seller and part of the price actually paid or payable provided that the condition or consideration does not relate to either:

- (a) an activity to which Article 29 (3) (b) of the Code applies; or
- (b) a factor in respect of which an addition is to be made to the price actually paid or payable under the provisions of Article 32 of the Code.

Article 149

1. For the purposes of Article 29 (3) (b) of the Code, the term 'marketing activities' means all activities relating to advertising and

promoting the sale of the goods in question and all activities relating to warranties or guarantees in respect of them.

2. Such activities undertaken by the buyer shall be regarded as having been undertaken on his own account even if they are performed in pursuance of an obligation on the buyer following an agreement with the seller.

Article 150

1. In applying Article 30 (2) (a) of the Code (the transaction value of identical goods), the customs value shall be determined by reference to the transaction value of identical goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued. Where no such sale is found, the transaction value of identical goods sold at a different commercial level and/or in different quantities, adjusted to take account of differences attributable to commercial level and/or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in the value.

2. Where the costs and charges referred to in Article 32 (1) (e) of the Code are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the identical goods in question arising from differences in distances and modes of transport.

3. If, in applying this Article, more than one transaction value of identical goods is found, the lowest such value shall be used to determine the customs value of the imported goods.

4. In applying this Article, a transaction value for goods produced by a different person shall be taken into account only when no transaction value can be found under paragraph 1 for identical goods produced by the same person as the goods being valued.

5. For the purposes of this Article, the transaction value of identical imported goods means a customs value previously determined under Article 29 of the Code, adjusted ► **C1** as provided for in paragraphs 1 and 2 ◀ of this Article.

Article 151

1. In applying Article 30 (2) (b) of the Code (the transaction value of similar goods), the customs value shall be determined by reference to the transaction value of similar goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued. Where no such sale is found, the transaction value of similar goods sold at a different commercial level and/or in different quantities, adjusted to take account of differences attributable to commercial level and/or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in the value.

2. Where the costs and charges referred to in Article 32 (1) (e) of the Code are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the similar goods in question arising from differences in distances and modes of transport.

3. If, in applying this Article, more than one transaction value of similar goods is found, the lowest such value shall be used to determine the customs value for the imported goods.

▼B

4. In applying this Article, a transaction value for goods produced by a different person shall be taken into account only when no transaction value can be found under paragraph 1 for similar goods produced by the same person as the goods being valued.
5. For the purposes of this Article, the transaction value of similar imported goods means a customs value previously determined under Article 29 of the Code, adjusted ►C1 as provided for in paragraphs 1 and 2 of ◀ this Article.

Article 152

1. (a) If the imported goods or identical or similar imported goods are sold in the Community in the condition as imported, the customs value of imported goods, determined in accordance with Article 30 (2) (c) of the Code, shall be based on the unit price at which the imported goods or identical or similar imported goods are so sold in the greatest aggregate quantity, at or about the time of the importation of the goods being valued, to persons who are not related to the persons from whom they buy such goods, subject to deductions for the following:
- (i) either the commissions usually paid or agreed to be paid or the additions usually made for profit and general expenses (including the direct and indirect costs of marketing the goods in question) in connection with sales in the Community of imported goods of the same class or kind;
 - (ii) the usual costs of transport and insurance and associated costs incurred within the Community;
 - (iii) the import duties and other charges payable in the Community by reason of the importation or sale of the goods.

▼M27

- (a) The customs value of certain perishable goods imported on consignment may be directly determined in accordance with Article 30(2)(c) of the Code. For this purpose the unit prices shall be notified to the Commission by the Member States and disseminated by the Commission via TARIC in accordance with Article 6 of Council Regulation (EEC) No 2658/87 ⁽¹⁾.

The unit prices shall be calculated and notified as follows:

- (i) After the deductions provided for in point (a), a unit price per 100 kg net for each category of goods shall be notified by the Member States to the Commission. The Member States may fix standard amounts for the costs referred to in point (a)(ii) which shall be made known to the Commission.
- (ii) The unit price may be used to determine the customs value of the imported goods for periods of 14 days, each period beginning on a Friday.
- (iii) The reference period for determining the unit prices shall be the preceding period of 14 days which ends on the Thursday preceding the week during which new unit prices are to be established.
- (iv) The unit prices shall be notified by the Member States to the Commission in euro not later than 12 noon on the Monday of the week in which they are disseminated by the Commission. If that day is a non-working day, noti-

fication shall be made on the working day immediately preceding that day. Unit prices shall only apply if this notification is disseminated by the Commission.

The goods referred to in the first subparagraph of this point are set out in Annex 26.

▼B

- (b) If neither the imported goods nor identical nor similar imported goods are sold at or about the time of importation of the goods being valued, the customs value of imported goods determined under this Article shall, subject otherwise to the provisions of paragraph 1 (a), be based on the unit price at which the imported goods or identical or similar imported goods are sold in the Community in the condition as imported at the earliest date after the importation of the goods being valued but before the expiration of 90 days after such importation.

2. If neither the imported goods nor identical nor similar imported goods are sold in the Community in the condition as imported, then, if the importer so requests, the customs value shall be based on the unit price at which the imported goods, after further processing, are sold in the greatest aggregate quantity to persons in the Community who are not related to the persons from whom they buy such goods, due allowance being made for the value added by such processing and the deductions provided for in paragraph 1 (a).

3. For the purposes of this Article, the unit price at which imported goods are sold in the greatest aggregate quantity is the price at which the greatest number of units is sold in sales to persons who are not related to the persons from whom they buy such goods at the first commercial level after importation at which such sales take place.

4. Any sale in the Community to a person who supplies directly or indirectly free of charge or at reduced cost for use in connection with the production and sale for export of the imported goods any of the elements specified in Article 32 (1) (b) of the Code should not be taken into account in establishing the unit price for the purposes of this Article.

5. For the purposes of paragraph 1 (b), the 'earliest date' shall be the date by which sales of the imported goods or of identical or similar imported goods are made in sufficient quantity to establish the unit price.

Article 153

1. In applying Article 30 (2) (d) of the Code (computed value), the customs authorities may not require or compel any person not resident in the Community to produce for examination, or to allow access to, any account or other record for the purposes of determining this value. However, information supplied by the producer of the goods for the purposes of determining the customs value under this Article may be verified in a non-Community country by the customs authorities of a Member State with the agreement of the producer and provided that such authorities give sufficient advance notice to the authorities of the country in question and the latter do not object to the investigation.

2. The cost or value of materials and fabrication referred to in the first indent of Article 30 (2) (d) of the Code shall include the cost of elements specified in Article 32 (1) (a) (ii) and (iii) of the Code.

It shall also include the value, duly apportioned, of any product or service specified in Article 32 (1) (b) of the Code which has been supplied directly or indirectly by the buyer for use in connection with the production of the imported goods. The value of the elements specified in Article 32 (1) (b) (iv) of the Code which are undertaken in the Community shall be included only to the extent that such elements are charged to the producer.

▼B

3. Where information other than that supplied by or on behalf of the producer is used for the purposes of determining a computed value, the customs authorities shall inform the declarant, if the latter so requests, of the source of such information, the data used and the calculations based on such data, subject to Article 15 of the Code.

4. The 'general expenses' referred to in the second indent of Article 30 (2) (d) of the Code, cover the direct and indirect costs of producing and selling the goods for export which are not included under the first indent of Article 30 (2) (d) of the Code.

Article 154

Where containers referred to in Article 32 (1) (a) (ii) of the Code are to be the subject of repeated importations, their cost shall, at the request of the declarant, be apportioned, as appropriate, in accordance with generally accepted accounting principles.

Article 155

For the purposes of Article 32 (1) (b) (iv) of the Code, the cost of research and preliminary design sketches is not to be included in the customs value.

Article 156

Article 33 (c) of the Code shall apply *mutatis mutandis* where the customs value is determined by applying a method other than the transaction value.

▼M8*Article 156a*

1. The customs authorities may, at the request of the person concerned, authorize:

- by derogation from Article 32 (2) of the Code, certain elements which are to be added to the price actually paid or payable, although not quantifiable at the time of incurrence of the customs debt,
- by derogation from Article 33 of the Code, certain charges which are not to be included in the customs value, in cases where the amounts relating to such elements are not shown separately at the time of incurrence of the customs debt,

to be determined on the basis of appropriate and specific criteria.

In such cases, the declared customs value is not to be considered as provisional within the meaning of the second indent of Article 254.

2. The authorization shall be granted under the following conditions:

- (a) the carrying out of the procedures provided for by Article 259 would, in the circumstances, represent disproportionate administrative costs;
- (b) recourse to an application of Articles 30 and 31 of the Code appears to be inappropriate in the particular circumstances;
- (c) there are valid reasons for considering that the amount of import duties to be charged in the period covered by the authorization will not be lower than that which would be levied in the absence of an authorization;
- (d) competitive conditions amongst operators are not distorted.

CHAPTER 2

Provisions concerning royalties and licence fees

Article 157

1. For the purposes of Article 32 (1) (c) of the Code, royalties and licence fees shall be taken to mean in particular payment for the use of rights relating:

- to the manufacture of imported goods (in particular, patents, designs, models and manufacturing know-how), or
- to the sale for exportation of imported goods (in particular, trade marks, registered designs), or
- to the use or resale of imported goods (in particular, copyright, manufacturing processes inseparably embodied in the imported goods).

2. Without prejudice to Article 32 (5) of the Code, when the customs value of imported goods is determined under the provisions of Article 29 of the Code, a royalty or licence fee shall be added to the price actually paid or payable only when this payment:

- is related to the goods being valued, and
- constitutes a condition of sale of those goods.

Article 158

1. When the imported goods are only an ingredient or component of goods manufactured in the Community, an adjustment to the price actually paid or payable for the imported goods shall only be made when the royalty or licence fee relates to those goods.

2. Where goods are imported in an unassembled state or only have to undergo minor processing before resale, such as diluting or packing, this shall not prevent a royalty or licence fee from being considered related to the imported goods.

3. If royalties or licence fees relate partly to the imported goods and partly to other ingredients or component parts added to the goods after their importation, or to post-importation activities or services, an appropriate apportionment shall be made only on the basis of objective and quantifiable data, in accordance with the interpretative note to Article 32 (2) of the Code in Annex 23.

Article 159

A royalty or licence fee in respect of the right to use a trade mark is only to be added to the price actually paid or payable for the imported goods where:

- the royalty or licence fee refers to goods which are resold in the same state or which are subject only to minor processing after importation,
- the goods are marketed under the trade mark, affixed before or after importation, for which the royalty or licence fee is paid, and
- the buyer is not free to obtain such goods from other suppliers unrelated to the seller.

Article 160

When the buyer pays royalties or licence fees to a third party, the conditions provided for in Article 157 (2) shall not be considered as

▼B

met unless the seller or a person related to him requires the buyer to make that payment.

Article 161

Where the method of calculation of the amount of a royalty or licence fee derives from the price of the imported goods, it may be assumed in the absence of evidence to the contrary that the payment of that royalty or licence fee is related to the goods to be valued.

However, where the amount of a royalty or licence fee is calculated regardless of the price of the imported goods, the payment of that royalty or licence fee may nevertheless be related to the goods to be valued.

Article 162

In applying Article 32 (1) (c) of the Code, the country of residence of the recipient of the payment of the royalty or licence fee shall not be a material consideration.

*CHAPTER 3**Provisions concerning the place of introduction into the Community**Article 163*

1. For the purposes of Article 32 (1) (e) and Article 33 (a) of the Code, the place of introduction into the customs territory of the Community shall be:

- (a) for goods carried by sea, the port of unloading, or the port of transshipment, subject to transshipment being certified by the customs authorities of that port;
- (b) for goods carried by sea and then, without transshipment, by inland waterway, the first port where unloading can take place either at the mouth of the river or canal or further inland, subject to proof being furnished to the customs office that the freight to the port of unloading is higher than that to the first port;
- (c) for goods carried by rail, inland waterway, or road, the place where the first customs office is situated;
- (d) for goods carried by other means, the place where the land frontier of the customs territory of the Community is crossed.

▼M30

2. The customs value of goods introduced into the customs territory of the Community and then carried to a destination in another part of that territory through the territories of Belarus, Russia, Switzerland, Bosnia and Herzegovina, Croatia, the Federal Republic of Yugoslavia or the former Yugoslav Republic of Macedonia shall be determined by reference to the first place of introduction into the customs territory of the Community, provided that goods are carried direct through the territories of those countries by a usual route across such territory to the place of destination.

▼B

3. The customs value of goods introduced into the customs territory of the Community and then carried by sea to a destination in another part of that territory shall be determined by reference to the first place of introduction into the customs territory of the Community, provided the goods are carried direct by a usual route to the place of destination.

▼M30

4. Paragraphs 2 and 3 of this Article shall also apply where the goods have been unloaded, transhipped or temporarily immobilised in the territories of Belarus, Russia, Switzerland, Bosnia and Herzegovina, Croatia, the Federal Republic of Yugoslavia or the former Yugoslav Republic of Macedonia for reasons related solely to their transport.

▼B

5. For goods introduced into the customs territory of the Community and carried directly from one of the French overseas departments to another part of the customs territory of the Community or vice versa, the place of introduction to be taken into consideration shall be the place referred to in paragraphs 1 and 2 situated in that part of the customs territory of the Community from which the goods came, if they were unloaded or transhipped there and this was certified by the customs authorities.

6. When the conditions specified at paragraphs 2, 3 and 5 are not fulfilled, the place of introduction to be taken into consideration shall be the place specified in paragraph 1 situated in that part of the customs territory of the Community to which the goods are consigned.

*CHAPTER 4**Provisions concerning transport costs**Article 164*

In applying Article 32 (1) (e) and 33 (a) of the Code:

- (a) where goods are carried by the same mode of transport to a point beyond the place of introduction into the customs territory of the Community, transport costs shall be assessed in proportion to the distance covered outside and inside the customs territory of the Community, unless evidence is produced to the customs authorities to show the costs that would have been incurred under a general compulsory schedule of freight rates for the carriage of the goods to the place of introduction into the customs territory of the Community;
- (b) where goods are invoiced at a uniform free domicile price which corresponds to the price at the place of introduction, transport costs within the Community shall not be deducted from that price. However, such deduction shall be allowed if evidence is produced to the customs authorities that the free-frontier price would be lower than the uniform free domicile price;
- (c) where transport is free or provided by the buyer, transport costs to the place of introduction, calculated in accordance with the schedule of freight rates normally applied for the same modes of transport, shall be included in the customs value.

Article 165

1. All postal charges levied up to the place of destination in respect of goods sent by post shall be included in the customs value of these goods, with the exception of any supplementary postal charge levied in the country of importation.

2. No adjustment to the declared value shall, however, be made in respect of such charges in determining the value of consignments of a non-commercial nature.

3. Paragraphs 1 and 2 are not applicable to goods carried by the express postal services known as EMS-Datapost (in Denmark, EMS-Jetpost, in Germany, EMS-Kurierpostsendungen, in Italy, CAI-Post).

▼B*Article 166*

The air transport costs to be included in the customs value of goods shall be determined by applying the rules and percentages shown in Annex 25.

▼M21**▼B***CHAPTER 6**Provisions concerning rates of exchange**Article 168*

►C2 For the purposes of Articles 169 to 172 ◀ of this chapter:

- (a) 'rate recorded' shall mean:
- the latest selling rate of exchange recorded for commercial transactions on the most representative exchange market or markets of the Member State concerned, or
 - some other description of a rate of exchange so recorded and designated by the Member State as the 'rate recorded' provided that it reflects as effectively as possible the current value of the currency in question in commercial transactions;
- (b) 'published' shall mean made generally known in a manner designated by the Member State concerned;
- (c) 'currency' shall mean any monetary unit used as a means of settlement between monetary authorities or on the international market.

Article 169

1. Where factors used to determine the customs value of goods are expressed at the time when that value is determined in a currency other than that of the Member State where the valuation is made, the rate of exchange to be used to determine that value in terms of the currency of the Member State concerned shall be the rate recorded on the second-last Wednesday of a month and published on that or the following day.
2. The rate recorded on the second-last Wednesday of a month shall be used during the following calendar month unless it is superseded by a rate established under Article 171.
3. Where a rate of exchange is not recorded on the second-last Wednesday indicated in paragraph 1, or, if recorded, is not published on that or the following day, the last rate recorded for the currency in question published within the preceding 14 days shall be deemed to be the rate recorded on that Wednesday.

Article 170

Where a rate of exchange cannot be established under the provisions of Article 169, the rate of exchange to be used for the application of Article 35 of the Code shall be designated by the Member State concerned and shall reflect as effectively as possible the current value of the currency in question in commercial transactions in terms of the currency of that Member State.

Article 171

1. Where a rate of exchange recorded on the last Wednesday of a month and published on that or the following day differs by 5 % or

▼B

more from the rate established in accordance with Article 169 for entry into use the following month, it shall replace the latter rate from the first Wednesday of that month as the rate to be applied for the application of Article 35 of the Code.

2. Where in the course of a period of application as referred to in the preceding provisions, a rate of exchange recorded on a Wednesday and published on that or the following day differs by 5 % or more from the rate being used in accordance with this Chapter, it shall replace the latter rate and enter into use on the Wednesday following as the rate to be used for the application of Article 35 of the Code. The replacement rate shall remain in use for the remainder of the current month, provided that this rate is not superseded due to operation of the provisions of the first sentence of this paragraph.

3. Where, in a Member State, a rate of exchange is not recorded on a Wednesday or, if recorded, is not published on that or the following day, the rate recorded shall, for the application in that Member State of paragraphs 1 and 2, be the rate most recently recorded and published prior to that Wednesday.

Article 172

When the customs authorities of a Member State authorize a declarant to furnish or supply at a later date certain details concerning the declaration for free circulation of the goods in the form of a periodic declaration, this authorization may, at the declarant's request, provide that a single rate be used for conversion into that Member State's currency of elements forming part of the customs value as expressed in a particular currency. In this case, the rate to be used shall be the rate, established in accordance with this Chapter, which is applicable on the first day of the period covered by the declaration in question.

*CHAPTER 7**Simplified procedures for certain perishable goods***▼M27****▼B***CHAPTER 8**Declarations of particulars and documents to be furnished**Article 178*

1. Where it is necessary to establish a customs value for the purposes of Articles 28 to 36 of the Code, a declaration of particulars relating to customs value (value declaration) shall accompany the customs entry made in respect of the imported goods. The value declaration shall be drawn up on a form D.V. 1 corresponding to the specimen in Annex 28, supplemented where appropriate by one or more forms D.V. 1 *bis* corresponding to the specimen in Annex 29.

▼M14

2. The value declaration provided for in paragraph 1 shall be made only by a person established in the Community and in possession of the relevant facts.

The second indent of Article 64(2)(b) and Article 64(3) of the Code shall apply *mutatis mutandis*.

▼B

3. The customs authorities may waive the requirement of a declaration on the form referred to in paragraph 1 where the customs value of

▼B

the goods in question cannot be determined under the provisions of Article 29 of the Code. In such cases the person referred to in paragraph 2 shall furnish or cause to be furnished to the customs authorities such other information as may be requested for the purposes of determining the customs value under another Article of the said Code; and such other information shall be supplied in such form and manner as may be prescribed by the customs authorities.

4. The lodging with a customs office of a declaration required by paragraph 1 shall, without prejudice to the possible application of penal provisions, be equivalent to the engagement of responsibility by the person referred to in paragraph 2 in respect of:

- the accuracy and completeness of the particulars given in the declaration,
- the authenticity of the documents produced in support of these particulars, and
- the supply of any additional information or document necessary to establish the customs value of the goods.

5. This Article shall not apply in respect of goods for which the customs value is determined under the simplified procedure system established in accordance with the provisions of Articles 173 to 177.

Article 179

1. Except where it is essential for the correct application of import duties, the customs authorities shall waive the requirement of all or part of the declaration provided for in Article 178 (1):

- (a) where the customs value of the imported goods in a consignment does not exceed ►**M21** EUR 10 000 ◀, provided that they do not constitute split or multiple consignments from the same consignor to the same consignee; or
- (b) where the importations involved are of a non-commercial nature; or
- (c) where the submission of the particulars in question is not necessary for the application of the Customs Tariff of the European Communities or where the customs duties provided for in the Tariff are not chargeable pursuant to specific customs provisions.

2. The amount in ecu referred to in paragraph 1 (a) shall be converted in accordance with Article 18 of the Code. The customs authorities may round-off upwards or downwards the sum arrived at after conversion.

The customs authorities may maintain unamended the exchange value in national currency of the amount determined in ecu if, at the time of the annual adjustment provided for in Article 18 of the Code, the conversion of this amount, before the rounding-off provided for in this paragraph, leads to an alteration of less than 5 % in the exchange value expressed in national currency or to a reduction thereof.

3. In the case of continuing traffic in goods supplied by the same seller to the same buyer under the same commercial conditions, the customs authorities may waive the requirement that all particulars under Article 178 (1) be furnished in support of each customs declaration, but shall require them whenever the circumstances change and at least once every three years.

4. A waiver granted under this Article may be withdrawn and the submission of a D.V. 1 may be required where it is found that a condition necessary to qualify for that waiver was not or is no longer met.

▼B*Article 180*

Where computerized systems are used, or where the goods concerned are the subject of a general, periodic or recapitulative declaration, the customs authorities may authorize variations in the form of presentation of data required for the determination of customs value.

Article 181

1. The person referred to in Article 178 (2) shall furnish the customs authorities with a copy of the invoice on the basis of which the value of the imported goods is declared. Where the customs value is declared in writing this copy shall be retained by the customs authorities.
2. In the case of written declarations of the customs value, when the invoice for the imported goods is made out to a person established in a Member State other than that in which the customs value is declared, the declarant shall furnish the customs authorities with two copies of the invoice. One of these copies shall be retained by the customs authorities; the other, bearing the stamp of the office in question and the serial number of the declaration at the said customs office shall be returned to the declarant for forwarding to the person to whom the invoice is made out.
3. The customs authorities may extend the provisions of paragraph 2 to cases where the person to whom the invoice is made out is established in the Member State in which the customs value is declared.

▼M5*Article 181a*

1. The customs authorities need not determine the customs valuation of imported goods on the basis of the transaction value method if, in accordance with the procedure set out in paragraph 2, they are not satisfied, on the basis of reasonable doubts, that the declared value represents the total amount paid or payable as referred to in Article 29 of the Code.
2. Where the customs authorities have the doubts described in paragraph 1 they may ask for additional information in accordance with Article 178 (4). If those doubts continue, the customs authorities must, before reaching a final decision, notify the person concerned, in writing if requested, of the grounds for those doubts and provide him with a reasonable opportunity to respond. A final decision and the grounds therefor shall be communicated in writing to the person concerned.

*Examination of the goods and taking of samples by the person concerned**Article 182*

1. Permission to examine the goods under Article 42 of the Code shall be granted to the person empowered to assign the goods a customs-approved treatment or use at his oral request, unless the customs authorities consider, having regard to the circumstances, that a written request is required.

▼B

The taking of samples may be authorized only at the written request of the person concerned.

2. A written request as referred to in paragraph 1 shall be signed by the person concerned and lodged with the relevant customs authorities. It shall include the following particulars:

This facility shall be granted only if the technical and administrative conditions laid down by the customs authorities are complied with.

The customs authorities may also provide that declarations produced using customs data-processing systems may be directly authenticated by those systems, in place of the manual or mechanical application of the customs office stamp and the signature of the competent official.

3. TITLE VIII

EXAMINATION OF THE GOODS, FINDINGS OF THE CUSTOMS OFFICE AND OTHER MEASURES TAKEN BY THE CUSTOMS OFFICE

Article 239

1. The goods shall be examined in the places designated and during the hours appointed for that purpose by the customs authorities.
2. However, the customs authorities may, at the request of the declarant, authorize the examination of goods in places or during hours other than those referred to in paragraph 1.

Any costs involved shall be borne by the declarant.

Article 240

1. Where the customs authorities elect to examine goods they shall so inform the declarant or his representative.
2. Where they decide to examine a part of the goods only, the customs authorities shall inform the declarant or his representative which items they wish to examine. The customs authorities' choice shall be final.

Article 241

1. The declarant or the person designated by him to be present at the examination of the goods shall render the customs authorities the assistance required to facilitate their work. Should the customs authorities consider the assistance rendered unsatisfactory, they may require the declarant to designate another person able to give the necessary assistance.

▼B

2. Where the declarant refuses to be present at the examination of the goods or to designate a person able to give the assistance which the customs authorities consider necessary, the said authorities shall set a deadline for compliance, unless they consider that such an examination may be dispensed with.

If, on expiry of the deadline, the declarant has not complied with the requirements of the customs authorities, the latter, for the purpose of applying Article 75 (a) of the Code, shall proceed with the examination of the goods, at the declarant's risk and expense, calling if necessary on the services of an expert or any other person designated in accordance with the provisions in force.

3. The findings made by the customs authorities during the examination carried out under the conditions referred to in the preceding paragraph shall have the same validity as if the examination had been carried out in the presence of the declarant.

4. Instead of the measures laid down in paragraphs 2 and 3, the customs authorities shall have the option of deeming a declaration invalid where it is clear that the declarant's refusal to be present at the examination of the goods or to designate a person able to give the necessary assistance neither prevents, nor seeks to prevent, those authorities from finding that the rules governing the entry of the goods for the customs procedure concerned have been breached, and neither evades, nor seeks to evade, the provisions of Article 66 (1) or Article 80 (2) of the Code.

Article 242

1. Where the customs authorities decide to take samples, they shall so inform the declarant or his representative.

2. Samples shall be taken by the customs authorities themselves. However, they may ask that this be done under their supervision by the declarant or a person designated by him.

Samples shall be taken in accordance with the methods laid down in the provisions in force.

3. The quantities taken as samples should not exceed what is needed for analysis or more detailed examination, including possible check analysis.

Article 243

1. The declarant or the person designated by him to be present at the taking of samples shall render the customs authorities all the assistance needed to facilitate the operation.

▼M7

2. Where the declarant refuses to be present at the taking of samples or to designate a person to attend, or where he fails to render the customs authorities all the assistance needed to facilitate the operation, the provisions of the second sentence of Article 241 (1) and of Article 241 (2), (3) and (4) shall apply.

▼B*Article 244*

Where the customs authorities take samples for analysis or more detailed examination, they shall authorize the release of the goods in question without waiting for the results of the analysis or examination, unless there are other grounds for not doing so, and provided that, where a customs debt has been or is likely to be incurred, the duties in question have already been entered in the accounts and paid or secured.

▼B*Article 245*

1. The quantities taken by the customs office as samples shall not be deducted from the quantity declared.
2. Where an export or outward processing declaration is concerned, the declarant shall be authorized, where circumstances permit, to replace the quantities of goods taken as samples by identical goods, in order to make up the consignment.

Article 246

1. Unless destroyed by the analysis or more detailed examination, the samples taken shall be returned to the declarant at his request and expense once they no longer need to be kept by the customs authorities, in particular after all the declarant's means of appeal against the decision taken by the customs authorities on the basis of the results of that analysis or more detailed examination have been exhausted.
2. Where the declarant does not ask for samples to be returned, they may either be destroyed or kept by the customs authorities. In specific cases, however, the customs authorities may require the declarant to remove any samples that remain.

Article 247

1. Where the customs authorities verify the declarations and accompanying documents or examine the goods, they shall indicate, at least in the copy of the declaration retained by the said authorities, or in a document attached thereto, the basis and results of any such verification or examination. In the case of partial examination of the goods, particulars of the consignment examined shall also be given.

Where appropriate, the customs authorities shall also indicate in the declaration that the declarant or his representative was absent.

2. Should the result of the verification of the declaration and accompanying documents or examination of the goods not be in accordance with the particulars given in the declaration, the customs authorities shall specify, at least in the copy of the declaration retained by the said authorities, or in a document attached thereto, the particulars to be taken into account for the purposes of the application of charges on the goods in question and, where appropriate, calculating any refunds or other amounts payable on exportation, and for applying the other provisions governing the customs procedure for which the goods are entered.
3. The findings of the customs authorities shall indicate, where appropriate, the means of identification adopted. They shall be dated and bear the particulars needed to identify the official issuing them.
4. Where the customs authorities neither verify the declaration nor examine the goods, they need not endorse the declaration or attached document referred to in paragraph 1.

Article 248

1. The granting of release shall give rise to the entry in the accounts of the import duties determined according to the particulars in the declaration. Where the customs authorities consider that the checks which they have undertaken ►**C2** may enable an amount of import duties higher than that ◀ resulting from the particulars made in the declaration to be assessed, they shall further require the lodging of a security sufficient to cover the difference between the amount according to the particulars in the declaration and the amount which may finally be payable on the goods. However, the declarant may request the

▼B

immediate entry in the accounts of the amount of duties to which the goods may ultimately be liable instead of lodging this security.

2. Where, on the basis of the checks which they have carried out, the customs authorities assess an amount of import duties different from the amount which results from the particulars in the declaration, the release of the goods shall give rise to the immediate entry in the accounts of the amount thus assessed.

3. Where the customs authorities have doubts about whether or not a prohibition or restriction applies and this cannot be resolved until the results of the checks the authorities have carried out are available, the goods in question cannot be released.

▼M12

4. Notwithstanding paragraph 1, the customs authorities may refrain from taking security in respect of goods which are the subject of a drawing request on a tariff quota if they determine, at the time when the declaration for release for free circulation is accepted, that the tariff quota in question is non-critical within the meaning of Article 308c.

▼B*Article 249*

1. The customs authorities shall determine the form of release, taking due account of the place in which the goods are located and of the special arrangements for their supervision.

2. Where the declaration is made in writing, a reference to the release and its date shall be made on the declaration or, where applicable, a document attached, and a copy shall be returned to the declarant.

Article 250

1. Where the customs authorities have been unable to grant release for one of the reasons specified in the second or third indent of Article 75 (a) of the Code, they shall give the declarant a time limit to regularize the situation of the goods.

2. Where, in the circumstances referred to in the second indent of Article 75 (a) of the Code, the declarant has not produced the requisite documents within the time limit referred to in paragraph 1, the declaration in question shall be deemed invalid and the customs office shall cancel it. The provisions of Article 66 (3) of the Code shall apply.

3. In the circumstances referred to in the third indent of Article 75 (a) of the Code, and without prejudice to any measures taken under the first subparagraph of Article 66 (1) or Article 182 of the Code, where the declarant has neither paid nor guaranteed the duties due within the time limit referred to in paragraph 1, the customs authorities may start the preliminary formalities for the sale of the goods. In this case the goods shall be sold unless the requisite conditions have been fulfilled in the interim, if necessary by forced sale where the law of the Member State of the authorities in question so permits. The customs authorities shall inform the declarant thereof.

The customs authorities may, at the risk and expense of the declarant, transfer the goods in question to special premises under their supervision.

Article 251

By way of derogation from Article 66 (2) of the Code, a customs declaration may be invalidated after the goods have been released, as provided below:

1. where it is established that the goods have been declared in error for a customs procedure entailing the payment of import duties

▼B

instead of being placed under another customs procedure, the customs authorities shall invalidate the declaration if a request to that effect is made within three months of the date of acceptance of the declaration provided that:

- any use of the goods has not contravened the conditions of the customs procedure under which they should have been placed,
- when the goods were declared, they were intended to be placed under another customs procedure, all the requirements of which they fulfilled, and
- the goods are immediately entered for the customs procedure for which they were actually intended.

The declaration placing the goods under the latter customs procedure shall take effect from the date of acceptance of the invalidated declaration.

The customs authorities may permit the three-month period to be exceeded in duly substantiated exceptional cases;

▼M1

- 1a. where it is established that the goods have been declared in error, instead of other goods, for a customs procedure entailing the obligation to pay import duties, the customs authorities shall invalidate the declaration if a request to that effect is made within three months of the date of acceptance of the declaration, provided that:

- the goods originally declared:
 - (i) have not been used other than as authorized in their original status; and
 - (ii) have been restored to their original status;
- and that
- the goods which ought to have been declared for the customs procedure originally intended:
 - (i) could, when the original declaration was lodged, have been presented to the same customs office: and
 - (ii) have been declared for the same customs procedure as that originally intended.

The customs authorities may allow the time limit referred to above to be exceeded in duly substantiated exceptional cases;

▼M12

- 1b. in the case of mail order goods which are returned, the customs authorities shall invalidate the declarations of release for free circulation if a request to that effect is made within three months of the date of acceptance of the declaration, provided that the goods have been exported to the original supplier's address or to another address indicated by the said supplier;

▼M20

- 1c. where a retroactive authorisation is granted in accordance with:
- Article 294 for release for free circulation with a favourable tariff treatment or at a reduced or zero rate of duty on account of the end-use of the goods, or
 - Article 508 for a customs procedure with economic impact;

▼B

2. where the goods have been declared for export or for the outward processing procedure, the declaration shall be invalidated provided that:

▼B

- (a) in the case of goods which are subject to export duty, to an application for the repayment of import duty, to refunds or other export amounts or to other special measures on export:
- the declarant provides the customs office of export with evidence that the goods have not left the customs territory of the Community,
 - the declarant returns to the said office all copies of the customs declaration, together with any other documents issued to him on acceptance of the declaration,
 - the declarant provides the customs office of export with evidence that any refunds and other amounts granted on the strength of the export declaration for the goods in question have been repaid or that the necessary measures have been taken by the departments concerned to ensure that they are not paid, and
 - the declarant, in accordance with the provisions in force, complies with any other obligations laid down by the customs office of export to regularize the position of the goods.

Invalidation of the declaration shall entail cancellation of any adjustments made on an export licence or advance-fixing certificate presented in support of the declaration.

Where the goods declared for export are required to leave the customs territory of the Community by a specified time limit, failure to comply with that time limit shall entail invalidation of the relevant declaration;

▼M29

- (b) in the case of other goods:
- (i) the customs office of export has been informed, in accordance with Article 792a, that the goods declared have not left the customs territory of the Community;
 - (ii) after a period of 90 days from the date of release of the goods for export, the goods have not left the customs territory of the Community, or sufficient evidence of such export cannot be provided in accordance with Article 792b(2);

▼B

3. in so far as the re-export of the goods entails the lodging of a declaration, (2) above shall apply *mutatis mutandis*;
4. where Community goods have been placed under the customs warehousing procedure within the meaning of Article 98 (1) (b) of the Code, invalidation of the declaration of entry for that procedure may be requested and effected provided that the measures provided for in the relevant legislation in the event of failure to comply with the treatment or use prescribed have been taken.

If, on the expiry of the period laid down for the goods to remain under the customs warehousing procedure, no application has been made for their assignment to a treatment or use provided for in the relevant legislation, the customs authorities shall take the measures provided for in that legislation.

▼M1*Article 252*

Where the customs authorities sell Community goods in accordance with point (b) of Article 75 of the code, this shall be done in accordance with the procedures in force in the Member States.

▼ B

TITLE IX

SIMPLIFIED PROCEDURES**▼ M1**

CHAPTER 1

General provisions**▼ B***Article 253*

1. The procedure for incomplete declarations shall allow the customs authorities to accept, in a duly justified case, a declaration which does not contain all the particulars required, or which is not accompanied by all documents necessary for the customs procedure in question.
2. The simplified declaration procedure shall enable goods to be entered for the customs procedure in question on presentation of a simplified declaration with subsequent presentation of a supplementary declaration which may be of a general, periodic or ► **C3** recapitulative ◀ nature, as appropriate.
3. The local clearance procedure shall enable the entry of goods for the customs procedure in question to be carried out at the premises of the person concerned or at other places designated or approved by the customs authorities.

▼ M1*Article 253a*

Where a simplified procedure is applied using data-processing systems to produce customs declarations or using a data-processing technique, the provisions referred to in Articles 199 (2) and (3), 222, 223 and 224 shall apply *mutatis mutandis*.

CHAPTER 2

Declarations for release for free circulation

Section 1

Incomplete declarations*Article 254***▼ M24**

Declarations for release for free circulation which the customs authorities may accept, at the declarant's request, without their containing some of the particulars referred to in Annex 37 shall contain at least the particulars referred to in boxes 1 (first and second subdivisions), 14, 21 (nationality), 31, 37, 40 and 54 of the single administrative document and:

▼ B

- a description of the goods in terms that are sufficiently precise to enable the customs authorities to determine immediately and unambiguously the combined nomenclature heading or subheading concerned,
- where the goods are liable to ad valorem duties, their value for customs purposes, or, where it appears that the declarant is not in a position to declare this value, a provisional indication of value which is considered acceptable by the customs authorities, due

▼B

- account being taken in particular of the information available to the declarant,
- any further particulars considered necessary by the customs authorities in order to identify the goods, implement the provisions governing their release for free circulation and determine the amount of any security required before the goods may be released.

Article 255

1. Declarations for release for free circulation which the customs authorities may accept at the declarant's request without their being accompanied by certain of the necessary supporting documents shall be accompanied at least by those documents which must be produced before the goods declared can be released for free circulation.

2. By way of derogation from paragraph 1, a declaration not accompanied by one or more of the documents required before the goods can be released for free circulation may be accepted once it is established to the satisfaction of the customs authorities that:

- (a) the document concerned exists and is valid;
- (b) it could not be annexed to the declaration for reasons beyond the declarant's control;
- (c) any delay in accepting the declaration would prevent the release of the goods for free circulation or make them liable to a higher rate of duty.

Data relating to missing documents shall in all cases be indicated in the declaration.

Article 256

1. The period allowed by the customs authorities to the declarant for the communication of particulars or production of documents missing at the time when the declaration was accepted may not exceed one month from the date of such acceptance.

▼M22

In the case of a document required for the application of a reduced or zero rate of import duty, where the customs authorities have good reason to believe that the goods covered by the incomplete declaration may qualify for such reduced or zero rate of duty, a period longer than that provided for in the first subparagraph may, at the declarant's request, be granted for the production of the document, if justified in the circumstances. That period may not exceed four months from the date of acceptance of the declaration. It cannot be extended.

▼B

Where the missing particulars to be communicated or documents to be supplied concern customs value, the customs authorities may, where this proves absolutely necessary, set a longer time limit or extend the period previously set. The total period allowed shall take account of the prescribed periods in force.

▼M12

2. Where a reduced or zero rate of import duty is applicable to goods released for free circulation within tariff quotas or, provided that the levying of normal import duties is not re-introduced, within tariff ceilings or other preferential tariff measures, the benefit of the tariff quota or preferential tariff measure shall only be granted after presentation to the customs authorities of the document on which the granting of the reduced or zero rate is conditional. The document must in any case be presented:

- before the tariff quota has been exhausted, or

▼M12

- in other cases, before the date on which a Community measure re-introduces the levying of normal import duties.

▼B

3. Subject to paragraphs 1 and 2, the document on whose presentation the granting of the reduced or zero rate of import duty is conditional may be produced after the expiry date of the period for which the reduced or zero rate was set, provided the declaration in respect of the goods in question was accepted before that date.

Article 257

1. The customs authorities' acceptance of an incomplete declaration shall not prevent or delay the release of the goods thus declared, unless other grounds exist for so doing. Without prejudice to the provisions of Article 248, release shall take place in accordance with the conditions laid down in paragraphs 2 to 5 below.
2. Where the late production of particulars or of a supporting document missing at the time when a declaration is accepted cannot affect the amount of duties to which the goods covered by the said declaration are liable, the customs authorities shall immediately enter in the accounts the sum payable, calculated in the usual manner.
3. Where, pursuant to Article 254, a declaration contains a provisional indication of value, the customs authorities shall:
 - enter immediately in the accounts the amount of duties determined on the basis of this indication,
 - require, if necessary, the lodging of a security adequate to cover the difference between that amount and the amount to which the goods may ultimately be liable.
4. Where, in circumstances other than those referred to in paragraph 3, the late production of particulars or of a supporting document missing at the time when a declaration is accepted may affect the amount of duties to which the goods covered by the said declaration are liable:
 - (a) if late production of any missing particulars or document may lead to the application of duty at a reduced rate, the customs authorities shall:
 - immediately enter in the accounts the import duties payable at the reduced rate,
 - require the lodging of a security covering the difference between that sum and the sum which would be payable were the import duties on the goods in question calculated at the normal rate;
 - (b) if the late production of any missing particulars or document may lead to admission of the goods with total relief from duties, the customs authorities shall require the lodging of a security covering the amount which would be payable were the duties charged at the normal rate.
5. Without prejudice to any subsequent changes which may arise, particularly as a result of the final determination of the customs value, the declarant shall have the option, instead of lodging a security, of requesting the immediate entry in the accounts:
 - where the second indent of paragraph 3 or the second indent of paragraph 4 (a) applies, of the amount of duties to which the goods may ultimately be liable, or
 - where paragraph 4 (b) applies, of the amount of duties calculated at the normal rate.

Article 290d

The Member States shall communicate to the Commission the list of authorised weighers and any subsequent changes thereto.

The Commission shall forward such information to the other Member States.

▼M18*CHAPTER 2**End-use**Article 291*

1. This chapter applies where it is provided that goods released for free circulation with a favourable tariff treatment or at a reduced or zero rate of duty on account of their end-use are subject to end-use customs supervision.

2. For the purposes of this chapter:

- (a) 'single authorisation' means: an authorisation involving different customs administrations;
- (b) 'accounts' means: the holder's commercial, tax or other accounting material, or such data held on their behalf;
- (c) 'records' means: the data containing all the necessary information and technical details on whatever medium, enabling the customs authorities to supervise and control operations.

Article 292

1. The granting of a favourable tariff treatment in accordance with Article 21 of the Code shall, where it is provided that goods are subject to end-use customs supervisions, be subject to a written authorisation.

Where goods are released for free circulation at a reduced or zero rate of duty on account of their end-use and the provisions in force require that the goods remain under customs supervision in accordance with Article 82 of the Code, a written authorisation for the purposes of end-use customs supervisions shall be necessary.

▼ M18

2. Applications shall be made in writing using the model set out in Annex 67. The customs authorities may permit renewal or modification to be applied for by simple written request.

3. In particular circumstances the customs authorities may allow the declaration for free circulation in writing or by means of a data-processing technique using the normal procedure to constitute an application for authorisation, provided that:

▼ C6

— the application only involves one customs administration,

▼ M18

— the applicant wholly assigns the goods to the prescribed end-use, and

— the proper conduct of operations is safeguarded.

4. Where the customs authorities consider any of the information given in the application inadequate, they may require additional details from the applicant.

In particular, in cases where an application may be made by making a customs declaration, the customs authorities shall require, without prejudice to Article 218, that the application be accompanied by a document made out by the declarant containing at least the following information, unless such information is deemed unnecessary or is entered on the customs declaration:

- (a) name and address of the applicant, the declarant and the operator;
- (b) nature of the end-use;
- (c) technical description of the goods, products resulting from their end-use and means of identifying them;
- (d) estimated rate of yield or method by which that rate is to be determined;
- (e) estimated period for assigning the goods to their end-use;
- (f) the place where the goods are put to the end-use.

5. Where a single authorisation is applied for, the prior agreement of the authorities shall be necessary according to the following procedure.

The application shall be submitted to the customs authorities designated for the place

— where the applicant's main accounts are kept facilitating audit-based controls, and where at least part of the operations to be covered by the authorisation are carried out; or

▼ M24

— otherwise, where the applicant's main accounts are held facilitating audit-based controls of the arrangements.

▼ M18

These customs authorities shall communicate the application and the draft authorisation to the other customs authorities concerned, which shall acknowledge the date of receipt within 15 days.

The other customs authorities concerned shall notify any objections within 30 days of the date on which the draft authorisation was received. Where objections are notified within the above period and no agreement is reached, the application shall be rejected to the extent to which objections were raised.

The customs authorities may issue the authorisation if they have received no objections to the draft authorisation within the 30 days.

The customs authorities issuing the authorisation shall send a copy to all customs authorities concerned.

▼ M18

6. Where the criteria and conditions for the granting of a single authorisation are generally agreed on between two or more customs administrations, the said administrations may also agree to replace prior consultation by simple notification. Such notification shall always be sufficient where a single authorisation is renewed or revoked.

▼ M21

7. The applicant shall be informed of the decision to issue an authorisation, or of the reasons why the application was rejected, within thirty days of the date on which the application was lodged or of the date on which any outstanding or additional information requested was received by the customs authorities.

That period shall not apply in the case of a single authorisation unless it is issued under paragraph 6.

▼ M18*Article 293*

1. An authorisation using the model set out in Annex 67 shall be granted to persons established in the customs territory of the Community, provided that the following conditions are met:

- (a) the activities envisaged are consistent with the prescribed end-use and with the provisions for the transfer of goods in accordance with Article 296 and the proper conduct of operations is ensured;
- (b) the applicant offers every guarantee necessary for the proper conduct of operations to be carried out and will undertake the obligations:
 - to whole or partly assign the goods to the prescribed end-use or to transfer them and to provide evidence of their assignment or transfer in accordance with the provisions in force,
 - not to take actions incompatible with the intended purpose of the prescribed end-use,
 - to notify all factors which may affect the authorisation to the competent customs authorities;
- (c) efficient customs supervision is ensured and the administrative arrangements to be taken by the customs authorities are not disproportionate to the economic needs involved;
- (d) adequate records are kept and retained;
- (e) security is provided where the customs authorities consider this necessary.

2. For an application under Article 292(3), the authorisation shall be granted to persons established in the customs territory of the Community by acceptance of the customs declaration, under the other conditions set out in paragraph 1.

3. The authorisation shall include the following items, unless such information is deemed unnecessary:

- (a) identification of the authorisation holder;
- (b) where necessary Combined Nomenclature or TARIC code, type and description of the goods and of the end-use operations and provisions concerning rates of yield;

▼ M21

- (c) means and methods of identification and of customs supervision, including arrangements for:
 - common storage, for which Article 534(2) and (3) shall apply *mutatis mutandis*,
 - mixed storage of products subject to end-use supervision falling within Chapters 27 and 29 of the Combined Nomenclature or of

▼ M21

such products with crude petroleum oils falling within CN code 2709 00;

▼ M18

- (d) the period within which the goods have to be assigned to the prescribed end-use;
- (e) the customs offices where the goods are declared for free circulation and the offices to supervise the arrangements;
- (f) the places where the goods have to be assigned to the prescribed end-use;
- (g) the security to be provided, where appropriate;
- (h) the period of validity of the authorisation;
- (i) where applicable, the possibility of transfer of the goods in accordance with Article 296(1);
- (j) where applicable, the simplified arrangements for the transfer of goods under Article 296(2), second subparagraph, and (3);
- (k) where applicable, simplified procedures authorised in accordance with Article 76 of the Code;
- (l) methods of communication.

▼ M21

Where the goods referred to in the second indent of point (c) of the first subparagraph do not share the same eight-digit CN code, the same commercial quality and the same technical and physical characteristics, mixed storage may be allowed only where the whole mixture is to undergo one of the treatments referred to in Additional Notes 4 and 5 to Chapter 27 of the Combined Nomenclature.

▼ M18

4. Without prejudice to Article 294 the authorisation shall take effect on the date of issue or at any later date given in the authorisation.

▼ M21

The period of validity shall not exceed three years from the date on which the authorisation takes effect, except where there are duly substantiated good reasons.

▼ M18*Article 294*

1. The customs authorities may issue a retroactive authorisation.

Without prejudice to paragraphs 2 and 3, a retroactive authorisation shall take effect on the date the application was submitted.

2. If an application concerns renewal of an authorisation for the same kind of operation and goods, an authorisation may be granted with retroactive effect from the date the original authorisation expired.

3. In exceptional circumstances, the retroactive effect of an authorisation may be extended further, but not more than one year before the date the application was submitted, provided a proven economic need exists and:

- (a) the application is not related to attempted deception or to obvious negligence;
- (b) the applicant's accounts confirm that all the requirements of the arrangements can be regarded as having been met and, where appropriate, in order to avoid substitution the goods can be identified for the period involved, and such accounts allow the arrangements to be verified;

▼ **M18**

- (c) all the formalities necessary to regularise the situation of the goods can be carried out, including, where necessary, the invalidation of the declaration.

Article 295

The expiry of an authorisation shall not affect goods which were in free circulation by virtue of that authorisation before it expired.

Article 296

1. The transfer of goods between different places designated in the same authorisation may be undertaken without any customs formalities.

2. Where a transfer of goods is carried out between two authorisation holders established in different Member States and the customs authorities concerned have not agreed simplified procedures in accordance with paragraph 3, the T5 control copy provided for in Annex 63 shall be used in accordance with the following procedure:

- (a) the transferor shall complete the T5 control copy in triplicate (one original and two copies); ► **M21** ————— ◀

▼ M12*CHAPTER 3**Management of tariff measures*

Section 1

Management of tariff quotas designed to be used following the chronological order of dates of customs declarations*Article 308a*

- 1. Save as otherwise provided, where tariff quotas are opened by a Community provision, those tariff quotas shall be managed in accordance with the chronological order of dates of acceptance of declarations for release for free circulation.
- 2. Where a declaration for release for free circulation incorporating a valid request by the declarant to benefit from a tariff quota is accepted, the Member State concerned shall draw from the tariff quota, through the Commission, a quantity corresponding to its needs.
- 3. Member States shall not present any request for drawing until the conditions laid down in Article 256 (2) and (3) are satisfied
- 4. Subject to paragraph 8, allocations shall be granted by the Commission on the basis of the date of acceptance of the relevant declaration for release for free circulation, and to the extent that the balance of the relevant tariff quota so permits. Priority shall be established in accordance with the chronological order of these dates.
- 5. The Member States shall communicate to the Commission all valid requests for drawing without delay. Those communications shall include the date referred to in paragraph 4, and the exact amount applied for on the relevant customs declaration.
- 6. For the purposes of paragraphs 4 and 5, the Commission shall fix order numbers where none are provided by the Community provision opening the tariff quota.
- 7. If the quantities requested for drawing from a tariff quota are greater than the balance available, allocation shall be made on a pro rata basis with respect to the requested quantities.
- 8. For the purposes of this Article, acceptance of a declaration by the customs authorities on 1, 2 or 3 January shall be regarded as acceptance on 3 January. However, if one of those days falls on a Saturday or a Sunday, such acceptance shall be regarded as having taken place on 4 January.

▼ M12

9. Where a new tariff quota is opened, drawings shall not be granted by the Commission before the 11th working day following the date of publication of the provision which created that tariff quota.

10. Member States shall immediately return to the Commission the amount of drawings which they do not use. However, where an erroneous drawing representing a customs debt of ►**M31** 10 euro ◀ or less is discovered after the first month following the end of the period of validity of the tariff quota concerned, Member States needs not make a return.

11. If the customs authorities invalidate a declaration for release for free circulation in respect of goods which are the subject of a request for benefit of a tariff quota, the complete request shall be cancelled in respect of those goods. The Member States concerned shall immediately return to the Commission any quantity drawn, in respect of those goods, from the tariff quota.

12. Details of drawings requested by individual Member States shall be treated by the Commission and other Member States as confidential.

Article 308b

1. The Commission shall make an allocation each working day, except:

- days which are holidays for the Community institutions in Brussels, or
- in exceptional circumstances, any other day, provided that the competent authorities of the Member States have been informed in advance.

2. Subject to Article 308a (8), any allocation shall take into account all unanswered requests which relate to declarations for release for free circulation accepted up to and including the second previous day, and which have been communicated to the Commission.

▼ M22*Article 308c*

1. A tariff quota shall be considered as critical as soon as ►**M31** 90 % ◀ of the initial volume has been used, or at the discretion of the competent authorities.

2. By way of derogation from paragraph 1, a tariff quota shall be considered from the date of its opening as critical in any of the following cases:

- (a) it is opened for less than three months;

Single authorisation*Article 500*

1. Where a single authorisation is applied for, the prior agreement of the authorities concerned shall be necessary, in accordance with the procedure set out in paragraphs 2 and 3.
2. In the case of temporary importation, the application shall be submitted to the customs authorities designated for the place of first use, without prejudice to Article ►**C9** 580(2) ◀, second subparagraph.

▼ M20

In other cases, it shall be submitted to the customs authorities designated for the place where the applicant's main accounts are held facilitating audit-based controls of the arrangements and where at least part of the storage, processing or temporary export operations to be covered by the authorisation are conducted.

▼ M24

Where the competent customs authorities cannot be determined under the first or second subparagraph, the application shall be submitted to the customs authorities designated for the place where the applicant's main accounts are held facilitating audit-based controls of the arrangements.

▼ M20

3. These customs authorities designated in accordance with paragraph 2 shall communicate the application and the draft authorisation to the other customs authorities concerned, which shall acknowledge the date of receipt within 15 days.

The other customs authorities concerned shall notify any objections within 30 days of the date on which the draft authorisation was received. Where objections are notified within that period and no agreement is reached, the application shall be rejected to the extent to which objections were raised.

4. The customs authorities may issue the authorisation if they have received no objections to the draft authorisation within the 30 days.

They shall send a copy of the agreed authorisation to all customs authorities concerned.

Article 501

1. Where the criteria and conditions for the granting of a single authorisation are generally agreed upon between two or more customs administrations, the said administrations may also agree to replace prior agreement in accordance with Article 500(1) and information to be supplied in accordance with ►C9 Article 500(4) ◀, second subparagraph, by simple notification.

2. Notification shall always be sufficient where:

- (a) a single authorisation is renewed, subject to modifications of a minor nature, annulled or revoked;
- (b) the application for a single authorisation concerns temporary importation and is not to be made using the model in Annex 67.

3. No notification shall be needed where:

- (a) the only element involving different customs administrations is triangular traffic under inward or outward processing, without use of recapitulative information sheets;
- (b) ATA or CPD carnets are used;
- (c) the authorisation for temporary importation is granted by accepting an oral declaration or a declaration by any other act.

Section 4

Economic conditions*Article 502*

1. Except where the economic conditions are deemed to be fulfilled pursuant to Chapters 3, 4 or 6, the authorisation shall not be granted without examination of the economic conditions by the customs authorities.

▼M20

2. For the inward processing arrangements (Chapter 3), the examination shall establish the economic unviability of using Community sources taking account in particular of the following criteria, the details of which are laid down in Part B of Annex 70:

- (a) unavailability of Community-produced goods sharing the same quality and technical characteristics as the goods intended to be imported for the processing operations envisaged;
- (b) differences in price between Community-produced goods and those intended to be imported;
- (c) contractual obligations.

3. For the processing under customs control arrangements (Chapter 4), the examination shall establish whether the use of non-Community sources enables processing activities to be created or maintained in the Community.

4. For the outward processing arrangements (Chapter 6), the examination shall establish whether:

- (a) carrying out processing outside the Community is likely to cause serious disadvantages for Community processors; or
- (b) carrying out processing in the Community is economically unviable or is not feasible for technical reasons or due to contractual obligations.

Article 503

An examination of the economic conditions involving the Commission may take place:

- (a) if the customs authorities concerned wish to consult before or after issuing an authorisation;
- (b) if another customs administration objects to an authorisation issued;
- (c) on the initiative of the Commission.

Article 504

1. Where an examination in accordance with Article 503 is initiated, the case shall be sent to the Commission. It shall contain the results of the examination already undertaken.

2. The Commission shall send an acknowledgement of receipt or notify the customs authorities concerned when acting on its own initiative. It shall determine in consultation with them whether an examination of the economic conditions in the Committee is required.

3. Where the case is submitted to the Committee, the customs authorities shall inform the applicant, or holder, that such a procedure has been initiated and, if the handling of the application is not completed, that the time limits laid down in Article 506 have been suspended.

4. The Committee's conclusion shall be taken into account by the customs authorities concerned and by any other customs authorities dealing with similar authorisations or applications.

This conclusion may include its publication in the C series of the *Official Journal of the European Communities*.

▼ **M20**

Section 5

The decision on authorisation*Article 505*

The customs authorities competent to decide shall grant the authorisation as follows:

- (a) for an application under Article 497(1), using the model set out in Annex 67;
- (b) for an application under Article 497(3), by acceptance of the customs declaration;
- (c) for an application for renewal or modification, by any appropriate act.

Article 506

The applicant shall be informed of the decision to issue an authorisation, or the reasons why the application was rejected, within 30 days or 60 days in the case of the customs warehousing arrangements, of the date the application was lodged or the date any requested outstanding or additional information is received by the customs authorities.

These periods shall not apply in the case of a single authorisation unless it is issued under Article 501.

Article 507

1. Without prejudice to Article 508, an authorisation shall take effect on the date of issue or at any later date given in the authorisation. In the case of a private warehouse, the customs authorities may exceptionally communicate their agreement to use the arrangements prior to the actual issuing of the authorisation.

2. No limit on the period of validity shall be fixed for authorisations for the customs warehousing arrangements.

3. For inward processing, processing under customs control and outward processing, the period of validity shall not exceed three years from the date the authorisation takes effect, except where there are duly justified good reasons.

4. By way of derogation from paragraph 3, for goods under inward processing covered by Annex 73, Part A, the period of validity shall not exceed six months.

In the case of milk and milk products referred to in Article 1 of Council Regulation (EC) No 1255/1999 ⁽¹⁾, the period of validity shall not exceed three months.

Article 508

1. Except for the customs warehousing arrangements, the customs authorities may issue a retroactive authorisation.

Without prejudice to paragraphs 2 and 3, a retroactive authorisation shall take effect at the earliest on the date on which the application was submitted.

2. If an application concerns renewal of an authorisation for the same kind of operation and goods, an authorisation may be granted with retroactive effect from the date the original authorisation expired.

⁽¹⁾ OJ L 160, 26.6.1999, p. 48.

▼ M20

3. In exceptional circumstances, the retroactive effect of an authorisation may be extended further, but not more than one year before the date the application was submitted, provided a proven economic need exists and:

- (a) the application is not related to attempted deception or to obvious negligence;
- (b) the period of validity which would have been granted under Article 507 is not exceeded;
- (c) the applicant's accounts confirm that all the requirements of the arrangements can be deemed to be met and, where appropriate, the goods can be identified for the period involved, and such accounts allow the arrangements to be controlled; and
- (d) all the formalities necessary to regularise the situation of the goods can be carried out, including, where necessary, the invalidation of the declaration.

Section 6

Other provisions concerning the operation of the arrangements

Subsection 1

General provisions*Article 509*

1. Commercial policy measures provided for in Community acts shall be applicable on entry for the arrangements of non-Community goods only to the extent that they refer to the entry of goods into the customs territory of the Community.

2. Where compensating products other than those mentioned in Annex 75, obtained under the inward processing arrangements are released for free circulation, the commercial policy measures to be applied shall be those applicable to the release for free circulation of the import goods.

3. Where processed products, obtained under the arrangements for processing under customs control, are released for free circulation, the commercial policy measures applicable to those products shall be applied only where the import goods are subject to such measures.

4. Where Community acts provide for commercial policy measures on release for free circulation, such measures shall not apply to compensating products released for free circulation following outward processing:

- that have retained Community origin within the meaning of Articles 23 and 24 of the Code;
- involving repair, including the standard exchange system;
- following successive processing operations in accordance with Article 123 of the Code.

Article 510

Without prejudice to Article 161(5) of the Code, the supervising office may allow the customs declaration to be presented at a customs office other than those specified in the authorisation. The supervising office shall determine how it shall be informed.

▼M20

Subsection 2

Transfers*Article 511*

The authorisation shall specify whether and under which conditions the movement of goods or products placed under suspensive arrangements between different places or to the premises of another holder may take place without discharge of the arrangements (transfer), subject, in cases other than temporary importation, to the keeping of records.

Transfer shall not be possible where the place of departure or arrival of the goods is a type B warehouse.

Article 512

1. Transfer between different places designated in the same authorisation may be undertaken without any customs formalities.
2. Transfer from the office of entry to the holder's or operator's facilities or place of use may be carried out under cover of the declaration for entry for the arrangements.
3. Transfer to the office of exit with a view to re-exportation may take place under cover of the arrangements. In this case, the arrangements shall not be discharged until the goods or products declared for re-exportation have actually left the customs territory of the Community.

Article 513

Transfer from one holder to another can only take place where the latter enters the transferred goods or products for the arrangements under an authorisation to use the local clearance procedure. Notification to the customs authorities and entry in the records of the goods or products referred to in Article 266 shall take place upon their arrival at the premises of the second holder. A supplementary declaration need not be required.

In the case of temporary importation, the transfer from one holder to another may also take place where the latter enters the goods under the arrangements by means of a customs declaration in writing using the normal procedure.

The formalities to be carried out are laid down in Annex 68. Upon receipt of the goods or products, the second holder shall be obliged to enter them for the arrangements.

Article 514

The transfer involving an increased risk as set out in Annex 44c shall be covered by a guarantee under conditions equivalent to those provided for in the transit procedure.

Subsection 3

Records*Article 515*

The customs authorities shall require the holder, the operator or the designated warehousekeeper to keep records, except for temporary importation or where they do not deem it necessary.

▼M20

The customs authorities may approve existing accounts containing the relevant particulars as records.

The supervising office may require an inventory to be made of all or some of the goods placed under the arrangements.

Article 516

The records referred to in Article 515 and, where they are required, under Article 581(2) for temporary imports shall contain the following information:

- (a) the information contained in the boxes of the minimum list laid down by Annex 37 for the declaration of entry for the arrangements;
- (b) particulars of the declarations by means of which the goods are assigned a customs-approved treatment or use discharging the arrangements;
- (c) the date and reference particulars of other customs documents and any other documents relating to entry and discharge;
- (d) the nature of the processing operations, types of handling or temporary use;
- (e) the rate of yield or its method of calculation where appropriate;
- (f) information enabling the goods to be monitored, including their location and particulars of any transfer;
- (g) commercial or technical descriptions necessary to identify the goods;
- (h) particulars enabling monitoring of the movements under the inward processing arrangements operating with equivalent goods.

However, the customs authorities may waive the requirement for some of this information where this does not adversely affect the control or supervision of the arrangements for the goods to be stored, processed or used.

Subsection 4

Rate of yield and calculation formula*Article 517*

1. Where relevant for the arrangements falling under Chapters 3, 4 and 6, a rate of yield or the method for determining a rate, including average rates, shall be established in the authorisation or at the time the goods are entered for the arrangements. Such rate is to be determined, as far as possible, on the basis of production or technical data or, where these are not available, data relating to operations of the same type.
2. In particular circumstances the customs authorities may establish the rate of yield after the goods have been entered for the arrangements, but not later than when they are assigned a new customs-approved treatment or use.
3. The standard rates of yield laid down for inward processing in Annex 69 shall apply to the operations mentioned therein.

Article 518

1. The proportion of import/temporary export goods incorporated in the compensating products shall be calculated in order:
 - to determine the import duties to be charged;

▼M20

- to determine the amount to be deducted when a customs debt is incurred; or
- to apply commercial policy measures.

These calculations shall be made in accordance with the quantitative scale method, or the value scale method as appropriate, or any other method giving similar results.

For the purposes of the calculations, compensating products shall include processed products or intermediate products.

2. The quantitative scale method shall be applicable where:
 - (a) only one kind of compensating product is derived from the processing operations; in this case the quantity of import/temporary export goods deemed to be present in the quantity of compensating products for which a customs debt is incurred shall be proportional to the latter category of products as a percentage of the total quantity of compensating products;
 - (b) several kinds of compensating product are derived from the processing operations and all elements of the import/temporary export goods are found in each of those compensating products; in this case the quantity of import/temporary export goods deemed to be present in the quantity of a given compensating product for which a customs debt is incurred shall be proportional to:
 - (i) the ratio between this specific kind of compensating product, irrespective of whether a customs debt is incurred, and the total quantity of all compensating products, and
 - (ii) the ratio between the quantity of compensating products for which a customs debt is incurred and the total quantity of compensating products of the same kind.

In deciding whether the conditions for applying the methods described in (a) or (b) are fulfilled, losses shall not be taken into account. Without prejudice to Article 862, losses means the proportion of import/temporary export goods destroyed and lost during the processing operation, in particular by evaporation, desiccation, venting as gas or leaching. In outward processing secondary compensating products that constitute waste, scrap, residues, offcuts and remainders shall be treated as losses.

3. The value scale method shall be applied where the quantitative scale method is not applicable.

The quantity of import/temporary export goods deemed to be present in the quantity of a given compensating product incurring a customs debt shall be proportional to:

- (a) the value of this specific kind of compensating product, irrespective of whether a customs debt is incurred, as a percentage of the total value of all the compensating products; and
- (b) the value of the compensating products for which a customs debt is incurred, as a percentage of the total value of compensating products of that kind.

The value of each of the different compensating products to be used for applying the value scale shall be the recent ex-works price in the Community, or the recent selling price in the Community of identical or similar products, provided that these have not been influenced by the relationship between buyer and seller.

4. Where the value cannot be ascertained pursuant to paragraph 3, it shall be determined by any reasonable method.

▼ **M20**

Subsection 5

Compensatory interest*Article 519*

1. Where a customs debt is incurred in respect of compensating products or import goods under inward processing or temporary importation, compensatory interest shall be due on the amount of import duties for the period involved.

2. The three-month money market interest rates published in the statistical annex of the Monthly Bulletin of the European Central Bank shall apply.

The applicable rate shall be that applicable two months before the month in which the customs debt is incurred and for the Member State where the first operation or use as provided for by the authorisation took place or should have taken place.

3. Interest shall be applied on a monthly basis, starting on the first day of the month following the month in which the import goods for which a customs debt is incurred were first entered for the arrangements. The period shall close on the last day of the month in which the customs debt is incurred.

Where inward processing (drawback system) is concerned and release for free circulation is requested under Article 128(4) of the Code, the period starts from the first day of the month following the month in which the import duties were repaid or remitted.

4. Paragraphs 1, 2 and 3 shall not apply to the following cases:

- (a) where the period to be taken into account is less than one month;
- (b) where the amount of compensatory interest applicable does not exceed EUR 20 per customs debt incurred;
- (c) where a customs debt is incurred in order to allow the application of preferential tariff treatment under an agreement between the Community and a third country on imports into that country;
- (d) where waste and scrap resulting from destruction is released for free circulation;
- (e) where the secondary compensating products referred to in Annex 75 are released for free circulation, provided they are in proportion to exported quantities of main compensating products;
- (f) where a customs debt is incurred as a result of an application for release for free circulation under Article 128(4) of the Code, as long as the import duties payable on the products in question have not yet actually been repaid or remitted;
- (g) where the holder requests release for free circulation and submits proof that particular circumstances not arising from any negligence or deception on his part make it impossible or uneconomic to carry out the re-export operation under the conditions he had anticipated and duly substantiated when applying for the authorisation;
- (h) where a customs debt is incurred and to the extent a security is provided by a cash deposit in relation to this debt;
- (i) where a customs debt is incurred in accordance with Article 201(1)(b) of the Code or is due to the release for free circulation of goods which were entered for the temporary importation arrangements under Articles 556 to 561, 563, 565, 568, 573(b) and 576 of this Regulation.

5. In the case of inward processing operations in which the number of import goods and/or compensating products makes it uneconomic to

▼ **M20**

apply the provisions of paragraphs 2 and 3, the customs authorities, at the request of the person concerned, may allow simplified methods giving similar results to be used for the calculation of compensatory interest.

Subsection 6

Discharge*Article 520*

1. Where import or temporary export goods have been entered under two or more declarations for the arrangements by virtue of one authorisation:

- in the case of a suspensive arrangement, the assignment of goods or products to a new customs-approved treatment or use shall be considered to discharge the arrangements for the import goods in question entered under the earliest of the declarations;
- in the case of inward processing (drawback system) or outward processing, the compensating products shall be considered to have been obtained from the import or temporary export goods in question respectively, entered under the earliest of the declarations.

Application of the first subparagraph shall not lead to unjustified import duty advantages.

The holder may request the discharge to be made in relation to the specific import or temporary export goods.

2. Where the goods under the arrangements are placed together with other goods and there is total destruction or irretrievable loss, the customs authorities may accept evidence produced by the holder indicating the actual quantity of goods under the arrangements which was destroyed or lost. Where it is not possible for the holder to produce such evidence, the amount of goods which has been destroyed or lost shall be established by reference to the proportion of goods of that type under the arrangements at the time when the destruction or loss occurred.

Article 521

1. At the latest upon expiry of the period for discharge, irrespective of whether aggregation in accordance with Article 118(2), second subparagraph, of the Code is used or not:

- in the case of inward processing (suspension system) or processing under customs control, the bill of discharge shall be supplied to the supervising office within 30 days;
- in the case of inward processing (drawback system), the claim for repayment or remission of import duties must be lodged with the supervising office within six months.

Where special circumstances so warrant, the customs authorities may extend the period even if it has expired.

2. The bill or the claim shall contain the following particulars, unless otherwise determined by the supervising office:

- (a) reference particulars of the authorisation;
- (b) the quantity of each type of import goods in respect of which discharge, repayment or remission is claimed or the import goods entered for the arrangements under the triangular traffic system;
- (c) the CN code of the import goods;
- (d) the rate of import duties to which the import goods are liable and, where applicable, their customs value;

▼M20

- (e) the particulars of the declarations entering the import goods under the arrangements;
 - (f) the type and quantity of the compensating or processed products or the goods in unaltered state and the customs-approved treatment or use to which they have been assigned, including particulars of the corresponding declarations, other customs documents or any other document relating to discharge and periods for discharge;
 - (g) the value of the compensating or processed products if the value scale method is used for the purpose of discharge;
 - (h) the rate of yield;
 - (i) the amount of import duties to be paid or to be repaid or remitted and where applicable any compensatory interest to be paid. Where this amount refers to the application of Article 546, it shall be specified;
 - (j) in the case of processing under customs control, the CN code of the processed products and elements necessary to determine the customs value.
3. The supervising office may make out the bill of discharge.

Section 7

Administrative cooperation*Article 522*

The customs authorities shall communicate to the Commission in the cases, within the time-limit and in the format set out in Annex 70 the following information:

- (a) with regard to inward processing and processing under customs control:
 - (i) authorisations issued;
 - (ii) applications refused or authorisations annulled or revoked on the grounds of economic conditions not being fulfilled;
- (b) with regard to outward processing:
 - (i) authorisations issued in accordance with Article 147(2) of the Code;
 - (ii) applications refused or authorisations annulled or revoked on the grounds of economic conditions not being fulfilled.

The Commission shall make these particulars available to the customs administrations.

Article 523

In order to make pertinent information available to other customs offices involved in the application of the arrangements, the following information sheets provided for in Annex 71 may be issued at the request of the person concerned or on the initiative of the customs authorities, unless the customs authorities agree other means of exchange of information:

- (a) for customs warehousing, the information INF8, in order to communicate the elements for assessment of the customs debt applicable to the goods before usual forms of handling have taken place;

▼ M20

- (b) for inward processing:
 - (i) the information sheet INF1, for the communication of information on duty amounts, compensatory interest, security and commercial policy measures,
 - (ii) the information sheet INF9, for the communication of information on compensating products to be assigned another customs approved treatment or use in triangular traffic,
 - (iii) the information sheet INF5, for the communication to obtain duty relief for import goods, of information on prior exportation in triangular traffic,
 - (iv) the information sheet INF7, for the communication of information permitting repayment or remission of duties under the drawback system;
- (c) for temporary importation, the information sheet INF6 in order to communicate the elements for assessment of the customs debt or of amounts of duties already levied for goods moved;
- (d) for outward processing, the information sheet INF2 in order to communicate information on temporary export goods in triangular traffic, in order to obtain partial or total relief for compensating products.

*CHAPTER 2**Customs warehousing*

Section 1

General provisions*Article 524*

For the purposes of this Chapter concerning agricultural products, 'prefinanced goods' means Community goods intended for export in the unaltered state which are the subject of the payment of an amount equal to an export refund before the goods are exported, where such payment is provided for in Council Regulation (EEC) No 565/80 ⁽¹⁾.

Article 525

1. Where a customs warehouse is public, the following classification shall apply:
 - (a) type A, if the responsibility lies with the warehousekeeper;
 - (b) type B, if the responsibility lies with the depositor;
 - (c) type F, if the warehouse is operated by the customs authorities.
2. Where a customs warehouse is private and responsibility lies with the warehousekeeper, who is the same person as the depositor but not necessarily the owner of the goods, the following classification shall apply:
 - (a) type D, where release for free circulation is made by way of the local clearance procedure and may be granted on the basis of the nature, the customs value and the quantity of the goods to be taken into account at the time of their placing under the arrangements;

⁽¹⁾ OJ L 62, 7.3.1980, p. 5.

▼ M20

- (b) type E, where the arrangements apply although the goods need not be stored in a place approved as a customs warehouse;
 - (c) type C, where neither of the special situations under points (a) and (b) applies.
3. An authorisation for a type E warehouse may provide for the procedures laid down for type D to be applied.

Section 2

Additional conditions concerning the granting of the authorisation*Article 526*

1. When granting the authorisation the customs authorities shall define the premises or any other location approved as a customs warehouse of type A, B, C or D. They may also approve temporary storage facilities as such types of warehouse or operate them as a type F warehouse.
2. A location may not be approved as more than one customs warehouse at the same time.
3. Where goods present a danger or are likely to spoil other goods or require special facilities for other reasons, authorisations may specify that they may only be stored in premises specially equipped to receive them.
4. Type A, C, D and E warehouses may be approved as victualling warehouses within the meaning of Article 40 of Commission Regulation (EC) No 800/99 ⁽¹⁾.
5. Single authorisations may be granted only for private customs warehouses.

Article 527

1. Authorisations may be granted only if any intended usual forms of handling, inward processing or processing under customs control of the goods do not predominate over the storage of the goods.
2. Authorisations shall not be granted if the premises of customs warehouses or the storage facilities are used for the purpose of retail sale.

An authorisation may, however, be granted, where goods are retailed with relief from import duties:

- (a) to travellers in traffic to third countries;
- (b) under diplomatic or consular arrangements;
- (c) to members of international organisations or to NATO forces.

3. For the purposes of the second indent of Article 86 of the Code, when examining whether the administrative costs of customs warehousing arrangements are disproportionate to the economic needs involved, customs authorities shall take account, *inter alia*, of the type of warehouse and the procedure which may be applied therein.

⁽¹⁾ OJ L 102, 17.4.1999, p. 11.

▼ M20

Section 3

Stock records*Article 528*

1. In warehouses of type A, C, D and E, the person designated to keep the stock records shall be the warehousekeeper.
2. In warehouses of type F, the operating customs office shall keep the customs records in place of stock records.
3. In type B warehouses, in place of stock records, the supervising office shall keep the declarations of entry for the arrangements.

Article 529

1. The stock records shall at all times show the current stock of goods which are still under the customs warehousing arrangements. At the times laid down by the customs authorities, the warehousekeeper shall lodge a list of the said stock at the supervising office.
2. Where Article 112(2) of the Code applies, the customs value of the goods before carrying out usual forms of handling shall appear in the stock records.
3. Information on the temporary removal of goods and on goods in common storage in accordance with Article 534(2) shall appear in the stock records.

Article 530

1. Where goods are entered for the type E warehouse arrangements, the entry in the stock records shall take place when they arrive at the holder's storage facilities.
2. Where the customs warehouse also serves as a temporary storage facility, the entry in the stock records shall take place at the time the declaration for the arrangements is accepted.
3. Entry in the stock records relating to discharge of the arrangements shall take place at the latest when the goods leave the customs warehouse or the holder's storage facilities.

Section 4

Other provisions concerning the operation of the arrangements*Article 531*

Non-Community goods may undergo the usual forms of handling listed in Annex 72.

Article 532

Goods may be temporarily removed for a period not exceeding three months. Where circumstances so warrant, this period may be extended.

Article 533

Applications for permission to carry out usual forms of handling or to remove goods temporarily from the customs warehouse shall be made in writing on a case by case basis to the supervising office. They must contain all particulars necessary to apply the arrangements.

▼ M20

Such permission may be granted as part of an authorisation to operate the warehousing arrangements. In this case the supervising office, in the manner it shall determine, shall be notified that such handling is to be carried out or the goods are to be temporarily removed.

Article 534

1. Where Community goods are stored on the premises of a customs warehouse or the storage facilities used for goods under the warehousing arrangements, specific methods of identifying such goods may be laid down with a view, in particular, to distinguishing them from goods entered for the customs warehousing arrangements.

2. The customs authorities may permit common storage where it is impossible to identify at all times the customs status of each type of goods. Prefinanced goods shall be excluded from such permission.

Goods in common storage shall share the same eight-digit CN-code, the same commercial quality and the same technical characteristics.

3. For the purpose of being declared for a customs-approved treatment or use the goods in common storage, as well as, in particular circumstances, identifiable goods which fulfill the conditions of the second subparagraph of paragraph 2, may be deemed to be either Community goods or non-Community goods.

Application of the first subparagraph shall, however, not result in a given customs status being assigned to a quantity of goods greater than the quantity actually having that status which is stored at the customs warehouse or the storage facilities when the goods declared for a customs-approved treatment or use are removed.

Article 535

1. Where operations of inward processing or processing under customs control are carried out on the premises of customs warehouses or in storage facilities, the provisions of Article 534 shall apply, *mutatis mutandis*, to the goods under these arrangements.

Where, however, these operations concern inward processing without equivalence or processing under customs control, the provisions of Article 534 on common storage shall not apply with regard to Community goods.

2. Entries in the records shall allow the customs authorities to monitor the precise situation of all goods or products under the arrangements at any time.

*CHAPTER 3**Inward processing*

Section 1

General provision*Article 536*

For the purposes of this Chapter:

- (a) 'Prior exportation' means the system whereby compensating products obtained from equivalent goods are to be exported before the import goods are entered for the arrangements using the suspension system;

▼ M20

- (b) 'Job processing' means any processing of import goods directly or indirectly placed at the disposal of the holder which is carried out according to specifications on behalf of a principal established in a third country, generally against payment of processing costs alone.

Section 2

Additional conditions concerning the granting of the authorisation*Article 537*

An authorisation shall be granted only where the applicant has the intention of re-exporting or exporting main compensating products.

Article 538

An authorisation may also be granted for the goods referred to in the fourth indent of Article 114(2)(c) of the Code, with the exception of:

- (a) fuels and energy sources other than those needed for the testing of compensating products or for the detection of faults in import goods needing repair;
- (b) lubricants other than those needed for the testing, adjustment or withdrawal of compensating products;
- (c) equipment and tools.

Article 539

► **C9** 1. ◀ The economic conditions shall be deemed to be fulfilled except where the application concerns import goods mentioned in Annex 73.

► **C9** 2. ◀ However, the conditions shall also be deemed to be fulfilled where an application concerns import goods mentioned in Annex 73, provided that:

- (a) the application concerns:
 - (i) operations involving goods of a non-commercial nature,
 - (ii) a job processing contract,
 - (iii) the processing of compensating products already obtained by processing under a previous authorisation the granting of which was subject to an examination of the economic conditions,

Such methods of identification or conditions may include examination of the records.

Section 3

Provisions concerning the operation of arrangements*Article 541*

1. The authorisation shall specify whether and under which conditions equivalent goods referred to in Article 114(2)(e) of the Code and sharing the same eight-digit CN code, the same commercial quality and the same technical characteristics as the import goods may be used for the processing operations.

2. Equivalent goods may be allowed to be at a more advanced stage of manufacture than the import goods where the essential part of the processing with regard to these equivalent goods is carried out in the undertaking of the holder or in the undertaking where the operation is being carried out on his behalf, save in exceptional cases.

3. Special provisions, set out in Annex 74, shall apply in respect of the goods referred to in that Annex.

Article 542

1. The authorisation shall specify the period for discharge. Where the circumstances so warrant, this period may be extended even when that originally set has expired.

2. Where the period for discharge expires on a specific date for all the goods placed under the arrangements in a given period, the authorisation may provide that the period for discharge shall be automatically extended for all goods still under the arrangements on this date. However, the customs authorities may require that such goods be assigned a new permitted customs-approved treatment or use within the period which they shall set.

3. Irrespective of whether or not aggregation is used or paragraph 2 is applied, the period for discharge for the following compensating products or goods in the unaltered state shall not exceed:

*CHAPTER 6****Outward processing*****Section 1****Additional conditions concerning the granting of the authorisation***Article 585*

1. Except where indications to the contrary exist, the essential interests of Community processors shall be deemed not to be seriously harmed.
2. Where an application for authorisation is made by a person who exports the temporary export goods without arranging for the processing operations, the customs authorities shall conduct a prior examination of the conditions set out in Article 147(2) of the Code on the basis of supporting documents. Articles 503 and 504 shall apply *mutatis mutandis*.

▼ **M20***Article 586*

Such means and methods may include the use of the information document set out in Annex 104 and the examination of the records.

2. Where the nature of the processing operations does not allow it to be established that the compensating products have resulted from the temporary export goods, the authorisation may nevertheless be granted in duly justified cases, provided the applicant can offer sufficient guarantees that the goods used in the processing operations share the same eight-digit CN code, the same commercial quality and the same technical characteristics as the temporary export goods. The authorisation shall lay down the conditions for using the arrangements.

Where the arrangements are requested for repair, the temporary export goods must be capable of being repaired and the arrangements shall not be used to improve the technical performance of the goods.

Section 2

Provisions concerning the operation of the arrangements*Article 588*

1. The authorisation shall specify the period for discharge. Where the circumstances so warrant, this period may be extended even when that originally set has expired.

2. Article 157(2) of the Code applies, even after the original period has expired.

Article 589

1. The declaration entering the temporary export goods for the arrangements shall be made in accordance with the provisions laid down for exportation.

Section 3

Provisions concerning the calculation of the duty relief*Article 590*

1. For the calculation of the amount to be deducted, no account shall be taken of anti-dumping duties and countervailing duties.

Secondary compensating products that constitute waste scrap, residues, offcuts and remainders shall be deemed to be included.

2. In determining the value of the temporary export goods in accordance with one of the methods referred to in the second subparagraph of Article 151(2) of the Code, the loading, transport, and insurance costs for the temporary export goods to the place where the

▼ M20

processing operation or the last such operation took place shall not be included in:

- (a) the value of the temporary export goods which is taken into account when determining the customs value of the compensating products in accordance with Article 32(1)(b)(i) of the Code; or
- (b) the processing costs, where the value of the temporary export goods cannot be determined in accordance with Article 32(1)(b)(i) of the Code.

The loading, transport and insurance costs for the compensating products from the place where the processing operation or the last processing operation took place to the place of their entry into the customs territory of the Community shall be included in the processing costs.

Loading, transport and insurance costs shall include:

- (a) commissions and brokerage, except buying commissions;
- (b) the cost of containers not integral to the temporary export goods;

Article 591

Partial relief from import duties by taking the cost of the processing operation as the basis of the value for duty shall be granted on request.

▼ M26

Customs authorities shall refuse the calculation of partial relief from import duties under this provision if before the compensating products are released for free circulation it is established that the sole object of the release for free circulation at a zero duty rate of the temporary export goods, which are not of Community origin within the meaning of Title II, Chapter 2, Section 1, of the Code, was to benefit from partial relief under this provision.

▼ C9

Articles 29 to 35 of the Code shall apply *mutatis mutandis* to the processing costs which shall not take into account the temporary export goods.

▼ M20*Article 592*

In the case of undertakings frequently carrying out processing operations under an authorisation not covering repair, the customs authorities may, on request of the holder, set an average rate of duty applicable to all those operations (aggregated discharge).

This rate shall be determined for each period not exceeding twelve months and shall apply provisionally for compensating products released for free circulation during that period. At the end of each period, the customs authorities shall make a final calculation and, where appropriate, apply the provisions of Article 220(1) or Article 236 of the Code.

2. Where ownership or a similar right of disposal over the goods belongs to a person established outside the Community pursuant to the contract on which the export is based, the exporter shall be considered to be the contracting party established in the Community.

Article 789

In cases involving sub-contracting, the export declaration may also be lodged at the customs office responsible for the place where the sub-contractor is established.

The customs authorities may authorise the declarant to print out the accompanying document from his computerised system.

3. When the entire export operation is carried out on the territory of one Member State, that Member State may waive the use of Copy 3 of the single administrative document or the export accompanying document, provided that the requirements of Article 182b(2) of the Code are met.

4. Without prejudice to Articles 796a to 796e, where the customs rules provide for another document to replace Copy 3 of the single administrative document, the provisions of this Chapter shall apply, *mutatis mutandis*, to that other document.

Article 792a

1. Where goods released for export do not leave the customs territory of the Community, the exporter or the declarant shall immediately inform the customs office of export. Where applicable, Copy 3 of the single administrative document shall be returned to that office. The customs office of export shall invalidate the export declaration.

The customs office of export shall inform the exporter or declarant accordingly.

In the cases referred to in the first and second subparagraph, the original of Copy 3 shall be annotated accordingly.

4. When the entire export operation is carried out on the territory of one Member State, that Member State may provide for the non-endorsement of Copy 3. In this case the Copy 3 shall not be returned to the declarant.

5. Where the customs office of exit establishes that goods are missing, it shall annotate the copy of the export declaration presented and inform the customs office of export.

The endorsement and return of the Copy 3 referred to in the first subparagraph of paragraph 1 of this Article shall also apply to goods released for export which are not placed under a transit procedure but are sent to a customs office of exit included in a single manifest transit declaration provided for by Article 445 or Article 448 and identified in accordance with Article 445(3)(e) or Article 448(3)(e).

Reference shall be made to the administrative accompanying document on Copy 3 of the export declaration and vice versa.

2. The customs office of exit shall supervise the physical exit of the goods and send back the copy of the administrative accompanying document in accordance with Article 19(4) of Council Directive 92/12/EEC.

▼ B*Article 794*

1. Goods not subject to prohibition or restriction and not exceeding ECU 3 000 in value per consignment and per declarant may be declared at the customs office of exit.

Member States may provide that this provision shall not apply when the person making the export declaration is acting as a professional customs agent on behalf of others.

2. Oral declarations may be made only at the customs office of exit.

▼B*Article 795*

Where goods leave the customs territory of the Community without an export declaration, such declaration shall be lodged retrospectively by the exporter at the customs office competent for the place where he is established. The provisions of Article 790 shall apply in these circumstances.

Acceptance of this declaration shall be subject to presentation by the exporter, to the satisfaction of the customs authorities of the customs office concerned, of evidence concerning the nature and quantity of the goods in question and the circumstances under which they left the customs territory of the Community. That office shall also endorse copy 3 of the Single Administrative Document.

Retrospective acceptance of the declaration shall not preclude application of the penalties in force nor the consequences which may arise as regards the common agricultural policy.

In cases justified by special circumstances the customs office of exit may forward that message at a later date.

3. In the case of split exportation, where goods covered by one 'Anticipated export record' message are moved to a customs office of exit as one consignment but subsequently exit the customs territory of the Community from that office of exit as more than one consignment, the customs office of exit shall control the physical exit of the goods and send the 'Exit results' message only when all of the goods have left the customs territory of the Community.

In exceptional circumstances, where goods covered by one 'Anticipated export record' message are moved to a customs office of exit as one consignment but subsequently exit the customs territory of the Community as more than one consignment and through more than one customs office of exit, the customs office of exit where the consignment was first presented shall, upon receiving a duly substantiated request, certify a copy of the export accompanying document for each part of the goods.

This certification shall only be granted by the customs authorities if the data contained in the export accompanying document corresponds to the data in the 'Anticipated export record' message.

The relevant copy of the export accompanying document and the goods shall be presented together to the customs office of exit concerned. Each customs office of exit shall endorse the copy of the export accompanying document with the particulars referred to in Article 793a(2) and return it to the customs office of exit where the consignment was first presented. TITLE I

RETURNED GOODS

▼B*Article 844*

1. In accordance with Article 185 (2) (b) of the Code, the following shall be exempt from import duties:

— goods previously exported from the customs territory of the Community, in respect of which the customs export formalities have been completed with a view to obtaining refunds or other amounts provided for on exportation under the common agricultural policy,

or

— goods in respect of which a financial advantage other than the said refunds or other amounts has been granted under the common agricultural policy, entailing an obligation to export the said goods,

provided it is established, as appropriate, that the refunds or other amounts paid have been repaid, or that the necessary steps have been taken by the competent authorities for such sums to be withheld, or that the other financial advantages granted have been cancelled, and that the goods:

- (i) could not be entered for home use in the country to which they were sent on account of laws in force in that country;
- (ii) were returned by the consignee as being defective or not in accordance with the provisions of the contract relating to them;
- (iii) were reimported into the customs territory of the Community because they could not be used for the purposes intended owing to other circumstances outside the exporter's control.

2. The circumstances referred to in paragraph 1 (iii) shall include the following:

- (a) goods returned to the customs territory of the Community following damage occurring before delivery to the consignee, either to the goods themselves or to the means of transport on which they were carried;
- (b) goods originally exported for the purposes of consumption or sale in the course of a trade fair or similar occasion which have not been so consumed or sold;
- (c) goods which could not be delivered to the consignee on account of his physical or legal incapacity to honour the contract under which the goods were exported;
- (d) goods which, because of natural, political or social disturbances, could not be delivered to their consignee or which reached him after the mandatory delivery date stipulated in the contract under which the goods were exported;
- (e) products covered by the common organization of the market in fruit and vegetables, exported and sent for sale on consignment, but which were not sold in the market of the third country of destination.

3. Goods exported under the common agricultural policy with an export licence or an advance fixing certificate shall not be exempt

▼B

from import duties unless it is established that the relevant Community provisions have been complied with.

4. The goods referred to in paragraph 1 shall not be exempt from import duties unless they are entered for free circulation in the customs territory of the Community within twelve months of the date of completion of the customs formalities relating to their exportation.

▼M14

However, where the goods are declared for free circulation after expiry of the period referred to in the first subparagraph, the customs authorities of the Member State of reimportation may allow the period to be exceeded where exceptional circumstances justify this. Where the customs authorities do allow the period to be exceeded, they shall send details of the case to the Commission.

▼B*Article 845*

Returned goods shall be exempt from import duties even where they represent only a proportion of the goods previously exported from the customs territory of the Community.

The same applies where the goods consist of parts or accessories belonging to machines, instruments, apparatus or other products previously exported from the customs territory of the Community.

Article 846

1. By way of derogation from Article 186 of the Code, returned goods in one of the following situations shall be exempt from import duties:

- (a) goods which, after having been exported from the customs territory of the Community, have received no treatment other than that necessary to maintain them in good condition or handling which alters their appearance only;
- (b) goods which, after having been exported from the customs territory of the Community, received treatment other than that necessary to maintain them in good condition or handling other than that altering their appearance, but which proved to be defective or unsuitable for their intended use, provided that one of the following conditions is fulfilled:
 - such treatment or handling was applied to the goods solely with a view to repairing them or restoring them to good condition,
 - their unsuitability for their intended use became apparent only after such treatment or handling had commenced.

2. Where returned goods have undergone treatment or handling permitted under paragraph 1 (b) and such treatment would have rendered them liable to import duties if they had come under outward processing arrangements, the rules in force for charging duty under the said arrangements shall apply.

However, if goods have undergone an operation consisting of repair or restoration to good condition which became necessary as a result of unforeseen circumstances which arose outside the customs territory of the Community, this being established to the satisfaction of the customs authorities, relief from import duties shall be granted provided that the value of the returned goods is not higher, as a result of such operation, than their value at the time of export from the customs territory of the Community.

3. For the purposes of the second subparagraph of paragraph 2:

- (a) repair or restoration to good condition which became necessary means: any operation to remedy operating defects or material

▼B

damage suffered by goods while they were outside the customs territory of the Community, without which the goods could no longer be used in the normal way for the purposes for which they were intended;

- (b) the value of returned goods shall be considered not to be higher, as a result of the operation which they have undergone, than their value at the time of export from the customs territory of the Community, when the operation does not exceed that which is strictly necessary to enable them to continue to be used in the same way as at that time.

When the repair or restoration to good condition of goods necessitates the incorporation of spare parts, such incorporation shall be limited to those parts strictly necessary to enable the goods to be used in the same way as at the time of export.

Article 847

When completing the customs export formalities, the customs authorities shall, at the request of the person concerned, issue a document containing the information necessary for identification of the goods in the event of their being returned to the customs territory of the Community.

Article 848

1. The following shall be accepted as returned goods:
 - goods for which the following documents are produced in support of the declaration for release for free circulation:
 - (a) the copy of the export declaration returned to the exporter by the customs authorities, or a copy of such document certified true by the said authorities; or
 - (b) the information sheet provided for in Article 850.

Where evidence available to the customs authorities at the customs office of reimportation or ascertainable by them from the person concerned indicates that the goods declared for free circulation were originally exported from the customs territory of the Community, and at that time satisfied the conditions for acceptance as returned goods, the documents referred to at (a) and (b) shall not be required.

- goods covered by an ATA carnet issued in the Community.

These goods may be accepted as returned goods, within the limits laid down by Article 185 of the Code, even when the validity of the ATA carnet has expired.

In all cases, the formalities laid down in Article 290 (2) shall be carried out.

2. The first indent of paragraph 1 shall not apply to the international movement of packing materials, means of transport or certain goods admitted under specific customs arrangements where autonomous or conventional provisions lay down that customs documents are not required in these circumstances.

Nor shall it apply in cases where goods may be declared for release for free circulation orally or by any other act.

3. Where they consider it necessary, the customs authorities at the customs office of reimportation may ask the person concerned ► **C1** to submit additional evidence, in particular for the purposes of identification of the returned goods. ◀

▼ B*Article 849*

1. A declaration for release for free circulation relating to returned goods whose export may have given rise to the completion of customs export formalities with a view to obtaining refunds or other amounts provided for on exportation under the common agricultural policy, shall be supported not only by the documents referred to in Article 848, but by a certificate issued by the authorities responsible for the grant of such refunds or amounts in the Member State of exportation. Such certificate shall contain the particulars necessary to allow the customs office where the goods concerned were declared for free circulation to verify that it relates to the said goods.

2. When the export of the goods did not give rise to the completion of customs export formalities with a view to obtaining refunds or other amounts provided for on exportation under the common agricultural policy, the certificate shall bear one of the following indications:

7. in the case of goods or products physically transferred within the meaning of Articles 296, 297 or 511, failure to fulfil one of the conditions under which the transfer takes place, where the following conditions are fulfilled:
 - (a) the person concerned can demonstrate, to the satisfaction of the customs authorities, that the goods or products arrived at the specified premises or destination and, in cases of transfer based on Articles 296, 297, 512(2) or 513, that the goods or products have been duly entered in the records of the specified premises or destination, where those Articles require such entry in the records;
 - (b) where a time limit set in the authorisation was not observed, the goods or products nevertheless arrived at the specified premises or destination within a reasonable time;

▼ M12

8. in the case of goods eligible on release for free circulation for the total or partial relief from import duties referred to in Article 145 of the Code, the existence of one of the situations referred to in Article 204 (1) (a) or (b) of the Code while the goods concerned are in temporary storage or under another customs procedure before being released for free circulation;

▼ B*Article 860*

The customs authorities shall consider a customs debt to have been incurred under Article 204 (1) of the Code unless the person who would be the debtor establishes that the conditions set out in Article 859 are fulfilled.

▼B*Article 861*

The fact that the failures referred to in Article 859 do not give rise to a customs debt shall not preclude the application of provisions of criminal law in force or of provisions allowing cancellation and withdrawal of authorizations issued under the customs procedure in question.

*CHAPTER 2**Natural wastage**Article 862*

1. For the purposes of Article 206 of the Code, the customs authorities shall, at the request of the person concerned, take account of the quantities missing wherever it can be shown that the losses observed result solely from the nature of the goods and not from any negligence or manipulation on the part of that person.

2. In particular, negligence or manipulation shall mean any failure to observe the rules for transporting, storing, handling, working or processing the goods in question imposed by the customs authorities or by normal practice.

Article 863

The customs authorities may waive the obligation for the person concerned to show that the goods were irretrievably lost for reasons inherent in their nature where they are satisfied that there is no other explanation for the loss.

Article 864

The national provisions in force in the Member States concerning standard rates for irretrievable loss due to the nature of the goods themselves shall be applied where the person concerned fails to show that the real loss exceeds that calculated by application of the standard rate for the goods in question.

▼M1*CHAPTER 3**Goods in special situations***▼B***Article 865*

The presentation of a customs declaration for the goods in question, or any other act having the same legal effects, and the production of a document for endorsement by the competent authorities, shall be considered as removal of goods from customs supervision within the meaning of Article 203 (1) of the Code, where these acts have the effect of wrongly conferring on them the customs status of Community goods.

▼M14

However, in the case of airline companies authorised to use a simplified transit procedure with the use of an electronic manifest, the goods shall not be considered to have been removed from customs supervision if, at the initiative or on behalf of the person concerned, they are treated in accordance with their status as non-Community goods before the customs authorities find the existence of an irregular situation and if the behaviour of the person concerned does not suggest any fraudulent dealing

▼B*Article 866*

Without prejudice to the provisions laid down concerning prohibitions or restrictions which may be applicable to the goods in question, where a customs debt on importation is incurred pursuant to Articles 202, 203, 204 or 205 of the Code and the import duties have been paid, those goods shall be deemed to be Community goods without the need for a declaration for entry into free circulation.

Article 867

The confiscation of goods pursuant to Article 233 (c) and (d) of the Code shall not affect the customs status of the goods in question.

▼M1*Article 867a*

1. Non-Community goods which have been abandoned to the Exchequer or seized or confiscated shall be considered to have been entered for the customs warehousing procedure.

2. The goods referred to in paragraph 1 may be sold by the customs authorities only on the condition that the buyer immediately carries out the formalities to assign them a customs-approved treatment or use.

Where the sale is at a price inclusive of import duties, the sale shall be considered as equivalent to release for free circulation, and the customs authorities themselves shall calculate the duties and enter them in the accounts.

In these cases, the sale shall be conducted according to the procedures in force in the Member States.

3. Where the administration decides to deal with the goods referred to in paragraph 1 otherwise than by sale, it shall immediately carry out the formalities to assign them one of the customs-approved treatments or uses laid down in Article 4 (15) (a), (b), (c) and (d) of the code.

TITLE III

▼M10**RECOVERY OF THE AMOUNT OF THE CUSTOMS DEBT****▼B***Article 868*

Member States need not enter in the accounts amounts of duty of less than ECU 10.

There shall be no post-clearance recovery of import duties or export duties where the amount per recovery action is less than ECU 10.

Article 869

The customs authorities shall themselves decide not to enter uncollected duties in the accounts:

- (a) in cases in which preferential tariff treatment has been applied in the context of a tariff quota, a tariff ceiling or other arrangements when entitlement to this treatment had been ended at the time of acceptance of the customs declaration without that fact having been published in the *Official Journal of the European Communities* before the release for free circulation of the goods in question or, where such fact is not published, having been made known in an appropriate manner in the Member State concerned, the person liable for payment for his part having acted in good faith and

▼B

complied with all the provisions laid down by the legislation in force as regards the customs declaration;

▼M23

- (b) in cases in which they consider that the conditions laid down in Article 220(2)(b) of the Code are fulfilled, except those in which the dossier must be transmitted to the Commission pursuant to Article 871. However, where Article 871(2), second indent, is applicable, the customs authorities may not adopt a decision waiving entry in the accounts of the duties in question until the end of a procedure initiated in accordance with Articles 871 to 876.

Where a request is submitted for repayment or remission under Article 236 of the Code in conjunction with Article 220(2)(b) of the Code, subparagraph (b) of the first paragraph of this Article and Articles 871 to 876 shall apply *mutatis mutandis*.

For the purposes of applying the above paragraphs the Member States shall give each other mutual assistance, particularly where an error by the customs authorities of a Member State other than the one responsible for taking the decision is concerned.

Article 870

1. Each Member State shall hold at the disposal of the Commission a list of the cases in which the following provisions have been applied:

- Article 869(a),
- Article 236 of the Code in conjunction with Article 220(2)(b) of the Code, where no communication is required under paragraph 2,
- Article 869(b), where no communication is required under paragraph 2.

2. Each Member State shall communicate to the Commission a list of the cases in which the amount not collected from the operator concerned in respect of one or more import or export operations but in consequence of a single error is more than EUR 50 000, and the provisions of Article 236 of the Code in conjunction with Article 220(2)(b) of the Code or of Article 869(b) have been applied, giving a short summary of each case. This communication shall be forwarded during the first and third quarters of each year for all cases in which it was decided not to enter the uncollected duties in the accounts during the preceding half-year.

Article 871

1. The customs authority shall transmit the case to the Commission to be settled under the procedure laid down in Articles 872 to 876 where it considers that the conditions laid down in Article 220(2)(b) of the Code are fulfilled and:

- it considers that the Commission has committed an error within the meaning of Article 220(2)(b) of the Code,
- the circumstances of the case are related to the findings of a Community investigation carried out under Council Regulation (EC) No 515/97 of 13 March 1997 on mutual assistance between the administrative authorities of the Member States and cooperation between the latter and the Commission to ensure the correct application of the law on customs and agricultural matters ⁽¹⁾ or under any other Community legislation or any agreement concluded by the

- Community with a country or group of countries in which provision is made for carrying out such Community investigations, or
- the amount not collected from the operator concerned in respect of one or more import or export operations but in consequence of a single error is EUR 500 000 or more.
2. However, the cases referred to in paragraph 1 shall not be transmitted where:
- the Commission has already adopted a decision under the procedure provided for in Articles 872 to 876 on a case involving comparable issues of fact and of law,
 - the Commission is already considering a case involving comparable issues of fact and of law.
3. The dossier submitted to the Commission shall contain all the information required for full consideration. It shall include detailed information on the behaviour of the operator concerned, and in particular on his professional experience, good faith and diligence. This assessment shall be accompanied by all information that may demonstrate that the operator acted in good faith. The dossier shall also include a statement, signed by the applicant for repayment or remission, certifying that he has read the dossier and either stating that he has nothing to add or listing all the additional information that he considers should be included.
4. As soon as it receives the dossier the Commission shall inform the Member State concerned accordingly.
5. Should it be found that the information supplied by the Member State is not sufficient to enable a decision to be taken on the case concerned in full knowledge of the facts, the Commission may request that additional information be supplied.
6. Where one of the following situations occurs the Commission shall return the dossier to the customs authority and the procedure referred to in Articles 872 to 876 shall be deemed never to have been initiated:
- the dossier shows that there is a disagreement between the customs authority that has transmitted the dossier and the person who signed the statement referred to in paragraph 3 as regards the account of the facts,
 - the dossier is obviously incomplete since it contains nothing that would justify its consideration by the Commission,
 - under paragraphs 1 and 2, the dossier should not be transmitted,
 - the existence of a customs debt has not been established,
 - new information relating to the dossier and of a nature to alter substantially its presentation of the facts or legal assessment has been transmitted by the customs authority to the Commission while it is considering the dossier.

Article 872

The Commission shall send to the Member States a copy of the dossier referred to in Article 871(3) within 15 days of the date on which it received that dossier.

Consideration of the case in question shall be included as soon as possible on the agenda of a meeting of the group of experts provided for in Article 873.

▼ M14*Article 872a*

Where, at any time in the procedure provided for in Articles 872 and 873, the Commission intends to take a decision unfavourable towards the person concerned by the case presented, it shall communicate its objections to him/her in writing, together with all the documents on which it bases those objections. The person concerned by the case submitted to the Commission shall express his/her point of view in writing within a period of one month from the date on which the objections were sent. If he/she does not give a point of view within that period, he/she shall be deemed to have waived the right to express a position.

▼ M23*Article 873*

After consulting a group of experts composed of representatives of all Member States, meeting within the framework of the Committee to consider the case in question, the Commission shall decide whether the circumstances under consideration are such that the duties in question need not be entered in the accounts.

That decision shall be taken within nine months of the date on which the dossier referred to in Article 871(3) is received by the Commission. However, where the declaration or detailed assessment of the operator's behaviour referred to in Article 871(3) is not included in the dossier, the nine months shall be counted only from the date of receipt of these documents by the Commission. The Commission shall notify the customs authority and the person concerned accordingly.

Where the Commission has found it necessary to ask for additional information from the Member State in order to reach its decision, the nine months shall be extended by a period equivalent to that between the date the Commission sent the request for additional information and the date it received that information. The Commission shall notify the person concerned of the extension of the procedure.

Where the Commission conducts investigations itself in order to reach a decision, the nine months shall be extended by the time necessary to complete the investigations. Such an extension shall not exceed nine months. The Commission shall notify the customs authority and the person concerned of the dates on which investigations are opened and closed.

Where the Commission has notified the person concerned of its objections in accordance with Article 872a, the period of nine months shall be extended by one month.

Article 874

The Member State concerned shall be notified of the decision referred to in Article 873 as soon as possible and in any event within one month of the expiry of the period specified in that Article.

The Commission shall notify the Member States of the decisions it has adopted in order to help customs authorities to reach decisions in situations involving comparable issues of fact and law.

Article 875

Where it is established by the decision referred to in Article 873 that the circumstances under consideration are such that the duties in question need not be entered in the accounts, the Commission may specify the conditions under which the Member States may refrain from post-clearance entry in the account in cases involving comparable issues of fact and of law.

▼B*Article 876*

If the Commission fails to take a decision within the period referred to in Article 873 or fails to notify a decision to the Member State concerned within the period referred to in Article 874, the customs authorities of that Member State shall not enter the duties in question in the accounts.

▼M10*Article 876a*

1. The customs authorities shall suspend the debtor's obligation to pay the duties until such time as they have taken a decision on the request, provided that, where the goods are no longer under customs supervision, security is lodged for the amount of those duties, and that:

- (a) in cases where a request for invalidation of a declaration has been presented, this request is likely to be met;
- (b) in cases where a request has been presented for remission pursuant to Article 236 in conjunction with Article 220 (2) (b) of the Code or pursuant to Article 238 or Article 239, the customs authorities consider that the conditions laid down in the relevant provision may be regarded as having been fulfilled;
- (c) in cases other than those referred to under (b), a request has been presented for remission pursuant to Article 236 of the Code and the conditions referred to in the second paragraph of Article 244 of the Code have been fulfilled.

It shall not be necessary to require a security where such requirement would be likely, owing to the debtor's circumstances, to cause serious economic or social difficulties.

2. In cases where goods in one of the circumstances referred to in the second indent of Article 233 (c) or in Article 233 (d) of the Code are seized, the customs authorities shall suspend the debtor's obligation to pay the duties if they consider that the conditions for confiscation may be regarded as having been fulfilled.

▼M22

3. Where a customs debt is incurred under Article 203 of the Code, the customs authorities shall suspend the obligation of the person referred to in the fourth indent of paragraph 3 of that Article to pay the duties where at least one other debtor has been identified and the amount of the duties has also been communicated to him in accordance with Article 221 of the Code.

The suspension may be granted only on the condition that the person referred to in the fourth indent of Article 203(3) of the Code is not also covered by one of the other indents of the said paragraph and has not been obviously negligent in fulfilling his obligations.

The duration of the suspension shall be limited to one year. However, this period may be extended by the customs authorities for duly justified reasons.

The suspension shall be conditional on the lodging by the person for whose benefit it is granted of a valid security for the amount of the duties at stake, except where such a security covering the whole amount of duties at stake already exists and the guarantor has not been released from his undertakings. Such security need not be required where such a requirement would be likely, owing to the debtor's circumstances, to cause serious economic or social difficulties.

2. The customs office referred to in paragraph 1 shall enter the date of receipt on the original and the copy of the application. It shall return the copy to the applicant.

Where the second subparagraph of Article 878 (2) is applied, the said customs office shall acknowledge receipt in writing to the applicant.

Article 880

Without prejudice to any specific provisions adopted in this connection under the common agricultural policy, an application relating to goods in respect of which an import or export licence or advance fixing certificate was produced when the relevant customs declaration was lodged must also be accompanied by certification issued by the authorities responsible for issuing such licence or certificate attesting that the necessary steps have been taken to cancel the effects of the said licence or certificate.

Such certification shall not be required, however:

- where the customs authority to which the application is submitted itself issued the licence or certificate in question,
- where the ground relied upon in support of the application is a substantive error that has no effect on the attribution of the licence or certificate in question.

Article 881

1. The customs office referred to in Article 879 may accept an application not containing all the information provided for on the form referred to in Article 878 (2). However, the application must contain at least the information to be entered in boxes 1 to 3 and 7.

2. Where paragraph 1 is applied, the said customs office shall set a time limit for the supply of any missing particulars and/or documents.

2. The request referred to in paragraph 1 must be lodged with the customs office referred to in Article 879 within 12 months of the date of acceptance of the export declaration.

Section 2

Procedure for granting repayment or remission*Article 883*

The decision-making customs authority may authorize completion of the customs formalities to which any repayment or remission may be subject before it has ruled on the application for repayment or remission. Such authorization shall be entirely without prejudice to its decision on the application.

Article 884

Without prejudice to Article 883 and until a decision has been taken on the application for repayment or remission, the goods in respect of which repayment or remission of duties has been requested may not be transferred to a location other than that specified in the said application unless the applicant notifies in advance the customs office referred to in Article 879, which shall in turn inform the decision-making customs authority.

Article 885

1. Where an application for repayment or remission relates to a case where supplementary information must be obtained or where the goods must be examined in order to ensure that the conditions for repayment or remission laid down in the Code and in this Title are satisfied, the decision-making customs authority shall adopt the measures necessary to that end, if necessary by requesting the assistance of the supervising customs office, specifying the nature of the information to be obtained or of the checks to be carried out.

The supervising customs office shall comply promptly with this request and shall forward the information obtained and the results of the checks carried out to the decision-making customs authority.

2. Where the application relates to goods which are situated in a Member State other than that in which the import or export duties were entered in the accounts, the provisions of Chapter 4 of this Title shall apply.

Article 886

1. When the decision-making customs authority possesses all the necessary particulars, it shall give its decision in writing on the application for repayment or remission in accordance with Article 6 (2) and (3) of the Code.

2. Where the application is approved, the decision shall include all the particulars necessary for its implementation.

Depending on the circumstances, some or all of the following particulars shall appear in the decision:

- (a) the information necessary for identifying the goods to which it applies;
- (b) the grounds for repayment or remission of the import or export duties and a reference to the corresponding article of the Code and, where appropriate, the corresponding article of this Title;
- (c) the use to which the goods may be put or the destination to which they may be sent, depending on the possibilities available in the particular case under the Code and where appropriate on the basis of a specific authorization by the decision-making customs authority;

▼B

- (d) the time limit for completion of the formalities to which repayment or remission of the import or export duties is subject;
- (e) a statement indicating that the import or export duties will not be repaid or remitted until the implementing customs office has informed the decision-making customs authority that the formalities to which repayment or remission is subject have been completed;
- (f) particulars of any requirements to which the goods remain subject pending implementation of the decision;
- (g) a notice informing the recipient that he must give the original of the decision to the implementing customs office of his choice when presenting the goods.

Article 887

1. The implementing customs office shall take steps to ensure:
 - where appropriate, that the requirements referred to in Article 886 (2) (f) are met,
 - that in all cases the goods are actually used in the manner or sent to the destination specified in the decision to repay or remit import or export duties.
2. Where the decision specifies that the goods may be placed in a customs warehouse, a free zone or a free warehouse, and the recipient avails himself of this opportunity, the necessary formalities must be carried out with the implementing customs office.
3. Where the decision to repay or remit duties specifies a use to which the goods are to be put or a destination to which they are to be sent which can be established only in a Member State other than that in which the implementing customs office is located, proof of compliance shall be furnished by production of a control copy T 5 issued and used in accordance with the provisions of ►**M18** Articles 912a to 912g ◀, and of this Article.

The control copy T 5 must contain the following:

- (a) box 33 shall contain the combined nomenclature code of the goods;
 - (b) box 103 shall indicate in words the net quantity of the goods;
 - (c) box 104 shall contain, as appropriate, either the words ‘exit from the customs territory of the Community’, or one of the following under the heading ‘other’:
 - Delivery free of charge to the following charity ...,
 - Destruction under customs supervision,
 - Entry for the following customs procedure ...,
 - Placing in a free zone or free warehouse;
 - (d) box 106 shall contain reference particulars of the decision granting repayment or remission of duties;

4. The supervising customs office which establishes or on whose responsibility it is established that the goods have actually been used for the purpose specified or have arrived at the prescribed destination shall complete the box entitled ‘Control of use and/or destination’ of the control document by entering a cross against ‘have received the use and/or destination declared overleaf’ and giving the relevant date.
 5. When the implementing customs office has satisfied itself that the conditions set out in paragraph 1 are fulfilled, it shall send a certificate to that effect to the decision-making customs authority.

▼B*Article 888*

A decision-making customs authority having approved an application for repayment or remission of duties shall repay or remit such duty only after receiving the certificate referred to in Article 887 (5).

Article 889

1. Where the request for repayment or remission is based on the existence, at the time when the declaration of release for free circulation was accepted, of a reduced or zero rate of import duty on the goods under a tariff quota, a tariff ceiling or other preferential tariff arrangements, repayment or remission shall be granted only on condition that, at the time of lodging the application for repayment or remission accompanied by the necessary documents:

- in the case of a tariff quota, its volume has not been exhausted,
- in other cases, the rate of duty normally due has not been re-established.

If the conditions laid down in the preceding paragraph are not fulfilled, repayment or remission shall nevertheless be granted where the failure to apply the reduced or zero rate of duty to the goods was the result of an error on the part of the customs authorities themselves and the declaration for free circulation contained all the particulars and was accompanied by all the documents necessary for application of the reduced or zero rate.

▼M13

2. Each Member State shall keep at the disposal of the Commission a list of the cases in which the provisions of the second subparagraph of paragraph 1 have been applied

▼B*Article 890***▼M22**

The decision-making customs authority shall grant repayment or remission when:

- (a) the request is accompanied with a certificate of origin, a movement certificate, a certificate of authenticity, an internal Community transit document or with any other appropriate document, indicating that the imported goods were eligible, at the time of acceptance of the declaration for free circulation, for Community treatment, preferential tariff treatment or favourable tariff treatment by reason of the nature of goods;
- (b) the document thus produced refers specifically to the goods in question;
- (c) all the conditions relating to acceptance of the said document are fulfilled;
- (d) all the other conditions for the granting of the Community treatment, a preferential tariff treatment or of a favourable tariff treatment by reason of the nature of goods are fulfilled.

▼M15

Repayment or remission shall take place upon presentation of the goods. Where the goods cannot be presented to the implementing customs office, the decision-making customs authority shall grant repayment or remission only where it has information showing unequivocally that the certificate or document produced post-clearance applies to the said goods.

▼B*Article 891*

Repayment or remission of duty shall not be granted where certificates for the advance fixing of levies are presented in support of the application.

Article 892

Import duties shall not be repaid or remitted under Article 238 of the Code where:

- the defective nature of the goods was taken into consideration in drawing up the terms of the contract, in particular the price, under which the goods were entered for a customs procedure involving the obligation to pay import duties,
- the goods are sold by the importer after it has been ascertained that they are defective or do not comply with the terms of the contract.

Article 893

1. Without prejudice to Article 900 (1) (c), the decision-making customs authority shall set a deadline, no later than two months from the date of notification of the decision to repay or remit import duties or export duties, for completion of the customs formalities to which the repayment or remission of duties is subject.

2. Failure to observe the deadline referred to in paragraph 1 shall result in loss of entitlement to repayment or remission except where the person concerned by the decision proves that he was prevented from meeting this deadline by unforeseeable circumstances or *force majeure*.

Article 894

Where destruction of the goods authorized by the decision-making customs authority produces waste or scrap, such waste or scrap shall be regarded as non-Community goods once a decision has been taken accepting the application for repayment or remission.

Article 895

Where the authorization referred to in the second subparagraph of Article 238 (2) (b) of the Code is granted, the customs authorities shall take all necessary steps to ensure that goods placed in a customs warehouse, free zone or free warehouse may subsequently be recognized as non-Community goods.

Article 896

1. Goods which, under the common agricultural policy, are entered for a customs procedure involving the obligation to pay import duties under an import licence or advance fixing certificate shall benefit from Articles 237, 238 and 239 of the Code only where the customs office referred to in Article 879 is satisfied that the necessary steps have been taken by the competent authorities to cancel the effects with regard to the certificate under which the importation took place.

2. Paragraph 1 shall also apply in the case of re-exportation, placing in a customs warehouse, free zone or free warehouse, or destruction of the goods.

Article 897

Where it is not the complete article that is exported, re-exported or destroyed or assigned to another authorized customs treatment or use,

▼B

but one or more parts or components of that article, the amount to be repaid or remitted shall be the difference between the amount of import duties on the complete article and the amount of import duties which would have been chargeable on the remainder of the article if the latter had been entered in the unaltered state for a customs procedure involving the obligation to pay such duties on the date on which the complete article was so entered.

Article 898

The amount referred to in Article 240 of the Code is hereby set at ECU 10.

*CHAPTER 3**Specific provisions relating to the application of Article 239 of the Code*

Section 1

Decisions to be taken by the customs authorities of the Member States**▼M23***Article 899*

1. Where the decision-making customs authority establishes that an application for repayment or remission submitted to it under Article 239(2) of the Code:

- is based on grounds corresponding to one of the circumstances referred to in Articles 900 to 903, and that these do not result from deception or obvious negligence on the part of the person concerned, it shall repay or remit the amount of import or export duties concerned,
- is based on grounds corresponding to one of the circumstances referred to in Article 904, it shall not repay or remit the amount of import or export duties concerned.

2. In other cases, except those in which the dossier must be submitted to the Commission pursuant to Article 905, the decision-making customs authority shall itself decide to grant repayment or remission of the import or export duties where there is a special situation resulting from circumstances in which no deception or obvious negligence may be attributed to the person concerned.

Where Article 905(2), second indent, is applicable, the customs authorities may not decide to authorise repayment or remission of the duties in question until the end of a procedure initiated in accordance with Articles 906 to 909.

3. For the purposes of Article 239(1) of the Code and of this Article, 'the person concerned' shall mean the person or persons referred to in Article 878(1) or their representatives, and any other person who was involved with the completion of the customs formalities relating to the goods concerned or gave the instructions necessary for the completion of these formalities.

4. For the purposes of applying paragraphs 1 and 2 the Member States shall give each other mutual assistance, particularly where an error by the customs authorities of a Member State other than that responsible for taking the decision is concerned.

▼B*Article 900*

1. Import duties shall be repaid or remitted where:
 - (a) non-Community goods placed under a customs procedure involving total or partial relief from import duties or goods released for free circulation with favourable tariff treatment by reason of their end-use are stolen, provided that the goods are recovered promptly and placed again in their original customs situation in the state they were in when they were stolen;
 - (b) non-Community goods are inadvertently withdrawn from the customs procedure involving total or partial relief from the said duties under which they had been placed, provided that, as soon as the error is found, they are placed again in their original customs situation in the state they were in when they were withdrawn;
 - (c) it is impossible to operate the mechanism for opening the means of transport on which goods previously released for free circulation are located and accordingly to unload them on arrival at their destination, provided that they are immediately re-exported;
 - (d) goods originally released for free circulation are subsequently returned to their non-Community supplier, under the outward processing arrangements, to enable him — free of charge — to eliminate defects existing prior to the release of the goods (even if found after release of the goods) or to bring them into line with the provisions of the contract under which they were released for free circulation, and the said supplier decides to keep the goods permanently because he is unable to remedy the defects or because it would not be economic to do so;
 - (e) it is found, when the customs authorities decide on post-clearance entry in the accounts of import duties actually due on goods released for free circulation with full relief from such duties, that the goods in question have been re-exported from the customs territory of the Community without customs supervision, provided it is established that the substantive conditions laid down in the Code for the repayment or remission of such import duties would actually have been met at the time of re-exportation if the amount had been levied when the goods were released for free circulation;
 - (f) a judicial body has forbidden the marketing of an item previously entered for a customs procedure obliging the person concerned to pay import duties under normal conditions, and the said item is re-exported from the customs territory of the Community or destroyed under the control of the customs authorities, provided it is established that the item in question has not actually been used in the Community;
 - (g) the goods have been entered for a customs procedure involving the obligation to pay such duties by a declarant empowered to do so on his own initiative and, through no fault of the declarant, it has not been possible to deliver them to the consignee;
 - (h) the goods have been addressed to the consignee in error by the consignor;
 - (i) the goods are found to be unsuitable for the use for which the consignee intended them because of an obvious factual error in his order;
 - (j) after having been released for a customs procedure involving the obligation to pay import duties, the goods are found not to have complied, at the time of their release, with the rules in force concerning their use or marketing and therefore cannot be used for the purpose intended by the consignee;
 - (k) the use of the goods by the consignee for the purpose intended is prevented or substantially restricted as a result of measures of

▼ B

general scope taken, after the date of release for a customs procedure involving the obligation to pay import duties, by an authority or other body having the appropriate power of decision;

- (l) total or partial import duty relief applied for by the person concerned in accordance with existing provisions cannot, through no fault of the person concerned, be granted by the customs authorities, who shall accordingly enter in the accounts the import duties which have become due;
- (m) the goods reached the consignee after the binding delivery dates stipulated in the contract under which they were entered for a customs procedure involving the obligation to pay import duties;
- (n) it has not been possible to sell the goods in the customs territory of the Community and they are delivered free of charge to charities:
 - carrying out their activities in a third country, provided that they are represented in the Community,
 - or
 - carrying out their activities in the customs territory of the Community, provided that they are eligible for relief in the case of importation for free circulation of similar goods from third countries.

▼ M5

- (o) the customs debt has been incurred otherwise than under Article 201 of the Code and the person concerned is able to produce a certificate of origin, a movement certificate, an internal Community transit document or other appropriate document showing that if the imported goods had been entered for free circulation they would have been eligible for Community treatment or preferential tariff treatment, provided the other conditions referred to in Article 890 were satisfied.

▼ M22

2. Repayment or remission of import duties in the cases referred to in paragraph 1(c) and (f) to (n) shall, except where the goods are destroyed by order of a public authority or delivered free of charge to charities carrying out their activities in the Community, be conditional upon their re-export from the customs territory of the Community under the supervision of the customs authorities.

If requested, the decision-making authority shall permit re-export of the goods to be replaced by their destruction or by placing them under the external Community transit procedure, under the customs warehousing arrangements, or in a free zone or free warehouse.

Goods to be assigned one of these treatments shall be considered to be non-Community goods.

In this case, the customs authorities shall take all requisite measures to ensure that the goods placed in a customs warehouse, in a free zone or in a free warehouse may later be recognised as non-Community goods.

▼ B

4. In addition, the supervising customs office must be satisfied that the goods have been neither used nor sold before their re-exportation.

Article 901

1. Import duties shall be repaid or remitted where:
 - (a) goods entered in error for a customs procedure involving the obligation to pay import duties have been re-exported from the customs territory of the Community without having been previously entered

▼B

for the customs procedure under which they should have been placed, provided the other conditions laid down in Article 237 of the Code have been met;

- (b) the goods have been re-exported or destroyed in accordance with Article 238 (2) (b) of the Code without customs supervision, provided the other conditions laid down in the said Article have been met;
- (c) the goods have been re-exported or destroyed without customs supervision in accordance with Article 900 (1) (c) and (f) to (n), provided the other conditions laid down in Article 900 (2) and (4) have been met.

2. Repayment or remission of import duties in the circumstances referred to in paragraph 1 shall be conditional on:

- (a) production of all the evidence needed to enable the decision-making customs authority to satisfy itself that the goods in respect of which repayment or remission is requested:
 - have actually been re-exported from the customs territory of the Community, or
 - have been destroyed under the supervision of authorities or persons empowered to certify such destruction officially;
- (b) the return to the decision-making customs authority of any document certifying the Community status of the goods in question under cover of which the said goods may have left the customs territory of the Community, or the presentation of whatever evidence the said authority considers necessary to satisfy itself that the document in question cannot be used subsequently in connection with any importation of goods into the Community.

Article 902

1. For the purposes of Article 901 (2):

- (a) the evidence needed to enable the decision-making customs authority to satisfy itself that the goods in respect of which repayment or remission is requested have actually been re-exported from the customs territory of the Community shall consist of the presentation by the applicant of:
 - the original or a certified copy of the declaration for export of the goods from the customs territory of the Community,
 - and
 - certification by the customs office through which the goods actually left the customs territory of the Community.

Where such certification cannot be produced, proof that the goods have left the customs territory of the Community may be presented in the form of:

- certification by the customs office in the third country of destination confirming that the goods have arrived, or
- the original or a certified copy of the customs declaration for the goods made in the third country of destination.

These documents must be accompanied by administrative and commercial documentation enabling the decision-making customs authority to check that the goods exported from the customs territory of the Community are the same as those which had been declared for a customs procedure involving the obligation to pay import duties, namely:

- the original or a certified copy of the declaration for the said procedure,

▼B

and

- where this is considered necessary by the decision-making customs authority, commercial or administrative documents (such as invoices, dispatch details, transit documents or health certificates) containing a full description of the goods (trade description, quantities, marks and other identifying particulars) which were presented with the declaration for the said procedure or with the declaration for export from the customs territory of the Community or the customs declaration made for the goods in the third country of destination, as the case may be;
- (b) The evidence needed to enable the decision-making customs authority to satisfy itself that the goods in respect of which repayment or remission is requested have actually been destroyed under the supervision of authorities or persons authorized to certify officially such destruction shall consist of the presentation by the applicant of:
- a report or declaration of destruction drawn up by the authorities under whose supervision the goods were destroyed, or a certified copy thereof, or
 - a certificate drawn up by the person authorized to certify destruction, accompanied by evidence of his authority.

These documents shall contain a sufficiently full description of the destroyed goods (trade description, quantities, marks and other identifying particulars) to enable the customs authorities to satisfy themselves, by means of comparison with the particulars given in the declaration for a customs procedure involving the obligation to pay import duties and the accompanying commercial documents (invoices, dispatch details, etc.), that the destroyed goods are those which had been declared for the said procedure.

2. Where the evidence referred to in paragraph 1 is insufficient to allow the decision-making customs authority to take a decision on the case submitted to it in full knowledge of the facts, or where certain evidence is not available, such evidence may be supplemented or replaced by any other documents considered necessary by the said authority.

Article 903

1. For returned goods in respect of which an export duty was levied when they were exported from the customs territory of the Community, entry for free circulation shall give the right to repayment of the amounts levied.

2. Paragraph 1 shall apply only to goods which are in one of the situations referred to in Article 844.

It must be proved to the satisfaction of the customs office where the goods are declared for release for free circulation that the goods are in one of the situations referred to in Article 185 (2) (b) of the Code.

3. Paragraph 1 shall apply even where the returned goods constitute only a proportion of the goods previously exported from the customs territory of the Community.

Article 904

Import duties shall not be repaid or remitted where the only grounds relied on in the application for repayment or remission are, as the case may be:

- (a) re-export from the customs territory of the Community of goods previously entered for a customs procedure involving the obligation to pay import duties, for reasons other than those referred to in

▼B

Article 237 or 238 of the Code or in Article 900 or 901, notably failure to sell;

- (b) destruction, for any reason whatsoever, save in the cases expressly provided for by Community legislation, of goods entered for a customs procedure involving the obligation to pay import duties after their release by the customs authorities;
- (c) presentation, for the purpose of obtaining preferential tariff treatment of goods declared for free circulation, of documents subsequently found to be forged, falsified or not valid for that purpose, even where such documents were presented in good faith.

▼M23*Article 904a*

1. When no communication is required under paragraph 2, each Member State shall hold at the disposal of the Commission the list of the cases in which Article 899(2) was applied.

2. Each Member State shall communicate to the Commission a list of the cases in which it has applied the provisions of Article 899(2) and the amount repaid or remitted in respect of one or more import or export operations but in consequence of a single special situation is more than EUR 50 000, giving a short summary of each case. This communication shall be forwarded during the first and third quarters of each year for all cases in which it was decided to repay or remit duties during the preceding half-year.

▼B

Section 2

Decisions to be taken by the Commission**▼M23***Article 905*

1. Where the application for repayment or remission submitted under Article 239(2) of the Code is supported by evidence which might constitute a special situation resulting from circumstances in which no deception or obvious negligence may be attributed to the person concerned, the Member State to which the decision-making customs authority belongs shall transmit the case to the Commission to be settled under the procedure laid down in Articles 906 to 909 where:

- the authority considers that a special situation is the result of the Commission failing in its obligations,
- the circumstances of the case are related to the findings of a Community investigation carried out under Regulation (EC) No 515/97, or under any other Community legislation or any agreement concluded by the Community with countries or groups of countries in which provision is made for carrying out such Community investigations, or
- the amount for which the person concerned may be liable in respect of one or more import or export operations but in consequence of a single special situation is EUR 500 000 or more.

The term ‘the person concerned’ shall be interpreted in the same way as in Article 899.

2. However, the cases referred to in paragraph 1 shall not be transmitted where:

- the Commission has already adopted a decision under the procedure provided for in Articles 906 to 909 on a case involving comparable issues of fact and of law,
- the Commission is already considering a case involving comparable issues of fact and of law.

▼ M23

3. The dossier submitted to the Commission shall contain all the information required for full consideration. It shall include detailed information on the behaviour of the operator concerned, and in particular on his professional experience, good faith and diligence. This assessment shall be accompanied by all information that may demonstrate that the operator acted in good faith. The dossier shall also include a statement, signed by the applicant for repayment or remission, certifying that he has read the dossier and either stating that he has nothing to add or listing all the additional information that he considers should be included.

4. As soon as it receives the dossier the Commission shall inform the Member State concerned accordingly.

5. Should it be found that the information supplied by the Member State is not sufficient to enable a decision to be taken on the case concerned in full knowledge of the facts, the Commission may request that additional information be supplied.

6. Where one of the following situations occurs the Commission shall return the dossier to the customs authority and the procedure referred to in Articles 906 to 909 shall be deemed never to have been initiated:

- the dossier shows that there is a disagreement between the customs authority that has transmitted the dossier and the person who signed the statement referred to in paragraph 3 as regards the account of the facts,
- the dossier is obviously incomplete since it contains nothing that would justify its consideration by the Commission,
- under paragraphs 1 and 2, the dossier should not be transmitted,
- the existence of a customs debt has not been established,
- new information relating to the dossier and of a nature to alter substantially its presentation of the facts or legal assessment has been transmitted by the customs authority to the Commission while it is considering the dossier.

Article 906

The Commission shall forward to the Member States a copy of the dossier referred to in Article 905(3) within 15 days of the date on which it received that dossier.

Consideration of the case in question shall be included as soon as possible on the agenda of a meeting of the group of experts provided for in Article 907.

▼ M14*Article 906a*

Where, at any time in the procedure provided for in Articles 906 and 907, the Commission intends to take a decision unfavourable towards the applicant for repayment or remission, it shall communicate its objections to him/her in writing, together with all the documents on which it bases those objections. The applicant for repayment or remission shall express his/her point of view in writing within a period of one month from the date on which the objections were sent. If he/she does not give his/her point of view within that period, he/she shall be deemed to have waived the right to express a position.

▼ M23*Article 907*

After consulting a group of experts composed of representatives of all Member States, meeting within the framework of the Committee to

▼M23

consider the case in question, the Commission shall decide whether or not the situation which has been considered justifies repayment or remission.

That decision shall be taken within nine months of the date on which the case referred to in Article 905(3) is received by the Commission. However, where the declaration or detailed assessment of the operator's behaviour referred to in Article 905(3) is not included in the dossier, the nine months shall be counted only from the date of receipt of these documents by the Commission. The customs authority and the person applying for repayment or remission shall be notified accordingly.

Where the Commission has found it necessary to ask for additional information from the Member State in order to reach its decision, the nine months shall be extended by a period equivalent to that between the date the Commission sent the request for additional information and the date it received that information. The person applying for repayment or remission shall be notified of the extension.

Where the Commission conducts investigations itself in order to reach its decision, the nine months shall be extended by the time necessary to complete the investigations. Such an extension shall not exceed nine months. The customs authority and the person applying for repayment or remission shall be notified of the dates on which investigations are opened and closed.

Where the Commission has notified the person applying for repayment or remission of its objections in accordance with Article 906a, the period of nine months shall be extended by one month.

Article 908

1. The Member State concerned shall be notified of the decision referred to in Article 907 as soon as possible and in any event within one month of the expiry of the period specified in that Article.

The Commission shall notify the Member States of the decisions it has adopted in order to help customs authorities to reach decisions on cases involving comparable issues of fact and law.

2. The decision-making authority shall decide whether to grant or refuse the application made to it on the basis of the Commission's decision notified in accordance with paragraph 1.

3. Where it is established by the decision referred to in Article 907 that the circumstances under consideration justify repayment or remission, the Commission may specify the conditions under which the Member States may repay or remit duties in cases involving comparable issues of fact and of law.

▼B*Article 909*

If the Commission fails to take a decision within the time limit set in Article 907, or fails to notify a decision to the Member State in question within the time limit set in Article 908, the decision-making customs authority shall grant the application.

*CHAPTER 4**Administrative assistance between the Customs authorities of the Member States**Article 910*

In the cases referred to in Article 885 (2), the decision-making customs authority shall send the supervising customs office two copies of its

request made out in writing on a form conforming to the model in Annex 112. The request shall be accompanied by originals or copies of the application for repayment or remission and of all documents necessary to enable the supervising customs office to obtain the information or carry out the checks requested.

Article 911

1. Within two weeks of the date of receipt of the request the supervising customs office shall obtain the information or carry out the checks requested by the decision-making customs authority. It shall enter the results obtained in the portion of the original of the document referred to in Article 910 reserved for that purpose and shall return the said document to the decision-making customs authority together with all the documents forwarded to it.

2. Where it is unable to obtain the information or carry out the checks requested within the two-week period referred to in paragraph 1, the supervising customs office shall acknowledge receipt of the request submitted to it within that period by returning to the decision-making customs authority the copy of the document referred to in Article 910 duly annotated.

Article 912

The implementing customs office shall send the certificate referred to in Article 887 (5) to the decision-making customs authority on a form conforming to the specimen in Annex 113.

ANNEX 9

INTRODUCTORY NOTES TO THE LISTS OF WORKING OR PROCESSING OPERATIONS CONFERRING OR NON-CONFERRING ORIGINATING STATUS TO MANUFACTURED PRODUCTS WHEN THEY ARE CARRIED OUT ON NON-ORIGINATING MATERIALS**GENERAL CONSIDERATIONS****Note 1**

- 1.1. The first two columns in the lists in Annexes 10 and 11 describe the product obtained. The first column gives the heading number, or the chapter number, used in the combined nomenclature and the second column gives the description of goods used in the combined nomenclature for that heading or chapter. For each entry in the first two columns, a rule is specified in column 3. Where the entry in the first column is preceded by an 'ex', this signifies that the rule in column 3 only applies to the part of that heading or chapter as described in column 2.
- 1.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of product in column 2 is therefore given in general terms, the adjacent rule in column 3 applies to all products which, under the combined nomenclature, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 1.3. Where the lists include different rules applying to different products within one heading, each indent contains the description of that part of the heading covered by the adjacent rule in column 3.

Note 2

- 2.1. The term 'manufacture' covers any kind of working or processing including 'assembly' or specific operations.
- 2.2. The term 'material' covers any 'ingredient', 'raw material', 'component' or 'part', etc., used in the manufacture of the product.
- 2.3. The term 'product' refers to the product being manufactured, even if it is intended for later use in another manufacturing operation.

Note 3

- 3.1. The working or processing required by a rule in column 3 has to be carried out only in relation to the non-originating materials used. The restrictions contained in a rule in column 3 likewise apply only to the non-originating materials used.
- 3.2. If a product, made from non-originating materials which has itself acquired originating status during manufacture, is used as a material in the process of manufacture of another product, then the list rule applicable to the product in which it is incorporated does not apply to it.

For example: Unembroidered fabric may obtain origin by being woven from yarn. If this is then used in making embroidered bed linen, then the percentage value limit imposed on the use of unembroidered fabric does not apply in this case.

Note 4

- 4.1. The rules in the lists represent the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer origin. Thus if a rule says that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
- 4.2. When a rule in a list specifies that a product may be manufactured from more than one material, this means that any one or more of the materials may be used. It does not require that all be used.

▼B

For example: the rule for yarns says that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used, one can use one or the other or both.

- 4.3. When a rule in a list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule.

Note 5

For all products which are not mentioned in Annex 11 (other than textiles falling within Section XI), origin is determined case-by-case by evaluating any process or operation in relation to the concept of the last substantial processing or working as defined in Article 24 of the Code.

Note 6

- 6.1. The term 'fibres' used in the list in Annex 10 covers 'natural fibres' and 'man-made staple fibres' falling within CN codes 5501 to 5507, and fibres of a kind used for the manufacture of paper.
- 6.2. The term 'natural fibres' is used in the list in Annex 10 to refer to fibres other than artificial or synthetic fibres and is restricted to the stages before spinning takes place, including waste, and unless otherwise specified, the term 'natural fibres' includes fibres that have been carded, combed or otherwise processed but not spun.
- 6.3. The term 'natural fibres' includes horsehair falling within CN code 0503, silk falling within CN codes 5002 and 5003 as well as the wool fibres, fine or coarse animal hair falling within CN codes 5101 to 5105, cotton fibres falling within CN codes 5201 to 5203 and other vegetable fibres falling within CN codes 5301 to 5305.
- 6.4. The term 'man-made staple fibres' is used in the list in Annex 10 to refer to synthetic or artificial filament tow, staple fibres or waste, falling within CN codes 5501 to 5507.
- 6.5. The terms 'textile pulp' and 'chemical materials' are used in the list in Annex 10 to describe the non-textile materials (these are not classified in Chapters 50 to 63) which can be used to manufacture artificial or synthetic fibres or yarns, or fibres of a kind used for the manufacture of paper.
- 6.6. For products obtained from two or more textile materials the provisions appearing in column 3 are applicable for each of the textile materials of which the mixture is composed.

Note 7

- 7.1. The term 'prebleached', used in the list in Annex 10 to characterize the level of manufacture required when certain non-originating materials are used, applies to certain yarns, woven fabrics and knitted or crocheted fabrics which have only been washed after the spinning or weaving operation.

Prebleached products are at an earlier stage of manufacture than bleached products, which have undergone several baths in bleaching agents (oxydizing agents such as hydrogen peroxyde and reducing agents).

- 7.2. The term 'complete making-up' used in the list in Annex 10 means that all the operations following cutting of the fabric or knitting or crocheting of the fabric directly to shape have to be performed.

However, making-up shall not necessarily be considered as incomplete where one or more finishing operations have not been carried out.

The following is a list of examples of finishing operations:

- fitting of buttons and/or other types of fastenings,
- making of button-holes,
- finishing off the ends of trouser legs and sleeves or the bottom hemming of skirts and dresses,
- fitting of trimmings and accessories such as pockets, labels, badges, etc.,
- ironing and other preparations of garments for sale 'ready made'.

▼B**Remarks concerning finishing operations — Special cases**

It is possible that in particular manufacturing operations, the accomplishment of finishing operations, especially in the case of a combination of operations, is of such importance that these operations must be considered as going beyond simple finishing.

In these particular cases, the non-accomplishing of finishing operations will deprive the making-up of its complete nature.

- 7.3. The term 'Impregnation, coating, covering or laminating' does not cover those operations designed to bind fabrics together.

▼ **M22***ANNEX 14***INTRODUCTORY NOTES TO THE LIST IN ANNEX 15****Note 1:**

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Articles 69 and 100.

Note 2:

- 2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns, a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an 'ex', this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.
- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 is to be applied.

Note 3:

- 3.1. The provisions of Articles 69 and 100, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the beneficiary country or republic or in the Community.

Example:

An engine of heading 8407, for which the rule states that the value of the non originating materials which may be incorporated may not exceed 40 % of the ex works price, is made from 'other alloy steel roughly shaped by forging' of heading ex 7224.

If this forging has been forged in the beneficiary country or republic from a non originating ingot, it has already acquired originating status by virtue of the rule for heading ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of whether it was produced in the same factory or in another factory in the beneficiary country or republic. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.
- 3.3. Without prejudice to Note 3.2, where a rule uses the expression 'Manufacture from materials of any heading', then materials of any heading(s) (even materials of the same description and heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule.

▼ M22

However, the expression ‘Manufacture from materials of any heading, including other materials of heading ...’ or ‘Manufacture from materials of any heading, including other materials of the same heading as the product’ means that materials of any heading(s) may be used, except those of the same description as the product as given in column 2 of the list.

- 3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of headings 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

- 3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles.)

Example:

The rule for prepared foods of heading 1904, which specifically excludes the use of cereals and their derivatives, does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth - even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn - that is, the fibre stage.

- 3.6. Where, in a rule in the list, two percentages are given for the maximum value of non originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

- 4.1. The term ‘natural fibres’ is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun.
- 4.2. The term ‘natural fibres’ includes horsehair of heading 0503, silk of headings 5002 and 5003, as well as wool-fibres and fine or coarse animal hair of headings 5101 to 5105, cotton fibres of headings 5201 to 5203, and other vegetable fibres of headings 5301 to 5305.
- 4.3. The terms ‘textile pulp’, ‘chemical materials’ and ‘paper-making materials’ are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4. The term ‘man-made staple fibres’ is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

Note 5:

- 5.1. Where, for a given product in the list, reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent 10 % or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below.)

▼M22

- 5.2. However, the tolerance mentioned in Note 5.1 may be applied only to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk;
- wool;
- coarse animal hair;
- fine animal hair;
- horsehair;
- cotton;
- paper-making materials and paper;
- flax;
- true hemp;
- jute and other textile bast fibres;
- sisal and other textile fibres of the genus Agave;
- coconut, abaca, ramie and other vegetable textile fibres;
- synthetic man-made filaments;
- artificial man-made filaments;
- current-conducting filaments;
- synthetic man-made staple fibres of polypropylene;
- synthetic man-made staple fibres of polyester;
- synthetic man-made staple fibres of polyamide;
- synthetic man-made staple fibres of polyacrylonitrile;
- synthetic man-made staple fibres of polyimide;
- synthetic man-made staple fibres of polytetrafluoroethylene;
- synthetic man-made staple fibres of poly(phenylene sulphide);
- synthetic man-made staple fibres of poly(vinyl chloride);
- other synthetic man-made staple fibres;
- artificial man-made staple fibres of viscose;
- other artificial man-made staple fibres;
- yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped;
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped;
- products of heading 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film;
- other products of heading 5605.

Example:

A yarn, of heading 5205, made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used, provided that their total weight does not exceed 10 % of the weight of the yarn.

Example:

A woollen fabric, of heading 5112, made from woollen yarn of heading 5107 and synthetic yarn of staple fibres of heading 5509, is a mixed fabric.

▼ M22

Therefore, synthetic yarn which does not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which does not satisfy the origin-rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used, provided that their total weight does not exceed 10 % of the weight of the fabric.

Example:

Tufted textile fabric, of heading 5802, made from cotton yarn of heading 5205 and cotton fabric of heading 5210, is a only mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed product.

- 5.3. In the case of products incorporating 'yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped', this tolerance is 20 % in respect of this yarn.
- 5.4. In the case of products incorporating 'strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film', this tolerance is 30 % in respect of this strip.

Note 6:

- 6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linings and interlinings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
- 6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

- 6.3. Where a percentage-rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

- 7.1. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the 'specific processes' are the following:
 - (a) vacuum-distillation;
 - (b) redistillation by a very thorough fractionation-process ⁽¹⁾;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;

⁽¹⁾ See additional explanatory Note 4(b) to Chapter 27 of the Combined Nomenclature.

▼ **M22**

- (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation.
- 7.2. For the purposes of headings 2710, 2711 and 2712, the ‘specific processes’ are the following:
- (a) vacuum-distillation;
 - (b) redistillation by a very thorough fractionation-process ⁽¹⁾;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (ij) isomerisation;
 - (k) in respect of heavy oils of heading ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 % of the sulphur-content of the products processed (ASTM D 1266-59 T method);
 - (l) in respect of products of heading 2710 only, deparaffining by a process other than filtering;
 - (m) in respect of heavy oils of heading ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250 °C, with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (n) in respect of fuel oils of heading ex 2710 only, atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C, by the ASTM D 86 method;
 - (o) in respect of heavy oils other than gas oils and fuel oils of heading ex 2710 only, treatment by means of a high-frequency electrical brush-discharge;
 - (p) in respect of crude products (other than petroleum jelly, ozokerite, lignite wax or peat wax, paraffin wax containing by weight less than 0,75 % of oil) of heading ex 2712 only, de-oiling by fractional crystallisation.
- 7.3. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water-separation, filtering, colouring, marking, obtaining a sulphur-content as a result of mixing products with different sulphur-contents, or any combination of these operations or like operations, do not confer origin.

Australia*	Republic of Belarus	European Union:		
Canada	Republic of Bulgaria	Austria	Germany	Netherlands
Japan	Czech Republic	Belgium	Greece	Portugal
New Zealand**	Republic of Hungary	Denmark	Ireland	Spain
Norway	Republic of Poland	Finland	Italy	Sweden
Switzerland	Russian Federation	France	Luxembourg	United Kingdom
United States of America***	Slovakia			

Full details of the conditions covering admission to the GSP in these countries are obtainable from the designated authorities in the exporting preference-receiving countries or from the customs authorities of the preference-giving countries listed above. An information note is also obtainable from the UNCTAD secretariat.

II. General conditions

To qualify for preference, products must:

- (a) fall within a description of products eligible for preference in the country of destination. The description entered on the form must be sufficiently detailed to enable the products to be identified by the customs officer examining them;
- (b) comply with the rules of origin of the country of destination. Each article in a consignment must qualify separately in its own right; and,
- (c) comply with the consignment conditions specified by the country of destination. In general, products must be consigned direct from the country of exportation to the country of destination but most preference-giving countries accept passage through intermediate countries subject to certain conditions. (For Australia, direct consignment is not necessary.)

III. Entries to be made in Box 8

Preference products must either be wholly obtained in accordance with the rules of the country of destination or sufficiently worked or processed to fulfil the requirements of that country's origin rules.

- (a) Products wholly obtained: for export to all countries listed in Section I, enter the letter "P" in Box 8 (for Australia and New Zealand Box 8 may be left blank).
- (b) Products sufficiently worked or processed: for export to the countries specified below, the entry in Box 8 should be as follows:
 - (1) United States of America: for single country shipments, enter the letter "Y" in Box 8, for shipments from recognized associations of countries, enter the letter "Z", followed by the sum of the cost or value of the domestic materials and the direct cost of processing, expressed as a percentage of the ex-factory price of the exported products; (example "Y" 35 % or "Z" 35 %).
 - (2) Canada: for products which meet origin criteria from working or processing in more than one eligible least developed country, enter letter "G" in Box 8; otherwise "F".
 - (3) Japan, Norway, Switzerland and the European Union: enter the letter "W" in box 8 followed by the Harmonized Commodity Description and coding System (Harmonized System) heading at the 4-digit level of the exported product (example "W" 96.18).
 - (4) Bulgaria, Czech Republic, Hungary, Poland, the Russian Federation and Slovakia: for products which include value added in the exporting preference-receiving country, enter the letter "Y" in Box 8 followed by the value of imported materials and components expressed as a percentage of the fob price of the exported products (example "Y" 45 %); for products obtained in a preference-receiving country and worked or processed in one or more other such countries, enter "Pk".
 - (5) Australia and New Zealand: completion of Box 8 is not required. It is sufficient that a declaration be properly made in Box 12.

* For Australia, the main requirement is the exporter's declaration on the normal commercial invoice. Form A, accompanied by the normal commercial invoice, is an acceptable alternative, but official certification is not required.

** Official certification is not required.

*** The United States does not require GSP Form A. A declaration setting forth all pertinent detailed information concerning the production or manufacture of the merchandise is considered sufficient only if requested by the district collector of Customs.

III. Indications à porter dans la case 8

Pour bénéficier des préférences, les produits doivent avoir été, soit entièrement obtenus, soit suffisamment ouvrés ou transformés conformément aux règles d'origine des pays de destination.

- a) Produits entièrement obtenus: pour l'exportation vers tous les pays figurant dans la liste de la section I, il y a lieu d'inscrire la lettre "P" dans la case 8 (pour l'Australie et la Nouvelle-Zélande, la case 8 peut être laissée en blanc).

 4. Bulgarie, Hongrie, Pologne, République tchèque, Fédération de Russie et Slovaquie: pour les produits avec valeur ajoutée dans le pays exportateur bénéficiaire de préférences, il y a lieu d'inscrire la lettre "Y" dans la case 8, en la faisant suivre de la valeur des matières et des composants importés, exprimée en pourcentage du prix fob des marchandises exportées (exemple: "Y" 45 %); pour les produits obtenus dans un pays bénéficiaire de préférences et ouvrés ou transformés dans un ou plusieurs autres pays bénéficiaires, il y a lieu d'inscrire les lettres "Pk" dans la case 8;
 5. Australie et Nouvelle-Zélande: il n'est pas nécessaire de remplir la case 8. Il suffit de faire une déclaration appropriée dans la case 12.

* Pour l'Australie, l'exigence de base est une attestation de l'exportateur sur la facture habituelle. La formule A, accompagnée de la facture habituelle, peut être acceptée en remplacement, mais une certification officielle n'est pas exigée.

** Un visa officiel n'est pas exigé.

*** Les États-Unis n'exigent pas de certificat SGP Formule A. ANNEX 23

INTERPRETATIVE NOTES ON CUSTOMS VALUE

First column	Second column
Reference to provisions of the Customs Code	Notes
Article 29 (1)	<p>The price actually paid or payable refers to the price for the imported goods. Thus the flow of dividends or other payments from the buyer to the seller that do not relate to the imported goods are not part of the customs value.</p>
Article 29 (1) (a), third indent	<p>An example of such restriction would be the case where a seller requires a buyer of automobiles not to sell or exhibit them prior to a fixed date which represents the beginning of a model year.</p>
Article 29 (1) (b)	<p>Some examples of this include:</p> <ul style="list-style-type: none"> (a) the seller establishes the price of the imported goods on condition that the buyer will also buy other goods in specified quantities (SIC! quantities); (b) the price of the import goods is dependent upon the price or prices at which the buyer of the imported goods sells other goods to the seller of the imported goods; (c) the price is established on the basis of a form of payment extraneous to the imported goods, such as where the imported goods are semi-finished goods which have been provided by the seller on condition that he will receive a specified quantity of the finished goods. <p>However, conditions or considerations relating to the production or marketing of the imported goods shall not result in rejection of the transaction value. For example, the fact that the buyer furnishes the seller with engineering and plans undertaken in the country of importation shall not result in rejection of the transaction value for the purposes of Article 29 (1).</p>
Article 29 (2)	<ol style="list-style-type: none"> 1. Paragraphs 2 (a) and (b) provide different means of establishing the acceptability of a transaction value. 2. Paragraph 2 (a) provides that where the buyer and the seller are related, the circumstances surrounding the sale shall be examined and the transaction value shall be accepted as the customs value provided that the relationship did not influence the price. It is not intended that there should be an examination of the circumstances in all cases where the buyer and the seller are related. Such examination will only be required where there are doubts about the acceptability of the price. Where the customs authorities have no doubts about the acceptability of the price, it should be accepted without requesting further information from the declarant. For example, the customs authorities may have previously examined the relationship, or it may already have detailed information concerning the buyer and the seller, and may already be satisfied from such examination or information that the relationship did not influence the price. 3. Where the customs authorities are unable to accept the transaction value without further inquiry, they should give the declarant an opportunity to supply such further detailed information as may be necessary to enable it to examine the circumstances surrounding the sale, in this context, the customs authorities should be prepared to examine relevant aspects of the transaction, including the way in which the buyer and seller organize their commercial relations and the way in which the price in question was arrived at, in order to determine whether the relationship influenced the price. Where it can be shown that the buyer and seller, although related under the provisions of Article 143 of this Regulation, buy from and sell to each other as if they were not related, this would demonstrate that the price had not been influenced by the relationship. As an

▼B

First column	Second column
Reference to provisions of the Customs Code	Notes
	<p>example of this, if the price had been settled in a manner consistent with the normal pricing practices of the industry in question or with the way the seller settles prices for sales to buyers who are not related to him, this would demonstrate that the price had not been influenced by the relationship. As a further example, where it is shown that the price is adequate to ensure recovery of all costs plus a profit which is representative of the firm's overall profit realized over a representative period of time (e.g. on an annual basis) in sales of goods of the same class or kind, this would demonstrate that the price had not been influenced.</p> <p>4. Paragraph 2 (b) provides an opportunity for the declarant to demonstrate that the transaction value closely approximates to a 'test' value previously accepted by the customs authorities and is therefore acceptable under the provisions of Article 29. Where a test under paragraph 2 (b) is met, it is not necessary to examine the question of influence under paragraph 2 (a). If the customs authorities already have sufficient information to be satisfied, without further detailed inquiries, that one of the tests provided in paragraph 2 (b) has been met, there is no reason for them to require the declarant to demonstrate that the test can be met.</p>
Article 29 (2) (b)	<p>A number of factors must be taken into consideration in determining whether one value 'closely approximates' to another value. These factors include the nature of the imported goods, the nature of the industry itself, the season in which the goods are imported, and, whether the difference in values is commercially significant. Since these factors may vary from case to case, it would be impossible to apply a uniform standard such as a fixed percentage, in each case. For example, a small difference in value in a case involving one type of goods could be unacceptable while a large difference in a case involving another type of goods might be acceptable in determining whether the transaction value closely approximates to the 'test' values set forth in Article 29 (2) (b).</p>
Article 29 (3) (a)	<p>An example of an indirect payment would be the settlement by the buyer, whether in whole or in part, of a debt owed by the seller.</p>
<p>Article 30 (2) (a)</p> <p>Article 30 (2) (b)</p>	<p>1. In applying these provisions, the customs authorities shall, where possible, use a sale of identical or similar goods, as appropriate, at the same commercial level and in substantially the same quantity as the goods being valued. Where no such sale is found, a sale of identical or similar goods, as appropriate, that takes place under any one of the following three conditions may be used:</p> <p>(a) a sale at the same commercial level but in a different quantity;</p> <p>(b) a sale at a different commercial level but in substantially the same quantity; or</p> <p>(c) a sale at a different commercial level and in a different quantity.</p> <p>2. Having found a sale under any one of these three conditions adjustments will then be made, as the case may be, for:</p> <p>(a) quantity factors only;</p> <p>(b) commercial (SIC! commercial) level factors only; or</p> <p>(c) both commercial level and quantity factors.</p> <p>►<u>C1</u> ◀</p> <p>4. A condition for adjustment because of different commercial levels or different quantities is that such adjustment, whether it leads to an increase or a decrease in the value, be made only on the basis of demonstrated evidence that clearly establishes the reasonableness and accuracy of the adjustment, e.g. valid price lists containing prices referring to different levels or different quantities. As an example of this, if the imported goods being valued consist of a</p>

	<p>shipment of 10 units and the only identical or similar imported goods, as appropriate, for which a transaction value exists involved a sale of 500 units, and it is recognized that the seller grants quantity discounts, the required adjustment may be accomplished by resorting to the seller's price list and using that price applicable to a sale of 10 units. This does not require that a sale had to have been made in quantities of 10 as long as the price list has been established as being bona fide through sales at other quantities. In the absence of such an objective measure, however, the determination of a customs value under the provisions of Article 30 (2) (a) and (b) is not appropriate.</p>
Article 30 (2) (d)	<ol style="list-style-type: none"> 1. As a general rule, customs value is determined under these provisions on the basis of information readily available in the Community. In order to determine a computed value, however, it may be necessary to examine the cost of producing the goods being valued and other information which has to be obtained from outside the Community. Furthermore, in most cases the producer of the goods will be outside the jurisdiction of the authorities of the Member States. The use of the computed value method will generally be limited to those cases where the buyer and seller are related, and the producer is prepared to supply to the authorities of the country of importation the necessary costings and to provide facilities for any subsequent verification which may be necessary. 2. The 'cost or value' referred to in Article 30 (2) (d), first indent, is to be determined on the basis of information relating to the production of the goods being valued supplied by or on behalf of the producer. It is to be based upon the commercial accounts of the producer, provided that such accounts are consistent with the generally accepted accounting principles applied in the country where the goods are produced. 3. The 'amount for profit and general expenses' referred to in Article 30 (2) d), second indent, is to be determined on the basis of information supplied by or on behalf of the producer unless his figures are inconsistent with those usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to the country of importation. 4. No cost or value of the elements referred to in this Article shall be counted twice in determining the computed value. 5. It should be noted in this context that the 'amount for profit and general expenses' has to be taken as a whole. It follows that if, in any particular case, the producer's profit figure is low and his general expenses are high, his profit and general expenses taken together may nevertheless be consistent with that usually reflected in sales of goods of the same class or kind. Such a situation might occur, for example, if a product were being launched in the Community and the producer accepted a nil or low profit to offset high general expenses associated with the launch. Where the producer can demonstrate that he is taking a low profit on his sales of the imported goods because of particular commercial circumstances, his actual profit figures should be taken into account provided that he has valid commercial reasons to justify them and his pricing policy reflects usual pricing policies in the branch of industry concerned. Such a situation might occur, for example, where producers have been forced to lower prices temporarily because of an unforeseeable drop in demand, or where they sell goods to complement a range of goods being produced in the country of importation and accept a low profit to maintain competitiveness (SIC! competitiveness). Where the producer's own figures for profit and general expenses are not consistent with those usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to the country of importation, the amount for profit and general expenses may be based upon relevant information other

	<p>than that supplied by or on behalf of the producer of the goods.</p> <p>6. Whether certain goods are 'of the same class or kind' as other goods must be determined on a case-by-case basis with reference to the circumstances involved. In determining the usual profits and general expenses under the provisions of Article 30 (2) (d), sales for export to the country of importation of the narrowest group or range of goods, which includes the goods being valued, for which the necessary information can be provided, should be examined. For the purposes of Article 30 (2) (d), 'goods of the same class or kind' must be from the same country as the goods being valued.</p>
Article 31 (1)	<p>1. Customs values determined under the provisions of Article 31 (1) should, to the greatest extent possible, be based on previously determined customs values.</p> <p>2. The methods of valuation to be employed under Article 31 (1) should be those laid down in Articles 29 and 30 (2), but a reasonable flexibility in the application of such methods would be in conformity with the aims and provisions of Article 31 (1).</p> <p>3. Some examples of reasonable flexibility are as follows:</p> <p>(a) <i>identical goods</i> — the requirement that the identical goods should be exported at or about the same time as the goods being valued could be flexibly interpreted; identical imported goods produced in a country other than the country of exportation of the goods being valued could be the basis for customs valuation; customs values of identical imported goods already determined under the provisions of Articles 30 (2) (c) and (d) could be used;</p> <p>(b) <i>similar goods</i> — the requirement that the similar goods should be exported at or about the same time as the goods being valued could be flexibly interpreted; similar imported goods produced in a country other than the country of exportation of the goods being valued could be the basis for customs valuation; customs values of similar imported goods already determined under the provisions of Articles 30 (2) (c) and (d) could be used;</p> <p>(c) <i>deductive method</i> — the requirement that the goods shall have been sold in the 'condition as imported' in Article 152 (1) (a) of this Regulation could be flexibly interpreted; the '90 days' requirement could be administered flexibly.</p>
Article 32 (1) (b) (ii)	<p>1. There are two factors involved in the apportionment of the elements specified in Article 32 (1) (b) (ii) to the imported goods — the value of the element itself and the way in which that value is to be apportioned to the imported goods. The apportionment of these elements should be made in reasonable manner appropriate to the circumstances and in accordance with generally accepted accounting principles.</p> <p>2. Concerning the value of the element, if the buyer acquires the element from a seller not related to him at a given cost, the value of the element is that cost. If the element was produced by the buyer or by a person related to him, its value would be the cost of producing it. If the element had been previously used by the buyer, regardless of whether it had been acquired or produced by him, the original cost of acquisition or production would have to be adjusted downwards to reflect its use in order to arrive at the value of the element.</p> <p>3. Once a value has been determined for the element, it is necessary to apportion that value to the imported goods. Various possibilities exist. For example, the value might be apportioned to the first shipment, if the buyer wishes to pay duty on the entire value at one time. As another example, he may request that the value be apportioned over the number of units produced up to the time of the first shipment. As a further example, he may request that the value</p>

First column	Second column

	<p>be apportioned over the entire anticipated production where contracts or firm commitments exist for that production. The method of apportionment used will depend upon the documentation provided by the buyer.</p> <p>4. As an illustration of the above, a buyer provides the producer with a mould to be used in the production of the imported goods and contracts with him to buy 10 000 units. By the time of arrival of the first shipment of 1 000 units, the producer has already produced 4 000 units. The buyer may request the customs authorities to apportion the value of the mould over 1 000, 4 000 or 10 000 units.</p>
Article 32 (1) (b) (iv)	<p>1. Additions for the elements specified in Article 32 (1) (b) (iv) should be based on objective and quantifiable data. In order to minimize the burden for both the declarant and customs authorities in determining the values to be added, data readily available in the buyer's commercial record system should be used insofar as possible.</p> <p>2. For those elements supplied by the buyer which were purchased or leased by the buyer, the addition would be the cost of the purchase or the lease. No addition shall be made for those elements available in the public domain, other than the cost of obtaining copies of them.</p> <p>3. The ease with which it may be possible to calculate the values to be added will depend on a particular firm's structure and management practice, as well as its accounting methods.</p> <p>4. For example, it is possible that a firm which imports a variety of products from several countries maintains the records of its design centre outside the country of importation in such a way as to show accurately the costs attributable to a given product. In such cases, a direct adjustment may appropriately be made under the provisions of Article 32.</p> <p>5. In another case, a firm may carry the cost of the design centre outside the country of importation as a general overhead expense without allocation to specific products. In this instance, an appropriate adjustment could be made under the provisions of Article 32 with respect to the imported goods by apportioning total design centre costs over total production benefiting from the design centre and adding such apportioned cost on a unit basis to imports.</p> <p>6. Variations in the above circumstances will, of course, require different factors to be considered in determining the proper method of allocation.</p> <p>7. In cases where the production of the element in question involves a number of countries and over a period of time, the adjustment should be limited to the value actually added to that element outside the Community.</p>
Article 32 (1) (c)	The royalties and licence fees referred to in Article 32 (1) (c) may include, among other things, payments in respect to patents, trademarks and copyrights.
Article 32 (2)	Where objective and quantifiable data do not exist with regard to the additions required to be made under the provisions of Article 32, the transaction value cannot be determined under the provisions of Article 29. As an illustration of this, a royalty is paid on the basis of the price in a sale in the importing country of a litre of a particular product that was imported by the kilogram and made up into a solution after importation. If the royalty is based partially on the imported goods and partially on other factors which have nothing to do with the imported goods (such as when the imported goods are mixed with domestic ingredients and are no longer separately identifiable, or when the royalty cannot be distinguished from special financial arrangements between the buyer and the seller), it would be inappropriate to attempt to make an addition for the royalty. However, if the amount

Article 152 (1) (a) (i)	<ol style="list-style-type: none"> The words 'profit and general expenses' should be taken as a whole. The figure for the purposes of this deduction should be determined on the basis of information supplied by the declarant unless his figures are inconsistent with those obtaining in sales in the country of importation of imported goods of the same class or kind. Where the declarant's figures are inconsistent with such figures, the amount for profit and general expenses may be based upon relevant information other than that supplied by the declarant. In determining either the commissions or the usual profits and general expenses under this provision, the question whether certain goods are of the same class or kind as other goods must be determined on a case-by-case basis by reference to the circumstances involved. Sales in the country of importation of the narrowest group or range of imported goods of the same class or kind, which includes the goods being valued, for which the necessary information can be provided, should be examined. For the purposes of this provision, 'goods of the same class or kind' includes goods imported from the same country as the goods being valued as well as goods imported from other countries.
Article 152 (2)	<ol style="list-style-type: none"> Where this method of valuation is used, deductions made for the value added by further processing shall be based on objective and quantifiable data relating to the cost of such work. Accepted industry formulas, recipes, methods of construction, and other industry practices would form the basis of the calculations. This method of valuation would normally not be applicable when, as a result of the further processing, the imported goods lose their identity. However, there can be instances where, although the identity of the imported goods is lost, the value added by the processing can be determined accurately without unreasonable difficulty. <p>On the other hand, there can also be instances where the imported goods maintain their identity but form such a minor element in the goods sold in the country of importation that the use of this valuation method would be unjustified. In view of the above, each situation of this type must be considered on a case-by-case basis.</p>

*ANNEX 24***APPLICATION OF GENERALLY ACCEPTED ACCOUNTING PRINCIPLES FOR THE DETERMINATION OF CUSTOMS VALUE**

1. 'Generally accepted accounting principles' refers to the recognized consensus or substantial authoritative support within a country at a particular time as to which economic resources and obligations should be recorded as assets and liabilities, which changes in assets and liabilities should be recorded, how the assets and liabilities and changes in them should be measured, what information should be disclosed and how it should be disclosed, and which financial statements should be prepared. These standards may be broad guidelines of general application as well as detailed practices and procedures.
2. For the purposes of the application of the customs valuation provisions, the customs administration concerned shall utilize information prepared in a manner consistent with generally accepted accounting principles in the country which is appropriate for the Article in question. For example, the determination of usual profit and general expenses under the provisions of Article 152 (1) (a) (i) of this Regulation would be carried out utilizing information prepared in a manner consistent with generally accepted accounting principles of the country of importation. On the other hand, the determination of usual profit and general expenses under the provisions of Article 30 (2) (d) of the Code would be carried out utilizing information prepared in a manner consistent with generally accepted accounting principles of the country of production. As a further example, the determination of an element provided for in Article 32 (1) (b) (ii) of the Code undertaken in the country of importation would be carried out utilizing information in a manner consistent with the generally accepted accounting principles of that country.

3. As regards the French overseas departments of Guadeloupe, Guyana, Martinique and Reunion, of which territories the airports are not included in the table, the following rules shall apply:
 - (a) for goods shipped direct to those departments from third countries, the whole of the air transport cost is to be included in the customs value;
 - (b) for goods shipped to the European part of the Community from third countries and transhipped or unloaded in one of those departments, only the air transport costs which would have been incurred for carrying the goods only as far as the place of transhipment or unloading are to be included in the customs value;
 - (c) for goods shipped to those departments from third countries and transhipped or unloaded in an airport in the European part of the Community, the air transport costs to be included in the customs value are those which result from the application of the percentages given in the following table to the costs which would have been incurred for carrying the goods from the airport of departure to the airport of transhipment or unloading.

The transhipment or unloading shall be certified by an appropriate endorsement by the customs authorities on the air waybill or other air transport document, with the official stamp of the office concerned; failing this certification the provisions of the last subparagraph of Article 163(6) of this Regulation shall apply.

TITLE I

GENERAL REMARKS

A. GENERAL DESCRIPTION

The forms and continuation forms are to be used:

- (a) where Community legislation refers to a declaration for placing goods under a customs procedure or for re-exportation;
- (b) as necessary during the transitional period provided for in an act of accession to the Community, in trade between the Community as constituted prior to that accession and the new Member States, and between the latter, in respect of goods for which customs duties and charges having equivalent effect have not yet been fully eliminated or which remain subject to other measures provided for in the act of accession;
- (c) where Community rules specifically provide for their use.

The forms and continuation forms used for this purpose comprise the copies needed to complete the formalities relating to one or more customs procedures, taken from a set of eight copies:

- copy 1 is kept by the authorities of the Member State in which export (dispatch) or Community transit formalities are completed,
- copy 2 is used for statistical purposes by the Member State of export. This copy can be used as well for statistical purposes by the Member State of dispatch in cases of trade between parts of the customs territory of the Community with a different fiscal regime,
- copy 3 is returned to the exporter after being stamped by the customs authority,
- copy 4 is kept by the office of destination upon completion of the Community transit operation or as the document providing evidence of Community status of the goods,
- copy 5 is the return copy for the Community transit procedure,
- copy 6 is kept by the authorities of the Member State in which import formalities are completed,
- copy 7 is used for statistical purposes by the Member State of import. This copy can be used as well for statistical purposes by the Member State of import in cases of trade between parts of the customs territory of the Community with a different fiscal regime,
- copy 8 is returned to the consignee.

Various combinations are therefore possible, such as:

- export, outward processing or re-export: copies 1, 2 and 3,
- Community transit: copies 1, 4 and 5,
- customs procedures at import: copies 6, 7 and 8.

In addition, there are circumstances in which the Community status of the goods in question has to be proved at destination. In such cases copy 4 should be used as a T2L document.

Operators may, if they wish, use privately printed subsets combining the appropriate copies, provided that they conform to the official specimen.

Each subset must be designed in such a way that where boxes must contain identical information in the two Member States involved, such

⁽¹⁾ The term 'EFTA' in this Annex refers not only to the EFTA countries but to the other non-Community contracting parties to the Conventions on a common transit procedure and on the simplification of formalities in trade in goods.

▼M24

information can be entered directly by the exporter or the principal on copy 1 and will then appear, by means of chemical treatment of the paper, on all the copies. Where, however, for any reason (in particular where the content of the information differs according to the stage of the operation involved) the information is not to be transmitted from one Member State to another, the desensitisation of the self-copying paper must confine reproduction to the copies concerned.

Where declarations are to be processed by computer, use may be made of subsets taken from sets in which each copy has a dual function: 1/6, 2/7, 3/8, 4/5.

In this case, in each subset, the numbers of the copies being used must be shown by striking through the numbers, in the margin of the form, referring to the copies not being used.

Every such subset must be designed so that the particulars which have to appear on each copy will be reproduced by means of chemical treatment of the paper.

When, pursuant to Article 205(3) of this Regulation, declarations for placing goods under a customs procedure, for re-export, or documents certifying the Community status of goods not being moved under the internal Community transit procedure are drawn up on plain paper by means of official or private-sector data-processing systems, the format of the said declarations or documents must comply with all the conditions laid down by the Code or this Regulation, including those relating to the back of the form (in respect of copies used under the Community transit procedure), except:

- the colour used for printing,
- the use of italic characters,
- the printing of a background for the Community transit boxes.

Where a transit declaration is processed at an office of departure by a computerised system, one copy of the declaration must be lodged at that office.

B. PARTICULARS REQUIRED

The forms contain a number of boxes only some of which will be used, depending on the customs procedure(s) in question.

Without prejudice to the application of simplified procedures, the boxes which may be completed for each procedure are set out in the following table. The specific provisions concerning each box as they are described in Title II apply without prejudice to the status of the boxes as defined in the table.

Note that the status listed below have no bearing on the fact that certain particulars are collected only where circumstances warrant it. For example, the supplementary units in box 41 (status 'A') will only be collected where required by the TARIC.

▼ **M24****C. INSTRUCTIONS FOR USE OF THE FORM**

Whenever a particular subset contains one or more copies which may be used in a Member State other than the one in which it was first completed, the forms must be completed by typewriter or by a mechanographical or similar process. For ease of completion by typewriter the form should be inserted in the machine in such a way that the first letter of the particulars to be entered in box 2 is placed in the position box in the top left-hand corner.

Where all the copies of a subset are intended for use in the same Member State, they may be filled in legibly by hand, in ink and in block capitals, provided that this is allowed in that Member State. The same applies to the particulars to be given on the copies used for the purposes of the Community transit procedure.

The form must contain no erasures or overwriting. Any alterations must be made by crossing out the incorrect particulars and adding those required. Any alterations made in this way must be initialled by the person making them and expressly endorsed by the competent authorities. The latter may, where necessary, require a new declaration to be lodged.

In addition, the forms may be completed using an automatic reproduction process instead of any of the procedures mentioned above. They may also be produced and completed by this means on condition that the provisions concerning the specimen forms, format, language used, legibility, absence of erasures and overwriting, and amendments are strictly observed.

Only numbered boxes are to be completed, as appropriate, by operators. The other boxes, identified by a capital letter, are for administrative use.

Without prejudice to Article 205, the copies which are to remain at the office of export/dispatch or departure must bear the original signature of the persons concerned.

The lodging with a customs office of a declaration signed by the declarant or his representative shall indicate that the person concerned is declaring the goods in question for the procedure applied for and, without prejudice to the possible application of sanctions, shall be held responsible, in accordance with the provisions in force in the Member States, in respect of:

- the accuracy of the information given in the declaration,
- the authenticity of the documents attached,
- the observance of all the obligations inherent in the placement of the goods in question under the procedure concerned.

The signature of the principal or, where applicable, his authorised representative commits him in respect of all particulars relating to the Community transit operation pursuant to the provisions on Community transit laid down in the Code and in this Regulation and as listed in section B above.

As regards Community transit formalities and formalities at destination, it is in the interests of each person intervening in the operation to check the contents of his declaration before signing it and lodging it with the customs office. In particular, any discrepancy found by the person concerned between the goods which he is to declare and any particulars already entered on the forms being used must immediately be reported by that person to the customs authority. In such cases the declaration must then be made out on fresh forms.

Unless Title III provides otherwise, a box that is not to be used should be left completely blank.

REMARKS CONCERNING THE CONTINUATION FORMS

- A. Continuation forms should only be used where the declaration covers more than one item (cf. box 5). They must be presented together with an IM, EX, EU or CO form.

▼ **M19***ANNEX 37a***EXPLANATORY NOTE ON THE USE OF TRANSIT DECLARATIONS
BY THE EXCHANGE OF EDI STANDARD MESSAGES****(EDI TRANSIT DECLARATION)**

TITLE I

General

The EDI transit declaration is based upon the particulars entered into the different boxes of the Single Administrative Document (SAD) as defined in Annexes 37 and 38, in association with or replaced by a code if appropriate.

This Annex contains exclusively the basic special requirements, which apply when the formalities are carried out by the exchange of the EDI standard messages. Furthermore the additional codes presented in Annex 37c are applicable. Annexes 37 and 38 apply to the EDI transit declaration unless otherwise specified in this Annex or in Annex 37c.

The detailed structure and content of the EDI transit declaration follow the technical specifications the competent authorities communicate to the principal in order to ensure the proper functioning of the system. These specifications are based upon the requirements laid down in this Annex.

This Annex describes the structure of the information exchange. The transit declaration is organised into data groups, which contain data attributes. The attributes are grouped together in such a way that they build up coherent logical blocks within the scope of the message. A data group indentation indicates that the data group depends on a lower indent data group.

When present, the appropriate number of the box on the SAD is noted.

The term 'number' in the explanation of a data group indicates how many times the data group may be used in the transit declaration.

The term 'type/length' in the explanation of an attribute indicates the requirements for the data type and the data length. The codes for the data types are as follows:

- a alphabetic
- n numeric
- an alphanumeric

The number following the code indicates the admissible data length. The following applies.

The optional two dots before the length indicator mean that the data has no fixed length, but it can have up to a number of digits, as specified by the length indicator. A comma in the data length means that the attribute can hold decimals, the digit before the comma indicates the total length of the attribute, the digit after the comma indicates the maximum number of digits after the decimal point.

Box 2: Consignor/Exporter

Where identification numbers are used, the code takes the following form:

▼ M24

On import: Country code (a2); code UN/EDIFACT 3055 (an..3); exporter's identification code (an..13)

On export: Country code (a2); exporter's identification code (an..16)

Country code: The Community's alphabetical codes for countries and territories are based on the current ISO alpha 2 (a2) in so far as they are compatible with the requirements of Community law. The legal basis for these codes is Council Regulation (EC) No 1172/95 of 22 May 1995 on the statistics relating to the trading of goods by the Community and its Member States with non-member countries (OJ L 118, 25.5.1995). The Commission regularly publishes regulations updating the list of country codes.

UN/EDIFACT 3055: With regard to the coding of the operators in the third countries mentioned in boxes 2 and 8, Member States use a list issued and updated by an agency or another institution which defines the interested parties' codes. The selected agency will be identified in the list of the agencies published by the UN under the heading UN/EDIFACT 3055 (Electronic Data Interchange for Administration, Commerce and Transport) which contains a list of the agencies responsible for the development of such lists of economic operators.

Example: 'JP1511234567890' for a Japanese exporter (country code: JP) whose identification number with Japanese customs (agency code 151 in the list of codes for UN/EDIFACT data element 3055) is 1234567890.

Box 8: Consignee

Where identification numbers are used, the code takes the following form:

On import: Country code (a2); consignee's identification code (an..16)

On export: Country code (a2); code UN/EDIFACT 3055 (an..3); importer's identification code (an..13).

Use the country codes entered in box 2.

Example: 'JP1511234567890' for a Japanese importer (country code: JP) whose identification number with Japanese customs (agency code 151 in the list of codes for UN/EDIFACT data element 3055) is 1234567890.

Box 14: Declarant/Representative

(a) Insert one of the following codes (n1) before the full name and address to designate the declarant or the status of the representative:

- 1 ► **C12** ————— ◀ Declarant
- 2 ► **C12** ————— ◀ Representative (direct representation within the meaning of the first indent of Article 5(2) of the Code)
- 3 ► **C12** ————— ◀ Representative (indirect representation within the meaning of the second indent of Article 5(2) of the Code).

Where this data element is printed on a paper document, it will be in square brackets (Ex: [1], [2] or [3])

(b) Where identification numbers are used, the code takes the following form: Country code (a2); identification code of the declarant/representative (an..16).

Use the country codes entered in box 2.

Box 15a: Country of dispatch/export code

Use the country codes entered in box 2.

Box 17a: Country-of-destination code

8 ► C12 ————— ◀ Delivery of building material and equipment in connection with construction or civil engineering activities constituting part of a general contract ⁽⁹⁾	
9 ► C12 ————— ◀ Other transactions	

- (¹) This item covers most exports and imports, i.e. transactions in respect of which:
— ownership is transferred from resident to non-resident or vice versa,
— payment or other compensation (payment in kind) is or will be made.
It should be noted that this applies to goods sent between entities of a same enterprise or of a same group of enterprises and to goods sent from/to central distribution depots, unless no payment or other compensation is made in respect of these transactions (in which case such transactions shall be listed under code 3).
- (²) Including spare parts and other replacement deliveries made against payment.
- (³) Including financial leasing: the lease instalments are calculated in such a way as to cover all or virtually all the value of the goods. The benefits and risks of ownership are transferred to the lessee. At the end of the contract, the lessee becomes the legal owner.
- (⁴) Return and replacement dispatches of goods originally recorded under headings 3 to 9 of column A should be recorded under the corresponding headings.
- (⁵) Processing operations (whether or not under customs supervision) should be recorded under headings 4 and 5 of column A. Own-account processing operations are not covered by these headings and should be recorded under heading 1 of column A.
- (⁶) Repair entails the restoration of goods to their original function; this may involve some structural alterations or improvements.
- (⁷) Operational leasing: all lease contracts other than financial leasing (see note 3).
- (⁸) This item covers goods exported/imported with the intention of subsequent reimport/re-export without any change of ownership taking place.
- (⁹) The transactions recorded under heading 8 of column A involve goods which are not separately invoiced but for which a single invoice is made covering the total collective value. Where this is not the case, the transactions should be recorded under heading 1.

Box 29: Office of exit/entry

Use (an8) codes structured as follows:

- the first two characters (a2) serve to identify the country by means of the country code entered in box 2,
- the next six characters (an6) stand for the office concerned in that country. It is suggested that the following structure be adopted:

▼ M24

The first three characters (a3) would be taken up by the UN/LOCODE and the last three by a national alphanumeric subdivision (an3). If this subdivision is not used, the characters '000' should be inserted.

Example: BEBRU000: BE = ISO 3166 for Belgium, BRU = UN/LOCODE for the city of Brussels, 000 for the unused subdivision.

To be completed using the headings of the Combined Nomenclature.

Where the form is used for Community transit procedure purposes, the commodity code made up of at least the six digits of the Harmonised Commodity Description and Coding System shall be entered in this subdivision. However, where Community legislation so requires, the Combined Nomenclature heading shall be used.

Second subdivision (two characters)

To be completed in accordance with the Taric code (two characters for the application of specific Community measures in respect of formalities to be completed at destination).

Third subdivision (four characters)

To be completed in accordance with the Taric code (first additional code).

Fourth subdivision (four characters)

To be completed in accordance with the Taric code (second additional code).

Fifth subdivision (four characters)

Codes to be adopted by the Member States concerned.

Box 34a: Country-of-origin code

Use the country codes entered in box 2.

Box 34b: Region-of-origin/-production code

Codes to be adopted by the Member States.

Box 36: Preference

This box is for three-digit codes comprising a single-digit component from 1). and a two-digit component from 2).

The relevant codes are given below:

1. First digit of the code
 - 1 Tariff arrangement erga omnes
 - 2 Generalised System of Preferences (GSP)
 - 3 Tariff preferences other than those mentioned under code 2
 - 4 Non-imposition of customs duties under the provisions of customs union agreements concluded by the Community

 - 15 Tariff suspension with specified end-use
 - 18 Tariff suspension with certificate confirming the special nature of the product
 - 19 Temporary suspension for products imported with a certificate of airworthiness
 - 20 Tariff quota (*)
 - 23 Tariff quota with specified end-use (*)
 - 25 Tariff quota with certificate confirming the special nature of the product (*)
 - 28 Tariff quota following outward processing (*)
 - 40 Special end-use resulting from the Common Customs Tariff

Box 37: Procedure*A. First subdivision*

The codes to be entered in this subdivision are four-digit codes, composed of a two-digit code representing the procedure requested, followed by a second two-digit code representing the previous procedure. The list of two-digit codes is given below.

‘Previous procedure’ means the procedure under which the goods were placed before being placed under the procedure requested.

It should be noted that where the previous procedure is a warehousing procedure or temporary importation, or where the goods have come from a free zone, the relevant code should be used only where the goods have not been placed under a customs procedure with economic impact (inward processing, outward processing or processing under customs control).

For example: re-export of goods imported under the customs inward processing procedure (suspension system) and subsequently placed under the customs warehousing procedure = 3151 (not 3171). (First operation = 5100; second operation = 7151; re-export = 3151).

Similarly, where goods previously temporarily exported are re-imported, placing under one of the abovementioned suspensive procedures is to be regarded as simple importation under that procedure. Indication of the ‘re-importation’ aspect is to be given only when the goods are released for free circulation.

For example: entry for home use with simultaneous entry for free circulation of goods exported under the customs outward processing procedure and placed under a customs warehousing procedure on re-importation = 6121 (not 6171). (First operation: temporary export for outward processing = 2100; second operation: storage in customs warehouse = 7121; third operation: entry for home use + entry for free circulation = 6121).

The codes marked in the list below with the letter (a) cannot be used as the first two digits of the procedure code, but only to indicate the previous procedure.

For example: 4054 = entry for free circulation and home use of goods previously placed under the IP — suspension system in another Member State.

List of procedures for coding purposes

Two of these basic elements must be combined to produce a four-digit code.

- 00 This code is used to indicate that there is no previous procedure (a)
- 01 Free circulation of goods simultaneously redispached in the context of trade between parts of the customs territory of the Community in which

(*) Where the requested tariff quota is exhausted, Member States may allow the request to be valid for any other existing preference.

- Codes exclusively for national use must be composed of a numeric character followed by two alphanumeric characters according to that Member State's own nomenclature.

Box 40: Summary declaration/Previous document

This box is for alphanumeric (an..26) codes.

Each code has three components, which are separated by dashes (-). The first component (a1) consists of three different letters and is used to distinguish between the three categories mentioned below. The second component (an..3), which consists of a combination of digits and/or letters, serves to identify the type of document. The third component (an..20) represents the particulars needed to recognise the document, either its identification number or another recognisable reference.

- The first component (a1):*

- the summary declaration, represented by 'X',
- the initial declaration, represented by 'Y'
- the previous document, represented by 'Z',

- The second component (an..3):*

Choose the abbreviation for the document from the 'list of abbreviations for documents'.

This list includes the code 'CLE', which stands for 'date and reference of the entry of the goods in the records'. (Article 76(1)(c) of the Code). The date is coded as follows: *yyyymmdd*.

- The third component (an..20):*

The identification number or another recognisable reference of the document is inserted here.

Examples:

- The previous document is a T1 transit document to which the office of destination has assigned the number '238544'. The code will therefore be 'Z-821-238544'. ('Z' for previous document, '821' for the transit procedure and '238544' for the document's registration number or the MRN for the NCTS operations).
- A cargo manifest bearing the number '2222' is used as a summary declaration. The code will be 'X-785-2222'. ('X' for the summary declaration, '785' for the cargo manifest and '2222' for the manifest's identification number).
- Goods were entered in the records on 14 February 2002. The code will therefore be 'Y-CLE-20020214-5' ('Y' to show there was an initial declaration, 'CLE' for 'entry in the records', '20020214' for the date of entry, '2002' being the year, '02' the month, '14' the day and '5' for the reference of the entry in the records).

Box 44: Additional information/Documents produced/Certificates and authorisations1. *Additional information*

A five-digit code is used to encode additional information of a customs nature. This code follows the additional information unless Community law provides for the code to be used in place of the text.

Example: In a simplified export procedure, copy 3 must contain the information 'simplified export procedure'. (Article 280(3). 'Simplified exportation — 30100' should therefore be entered in box 44.

Community law provides for certain additional information to be entered in boxes other than box 44. However, such additional information should be coded according to the same rules as the information to be specifically entered in box 44. Furthermore, where Community law fails to specify the box in which information is to be entered, that information is to be entered in box 44.

All types of additional information are listed at the end of this Annex.

Member States may provide for the use of national additional information provided that their codification presents a structure different to the codes for Community additional information.

2. *Documents produced, certificates and authorisations*

- (a) Documents, certificates and Community or international authorisations produced in support of the declaration must be entered in the form of a code composed of 4 alpha-numeric characters, followed either by an identification number or another recognisable reference. The list of documents, certificates and authorisations and their respective codes can be found in the Taric database.
- (b) National documents, certificates and authorisations produced in support of the declaration must be entered in the form of a code composed of a numeric character followed by 3 alpha-numeric characters (Ex: 2123, 34d5), possibly followed either by an identification number or another recognisable reference. The four characters represent codes based on that Member State's own nomenclature.

ANNEX 44

NOTES

(to be added to the booklet containing the T2M forms)

I. General considerations

1. The purpose of a T2M form is to prove the Community status, upon entry into Community customs territory, of a catch made by a Community fishing vessel outside the territorial waters of a country or territory not forming part of Community customs territory and/or of goods obtained from such catches by processing carried out on board the Community fishing vessel which made the catch, another Community fishing vessel, or a Community factory ship.
2. The Community fishing vessel is a vessel which is registered and listed in a part of a Member State's territory forming part of Community customs territory, flies the flag of a Member State, makes the catch and may process it on board. The Community factory ship is a vessel, similarly registered or listed, which processes only transhipped catches.
3. This booklet contains 10 forms, each consisting of an original and a copy. The copies must not be separated from the booklet.
4. The booklet must be produced whenever the customs authorities so require.
5. It must be returned to the customs authorities by which it was issued when the vessel for which it was issued ceases to fulfil the conditions laid down, when all the forms contained in the booklet have been used or when the period of validity of the booklet expires.

II. Authentication of T2M forms

6. The forms must be completed in typescript or legibly by hand; if the latter, in ink and in printed characters. No erasures or alterations may be made. Amendments must be made by striking out the incorrect particulars and adding those required where appropriate. Any such amendments must be initialled by the person who signed the declaration containing them.
7. Boxes 1 to 3 of the form must be completed by the person indicated, in the language in which the form is printed. Boxes 4 to 12 of the form must be completed in one of the official Community languages.
8. The validity of the T2M forms contained in a booklet is guaranteed by the presence (SIC! presence), in box A of both originals and copies, of an endorsement by the authority responsible for registering the Community fishing vessel for which the booklet was issued. The booklet is valid for two years from the date shown on page 2 of its cover.

III. Use of T2M forms

9. The master of the Community fishing vessel must complete boxes 4, 5 and/or boxes 6, 7, 8 and complete and sign the declaration in box 9, of the original and the copy of a T2M form whenever:
 - a catch and/or the goods resulting from on-board processing of a catch are landed either in a port in Community customs territory, or in another part from which they will leave for that territory,
 - the catch and/or goods are transhipped onto another Community fishing vessel, a Community factory ship — where the catch undergoes on-board processing — or any other vessel which transports the catch and/or goods without processing them, either directly to a port within Community customs territory or to a port not in Community customs territory from where they will leave for that territory. In this case the master of the Community fishing vessel and the master of the vessel onto which the catch and/or goods are transhipped must complete and sign box 10 of the original and the copy.

▼M7

10. Where appropriate, the master of the vessel onto which a Community fishing vessel's catch has been transhipped to undergo on-board processing must complete boxes 6, 7 and 8, and complete and sign the declaration in box 11 of the original whenever:
 - goods resulting from on-board processing are landed either in a port in Community customs territory, or in a port not in Community customs territory from which they will leave for that territory,
 - the goods are transhipped onto any other vessel which transports them without processing, either directly to a port in Community customs territory or to a port not in Community customs territory from where they will leave for that territory. In this case, the master of the processing vessel and the master of the vessel onto which the goods are transhipped must complete and sign box 12 of the original.
11. Where catch or goods have gone to a country or territory not forming part of Community customs territory before being shipped to Community customs territory, box 13 of the form must be completed and signed by the customs authorities of the country or territory. If a part of the catch or goods does not go to Community customs territory, the name, kind, gross mass and treatment or use assigned to the consignments concerned must be entered in the 'Remarks' box of the form.
12. Whenever catch and/or goods are transhipped for carriage to Community customs territory, they must be accompanied by the original of a T2M form.

IV. Use of 'Extracts' of T2M forms

Where catch and/or goods have been transported to a country or territory not forming part of Community customs territory for later reconsignment to that territory in split consignments:

13. A number of original T2M forms equal to the number of split consignments must be taken from the booklet issued to the fishing vessel which made the catch and/or processed it into goods, and clearly marked with the word 'Extract' and particulars of the T2M form for the initial consignment. This information must also be entered in the copies of the 'Extracts' which must remain in the booklet.
14. For each split consignment:
 - boxes 4, 5 and/or 6, 7, 8 of the T2M 'Extract' form must be completed, stating the quantities of catch and/or goods consigned,
 - box 13 of the original of the 'Extract' form must be completed, endorsed and signed by the customs authorities of the country or territory concerned,
 - the number and kind of packages, the gross mass, the treatment or use assigned to the consignment and the number and date of the 'Extract' form must be entered in the 'Remarks' box of the initial T2M form,
 - the 'Extract' form must accompany the consignment of catch and/or goods.
15. When all the catch and/or goods covered by the initial T2M form have been shipped to Community customs territory, box 13 of the form must be completed, endorsed and signed by the customs authorities of the country or territory concerned. This form must be sent to the office which issued the T2M booklet. If a part of the catch or goods does not go to Community customs territory, the name, kind and gross mass of the consignments concerned, and the treatment or use assigned, must be entered in the 'Remarks' box on the form.

V. Discharge of T2M forms

16. All original T2M forms (initial or 'Extract') must be presented to the customs office where the catch or goods to which it refers have been brought into Community customs territory. However, where such catch or goods are brought into Community customs territory under a transit procedure and the corresponding operation began outside that territory,

▼ M7

the T2M forms must be presented to the customs office of destination for that procedure.

ANNEX 47a

APPLICATION OF ARTICLE 94(6) AND (7) OF THE CODE

Temporary prohibition of the use of the comprehensive guarantee for a reduced amount or the comprehensive guarantee

1. *Situations where use of the comprehensive guarantee for a reduced amount or the comprehensive guarantee may be prohibited temporarily*

1.1. *Temporary prohibition of the use of the comprehensive guarantee for a reduced amount*

The 'special circumstances' referred to in Article 94(6) of the Code mean a situation in which it has been established, in a significant number of cases involving more than one principal and putting at risk the smooth functioning of the procedure that, in spite of the application of Article 384 and Article 9 of the Code, the comprehensive guarantee for a reduced amount referred to in Article 94(4) of the Code is no longer sufficient to ensure payment, within the prescribed time limit, of the customs debt arising when any of the goods listed in Annex 44c are removed from the Community transit procedure.

1.2. *Temporary prohibition of the use of a comprehensive guarantee*

The 'large-scale fraud' referred to in Article 94(7) means a situation where it is established that, in spite of the application of Article 384, Article 9 of the Code and, where appropriate, Article 94(6) of the Code, the comprehensive guarantee referred to in Article 94(2)(b) of the Code is no longer sufficient to ensure payment, within the time limit prescribed, of the customs debt arising when any of the goods listed in Annex 44c are removed from the Community transit procedure. In this connection account should be taken of the volume of goods removed and the circumstances of their removal, particularly if these result from internationally organised criminal activities.

2. *Effect of the decision*

2.1. The effect of the decision temporarily prohibiting use of the comprehensive guarantee for a reduced amount or the comprehensive guarantee shall be limited to a period of 12 months unless the Commission decides to extend the period or repeal the decision in accordance with the committee procedure.

2.2. The following measures shall apply to transit operations involving goods which are subject to decisions prohibiting use of the comprehensive guarantee:

- by way of derogation from Article 363, the office of destination shall return Copy No 5 of any transit declaration endorsed with this phrase no later than on the working day following that on which the consignment and the requisite copies of the declaration were presented at that office. Where such a consignment is presented to an authorised consignee within the meaning of Article 406, he shall transmit the copy No 5 to his local office of destination no later than on the working day following that on which he took receipt of the consignment.

3. *Measures to alleviate the financial consequences of the prohibition on using the comprehensive guarantee*

When the use of the comprehensive guarantee has been prohibited temporarily for Annex 44c goods, holders of comprehensive guarantees may, upon request, use an individual guarantee. However, the following special conditions shall apply:

- the individual guarantee shall be put up in the form of a specific guarantee document which includes a reference to this Annex and covers only the goods referred to in the decision,

▼ M20

- except where guarantee data is exchanged between the office of guarantee and the office of departure using information technology and computer networks, this individual guarantee may be used only at the office of departure identified in the guarantee document,

▼ M19

- it may be used to cover several simultaneous or successive operations provided that the sum of the amounts involved in current operations for which the procedure has not yet been discharged does not exceed the amount of the individual guarantee,
- each time the procedure is discharged for a Community transit operation covered by this individual guarantee, the amount corresponding to that operation shall be released and may be reused to cover another operation up to the maximum amount of the guarantee.

4. *Derogation from the decision temporarily prohibiting use of the comprehensive guarantee for a reduced amount or the comprehensive guarantee*

- 4.1. Principals may be authorised to use a comprehensive guarantee for a reduced amount or a comprehensive guarantee to place under the Community transit procedure goods to which the decision temporarily prohibiting such use applies if they can show that no customs debt has arisen in respect of the goods in question in the course of Community transit operations which they have undertaken in the two years preceding the decision or, where customs debts have arisen during that period, if they can show that these were fully paid up by the debtor or debtors or the guarantor within the time limit prescribed.

To obtain authorisation to use a temporarily prohibited comprehensive guarantee, the principal must also meet the conditions set out in Article 381(2)(b).

- 4.2. Articles 374 to 378 shall apply *mutatis mutandis* to applications and authorisations for the derogations referred to in point 4.1.

ANNEX 66

INSTRUCTIONS FOR USE OF THE FORMS REQUIRED TO DRAW UP CONTROL COPY T5**A. General remarks**

1. The T5 control copy is a document drawn up on a T5 form accompanied, where appropriate, either by one or more T5*bis* forms or by one or more T5 loading lists.
2. The T5 control copy is intended to supply proof that the goods in respect of which it was issued have either been used in the way, or have reached the destination provided for by the specific Community provisions governing their use, it being the responsibility of the competent office of destination to be satisfied either directly or through persons acting on its behalf as to the use and/or destination of the goods concerned. In some cases, the T5 control copy is also used to inform the competent authorities of destination that the goods which it covers are subject to special measures. The procedure thus instituted is a framework procedure, to be put into effect only if specific Community legislation expressly so provides. It can apply even where the goods are not moving under a customs procedure.
3. The T5 control copy must be drawn up in one original and at least one copy, each of which must bear an original signature.

When goods are transported under a customs procedure, the original and the copy or copies of the T5 control copy must be submitted together to the customs office of departure or consignment, which retains one copy while the original accompanies the goods and must be presented with them at the customs office of destination.

Where the goods are not placed under a customs procedure, the T5 control copy shall be issued by the office of consignment, which shall keep a copy. The words 'Goods not covered by a customs procedure' shall be entered in box 109 of the T5 form. The original of the T5 control copy must be presented together with the goods to the competent office of destination.

4. If T5*bis* forms are used, the T5 form and the T5*bis* forms must be completed.

If T5 loading lists are used, the T5 form must be completed but boxes 31, 32, 33, 35, 38, 100, 103 and 105 must be struck through and the information concerned must be entered only on the T5 loading list or lists.

5. A T5 form may not be accompanied both by T5*bis* and by T5 loading lists.
6. The forms must be printed on pale blue paper, dressed for writing purposes and weighing at least 40 g/m². The paper must be sufficiently opaque for the information on one side not to affect the legibility of the information on the other side and its strength should be such that in normal use it does not easily tear or crease.

The forms must measure 210 × 297 mm for T5 forms and T5*bis* and 297 × 420 mm for T5 loading lists, a tolerance in the length of between -5 and +8 mm being allowed.

The address for return and the important note on the front of the form may be printed in red.

The competent authorities of the Member States may require that control copy T5 forms show the name and address of the printer, or a symbol enabling the printer to be identified.

7. The T5 control copy shall be made out in an official language of the Community which is acceptable to the competent authorities of the Member State of departure.

The competent authorities of another Member State in which such a document is presented may, as necessary, require a translation into the official language, or one of the official languages, of that Member State.

8. T5 forms and any T5*bis* forms or T5 loading lists must be completed in typescript or by a mechanographical or similar process. They may also be filled in legibly by hand, in ink and in block letters. To make it easier to complete T5 forms in typescript, they should be inserted in such a way that

▼M18

the first letter to be entered in box 2 is located in the small positioning box in the top left hand corner.

Forms must contain no erasures or overwriting. Alterations must be made by crossing out incorrect particulars and adding those required. Any such amendments must be initialled by the person making the amendment and authenticated by the competent authorities, who may require a new form to be lodged.

In addition, forms may be completed using an automatic reproduction process instead of any of the processes mentioned above. They may also be produced and completed by that means provided that the rules relating to the specimens, paper, size of forms, language to be used, legibility, prohibition of erasures and overwriting and alterations are strictly observed.

B. Provisions relating to T5 forms

Only boxes marked with a serial number need be completed, as appropriate. The other boxes, marked with a capital letter, are for official use only except in cases provided for in specific regulations or in the provisions relating to authorised consignors.

BOX 2: CONSIGNOR/EXPORTER

Enter the full name and address of the person or company concerned. Instructions regarding the identification number can be added by the Member States (identification number allocated to the person concerned by the competent authorities for tax, statistical or other purposes).

BOX 3: FORMS

Enter the number of the form in relation to the total number of T5 and T5bis forms used. For example, if there is one T5 form and two T5bis forms, indicate in the T5 form '1/3', on the first T5bis form '2/3' and on the second T5 form '3/3'.

1. Where goods or products are transferred from one holder to another without discharge of the arrangements only copies 1 and 4 of the document referred to in paragraph 1 of Part A shall be completed.
2. Before the goods or products are transferred, the supervising offices shall be informed of the intended transfer in the manner which they shall stipulate, to enable them to carry out any controls they consider necessary.
3. The first holder (the sender of the goods or products) shall retain copy 1.
4. Copy 4 may accompany the goods or products and be retained by the second holder.
5. Paragraph 6 of Part A shall apply.

II. Using other methods instead of the SAD where the necessary information is provided:

- data processing,
- commercial or administrative documents, or
- any other document.

▼ **M20***Appendix*

Where the SAD copies are used, the boxes indicated must contain the following information:

2. *Consignor*: give the name and address of the first holder, the name and address of his supervising office, followed by the authorisation number and the issuing customs authority.
3. *Forms*: indicate the order number of the set of forms among the total number of sets used.

Where the declaration relates to a single item (i.e. where only one 'description of goods' box needs to be filled in), leave box 3 blank but enter the figure 1 in box 5.

5. *Items*: state the total number of items declared in all the forms or supplementary forms used. The number of items is equal to the number of 'description of goods' boxes which need to be filled in.
8. *Consignee*: give the name of the second holder, the name and address of his supervising office and the address where the goods or products are to be stored, used or processed followed by the authorisation number and the issuing customs authority.
15. *Dispatching country*: indicate the Member State from which the goods are dispatched.

31. *Packages and description of goods; marks and numbers — container No(s) — number and kind*: enter the marks, (identifying) numbers, number and kind of packages or, in the case of unpacked goods, the number of goods covered by the declaration or the indication 'in bulk', as appropriate, plus the details needed to identify them.

The goods should be described using their usual commercial description, in sufficient detail to allow the goods to be identified. Where a container is used, the identification marks of the container should also be indicated in this box.

32. *Item No*: state the order number of the item in question among the total number of items declared in the forms or supplementary forms used, as defined in box 5.

Where the declaration relates to a single item, the customs authorities may stipulate that nothing should be entered in this box.

33. *Commodity code*: enter the CN code for the item in question ⁽¹⁾.
35. *Gross mass*: where necessary, state the gross mass in kilograms of the goods described in the corresponding box 31. The gross mass is the aggregate mass of the goods with all their packing, excluding containers and other transport equipment.
38. *Net mass*: state the net mass in kilograms of the goods described in the corresponding box 31. The net mass is the mass of the goods stripped of all packaging.
41. *Supplementary units*: where necessary, indicate the quantity in the units laid down in the Combined Nomenclature.

44. *Additional information; documents produced, certificates and authorisation*: enter the date of the first entry into the arrangements and 'Transfer' in capital letters followed by, as appropriate:

— 'CW' —

— 'IP/S' —

— 'PCC' —

— 'TI' —.

When the import goods are subject to specific commercial policy measures and when these measures are still to be applied at the moment of transfer, the words 'Commercial Policy' should be added to this entry.

47. *Calculation of taxes*: enter the tax base (value, weight or other).

⁽¹⁾ Box not mandatory in the case of the customs warehousing arrangements.

▼ **M20**

54. *Place and date; signature and name of the declarant or his representative:* enter the original hand-written signature of the person indicated in box 2 followed by his name. ^(*) The standard rate of yield shall be calculated on the basis of the corresponding conversion coefficient set out in Annex E to Commission Regulation (EC) No 1520/2000 (OJ L 177, 15.7.2000, p. 1).

⁽¹⁾ The subheadings in this column correspond to those in the Combined Nomenclature. When further subdivision has been necessary this is shown in parentheses (). These subdivisions correspond to those used in the regulations fixing export refunds.

⁽²⁾ Losses are calculated by subtracting from 100 the sum of the quantities shown in this column.

⁽³⁾ Hulled grains are grains corresponding to the definition given in Annex to Commission Regulation (EEC) No 821/68 (OJ L 149, 29.6.1968, p. 46).

⁽⁴⁾ Cereal meal with an ash content, referred to dry matter, of less than 0,95 % by weight and a rate of passage through a sieve with an aperture of 0,25 mm of less than 10 % by weight.

⁽⁵⁾ The standard rate of yield to be applied is based on the number of eggs used per kg of pasta produced, using the following formula:

$$\text{— Numerical order 25: } T = \frac{100}{160 - (X \times 1,6)} \times 100$$

$$\text{— Numerical order 26: } T = \frac{100}{150 - (X \times 1,6)} \times 100$$

$$\text{— Numerical order 27: } T = \frac{100}{140 - (X \times 1,6)} \times 100$$

$$\text{— Numerical order 28: } T = \frac{100}{126 - (X \times 1,6)} \times 100$$

X represents the number of eggs in shell (or the 50th of their weight expressed in grams of their equivalent in other egg products) used per kg of pasta produced, the result being given to two decimal points.

⁽⁶⁾ Pearled grains are grains corresponding to the definition given in the Annex to Regulation (EEC) No 821/68.

⁽⁷⁾ This concerns maize groats and meal:

— of which a percentage not exceeding 30 % by weight passes through a sieve with an aperture of 315 micrometres, or

— of which a percentage not exceeding 5 % by weight passes through a sieve with an aperture of 150 micrometres.

ANNEX 70

ECONOMIC CONDITIONS AND ADMINISTRATIVE COOPERATION

(Articles 502 and 522)

A. GENERAL PROVISIONS

This Annex deals on the one hand with the detailed criteria for economic conditions applicable to the inward processing arrangements and on the other hand with information to be exchanged in the framework of the administrative cooperation.

The cases, the format and the time limit within which information must be provided in accordance with Article 522 are indicated for each of the arrangements concerned. Information must also be communicated where the information concerning authorisations granted is modified.

B. DETAILED CRITERIA FOR ECONOMIC CONDITIONS APPLICABLE TO THE INWARD PROCESSING ARRANGEMENTS

Codes and detailed criteria▼ M22

01: Where import goods not mentioned in Annex 73 are concerned and Code 30 does not apply.

▼ M20

10: Unavailability of goods produced in the Community falling within the same eight-digit CN code, which are of the same commercial quality and which have the same technical characteristics (comparable goods) as the import goods referred to in the application.

The unavailability covers the total absence of Community production of comparable goods, the unavailability of a sufficient quantity of those goods in order to carry out the processing operations envisaged or the fact that comparable Community goods cannot be made available to the applicant in time for the proposed commercial operation to be carried out, despite a request having been made in good time.

11: Although available, comparable goods cannot be used because their price would make the proposed commercial operation economically unviable.

In deciding whether the price of comparable goods produced in the Community would make the proposed commercial operation economically unviable, it shall be necessary to take account, *inter alia* of the impact that the use of Community-produced goods would have on the cost price of the compensating product and hence on the disposal of the product on the third-country market, having regard to:

- the price before duty of the goods for processing and the price of comparable goods produced in the Community less domestic taxes refunded or refundable on export, taking into account the conditions of sale and any refunds or other amounts applying under the common agricultural policy,
- the price obtainable for the compensating products on the third-country market, as ascertained from commercial correspondence or other information.

12: Comparable goods which do not conform to the expressly stated requirements of the third-country purchaser of the compensating products or the compensating products must be obtained from import goods in order to comply with provisions concerning the protection of industrial or commercial property rights (contractual obligations).

30: The following are concerned:

1. operations involving import goods of a non-commercial nature;
2. operations carried out under a job-processing contract;

▼ M20

3. usual forms of handling referred to in Article 531;
4. repair;
5. processing operations on compensating products obtained under a previous inward processing authorisation the granting of which was subject to an examination of the economic conditions;
6. processing of durum wheat falling within CN code 1001 10 00 to produce pasta falling within CN codes 1902 11 00 and 1902 19;
7. operations in which the value ⁽¹⁾ of the import goods, by eight-digit CN code, does not exceed EUR 150 000 for goods listed in Annex 73 or EUR 500 000 for other goods, per applicant and per calendar year (*de minimis* value); ► **M22** or ◀

▼ M22

8. building, modification or conversion of civil aircraft or satellites or parts of them.

31: Where, according to Article 11 of Council Regulation (EC) No 3448/93, import goods referred to under part A of Annex 73 are concerned and the applicant presents a document issued by a competent authority permitting the entry for the arrangements for those goods, in the limits of a quantity determined with the aid of a supply balance.

▼ M20

- 99: The applicant considers the economic conditions to be fulfilled for reasons other than those corresponding to the previous codes. The reasons are indicated in his application.

▼ M22

Note: The Codes 10, 11, 12, 31 and 99 may be used only, where goods mentioned in Annex 73 are concerned.

▼ M20

C. INFORMATION TO BE PROVIDED TO THE COMMISSION FOR EACH ARRANGEMENT CONCERNED

The information to be communicated to the Commission corresponds to the boxes of the form the model of which is reproduced in the Appendix.

C.1. Inward processing

The information concerning the economic conditions shall be provided by using one or more of the codes laid down under Part B.

The reason for the rejection of the application or for annulment or revocation of the authorisation for non-observance of the economic conditions is indicated by using code(s). The same codes as those used to identify the economic conditions are used, preceded by the sign of negation (for example: - 10).

Cases in which information is mandatory

▼ M22

Where the economic conditions are identified by codes 01, 10, 11, 31 or 99.

For milk and milk products referred to in Article 1 of Council Regulation (EC) No 1255/1999 information is also mandatory where code 30 is used in relation with the situations referred to under subdivisions 2, 5 and 7 of this code.

⁽¹⁾ The value is the value for customs purposes of the goods estimated on the basis of the known particulars and on the basis of the documents submitted at the time of the submission of the request.

▼ M20*Communication of information*

The information intended to complete the columns 2 to 10 of the form reproduced in the Appendix is communicated electronically to the Commission. This information may only be communicated using the form reproduced in the Appendix where technical problems make its electronic communication temporarily impossible.

Communication time limit

Information is to be communicated as soon as possible. If the form reproduced in the Appendix is used, the information is communicated within the time limit indicated thereon.

C.2. Processing under customs control

Information shall be communicated where types of goods and operations other than those mentioned in Annex 76 Part A are concerned.

Information shall be communicated using the form reproduced in the Appendix within the time indicated thereon.

C.3. Outward processing

Columns 8 and 9 'Authorisations granted' are only to be filled in where an authorisation is granted in accordance with Article 147(2) of the Code.

In column (10) 'Reason', it shall be also mentioned if the rejection of the application, annulment or revocation of the authorisation concerns an application submitted or an authorisation granted in accordance with Article 147 (2) of the Code.

Information shall be communicated using the form reproduced in the Appendix within the time indicated thereon.

ANNEX 72

LIST OF USUAL FORMS OF HANDLING REFERRED TO IN ARTICLE 531 AND ARTICLE 809

Unless otherwise specified, none of the following forms of handling may give rise to a different eight-digit CN code.

Usual forms of handling listed below shall not be granted if, in the opinion of the customs authorities, the operation is likely to increase the risk of fraud:

1. ventilation, spreading-out, drying, removal of dust, simple cleaning operations, repair of packing, elementary repairs of damage incurred during transport or storage in so far as it concerns simple operations, application and removal of protective coating for transport;
2. reconstruction of the goods after transport;
3. stocktaking, sampling, sorting, sifting, mechanical filtering and weighing of the goods;
4. removal of damaged or contaminated components;
5. conservation, by means of pasteurisation, sterilisation, irradiation or the addition of preservatives;
6. treatment against parasites;
7. anti-rust treatment;
8. treatment:
 - by simple raising of the temperature, without further treatment or distillation process, or
 - by simple lowering of the temperature;
 even if this results in a different eight-digit CN code;
9. electrostatic treatment, uncreasing or ironing of textiles;
10. treatment consisting in:
 - stemming and/or pitting of fruits, cutting up and breaking down of dried fruits or vegetables, rehydration of fruits, or
 - dehydration of fruits even if this results in a different eight-digit CN code;
11. desalination, cleaning and butting of hides;
12. addition of goods or addition or replacement of accessory components as long as this addition or replacement is relatively limited or is intended to ensure compliance with technical standards and does not change the nature or improve the performances of the original goods, even if this results in a different eight-digit CN code for the added or replacement goods;
13. dilution or concentration of fluids, without further treatment or distillation process, even if this results in a different eight-digit CN code;
14. mixing between them of the same kind of goods, with a different quality, in order to obtain a constant quality or a quality which is requested by the customer, without changing the nature of the goods;
15. dividing or size cutting out of goods if only simple operations are involved;
16. packing, unpacking, change of packing, decanting and simple transfer into containers, even if this results in a different eight-digit CN code, affixing, removal and altering of marks, seals, labels, price tags or other similar distinguishing signs;
17. testing, adjusting, regulating and putting into working order of machines, apparatus and vehicles, in particular in order to control the compliance with technical standards, if only simple operations are involved;

19. Any usual forms of handling, other than the abovementioned, intended to improve the appearance or marketable quality of the import goods or to

▼ M26

prepare them for distribution or resale, provided that these operations do not change the nature or improve the performance of the original goods. Where costs for usual forms of handling have been incurred, such costs or the increase in value shall not be taken into account for the calculation of the import duty where satisfactory proof of these costs is provided by the declarant. However, the customs value, nature and origin of non-Community goods used in the operations shall be taken into account for the calculation of the import duties.

▼ M20*ANNEX 74***SPECIAL PROVISIONS CONCERNING EQUIVALENT GOODS****(Article 541)****1. Rice**

Rice classified under CN code 1006 shall not be deemed equivalent unless it falls within the same eight-digit CN code of the Combined Nomenclature. Nevertheless, for rice with a length not exceeding 6,0 mm and a length/width ratio equal to or more than 3 and for rice with a length equal to or less than 5,2 mm and a length/width ratio equal to or more than 2, equivalence shall be established by determination of the length/width ratio only. The measurement of the grains shall be done in accordance with Annex A(2)(d) to Regulation (EC) No 3072/95 on the common organisation of the market in rice.

The use of equivalent goods shall be prohibited where inward-processing operations consist of the 'usual forms of handling' listed in Annex 72 to this Regulation.

2. Wheat

Equivalent goods may be used only between wheat harvested in a third country and already released for free circulation and non-Community wheat, of the same eight-digit CN code, having the same commercial quality and the same technical characteristics.

However:

- derogations from the ban on use of equivalent goods may be adopted in respect of wheat on the basis of a communication from the Commission to the Member States, after examination by the Committee,
- the use of equivalent goods is permitted between Community durum wheat and durum wheat of third-country origin provided it is for the production of pasta falling within CN codes 1902 11 00 and 1902 19.

3. Sugar

Recourse to the use of equivalent goods is permitted between raw cane sugar falling within CN code 1701 11 90 and raw beet sugar within CN code 1701 12 90 under the condition that compensating products falling within CN code 1701 99 10 (white sugar) are obtained.

4. Live animals and meat

Equivalent goods may not be used for inward-processing operations on live animals or meat.

Derogation from the ban on the use of equivalent goods can be made for meat which has been made subject of a communication by the Commission to the Member States, after an examination carried out by the Customs Code Committee if the applicant can prove that equivalence is economically necessary and if the customs authorities transmit the draft of the procedures foreseen to control the operation.

5. Maize

Recourse to the use of equivalent goods between Community and non-Community maize is possible only in the following cases and subject to the following conditions:

1. In the case of maize for use in animal feed, the use of equivalent goods is possible provided that a customs control system is set up to ensure that the non-Community maize is in fact used for processing into animal feed.
2. In the case of maize used in the manufacture of starch and starch products, the use of equivalent goods is possible between all varieties with the exception of maizes rich in amylopectin (waxy-like maize or 'waxy' maize) which are only equivalent between themselves.
3. In the case of maize used in the manufacture of meal products, the use of equivalent goods is possible between all varieties with the exception of

▼ **M20**

maizes of the vitreous type ('Plata' maize of the 'Duro' type, 'Flint' maize) which are only equivalent between themselves.

6. Olive oil

A. Recourse to the use of equivalent goods is permitted only in the following cases and under the following conditions:

1. *virgin olive oil*

- (a) between Community extra virgin olive oil falling within CN code 1509 10 90 which corresponds to the description in point 1(a) of the Annex to Regulation No 136/66/EEC and non-Community extra virgin olive oil of the same CN code, provided that the processing operation produces extra virgin olive oil falling within the same CN code and satisfying the requirements of the said point 1(a);
- (b) between Community virgin olive oil falling within CN code 1509 10 90 which corresponds to the description in point 1(b) of the Annex to Regulation No 136/66/EEC and non-Community virgin olive oil of the same CN code, provided that the processing operation produces virgin olive oil falling within the same CN code and satisfying the requirements of the said point 1(b);
- (c) between Community ordinary virgin olive oil falling within CN code 1509 10 90 which corresponds to the description in point 1 (c) of the Annex to Regulation No 136/66/EEC and non-Community ordinary virgin olive oil of the same CN code, provided that the compensating product is:
 - refined olive oil falling within CN code 1509 90 00 which corresponds to the description in point 2 of the abovementioned Annex,
 - olive oil falling within CN code 1509 90 00 which corresponds to the description in point 3 of the said Annex and is obtained by blending with Community virgin olive oil falling within CN code 1509 10 90;
- (d) between Community lampante virgin olive oil falling within CN code 1509 10 10 which corresponds to the description in point 1(d) of the Annex to Regulation No 136/66/EEC and non-Community lampante virgin olive oil of the same CN code, provided that the compensating product is:
 - refined olive oil falling within CN code 1509 90 00 which corresponds to the description in point 2 of the abovementioned Annex, or
 - olive oil falling within CN code 1509 90 00 which corresponds to the description in point 3 of the said Annex and is obtained by blending with Community virgin olive oil falling within CN code 1509 10 90.

2. *olive-pomace oil*

between Community unrefined olive-pomace oil falling within CN code 1510 00 10 which corresponds to the description in point 4 of the Annex to Regulation No 136/66/EEC and non-Community unrefined olive-pomace oil of the same CN code, provided that the olive-pomace oil compensating product falling within CN code 1510 00 90 and corresponding to the description in point 6 of the said Annex is obtained by blending with Community virgin olive oil falling within CN code 1509 10 90.

- B. The blendings referred to in point A.1(c) second indent and (d) second indent and point A.2, with non-Community virgin olive oil, used in an identical manner, are authorised only where the arrangements for supervision of the procedure are organized in a manner that makes it possible to identify the proportion of non-Community virgin olive oil in the total quantity of blended oil exported.
- C. The compensating products must be put into immediate packaging of 220 litres or less. By way of derogation, in the case of agreed containers of 20 tonnes maximum, the customs authorities may allow the exportation of the oils found in the preceding points on condition that there is systematic control of the quality and quantity of the exported product.

▼ M20

D. Equivalence shall be checked by using commercial records to verify the quantity of oils used for blending and, for the purpose of verifying the quality concerned, by comparing the technical characteristics of samples of the non-Community oil taken when it was entered for the procedure with the technical characteristics of the samples of the Community oil used taken when the compensating product concerned was processed against the technical characteristics of the samples taken at the time of actual exportation of the compensating product at the point of exit. Samples shall be taken in accordance with international standards EN ISO 5555 (sampling) and EN ISO 661 (sending of samples to laboratories and preparation of samples for tests). The analysis shall be carried out with reference to the parameters in Annex I to Commission Regulation (EEC) No 2568/91 ⁽¹⁾.

▼ M24**7. Milk and milk products**

Recourse to the use of equivalence is permitted under the following conditions:

The weight of each component of milk dry matter, milk fat matter and milk protein of the import goods shall not exceed the weight of each of these components in the equivalent goods. However, where the economic value of the import goods is determined by only one or two of the above mentioned components, the weight may be calculated on the basis of this or these component(s). The authorisation shall specify the details, notably the reference period for which the total weight has to be calculated. The reference period shall not exceed 4 months.

The weight of the relevant component(s) of the import goods and of the equivalent goods shall be entered on the customs declarations and on any information sheet INF9 or INF5, to enable the customs authorities to control the equivalence on the basis of those elements.

Physical checks shall be carried out on at least 5 % of the declarations for entry of import goods for the arrangements and the export declaration (IM/EX) and cover the import goods as well as the equivalent goods concerned.

Physical checks shall be carried out on at least 5 % of the prior export declarations and the declarations for entry for the arrangements (EX/IM). These checks shall cover the equivalent goods that shall be checked before the processing operations start as well as the concerned import goods at the moment they are entered for the arrangements.

Physical checks imply the verification of the declaration and the documents attached thereto, and representative samples shall be taken for analysis of the ingredients by a competent laboratory.

If the Member State applies a system of risk analysis, a lower percentage of physical checks may be permitted.

Each physical check shall be the subject of a detailed report by the official who has carried out this check. These reports shall be centralised by the customs authorities designated in each Member State.

2. The duly completed Information Document (I.D.) must be presented to the Customs authorities whenever the goods are cleared.
3. If the goods are to be re-imported in split consignments the following procedure applies.
 - (a) Temporary exportation:
The exporter produces the I. D. in duplicate. The Customs certify both copies (Part I) and return them to the exporter who sends the original I. D. to the importer who keeps it until the last split re-exportation. The exporter keeps the duplicate I. D.
 - (b) Temporary importation:
The importer produces the original I. D. to the Customs who certify Part II and return the I. D. to him.
 - (c) Split re-exportation:
The re-exporter completes an additional Part III (including Cage G) and produces it to the Customs together with the original I. D. The Customs certify the additional Part III after checking it against the I. D. The re-exporter sends the additional Part III to re-importer.
 - (d) Split re-importation:
The re-importer produces the additional Part III and his copy of the I. D. to the Customs for checking against each other.
 - (e) Last split re-exportation:
The re-exporter completes Part III of the original I. D. including Cage G. The Customs certify the original I. D. and return it to the re-exporter who sends it to the re-importer.
