COMMISSION REGULATION (EEC) No 2454/93

of 2 July 1993

laying down provisions for the implementation of Council Regulation (EEC) No 2913/92
establishing the Community Customs Code

THE COMMISSION OF THE EUROPEAN
COMMUNITIES,

Having regard to the Treaty establishing the European
Economic Community,

Having regard to Council Regulation (EEC) No
2913/92 of 12 October 1992 establishing the Community
Customs Code (⁽¹⁾), hereinafter referred to as the 'Code',
and in particular Article 249 thereof,

Whereas the Code assembled all existing customs legis-
lation in a single legal instrument; whereas at the same
time the Code made certain modifications to this legis-
lation to make it more coherent, to simplify it and to
plug certain loopholes; whereas it therefore constitutes
complete Community legislation in this area;

Whereas the same reasons which led to the adoption of
the Code apply equally to the customs implementing
legislation; whereas it is therefore desirable to bring
together in a single regulation those customs
implementing provisions which are currently scattered
over a large number of Community regulations and
directives;

Whereas the implementing code for the Community
Customs Code hereby established should set out existing
customs implementing rules; whereas it is nevertheless
necessary, in the light of experience:

- to make some amendments in order to adapt the said
rules to the provisions of the Code,
- to extend the scope of certain provisions which
currently apply only to specific customs procedures in
order to take account of the Code's comprehensive
application,
- to formulate certain rules more precisely in order to
achieve greater legal security in their application;

Whereas the changes made relate mainly to the
provisions concerning customs debt;

Whereas it is appropriate to limit the application of
Article 791 (2) until 1 January 1995 and to review the
subject matter in the light of experience gained before
that time;

Whereas the measures provided for by this Regulation
are in accordance with the opinion of the Customs Code
Committee,

HAS ADOPTED THIS REGULATION:

PART I

2. In exceptional cases where the Commission, in accordance with the last subparagraph of Article 12 (7) of the Code, adopts a measure derogating from the provisions of paragraph 6 of that Article, or where the conditions referred to in paragraph 1 concerning the possibility of continuing to invoke binding tariff information have not been fulfilled, the customs authorities shall notify the holder in writing.

Other colours and combinations of colours frequently result from variations in maturity or cultural and curing techniques;

The front of the certificate shall have a printed guilloche pattern background in pink, such as to reveal any falsification by mechanical or chemical means,

— in the case of the goods listed under Order Nos 4 and 5 in the table referred to in Article 26, white paper with a yellow border weighing not less than 40 g/m²,

— in the case of the other goods in the table, white paper weighing at least 40 g/m².

3. In the case of the goods listed under Order No 3 in the table referred to in Article 26, the borders of the certificate may bear decorative designs on their outer edge in a band not exceeding 13 millimetres in width.

4. In the case of goods referred to under Order No 2 in the table referred to in Article 26, the certificate shall be made out in one original and two copies. The original shall be white, the first copy pink and the second copy yellow.

5. In the case of the goods listed under Order No 2 of the table referred to in Article 26, each certificate shall bear an individual serial number given by the issuing body, followed by the nationality symbol appropriate to that body.

The copies shall bear the same serial number and nationality symbol as the original.

6. The customs authorities of the Member State where the goods are declared for release for free circulation may require a translation of the certificate.

Article 28

The certificate shall be completed either in typescript or in manuscript. In the latter case it shall be completed in ink using block capitals.

Article 29

1. The certificate or, in the case of split consignments of the goods listed under Order Nos 1, 6 and 7 in the table referred to in Article 26, a photocopy of the certificate, as provided for in Article 34, shall be presented to the customs authorities of the importing Member State, together with the goods to which it relates, within the following time limits, running from the date of issue of the certificate:

— two months, in the case of the goods listed under Order No 2 in the table,

— three months, in the case of the goods listed under Order Nos 1, 3 and 4 in the table,

TITLE IV

ORIGIN OF GOODS

CHAPTER 1

Non-preferential origin

Section 1

Working or processing conferring origin*Article 35*

This chapter lays down, for textiles and textile articles falling within Section XI of the combined nomenclature, and for certain products other than textiles and textile articles, the working or processing which shall be regarded as satisfying the criteria laid down in Article 24 of the Code and shall confer on the products concerned the origin of the country in which they were carried out.

'Country' means either a third country or the Community as appropriate.

Subsection 1

Textiles and textile articles falling within Section XI of the combined nomenclature*Article 36*

For textiles and textile articles falling within Section XI of the combined nomenclature, a complete process, as specified in Article 37, shall be regarded as a working or processing conferring origin in terms of Article 24 of the Code.

Article 37

Working or processing as a result of which the products obtained receive a classification under a heading of the combined nomenclature other than those covering the various non-originating materials used shall be regarded as complete processes.

However, for products listed in Annex 10, only the specific processes referred to in column 3 of that Annex in connection with each product obtained shall be regarded as complete, whether or not they involve a change of heading.

The method of applying the rules in Annex 10 is described in the introductory notes in Annex 9.

Article 38

For the purposes of the preceding Article, the following shall in any event be considered as insufficient working or processing to confer the status of originating products whether or not there is a change of heading:

- (a) operations to ensure the preservation of products in good condition during transport and storage (ventilation, spreading out, drying, removal of damaged parts and like operations);
- (b) simple operations consisting of removal of dust, sifting or screening, sorting, classifying, matching (including the making-up of sets of articles), washing, cutting up;
- (c) (i) changes of packing and breaking-up and assembly of consignments;
 - (ii) simple placing in bags, cases, boxes, fixing on cards or boards, etc., and all other simple packing operations;
- (d) the affixing of marks, labels or other like distinguishing signs on products or their packaging;
- (e) simple assembly of parts of products to constitute a complete product;
- (f) a combination of two or more operations specified in (a) to (e).

Subsection 2

Products other than textiles and textile articles falling within Section XI of the combined nomenclature*Article 39*

In the case of products obtained which are listed in Annex 11, the working or processing referred to in column 3 of the Annex shall be regarded as a process or operation conferring origin under Article 24 of the Code.

The method of applying the rules set out in Annex 11 is described in the introductory notes in Annex 9.

Subsection 3

Common provisions for all products*Article 40*

Where the lists in Annexes 10 and 11 provide that origin is conferred if the value of the non-originating materials used does not exceed a given percentage of the ex-works price of the products obtained, such percentage shall be calculated as follows:

- 'value' means the customs value at the time of import of the non-originating materials used or, if this is not known and cannot be ascertained, the first ascertainable price paid for such materials in the country of processing,
- 'ex-works price' means the ex-works price of the product obtained minus any internal taxes which are, or may be, repaid when such product is exported,
- 'value acquired as a result of assembly operations' means the increase in value resulting from the assembly itself, together with any finishing and checking operations, and from the incorporation of any parts originating in the country where the operations in question were carried out, including profit and the general costs borne in that country as a result of the operations.

Section 2

Implementing provisions relating to spare parts*Article 41*

Essential spare parts for use with any piece of equipment, machine, apparatus or vehicle put into free circulation or previously exported shall be deemed to have the same origin as that piece of equipment, machine, apparatus or vehicle provided the conditions laid down in this section are fulfilled.

Article 42

The presumption of origin referred to in the preceding Article shall be accepted only:

- if this is necessary for importation into the country of destination,
- if the incorporation of the said essential spare parts in the piece of equipment, machine, apparatus or vehicle concerned at the production stage would not have prevented the piece of equipment, machine, apparatus or vehicle from having Community origin or that of the country of manufacture.

Article 43

For the purposes of Article 41:

- (a) 'piece of equipment, machine, apparatus or vehicle' means goods listed in Sections XVI, XVII and XVIII of the combined nomenclature;
- (b) 'essential spare parts' means parts which are:
 - components without which the proper operation of the goods referred to in (a) which have been put into free circulation or previously exported cannot be ensured, and
 - characteristic of those goods, and
 - intended for their normal maintenance and to replace parts of the same kind which are damaged or have become unserviceable.

Article 44

Where an application is presented to the competent authorities or authorized agencies of the Member States for a certificate of origin for essential spare parts within the meaning of Article 41, box 6 (Item number, marks, numbers, number and kind of packages, description of goods) of that certificate and the application relating thereto shall include a declaration by the person concerned that the goods mentioned therein are intended for the normal maintenance of a piece of equipment, machine, apparatus or vehicle previously exported, together with the exact particulars of the said piece of equipment, machine, apparatus or vehicle.

Whenever possible, the person concerned shall also give the particulars of the certificate of origin (issuing authority, number and date of certificate) under cover of which was exported the piece of equipment, machine, apparatus or vehicle for whose maintenance the parts are intended.

Article 45

Where the origin of essential spare parts within the meaning of Article 41 must be proved for their release for free circulation in the Community by the production of a certificate of origin, the certificate shall include the particulars referred to in Article 44.

Article 46

In order to ensure application of the rules laid down in this section, the competent authorities of the Member States may require additional proof, in particular:

- production of the invoice or a copy of the invoice relating to the piece of equipment, machine, apparatus or vehicle put into free circulation or previously exported,
- the contract or a copy of the contract or any other document showing that delivery is being made as part of the normal maintenance service.

Section 3

Implementing provisions relating to certificates of origin

Subsection 1

Provisions relating to universal certificates of origin*Article 47*

When the origin of a product is or has to be proved on importation by the production of a certificate of origin, that certificate shall fulfil the following conditions:

- (a) it shall be made out by a reliable authority or agency duly authorized for that purpose by the country of issue;
- (b) it shall contain all the particulars necessary for identifying the product to which it relates, in particular:
 - the number of packages, their nature, and the marks and numbers they bear,
 - the type of product,
 - the gross and net weight of the product; these particulars may, however, be replaced by others, such as the number or volume, when the product is subject to appreciable changes in weight during carriage or when its weight cannot be ascertained or when it is normally identified by such other particulars,
 - the name of the consignor;
- (c) it shall certify unambiguously that the product to which it relates originated in a specific country.

Article 48

1. A certificate of origin issued by the competent authorities or authorized agencies of the Member States shall comply with the conditions prescribed by Article 47 (a) and (b).

2. The certificates and the applications relating to them shall be made out on forms corresponding to the specimens in Annex 12.

3. Such certificates of origin shall certify that the goods originated in the Community.

However, when the exigencies of export trade so require, they may certify that the goods originated in a particular Member State.

If the conditions of Article 24 of the Code are fulfilled only as a result of a series of operations or processes carried out in different Member States, the goods may only be certified as being of Community origin.

Article 49

Certificates of origin shall be issued upon written request of the person concerned.

Where the circumstances so warrant, in particular where the applicant maintains a regular flow of exports, the Member States may decide not to require an application for each export operation, on condition that the provisions concerning origin are complied with.

Where the exigencies of trade so require, one or more extra copies of an origin certificate may be issued.

Such copies shall be made out on forms corresponding to the specimen in Annex 12.

Article 50

1. The certificate shall measure 210 × 297 mm. A tolerance of up to minus 5 mm or plus 8 mm in the length shall be allowed. The paper used shall be white, free of mechanical pulp, dressed for writing purposes and weigh at least 64 g/m² or between 25 and 30 g/m² where air-mail paper is used. It shall have a printed guilloche pattern background in sepia such as to reveal any falsification by mechanical or chemical means.

2. The application form shall be printed in the official language or in one or more of the official languages of the exporting Member State. The certificate of origin form shall be printed in one or more of the official languages of the Community or, depending on the practice and requirements of trade, in any other language.

3. Member States may reserve the right to print the certificate of origin forms or may have them printed by approved printers. In the latter case, each certificate must bear a reference to such approval. Each certificate of origin form must bear the name and address of the

printer or a mark by which the printer can be identified. It shall also bear a serial number, either printed or stamped, by which it can be identified.

Article 51

The application form and the certificate of origin shall be completed in typescript or by hand in block capitals, in an identical manner, in one of the official languages of the Community or, depending on the practice and requirements of trade, in any other languages.

Article 52

Each origin certificate referred to in Article 48 shall bear a serial number by which it can be identified. The application for the certificate and all copies of the certificate itself shall bear the same number.

In addition, the competent authorities or authorized agencies of the Member States may number such documents by order of issue.

Article 53

The competent authorities of the Member States shall determine what additional particulars, if any, are to be given in the application. Such additional particulars shall be kept to a strict minimum.

Each Member State shall inform the Commission of the provisions it adopts in pursuance of the preceding paragraph. The Commission shall immediately communicate this information to the other Member States.

Article 54

The competent authorities or authorized agencies of the Member States which have issued certificates of origin shall retain the applications for a minimum of two years.

However, applications may also be retained in the form of copies thereof, provided that these have the same probative value under the law of the Member State concerned.

Subsection 2

Specific provisions relating to certificates of origin for certain agricultural products subject to special import arrangements

Article 55

Articles 56 to 65 lay down the conditions for use of certificates of origin relating to agricultural products originating in third countries for which special non-preferential import arrangements have been established, in so far as these arrangements refer to the following provisions.

(a) *Certificates of origin*

Article 56

1. Certificates of origin relating to agricultural products originating in third countries for which special non-preferential import arrangements are established shall be made out on a form conforming to the specimen in Annex 13.

2. Such certificates shall be issued by the competent governmental authorities of the third countries concerned, hereinafter referred to as the issuing authorities, if the products to which the certificates relate can be considered as products originating in those countries within the meaning of the rules in force in the Community.

3. Such certificates shall also certify all necessary information provided for in the Community legislation governing the special import arrangements referred to in Article 55.

4. Without prejudice to specific provisions under the special import arrangements referred to in Article 55 the period of validity of the certificates of origin shall be ten months from the date of issue by the issuing authorities.

Article 57

1. Certificates of origin drawn up in accordance with the provisions of this subsection shall consist only of a single sheet identified by the word 'original' next to the title of the document.

If additional copies are necessary, they shall bear the designation 'copy' next to the title of the document.

2. The competent authorities in the Community shall accept as valid only the original of the certificate of origin.

Article 58

1. The certificate of origin shall measure 210 x 297 mm; a tolerance of up to plus 8 mm or minus 5 mm in the length may be allowed. The paper used shall be white, not containing mechanical pulp, and shall weigh not less than 40 g/m². The face of the original shall have a printed yellow guilloche pattern background making any falsification by mechanical or chemical means apparent.

2. The certificates shall be printed and completed in one of the official languages of the Community.

Article 59

1. The certificate shall be completed in typescript or by means of a mechanical data-processing system, or similar procedure.

2. Entries must not be erased or overwritten. Any changes shall be made by crossing out the wrong entry and if necessary adding the correct particulars. Such changes shall be initialled by the person making them and endorsed by the issuing authorities.

Article 60

1. Box 5 of the certificates of origin issued in accordance with Articles 56 to 59 shall contain any additional particulars which may be required for the implementation of the special import arrangements to which they relate as referred to in Article 56 (3).

2. Unused spaces in boxes 5, 6 and 7 shall be struck through in such a way that nothing can be added at a later stage.

Article 61

Each certificate of origin shall bear a serial number, whether or not printed, by which it can be identified, and shall be stamped by the issuing authority and signed by the person or persons empowered to do so.

The certificate shall be issued when the products to which it relates are exported, and the issuing authority shall keep a copy of each certificate issued.

Article 62

Exceptionally, the certificates of origin referred to above may be issued after the export of the products to which they relate, where the failure to issue them at the time of such export was a result of involuntary error or omission or special circumstances.

The issuing authorities may not issue retrospectively a certificate of origin provided for in Articles 56 to 61 until they have checked that the particulars in the exporter's application correspond to those in the relevant export file.

Certificates issued retrospectively shall bear one of the following:

- expedido a posteriori,
- udstedt efterfølgende,
- Nachträglich ausgestellt,
- Εκδοθέν εκ των υστέρων,
- Issued retrospectively,
- Délivré a posteriori,
- rilasciato a posteriori,
- afgegeven a posteriori,
- emitido a posteriori,

in the 'Remarks' box.

(b) Administrative cooperation

Article 63

1. Where the special import arrangements for certain agricultural products provide for the use of the certificate of origin laid down in Articles 56 to 62, the entitlement to use such arrangements shall be subject to the setting up of an administrative cooperation procedure unless specified otherwise in the arrangements concerned.

To this end the third countries concerned shall send the Commission of the European Communities:

- the names and addresses of the issuing authorities for certificates of origin together with specimens of the stamps used by the said authorities,
- the names and addresses of the government authorities to which requests for the subsequent verification of origin certificates provided for in Article 64 below should be sent.

The Commission shall transmit all the above information to the competent authorities of the Member States.

2. Where the third countries in question fail to send the Commission the information specified in paragraph 1, the competent authorities in the Community shall refuse access entitlement to the special import arrangements.

Article 64

1. Subsequent verification of the certificates of origin referred to in Articles 56 to 62 shall be carried out at random and whenever reasonable doubt has arisen as to the authenticity of the certificate or the accuracy of the information it contains.

For origin matters the verification shall be carried out on the initiative of the customs authorities.

For the purposes of agricultural rules, the verification may be carried out, where appropriate, by other competent authorities.

2. For the purposes of paragraph 1, the competent authorities in the Community shall return the certificate of origin or a copy thereof to the governmental authority designated by the exporting country, giving, where appropriate, the reasons of form or substance for an enquiry. If the invoice has been produced, the original or a copy thereof shall be attached to the returned certificate. The authorities shall also provide any information that has been obtained suggesting that the particulars given on the certificates are inaccurate or that the certificate is not authentic.

Should the customs authorities in the Community decide to suspend the application of the special import arrangements concerned pending the results of the verification they shall grant release of the products subject to such precautions as they consider necessary.

Article 65

1. The results of subsequent verifications shall be communicated to the competent authorities in the Community as soon as possible.

The said results must make it possible to determine whether the origin certificates remitted in the conditions laid down in Article 64 above apply to the goods actually exported and whether the latter may actually give rise to application of the special importation arrangements concerned.

2. If there is no reply within a maximum time limit of six months to requests for subsequent verification, the competent authorities in the Community shall definitively refuse to grant entitlement to the special import arrangements.

CHAPTER 2

Preferential origin

Section 1

Generalized system of preferences

Subsection 1

Definition of the concept of originating products

Article 66

For the purposes of the provisions concerning generalized tariff preferences granted by the Community to certain products originating in developing countries, the following shall be considered as products originating in a country entitled to those preferences (hereinafter referred to as a 'beneficiary country') provided that these products have been transported direct to the Community within the meaning of Article 75:

- (a) products wholly obtained in that country;
- (b) products obtained in that country in the manufacture of which products other than those referred to in (a) are used, provided that the said products have undergone sufficient working or processing within the meaning of Article 68 (1).

Article 67

1. The following shall be considered as wholly obtained in a beneficiary country within the meaning of Article 66 (a):

- (a) mineral products extracted from its soil or from its sea bed;

- (b) vegetable products harvested there;
- (c) live animals born and raised there;
- (d) products obtained from live animals there;
- (e) products obtained by hunting or fishing conducted there;
- (f) products of sea fishing and other products taken from the sea by its vessels;
- (g) products made on board its factory ships exclusively from the products referred to in (f);
- (h) used articles collected there fit only for the recovery of raw materials;
- (i) waste and scrap resulting from manufacturing operations conducted there;
- (j) products extracted from marine soil or subsoil outside its territorial waters, provided that it has sole rights to work that soil or subsoil;
- (k) products produced there exclusively from products specified in (a) to (j).

2. The term 'its vessels' in paragraph 1 (f) shall apply only to vessels:

- which are registered or recorded in the beneficiary country,
- which sail under the flag of the beneficiary country,
- which are at least 50 % owned by nationals of the beneficiary country or by a company with its head office in that country, of which the manager or managers, chairman of the board of directors or of the supervisory board, and the majority of the members of such boards are nationals of that country and of which, in addition, in the case of partnerships or limited companies, at least half the capital belongs to that country or to public bodies or nationals of that country,
- of which the captain and officers are all nationals of the beneficiary country, and
- of which at least 75 % of the crew are nationals of the beneficiary country.

3. The term 'in a beneficiary country' shall also cover the territorial waters of that country.

4. Vessels operating on the high seas, including factory ships on which the fish caught is worked or

processed, shall be deemed to be part of the territory of the beneficiary country to which they belong, provided that they satisfy the conditions set out in paragraph 2.

Article 68

1. For the purposes of Article 66 (b), non-originating materials shall be considered to be sufficiently worked or processed when the product obtained is classified in a heading different from those in which all the non-originating materials used in its manufacture are classified, subject to paragraphs 2 and 3 below.

Annex 14 contains the notes concerning products made from non-originating materials.

The expressions 'chapters' and 'headings' used in these provisions shall mean the chapters and the headings (four-digit codes) used in the nomenclature which makes up the Harmonized System.

The expression 'classified' shall refer to the classification of a product or material under a particular heading.

2. For a product mentioned in columns 1 and 2 of the List in Annex 15, the conditions set out in column 3 for the product concerned shall be fulfilled instead of the rule in paragraph 1.

(a) The term 'value' in the list in Annex 15 shall mean the customs value at the time of importation of the non-originating materials used or, if this is not known and cannot be ascertained, the first ascertainable price paid for the materials in the country concerned. Where the value of the originating materials used needs to be established, this subparagraph shall be applied *mutatis mutandis*.

(b) The term 'ex-works price' in the list in Annex 15 shall mean the price paid for the product obtained to the manufacturer in whose undertaking the last working or processing is carried out, provided the price includes the value of all materials used in manufacture, minus any internal taxes which are, or may be, repaid when the product obtained is exported.

3. For the purposes of Article 66 (b), the following shall in any event be considered as insufficient working or processing to confer the status of originating products, whether or not there is a change of heading:

(a) operations to ensure the preservation of products in good condition during transport and storage (ventilation, spreading out, drying, chilling, placing in salt, sulphur dioxide or other aqueous solutions, removal of damaged parts, and like operations);

(b) simple operations consisting of removal of dust, sifting or screening, sorting, classifying, matching (including the making-up of sets of articles), washing, painting, cutting up;

(c) (i) changes of packing and breaking up and assembly of consignments,

(ii) simple placing in bottles, flasks, bags, boxes, fixing on cards or boards, etc., and all other simple packing operations;

(d) the affixing of marks, labels or other like distinguishing signs on products or their packaging;

(e) simple mixing of products, whether or not of different kinds, where one or more components of the mixture do not meet the conditions laid down in this Title to enable them to be considered as originating products;

(f) simple assembly of parts of products to constitute a complete product;

(g) a combination of two or more operations specified in (a) to (f);

(h) slaughter of animals.

Article 69

In order to determine whether a product originates in a beneficiary country, it shall not be necessary to establish whether the power and fuel, plant and equipment, and machines and tools used to obtain such products originate in third countries or not.

Article 70

1. By way of derogation from Article 66, for the purposes of determining whether a product manufactured in a beneficiary country which is a member of a regional group originates therein within the meaning of that Article, products originating in any of the countries of that regional group and used in further manufacture in another country of the group shall be treated as if they originated in the country of further manufacture.

2. The country of origin of the final product shall be determined in accordance with Article 71.

3. Regional cumulation shall apply to three separate regional groups of GSP beneficiary countries:

(a) the Association of South-East Asian Nations (Asean);

(b) the Central American Common Market (CACM);

(c) the Andean Group.

4. The expression 'regional group' shall be taken to mean the Asean or the CACM or the Andean group as the case may be.

Article 71

1. Products having originating status by virtue of Article 70 shall have the origin of the country of the regional group where the last working or processing was carried out provided that:

- the value added there, as defined in paragraph 3 of this Article, is greater than the highest customs value of the products used originating in any one of the other countries of the regional group,
- the working or processing carried out there exceeds that set out in Article 68 (3) and, in the case of textile products, also those operations referred to in Annex 16.

2. In all other cases products shall have the origin of the country of the regional group which accounts for the highest customs value of the originating products coming from other countries of the regional group.

3. 'Value added' means the ex-works price minus the customs value of each of the products incorporated which originated in another country of the regional group.

Article 72

1. Articles 70 and 71 shall apply only where:

- (a) the rules regulating trade in the context of regional cumulation, as between the countries of the regional group, are identical to those laid down in this section;
- (b) each country of the regional group has undertaken to comply or ensure compliance with the terms of this section and to provide the administrative cooperation necessary both to the Community and to the other countries of the regional group in order to ensure the correct issue of certificates of origin form A and the verification of certificates of origin form A and forms APR.

This undertaking shall be transmitted to the Commission through the Secretariat of the regional group. The Secretariats are as follows:

- the Asean General Secretariat,
- the Permanent Secretariat of the Central American Common Market,
- the Junta del Acuerdo de Cartagena,

as the case may be.

2. The Commission shall inform the Member States when the conditions set out in paragraph 1 have been complied with in the case of each regional group.

Article 73

Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle which are part of the normal equipment and included in the price

thereof or are not separately invoiced are regarded as one with the piece of equipment, machine, apparatus or vehicle in question.

Article 74

Sets, as defined in General Rule 3 of the Harmonized System, shall be regarded as originating when the component articles are originating products. Nevertheless, when a set is composed of originating and non-originating articles, the set as a whole shall be regarded as originating provided that the value of the non-originating articles does not exceed 15 % of the ex-works price of the set.

Article 75

1. The following shall be considered as transported direct from the exporting beneficiary country to the Community:

- (a) products transported without passing through the territory of any other country except, when Article 70 applies, another country of the same regional group;
- (b) products transported through the territories of countries other than the exporting beneficiary country or, when Article 70 applies, other than the territory of other countries of the same regional group, with or without transshipment or temporary warehousing within those countries, provided that transport through those countries is justified for geographical reasons or exclusively on account of transport requirements and that the products:
 - have remained under the supervision of the customs authorities of the country of transit or warehousing, and
 - have not entered into commerce or been released for home use there, and
 - have not undergone operations other than unloading, reloading or any operation intended to keep them in good condition;
- (c) products transported through the territory of Austria, Finland, Norway, Sweden or Switzerland and subsequently re-exported in full or in part to the Community, provided that the goods:
 - have remained under the supervision of the customs authorities of the country of transit or warehousing and
 - have not undergone operations other than unloading, reloading or any operation designed to keep them in good condition there;
- (d) products which are transported by pipeline across territory other than of the exporting beneficiary country.

2. Evidence that the conditions specified in paragraph 1 (b) and (c) have been fulfilled shall be supplied to customs in the Community by the production of:

- (a) a single transport document issued in the exporting beneficiary country covering the passage through the country of transit; or
- (b) a certification issued by the customs authorities of the country of transit:
 - giving an exact description of the goods,
 - stating the dates of unloading and reloading of the goods or of their embarkation or disembarkation, identifying the ships used, and
 - certifying the conditions under which the goods remained in the transit country; or
- (c) failing these, any substantiating documents.

Article 76

The conditions set out in this subsection concerning the acquisition of originating status shall be fulfilled without interruption in the beneficiary country.

If originating products exported from the beneficiary country to another country are returned, they shall be considered as non-originating unless it can be demonstrated to the satisfaction of the competent authorities that:

- the goods returned are the same goods as those exported, and
- they have not undergone any operations beyond that necessary to preserve them in good condition while in that country.

Article 77

1. Derogations to these provisions may be made in favour of the least-developed GSP beneficiary countries when the development of existing industries or the creation of new industries justifies them. The least-developed countries are those listed in the annual Council Regulations and ECSC Decisions applying generalized tariff preferences.

For this purpose, the country concerned shall submit to the Commission of the European Communities a request for a derogation together with the reasons for the request in accordance with paragraph 3.

2. The examination of requests shall in particular take into account:

- (a) cases where the application of existing rules of origin would significantly affect the ability of an existing industry in the country concerned to continue its exports to the Community, with particular reference to cases where this could lead to cessation of its activities;

- (b) specific cases where it can be clearly demonstrated that significant investment in an industry could be deterred by the rules of origin and where a derogation favouring the realization of the investment programme would enable these rules to be satisfied by stages;

- (c) the economic and social impact of the decision to be taken especially in respect of employment.

3. In order to facilitate the examination of requests for derogation, the country making the request shall furnish the fullest possible information in support of its request, covering in particular the points listed below:

- description of the finished product,
- nature and quantity of products which have been processed there,
- manufacturing process,
- value added,
- number of employees in the undertaking concerned,
- anticipated volume of exports to the Community,
- reasons for the duration requested,
- other observations.

The same rules apply to any request for an extension.

Subsection 2

Proof of origin

(a) *Certificate of origin form A*

Article 78

1. Originating products within the meaning of this section shall be eligible, on importation into the Community, to benefit from the tariff preferences specified in Article 66 on production of a certificate of origin form A, a specimen of which appears in Annex 17, issued either by the customs authorities or by other governmental authorities of the beneficiary country, provided that the said country:

- has communicated to the Commission of the European Communities the information required by Article 93, and
- assists the Community by allowing the customs authorities of Member States to verify the authenticity of the document or the accuracy of the information regarding the true origin of the products in question.

2. A certificate of origin form A may be issued only where it can serve as the documentary evidence required for the purposes of the tariff preferences referred to in Article 66.

3. A certificate of origin form A shall be issued only upon written application by the exporter or his authorized representative.

4. The exporter or his representative shall submit with his application any appropriate supporting document proving that the products to be exported qualify for the issue of a certificate of origin form A.

5. The certificate shall be issued by the competent governmental authority of the beneficiary country if the products to be exported can be considered products originating in that country within the meaning of subsection 1.

6. For the purpose of verifying whether the condition stated in paragraph 5 has been met, the competent governmental authority shall have the right to call for any documentary evidence or to carry out any check which it considers appropriate.

7. It shall be the responsibility of the competent governmental authorities of the exporting beneficiary country to ensure that certificates and applications are duly completed.

8. The completion of box 2 of the certificate of origin form A shall be optional. In consequence, box 12 shall be duly completed by indicating 'European Economic Community' or one of the Member States. However, in the case of application of the transit procedure referred to in Article 75 (1) (c) and Article 80, one of the countries referred to in the latter Article as the importing country should be mentioned instead, as provided for in the last subparagraph of Article 83 (3).

9. The date of issue of the certificate of origin form A shall be indicated in box 11. The signature to be entered in that box, which is reserved for the certifying authority, shall be handwritten.

10. A certificate of origin form A shall be issued by the competent authorities of the exporting beneficiary country when the products to which it relates are exported. It shall be made available to the exporter as soon as exportation is actually carried out or when it is certain that it will be carried out.

Article 79

Since the certificate of origin form A constitutes the documentary evidence for the application of the provisions concerning tariff preferences, referred to in Article 66, it shall be the responsibility of the competent governmental authority of the exporting country to take any steps necessary to verify the origin of the products and to check the other statements on the certificate.

Article 80

Originating products within the meaning of this section shall be eligible on importation into the Community to benefit from tariff preferences referred to in Article 66 on production of a certificate of origin form A issued by the customs authorities of Austria, Finland, Norway,

Sweden or Switzerland on the basis of a certificate of origin form A issued by the competent authorities of the exporting beneficiary country provided that the conditions laid down in Article 75 have been fulfilled and provided that Austria, Finland, Norway, Sweden or Switzerland assists the Community by allowing its customs authorities to verify the authenticity and accuracy of the certificates of origin form A. The verification procedure laid down in Article 95 shall apply *mutatis mutandis*. The time limit laid down in the first subparagraph of Article 95 (3) shall be extended to eight months.

Article 81

1. In exceptional cases a certificate of origin form A may be issued after the actual exportation of the products to which it relates, if it was not issued at the time of exportation as a result of involuntary errors or omissions or other special circumstances, and provided that the goods were not exported before the communication to the Commission of the European Communities of the information required by Article 93.

2. The competent governmental authority may issue a certificate retrospectively only after verifying that the particulars contained in the exporter's application agree with those contained in the corresponding export documents and that no certificate of origin form A was issued when the products in question were exported.

3. Box 4 of certificates of origin form A issued retrospectively shall bear the endorsement 'Délivré a posteriori' or 'issued retrospectively'.

Article 82

1. In the event of the theft, loss or destruction of a certificate of origin form A, the exporter may apply to the competent governmental authority which issued it for a duplicate to be made out on the basis of the export documents in their possession. Box 4 of the duplicate form A issued in this way shall be endorsed: 'Duplicata' or 'Duplicate', together with the date of issue and the serial number of the original certificate.

2. For the purposes of Article 85 the duplicate shall take effect from the date of the original.

Article 83

1. It shall at any time be possible to replace one or more certificates of origin form A by one or more other such certificates, provided that this is done by the customs authorities in the Community responsible for controlling the products.

2. The replacement certificate issued under this Article or Article 80 shall be regarded as a definitive certificate of origin for the products referred to. The replacement certificate shall be issued on the basis of a written request by the re-exporter.

3. The replacement certificate shall indicate in the top right-hand box the name of the intermediary country where it is issued.

Box 4 shall contain one of the following endorsements: 'replacement certificate' or 'certificat de remplacement', as well as the date of the original certificate of origin and its serial number.

The name of the re-exporter shall be given in box 1.

The name of the final consignee may be given in box 2.

References to the re-exporter's invoice should be given in box 10.

Particulars from the original certificate relating to the re-exported products shall be entered in boxes 3 to 9.

The authority which issued the replacement certificate shall enter its certification in box 11. The responsibility of the authority is confined to the issue of the replacement certificate.

The entries in box 12 concerning the country of origin and the country of destination shall be taken from the original certificate. This box shall be signed by the re-exporter. A re-exporter who signs this box in good faith is not responsible for the correctness of the entries made on the original certificate.

4. The customs office which is requested to perform the operation shall note on the original certificate the weights, numbers and nature of the goods forwarded and indicate thereon the serial numbers of the corresponding replacement certificate or certificates. The original certificate shall be kept for at least two years by the customs office concerned.

5. A photocopy of the original certificate may be annexed to the replacement certificate.

Article 84

1. Subject to the provisions of paragraph (4) below the certificate of authenticity provided for in Article 1 (4) of Council Regulation (EEC) No 3833/90⁽¹⁾ shall be given in box 7 of the certificate of origin form A, provided for in Article 78.

2. The certificate mentioned in paragraph 1 shall consist of the description of the goods as set out in paragraph 3 below followed by the stamp of the competent governmental authority, with the handwritten signature of the official authorized to certify the authenticity of the description of the goods given in box 7.

3. The description of the goods in box 7 of the certificate of origin shall be as follows, according to the product concerned:

- 'unmanufactured flue-cured tobacco Virginia type' or 'tabac brut ou non-fabriqu  du type Virginia "flue-cured"',
- 'agave brandy "tequila", in containers holding two litres or less' or 'eau-de-vie d'agave "tequila" en r cipients contenant deux litres ou moins',
- 'spirits produced from grapes, called "Pisco" in containers holding two litres or less' or 'eau-de-vie   base de raisins, appliqu e "Pisco" en r cipients contenant deux litres ou moins',
- 'spirit produced from grapes, called "Singani" in containers holding two litres or less' or 'eau-de-vie   base de raisins, appel e "Singani" en r cipients contenant deux litres ou moins'.

4. By way of derogation from paragraphs 1 and 2 above, and without prejudice to paragraph 3, the stamp of the authorities competent to certify the authenticity of the description of the goods set out in paragraph 3 shall not be placed in box 7 of the certificate of origin form A if the authority empowered to issue the certificate of origin is the governmental authority empowered to issue the certificate of authenticity.

Article 85

1. A certificate of origin form A shall be submitted within 10 months of the date of issue by the governmental authorities of the exporting beneficiary country, to the customs authorities of the importing Member State where the products are presented.

2. Certificates of origin form A presented to the customs authorities after expiry of the period of validity stipulated in paragraph 1 may be accepted for the purpose of applying the tariff preferences specified in Article 66 where the failure to observe this period is due to *force majeure* or to exceptional circumstances.

3. Customs may also accept such certificates where the products have been presented to them before expiry of the said time limit.

Article 86

1. Products sent from a beneficiary country for exhibition in another country and sold for importation into the Community shall benefit on importation from the tariff preferences referred to in Article 66 on condition that the products meet the requirements of this section entitling them to be recognized as originating in the exporting beneficiary country and provided that it is shown to the satisfaction of the customs authorities that:

- (a) an exporter has consigned the products from the territory of the exporting beneficiary country direct to the country in which the exhibition is held;

⁽¹⁾ OJ No L 370, 31. 12. 1990, p. 86.

- (b) the products have been sold or otherwise disposed of by that exporter to a person in the Community;
- (c) the products have been consigned to the Community in the state in which they were sent for exhibition;
- (d) the products have not, since they were consigned for exhibition, been used for any purpose other than demonstration at the exhibition.

2. A certificate of origin form A shall be produced to the customs authorities in the normal manner. The name and address of the exhibition shall be indicated thereon. Where necessary, additional documentary evidence of the nature of the products and the conditions under which they have been exhibited may be required.

3. Paragraph 1 shall apply to any trade, industrial, agricultural or crafts exhibition, fair or similar public show or display which is not organized for private purposes in shops or business premises with a view to the sale of foreign products, and during which the products remain under the supervision of the customs authorities.

Article 87

The certificate of origin form A shall be presented to the customs authorities of the Member State of importation in support of the customs declaration. They may also require the declaration for release for free circulation to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the tariff preferences referred to in Article 66.

Article 88

Without prejudice to Article 68 (3), where an unassembled or disassembled article falling within Chapter 84 or 85 of the Harmonized System is imported in several consignments on the conditions laid down by the customs authorities, at the request of the person declaring the goods to customs, it shall be considered to be a single article and a certificate of origin form A may be submitted for the whole article upon importation of the first consignment.

(b) *Form APR*

Article 89

1. Notwithstanding Article 78, in the case of products which form the subject of postal consignments (including parcels), evidence of originating status within the meaning of this Regulation shall be supplied by form APR, a specimen of which is in Annex 18, provided that they consist only of originating products and that the value does not exceed ECU 3 000 per consignment, and on condition that the assistance specified in Article 78 (1) is forthcoming in respect of the said form.

2. Form APR shall be completed and signed by the exporter or, on his responsibility, by his authorized representative. The signature in box 6 of the form shall be handwritten.

3. A form APR shall be completed for each postal consignment. After completing and signing the form the exporter shall, in the case of consignments by parcel post, attach it to the dispatch note. In the case of consignment by letter post, the exporter shall insert the form inside the package.

4. If the goods contained in the consignment have already been subject to verification in the exporting country concerning the concept of 'originating products', the exporter may refer to this check in box 7 'Remarks' on form APR.

5. These provisions do not exempt exporters from complying with any other formalities required by customs or postal regulations.

6. Articles 85 and 87 shall apply to forms APR *mutatis mutandis*.

(c) *Other provisions concerning proof of origin*

Article 90

Products sent as small packages by private persons to private persons or contained in travellers' personal luggage shall be admitted as originating products benefiting from the tariff preferences referred to in Article 66 without requiring the production of a certificate of origin form A or the completion of a form APR, provided that such imports are of a non-commercial nature and have been declared as meeting the conditions required for the application of that Article, and where there is no doubt as to the veracity of such declaration.

The total value of these products must not exceed ECU 215 in the case of small packages or ECU 600 in the case of the contents of travellers' personal luggage.

Article 91

1. When Article 70 is applied, proof of the originating status of products exported from a country of a regional group to another country of the same group to be used in further working or processing, or to be re-exported where no further working or processing takes place, shall be established by a certificate of origin form A or a form APR issued or made out in the first country.

2. The authorities of the beneficiary country responsible for issuing a certificate of origin form A for products in the manufacture of which products originating in another member of the same regional group are used, shall take into consideration the certificate of

origin form A issued by the competent authorities of that other country or form APR made out there. The country of origin determined in accordance with Article 71 shall be entered in box 12 of the certificates of origin form A or box 8 of form APR.

3. Certificates of origin form A issued in this way must bear the endorsement 'cumul regional' or 'regional cumulation' in box 4.

Article 92

The discovery of slight discrepancies between the statements made in the certificate and those made in the documents produced to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the certificate null and void, provided it is duly established that the certificate corresponds to the products presented.

Subsection 3

Methods of administrative cooperation

Article 93

1. The beneficiary countries shall inform the Commission of the European Communities of the names and addresses of the governmental authorities who may issue certificates of origin form A, together with specimens of stamps used by these authorities and the name and address of the governmental authorities responsible for carrying out verifications of forms A and forms APR.

2. The beneficiary countries shall also inform the Commission of the European Communities of the names and addresses of the governmental authorities who may issue the certificates of authenticity mentioned in Article 84, together with specimens of the stamp they use.

3. The Commission shall forward this information to the customs authorities of the Member States.

Article 94

For the purposes of the provisions concerning tariff preferences specified in Article 66, every beneficiary country shall comply or ensure compliance with the rules concerning the completion and issue of certificates of origin form A, the conditions for the use of form APR and those concerning administrative cooperation.

Article 95

1. Subsequent verifications of certificates of origin form A and forms APR shall be carried out at random or whenever the customs authorities have reasonable doubt as to the authenticity of the document or as to the accuracy of the information regarding the true origin of the products in question.

2. For the purposes of paragraph 1, the customs authorities shall return the certificate of origin form A or the form APR to the competent governmental authority in the exporting beneficiary country, giving where appropriate the reasons of form or substance for an inquiry. If the invoice has been submitted, such invoice or a copy thereof shall be attached to form APR. The customs authorities shall also forward any information that has been obtained suggesting that the particulars given on the said certificate or the said form are inaccurate.

If the authorities concerned decide to suspend the tariff preferences referred to in Article 66 pending the results of the verification, they shall grant release of the products subject to any precautionary measures judged necessary.

3. When an application for subsequent verification has been made in accordance with the provisions of paragraph 1, such verification shall be carried out and its results communicated to the customs authorities in the Community within a maximum of six months. The results shall make it possible to determine whether the certificate of origin form A or the form APR in question applies to the products actually exported and whether these products were in fact eligible to benefit from the tariff preferences referred to in Article 66.

4. In the case of certificates of origin form A issued in accordance with Article 91, the reply shall include the references of the certificates of origin form A or forms APR taken into consideration.

5. If in cases of reasonable doubt there is no reply within the six months specified in paragraph 3 or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, a second communication shall be sent to the competent authorities. If after the second communication, the results of the verification are not communicated to the requesting authorities within four months, or if these results do not allow the authenticity of the document in question or the real origin of the products to be determined, those authorities shall, except in the case of force majeure or in exceptional circumstances, refuse entitlement to the generalized preferences.

6. Where the verification procedure or any other available information appears to indicate that the provisions of this section are being contravened, the exporting beneficiary country on its own initiative or at the request of the Community shall carry out appropriate enquiries or arrange for such enquiries to be carried out with due urgency to identify and prevent such contraventions and for this purpose the beneficiary country concerned may invite the participation of the Community in these enquiries.

7. For the purpose of subsequent verification of certificates of origin form A, copies of the certificates as well as any export documents referring to them shall be kept for at least two years by the competent governmental authority in the exporting beneficiary country.

Article 96

The provisions of Article 75 (1) (c) and Article 80 are applicable only in so far as, in the context of the tariff preferences given by Austria, Finland, Norway, Sweden and Switzerland to certain products originating in developing countries, these countries apply provisions similar to those mentioned above.

Subsection 4

Final provision

Article 97

Without prejudice to Article 87, certificates of origin form A together with documentary evidence of direct transport may be produced for a period of six months from the date on which a country or territory is admitted or readmitted as a GSP beneficiary, in respect of products referred to in the Council regulations and ECSC decisions for the year in question, which are either in transit or being held in the Community in temporary storage, under the customs warehousing procedure or in a free zone or free warehouse.

Section 2

Occupied Territories

Subsection 1

Definition of the concept of originating products

Article 98

1. For the purposes of the provisions concerning tariff preferences granted by the Community to certain products originating in the Occupied Territories, the following products, on condition that they were transported direct within the meaning of Article 103, shall be considered as:

(a) products originating in the Occupied Territories:

(i) products wholly obtained in those territories;

(ii) products obtained in those territories, in the manufacture of which products other than those wholly obtained in these territories are used, provided that the said products have undergone sufficient working or processing within the meaning of Article 100. This condition shall not apply, however, to products which, within the meaning of this subsection, originate in the Community;

(b) products originating in the Community:

(i) products wholly obtained in the Community;

(ii) products obtained in the Community, in the manufacture of which products other than those wholly obtained in the Community are used, provided that the said products have undergone sufficient working or processing within the meaning of Article 100. This condition shall not apply, however, to products which, within the meaning of this subsection, originate in the Occupied Territories.

2. The term 'Occupied Territories' shall cover the West Bank of the River Jordan and the Gaza Strip, both occupied by Israel.

Article 99

The following shall be considered as wholly obtained in the Occupied Territories:

(a) mineral products extracted from their soil or from their seabed;

(b) vegetable products harvested there;

(c) live animals born and raised there;

(d) products from live animals raised there;

(e) products obtained by hunting or fishing conducted there;

(f) used articles collected there fit only for the recovery of raw materials;

(g) waste and scrap resulting from manufacturing operations conducted therein;

(h) products extracted from marine soil or subsoil outside their territorial waters, provided that the territory concerned has sole rights to work that soil or subsoil;

(i) goods produced there exclusively from the products specified in subparagraphs (a) to (h).

Article 100

1. For the purposes of Article 98 (1) (a) (ii), and (b) (ii), non-originating materials shall be considered to have been sufficiently worked or processed when the product obtained is classified in a heading different from those in which all the non-originating materials used in its manufacture are classified, subject to paragraphs 2 and 3.

The second, third and fourth subparagraphs of Article 68 (1) shall apply.

2. For a product mentioned in columns 1 and 2 of the list in Annex 19, the conditions set out in column 3 for the product concerned must be fulfilled instead of the rule in paragraph 1.

- (a) The term 'value' in the list in Annex 19 shall mean the customs value at the time of the import of the non-originating materials used or, if this is not known and cannot be ascertained, the first ascertainable price paid for those materials in the territory concerned.

Where the value of the originating materials used needs to be established, the preceding subparagraph shall be applied *mutatis mutandis*.

- (b) The term 'ex-works price' in the list in Annex 19 shall mean the price paid to the manufacturer in whose undertaking the last working or processing is carried out, provided the price includes the value of all the materials used in manufacture, minus any internal taxes which are, or may be, repaid when the product obtained is exported.

3. For the purposes of Article 98 (1) (a) (ii) and (b) (ii), the operations referred to in Article 68 (3) (a) to (h) shall be considered as insufficient working or processing to confer the status of originating products, whether or not there is a change of heading.

Article 101

In order to determine whether goods originate in the Occupied Territories, it shall not be necessary to establish whether the electrical power, fuel, plant and equipment, and machines and tools used to obtain such goods or any materials or products used in the course of production which do not enter and which were not intended to enter into the final composition of the goods originate in third countries or not.

Article 102

The provisions of Articles 73 and 74 shall apply to this section.

Article 103

1. The following shall be considered as transported direct from the Occupied Territories to the Community and from the Community to the Occupied Territories:

- (a) products transported without passing through another territory;
- (b) products transported through territories other than the Occupied Territories or the Community, with or without transshipment or temporary warehousing, provided that transport through those territories is justified for geographical reasons or exclusively on account of transport requirements and that the products:

— have not been released for home use there, and

— have not undergone operations other than unloading, reloading and any operation intended to keep them in good condition;

- (c) products which are transported by pipeline across territories other than that of the Occupied Territories.

2. Evidence that the conditions specified in paragraph 1 (b) have been fulfilled shall be supplied to the customs authorities in the Community or to the Chambers of Commerce of the Occupied Territories by the production of:

- (a) a single transport document drawn up in the Occupied Territories or in the Community covering the passage through the country of transit; or

- (b) a certification by the customs authorities of the country of transit:

— giving an exact description of the products,

— stating the dates of unloading and reloading of the products or of their embarkation or disembarkation, identifying the ships used,

— certifying the conditions under which the goods remained in the transit country; or

- (c) failing these, any substantiating documents.

Article 104

The conditions set out in this subsection concerning the acquisition of originating status shall be fulfilled without interruption in the Community or the Occupied Territories.

If originating products exported from the Community or the Occupied Territories to another country are returned, they must be considered as non-originating unless it can be demonstrated to the satisfaction of the competent authorities that:

— the goods returned are the same goods as those exported, and

— they have not undergone any operation beyond that necessary to preserve them in good condition while in that country.

Subsection 2

Proof of origin

- (a) *Movement certificate EUR.1*

Article 105

Evidence of originating status, within the meaning of this section, shall be given by a movement certificate EUR.1, a specimen of which appears in Annex 21.

Article 106

1. A movement certificate EUR.1 shall be issued on written application by the exporter or, under the exporter's responsibility, his authorized representative. Such application shall be made on a form, a specimen of which appears in Annex 21, which shall be completed in accordance with the provision of this subsection.

Applications for movement certificates EUR.1 must be kept for at least two years by the Chambers of Commerce of the Occupied Territories.

2. The exporter or his representative shall submit with his request any appropriate supporting document proving that the products to be exported are such as to qualify for the issue of a movement certificate EUR.1.

He shall undertake to submit, at the request of the competent authorities, any supplementary evidence they may require for the purpose of establishing the correctness of the originating status of the products eligible for preferential treatment and shall undertake to agree to any inspection of his accounts and to any check on the circumstances in which the products were obtained by the said authorities.

3. A movement certificate EUR.1 may be issued only where it can serve as the documentary evidence required for the purposes of implementing the tariff preferences referred to in Article 98.

4. The movement certificate EUR.1 shall be issued by the Chambers of Commerce of the Occupied Territories or by the customs authorities of the exporting Member State, if the goods to be exported can be considered originating products within the meaning of this section.

5. Since the movement certificate EUR.1 constitutes the documentary evidence for the application of the preferential arrangements laid down, it shall be the responsibility of the Chambers of Commerce of the Occupied Territories or of the customs authorities of the exporting Member State to take any steps necessary to verify the origin of the goods and to check the other statements on the certificate.

6. For the purpose of verifying whether the conditions stated in paragraph 4 have been met, the Chambers of Commerce of the Occupied Territories or the customs authorities of the exporting Member State shall have the right to call for any documentary evidence or to carry out any check which they consider appropriate.

7. It shall be the responsibility of the Chambers of Commerce of the Occupied Territories or the customs authorities of the exporting Member State to ensure that the forms referred to in paragraph 1 are duly completed. In particular, they shall check whether the space reserved for the description of the products has been completed in such a manner as to exclude all possibility of fraudulent additions. To this end, the description of the products shall be indicated without leaving any blank lines. Where the space is not completely filled a horizontal line shall

be drawn below the last line of the description, the empty space being crossed through.

8. The date of issue of the movement certificate must be indicated in the part of the certificate reserved for the customs authorities.

9. A movement certificate EUR.1 shall be issued by the Chambers of Commerce of the Occupied Territories or by the customs authorities of the exporting Member State when the products to which it relates are exported. It shall be made available to the exporter as soon as export has actually been carried out or ensured.

Article 116

The discovery of slight discrepancies between the statements made in the movement certificate EUR.1 or in the form EUR.2 and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the materials shall not *ipso facto* render the document null and void if it is duly established that the movement certificate EUR.1 or the form EUR.2 does correspond to the goods presented.

3. For the purposes of paragraph 1, the customs authorities of the importing Member State or territory shall return the EUR.1 certificate or form EUR.2 or a copy thereof to the Chambers of Commerce of the Occupied Territories or to the customs authorities of the exporting Member State, giving, where appropriate, the reasons of substance or form for an inquiry.

The requesting authorities shall attach the relevant commercial documents or a copy thereof to the EUR.1 certificate or form EUR.2 and shall forward, in support of the request for a subsequent verification, any documents and information that have been obtained suggesting that the particulars given on the said certificate or the said form are inaccurate.

4. The customs authorities in the importing Member State or the Chambers of Commerce of the Occupied Territories shall be informed of the results of the verification within six months. Section 3

Republics of Bosnia-Herzegovina, Croatia, Slovenia and the territory of the former Yugoslav Republic of Macedonia

Subsection 1

Definition of the concept of originating products

Article 120

For the purposes of the provisions concerning tariff preferences granted by the Community to certain products originating in the Republics of Bosnia-Herzegovina, Croatia, Slovenia and the territory of the former Yugoslav Republic of Macedonia, hereinafter referred to as a 'beneficiary Republic', the following products, on condition that they were transported direct within the meaning of Article 125, shall be considered as:

1. products originating in a beneficiary Republic:
 - (a) products wholly obtained in a beneficiary Republic;
 - (b) products obtained in a beneficiary Republic in the manufacture of which products other than those wholly obtained in that Republic are used, provided that the said products have undergone sufficient working or processing within the meaning of Article 122. This condition shall not apply, however, to products which, within the meaning of this subsection, originate in the Community, providing they have undergone, in the beneficiary Republic concerned, working or processing exceeding the insufficient working or processing referred to in Article 122 (3);
2. products originating in the Community:
 - (a) products wholly obtained in the Community;
 - (b) products obtained in the Community, in the manufacture of which products other than those wholly obtained in the Community are used, provided that the said products have undergone sufficient working or processing within the meaning of Article 122. This condition shall not apply, however, to products which, within the meaning of this subsection originate in a beneficiary Republic, providing they have undergone, in the Community, working or

processing exceeding the insufficient working or processing referred to in Article 122 (3).

Article 121

1. The items referred to in Article 67 (1) (a) to (k) shall be considered as wholly obtained either in a beneficiary Republic or in the Community.

2. The term 'its vessels' in Article 67 (1) (f) shall apply only to vessels:

— which are registered or recorded in a Member State or in the beneficiary Republic concerned,

— which sail under the flag of a Member State or of the beneficiary Republic concerned,

— which are at least 50 %-owned by nationals of the Member States or the beneficiary Republic concerned or by a company with its head office in a Member State or in a beneficiary Republic, of which the manager, managers, Chairman of the board of directors or of the supervisory board, and the majority of the members of such a board, are nationals of the Member States or the beneficiary Republic and of which in addition, in the case of partnerships or limited companies, at least half the capital belongs to the Member States or the beneficiary Republic concerned or to public bodies or nationals of the Member States or of a beneficiary Republic,

— of which the captain and officers are all nationals of the Member States or of the beneficiary Republic concerned, and

— of which at least 75 % of the crew are nationals of the Member States or of the beneficiary Republic concerned.

3. The terms 'Community' and 'beneficiary Republic' shall also cover their territorial waters. Sea-going vessels, including factory ships, on which the fish caught is worked or processed, shall be considered as part of the territory of the State to which they belong, provided that they satisfy the conditions set out in paragraph 2.

Article 122

1. For the purposes of Article 120, non-originating materials shall be considered to be sufficiently worked or processed when the product obtained is classified in a heading different from those in which all the non-originating materials used in its manufacture are classified, subject to the provisions of paragraphs 2 and 3.

The provisions of the second, third and fourth subparagraphs of Article 68 (1) shall apply.

2. For a product mentioned in columns 1 and 2 of the list in Annex 20, the conditions set out in column 3 for the product concerned must be fulfilled instead of the rule in paragraph 1.

(a) Where in the list in Annex 20 a percentage rule is applied in determining the originating status of a product obtained in the Community or in a beneficiary Republic, the value added by the working or processing shall correspond to the ex-works price of the product obtained, less the customs value of third-country materials imported into the Community or a beneficiary Republic.

(b) The term 'value' in the list in Annex 20 shall mean the customs value at the time of the import of the non-originating materials used or, if this is not known and cannot be ascertained, the first ascertainable price paid for the materials in the territory concerned.

Where the value of the originating materials used needs to be established, the preceding subparagraph shall be applied *mutatis mutandis*.

(c) The term 'ex-works price' in the list in Annex 20 shall mean the price paid for the product to the manufacturer in whose undertaking the last working or processing is carried out, provided the price includes the value of all the materials used in manufacture, minus any internal taxes which are, or may be, repaid when the product obtained is exported.

3. For the purposes of paragraphs 1 and 2, the operations referred to in Article 68 (3) (a) to (h) shall be considered as insufficient working or processing to confer the status of originating products, whether or not there is a change of heading.

Article 123

In order to determine whether goods originate in a beneficiary Republic or in the Community it shall not be necessary to establish whether the electrical power, fuel, plant and equipment, and machines and tools used to obtain such goods or any materials or products used in the course of production which do not enter and which were not intended to enter into the final composition of the goods originate in third countries or not.

Article 124

The provisions of Articles 73 and 74 shall apply to this section.

Article 125

1. The tariff preferences referred to in Article 120 shall apply only to originating products or materials which are transported between the territory of a beneficiary Republic and that of the Community without entering any other territory. However, goods originating in a beneficiary Republic or in the Community and constituting a single consignment may be transported through territory other than that of a beneficiary Republic or the Community with or without transshipment or temporary warehousing in such territory, provided that the goods have remained under the supervision of the customs authorities in the country of transit or of warehousing, and have not undergone operations other than unloading, reloading or any other operation designed to preserve them in good condition.

Products originating in the beneficiary Republic or in the Community may be transported by pipeline across territory other than that of the Community or of the beneficiary Republic.

2. Evidence that the conditions referred to in paragraph 1 have been fulfilled shall be supplied to the competent customs authorities by the production of:

(a) a single transport document issued in the exporting country or territory covering the passage through the country of transit; or

(b) a certificate issued by the customs authorities of the country of transit:

— giving an exact description of the goods,

— stating the dates of unloading and reloading of the goods or of their embarkation or disembarkation, identifying the ships used,

— certifying the conditions under which the goods remained in the transit country; or

(c) failing these, any substantiating documents.

Article 126

The conditions set out in this subsection concerning the acquisition of originating status shall be fulfilled without interruption in the Community or a beneficiary Republic.

If originating goods exported from the Community or a beneficiary Republic to another country are returned, they shall be considered as non-originating unless it can be demonstrated to the satisfaction of the customs authorities that:

— the goods returned are the same goods as those exported, and

— they have not undergone any operation beyond that necessary to preserve them in good condition while in that country.

Subsection 2

5. In cases where the goods are considered originating products within the meaning of Article 120 (1) (b), last sentence, or (2) (b), last sentence, the movement certificates EUR.1 shall be issued subject to the presentation of the proof of origin previously issued or made out. This proof of origin must be kept for at least two years by the customs authorities of the exporting Member State or beneficiary Republic.

6. Since the movement certificate EUR.1 constitutes the documentary evidence for the application of the tariff preferences referred to in Article 120, it shall be the responsibility of the customs authorities of the exporting Member State or beneficiary Republic to take any steps necessary to verify the origin of the goods and to check the other statements on the certificate.

7. For the purpose of verifying whether the conditions stated in paragraphs 4 and 5 have been met, the customs authorities of the exporting Member State or beneficiary Republic shall have the right to call for any documentary

evidence or to carry out any check which they consider appropriate.

8. It shall be the responsibility of the customs authorities of the exporting Member State or beneficiary Republic to ensure that the form referred to in Article 127 is duly completed. In particular, they shall check whether the space reserved for the description of the products has been completed in such a manner as to exclude all possibility of fraudulent additions. To this end, the description of the products must be indicated without leaving any blank lines. Where the space is not completely filled a horizontal line must be drawn below the last line of the description, the empty space being crossed through.

10. A movement certificate EUR.1 shall be issued by the customs authorities of the exporting Member State or beneficiary Republic when the products to which it relates are exported. It shall be made available to the exporter as soon as export has actually been carried out or ensured.

2. A movement certificate EUR.1 which is submitted to the customs authorities of the importing Member State or beneficiary Republic after the final date of presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit the certificate by the final date set is due to force majeure or exceptional circumstances.

3. In other cases of belated presentation, the customs authorities of the importing Member State or beneficiary Republic may accept the certificates where the products have been submitted to them before the said final date.

Article 131

1. Products sent from the Community or from a beneficiary Republic for exhibition in another country and sold after the exhibition for importation into the Community shall benefit on importation from the tariff preferences referred to in Article 120 on condition that the goods meet the requirements of subsection 1 entitling them to be recognized as originating in the Community or in a beneficiary Republic and provided that it is shown to the satisfaction of the customs authorities that:

They may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the tariff preferences referred to in Article 120.

Article 133

Without prejudice to Article 122 (3), where, at the request of the declarant, an unassembled or disassembled article falling within Chapter 84 and 85 of the Harmonized System is imported in several consignments on the conditions laid down by the customs authorities, it shall be considered to be a single article and a movement certificate may be submitted for the whole article upon import of the first consignment.

Article 134

Movement certificates EUR.1 shall be kept by the customs authorities of the importing Member State or beneficiary Republic in accordance with the rules in force in the Community or that beneficiary Republic.

2. Form EUR.2 shall be completed and signed by the exporter or, under the exporter's responsibility, by his authorized representative. If the goods contained in the consignment have already been subject to verification in the exporting Member State or territory by reference to the definition of the concept of originating products, the exporter may refer to this check in the 'remarks' box of form EUR.2.

3. A form EUR.2 shall be completed for each consignment.

4. These provisions do not exempt exporters from complying with any other formalities required by customs or postal regulations.

5. The exporter who made out the form EUR.2 shall submit at the request of the customs authorities of the exporting Member State or beneficiary Republic all supporting documents concerning the use of this form.

Article 136

2. The Commission and the Member States shall consult within the Committee concerning the application of paragraph 1.

Article 145

Where goods declared for free circulation are part of a larger quantity of the same goods purchased in one transaction, the price actually paid or payable for the purposes of Article 29 (1) of the Code shall be that price represented by the proportion of the total price which the quantity so declared bears to the total quantity purchased.

Apportioning the price actually paid or payable shall also apply in the case of the loss of part of a consignment or when the goods being valued have been damaged before entry into free circulation.

Article 146

Where the price actually paid or payable for the purposes of Article 29 (1) of the Code includes an amount in respect of any internal tax applicable within the country of origin or export in respect of the goods in question, the said amount shall not be incorporated in the customs value provided that it can be demonstrated to the satisfaction of the customs authorities concerned that the goods in question have been or will be relieved therefrom for the benefit of the buyer.

Article 147

1. For the purposes of Article 29 of the Code, the fact that the goods which are the subject of a sale are declared for free circulation shall be regarded as adequate indication that they were sold for export to the customs territory of the Community. This indication

shall also apply in the case of successive sales before valuation; in such case each price resulting from these sales may, subject to the provisions of Articles 178 to 181, be taken as a basis for valuation.

2. However, where goods are used in a third country between the time of sale and the time of entry into free circulation the customs value need not be the transaction value.

3. The buyer need satisfy no condition other than that of being a party to the contract of sale.

Article 148

Where, in applying Article 29 (1) (b) of the Code, it is established that the sale or price of imported goods is subject to a condition or consideration the value of which can be determined with respect to the goods being valued, such value shall be regarded as an indirect payment by the buyer to the seller and part of the price actually paid or payable provided that the condition or consideration does not relate to either:

- (a) an activity to which Article 29 (3) (b) of the Code applies; or
- (b) a factor in respect of which an addition is to be made to the price actually paid or payable under the provisions of Article 32 of the Code.

Article 149

1. For the purposes of Article 29 (3) (b) of the Code, the term 'marketing activities' means all activities relating to advertising and promoting the sale of the goods in question and all activities relating to warranties or guarantees in respect of them.

2. Such activities undertaken by the buyer shall be regarded as having been undertaken on his own account even if they are performed in pursuance of an obligation on the buyer following an agreement with the seller.

Article 150

1. In applying Article 30 (2) (a) of the Code (the transaction value of identical goods), the customs value shall be determined by reference to the transaction value of identical goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued. Where no such sale is found, the transaction value of identical goods sold at a different commercial level and/or in different quantities, adjusted to take account of differences attributable to commercial level and/or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in the value.

2. Where the costs and charges referred to in Article 32 (1) (e) of the Code are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the identical goods in question arising from differences in distances and modes of transport.

3. If, in applying this Article, more than one transaction value of identical goods is found, the lowest such value shall be used to determine the customs value of the imported goods.

4. In applying this Article, a transaction value for goods produced by a different person shall be taken into account only when no transaction value can be found under paragraph 1 for identical goods produced by the same person as the goods being valued.

5. For the purposes of this Article, the transaction value of identical imported goods means a customs value previously determined under Article 29 of the Code, adjusted as provided for in paragraphs 1 (b) and 2 of this Article.

Article 151

1. In applying Article 30 (2) (b) of the Code (the transaction value of similar goods), the customs value shall be determined by reference to the transaction value of similar goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued. Where no such sale is found, the transaction value of similar goods sold at a different commercial level and/or in different quantities, adjusted to take account of differences attributable to commercial level and/or to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in the value.

2. Where the costs and charges referred to in Article 32 (1) (e) of the Code are included in the transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the similar goods in question arising from differences in distances and modes of transport.

3. If, in applying this Article, more than one transaction value of similar goods is found, the lowest such value shall be used to determine the customs value for the imported goods.

4. In applying this Article, a transaction value for goods produced by a different person shall be taken into

account only when no transaction value can be found under paragraph 1 for similar goods produced by the same person as the goods being valued.

5. For the purposes of this Article, the transaction value of similar imported goods means a customs value previously determined under Article 29 of the Code, adjusted as provided for in paragraphs 1 (b) and 2 of this Article.

Article 152

1. (a) If the imported goods or identical or similar imported goods are sold in the Community in the condition as imported, the customs value of imported goods, determined in accordance with Article 30 (2) (c) of the Code, shall be based on the unit price at which the imported goods or identical or similar imported goods are so sold in the greatest aggregate quantity, at or about the time of the importation of the goods being valued, to persons who are not related to the persons from whom they buy such goods, subject to deductions for the following:

- (i) either the commissions usually paid or agreed to be paid or the additions usually made for profit and general expenses (including the direct and indirect costs of marketing the goods in question) in connection with sales in the Community of imported goods of the same class or kind;
- (ii) the usual costs of transport and insurance and associated costs incurred within the Community;
- (iii) the import duties and other charges payable in the Community by reason of the importation or sale of the goods.

(b) If neither the imported goods nor identical nor similar imported goods are sold at or about the time of importation of the goods being valued, the customs value of imported goods determined under this Article shall, subject otherwise to the provisions of paragraph 1 (a), be based on the unit price at which the imported goods or identical or similar imported goods are sold in the Community in the condition as imported at the earliest date after the importation of the goods being valued but before the expiration of 90 days after such importation.

2. If neither the imported goods nor identical nor similar imported goods are sold in the Community in the condition as imported, then, if the importer so requests, the customs value shall be based on the unit price at which the imported goods, after further processing, are sold in the greatest aggregate quantity to persons in the

Community who are not related to the persons from whom they buy such goods, due allowance being made for the value added by such processing and the deductions provided for in paragraph 1 (a).

3. For the purposes of this Article, the unit price at which imported goods are sold in the greatest aggregate quantity is the price at which the greatest number of units is sold in sales to persons who are not related to the persons from whom they buy such goods at the first commercial level after importation at which such sales take place.

4. Any sale in the Community to a person who supplies directly or indirectly free of charge or at reduced cost for use in connection with the production and sale for export of the imported goods any of the elements specified in Article 32 (1) (b) of the Code should not be taken into account in establishing the unit price for the purposes of this Article.

5. For the purposes of paragraph 1 (b), the 'earliest date' shall be the date by which sales of the imported goods or of identical or similar imported goods are made in sufficient quantity to establish the unit price.

Article 153

1. In applying Article 30 (2) (d) of the Code (computed value), the customs authorities may not require or compel any person not resident in the Community to produce for examination, or to allow access to, any account or other record for the purposes of determining this value. However, information supplied by the producer of the goods for the purposes of determining the customs value under this Article may be verified in a non-Community country by the customs authorities of a Member State with the agreement of the producer and provided that such authorities give sufficient advance notice to the authorities of the country in question and the latter do not object to the investigation.

2. The cost or value of materials and fabrication referred to in the first indent of Article 30 (2) (d) of the Code shall include the cost of elements specified in Article 32 (1) (a) (ii) and (iii) of the Code.

It shall also include the value, duly apportioned, of any product or service specified in Article 32 (1) (b) of the Code which has been supplied directly or indirectly by the buyer for use in connection with the production of the imported goods. The value of the elements specified in Article 32 (1) (b) (iv) of the Code which are undertaken in the Community shall be included only to the extent that such elements are charged to the producer.

3. Where information other than that supplied by or on behalf of the producer is used for the purposes of

determining a computed value, the customs authorities shall inform the declarant, if the latter so requests, of the source of such information, the data used and the calculations based on such data, subject to Article 15 of the Code.

5. The 'general expenses' referred to in the second indent of Article 30 (2) (d) of the Code, cover the direct and indirect costs of producing and selling the goods for export which are not included under the first indent of Article 30 (2) (d) of the Code.

Article 154

Where containers referred to in Article 32 (1) (a) (ii) of the Code are to be the subject of repeated importations, their cost shall, at the request of the declarant, be apportioned, as appropriate, in accordance with generally accepted accounting principles.

Article 155

For the purposes of Article 32 (1) (b) (iv) of the Code, the cost of research and preliminary design sketches is not to be included in the customs value.

Article 156

Article 33 (c) of the Code shall apply *mutatis mutandis* where the customs value is determined by applying a method other than the transaction value.

CHAPTER 2

Provisions concerning royalties and licence fees

Article 157

1. For the purposes of Article 32 (1) (c) of the Code, royalties and licence fees shall be taken to mean in particular payment for the use of rights relating:

- to the manufacture of imported goods (in particular, patents, designs, models and manufacturing know-how), or
- to the sale for exportation of imported goods (in particular, trade marks, registered designs), or
- to the use or resale of imported goods (in particular, copyright, manufacturing processes inseparably embodied in the imported goods).

2. Without prejudice to Article 32 (5) of the Code, when the customs value of imported goods is determined under the provisions of Article 29 of the Code, a royalty or licence fee shall be added to the price actually paid or payable only when this payment:

- is related to the goods being valued, and
- constitutes a condition of sale of those goods.

Article 158

1. When the imported goods are only an ingredient or component of goods manufactured in the Community, an adjustment to the price actually paid or payable for the imported goods shall only be made when the royalty or licence fee relates to those goods.

2. Where goods are imported in an unassembled state or only have to undergo minor processing before resale, such as diluting or packing, this shall not prevent a royalty or licence fee from being considered related to the imported goods.

3. If royalties or licence fees relate partly to the imported goods and partly to other ingredients or component parts added to the goods after their importation, or to post-importation activities or services, an appropriate apportionment shall be made only on the basis of objective and quantifiable data, in accordance with the interpretative note to Article 32 (2) of the Code in Annex 23.

Article 159

A royalty or licence fee in respect of the right to use a trade mark is only to be added to the price actually paid or payable for the imported goods where:

- the royalty or licence fee refers to goods which are resold in the same state or which are subject only to minor processing after importation,
- the goods are marketed under the trade mark, affixed before or after importation, for which the royalty or licence fee is paid, and
- the buyer is not free to obtain such goods from other suppliers unrelated to the seller.

Article 160

When the buyer pays royalties or licence fees to a third party, the conditions provided for in Article 157 (2) shall not be considered as met unless the seller or a person related to him requires the buyer to make that payment.

Article 161

Where the method of calculation of the amount of a royalty or licence fee derives from the price of the imported goods, it may be assumed in the absence of evidence to the contrary that the payment of that royalty or licence fee is related to the goods to be valued.

However, where the amount of a royalty or licence fee is calculated regardless of the price of the imported goods, the payment of that royalty or licence fee may nevertheless be related to the goods to be valued.

Article 162

In applying Article 32 (1) (c) of the Code, the country of residence of the recipient of the payment of the royalty or licence fee shall not be a material consideration.

CHAPTER 3

Provisions concerning the place of introduction into the Community*Article 163*

1. For the purposes of Article 32 (1) (e) and Article 33 (a) of the Code, the place of introduction into the customs territory of the Community shall be:

- (a) for goods carried by sea, the port of unloading, or the port of transshipment, subject to transshipment being certified by the customs authorities of that port;
- (b) for goods carried by sea and then, without transshipment, by inland waterway, the first port where unloading can take place either at the mouth of the river or canal or further inland, subject to proof being furnished to the customs office that the freight to the port of unloading is higher than that to the first port;
- (c) for goods carried by rail, inland waterway, or road, the place where the first customs office is situated;
- (d) for goods carried by other means, the place where the land frontier of the customs territory of the Community is crossed.

2. The customs value of goods introduced into the customs territory of the Community and then carried to a destination in another part of that territory through the territories of Austria, Switzerland, Hungary, the Czech and Slovak Republics or Yugoslavia as it was on 1 January 1991 shall be determined by reference to the first place of introduction into the customs territory of the Community, provided the goods are carried direct through the territories of Austria, Switzerland, Hungary, the Czech and Slovak Republics or Yugoslavia as defined above by a usual route across such territory to the place of destination.

3. The customs value of goods introduced into the customs territory of the Community and then carried by sea to a destination in another part of that territory shall be determined by reference to the first place of introduction into the customs territory of the Community, provided the goods are carried direct by a usual route to the place of destination.

4. Paragraphs 2 and 3 of this Article shall also apply where the goods have been unloaded, transhipped or temporarily immobilized in the territories of Austria, Switzerland, Hungary, the Czech and Slovak Republics or Yugoslavia within the meaning of paragraph 2, for reasons relating solely to their transport.

5. For goods introduced into the customs territory of the Community and carried directly from one of the French overseas departments to another part of the customs territory of the Community or vice versa, the place of introduction to be taken into consideration shall be the place referred to in paragraphs 1 and 2 situated in that part of the customs territory of the Community from which the goods came, if they were unloaded or transhipped there and this was certified by the customs authorities.

6. When the conditions specified at paragraphs 2, 3 and 5 are not fulfilled, the place of introduction to be taken into consideration shall be the place specified in paragraph 1 situated in that part of the customs territory of the Community to which the goods are consigned.

CHAPTER 4

Provisions concerning transport costs

Article 164

In applying Article 32 (1) (e) and 33 (a) of the Code:

- (a) where goods are carried by the same mode of transport to a point beyond the place of introduction into the customs territory of the Community, transport costs shall be assessed in proportion to the distance covered outside and inside the customs territory of the Community, unless evidence is produced to the customs authorities to show the costs that would have been incurred under a general compulsory schedule of freight rates for the carriage of the goods to the place of introduction into the customs territory of the Community;
- (b) where goods are invoiced at a uniform free domicile price which corresponds to the price at the place of introduction, transport costs within the Community shall not be deducted from that price. However, such deduction shall be allowed if evidence is produced to the customs authorities that the free-frontier price would be lower than the uniform free domicile price;
- (c) where transport is free or provided by the buyer, transport costs to the place of introduction, calculated in accordance with the schedule of freight rates normally applied for the same modes of transport, shall be included in the customs value.

Article 165

1. All postal charges levied up to the place of destination in respect of goods sent by post shall be included in the customs value of these goods, with the exception of any supplementary postal charge levied in the country of importation.

2. No adjustment to the declared value shall, however, be made in respect of such charges in deter-

mining the value of consignments of a non-commercial nature.

3. Paragraphs 1 and 2 are not applicable to goods carried by the express postal services known as EMS-Datapost (in Denmark, EMS-Jetpost, in Germany, EMS-Kurierpostsendungen, in Italy, CAI-Post).

Article 166

The air transport costs to be included in the customs value of goods shall be determined by applying the rules and percentages shown in Annex 25.

CHAPTER 5

Valuation of certain carrier media for use in ADP equipment

Article 167

1. Notwithstanding Articles 29 to 33 of the Code, in determining the customs value of imported carrier media bearing data or instructions for use in data processing equipment, only the cost or value of the carrier medium itself shall be taken into account. The customs value of imported carrier media bearing data or instructions shall not, therefore, include the cost or value of the data or instructions, provided that such cost or value is distinguished from the cost or value of the carrier medium in question.

2. For the purposes of this Article:

- (a) the expression 'carrier medium' shall not be taken to include integrated circuits, semiconductors and similar devices or articles incorporating such circuits or devices;
- (b) the expression 'data or instructions' shall not be taken to include sound, cinematographic or video recordings.

CHAPTER 6

Provisions concerning rates of exchange

Article 168

For the purposes of Articles 169 to 171 of this chapter:

(a) 'rate recorded' shall mean:

- the latest selling rate of exchange recorded for commercial transactions on the most representative exchange market or markets of the Member State concerned, or
- some other description of a rate of exchange so recorded and designated by the Member State as the 'rate recorded' provided that it reflects as effectively as possible the current value of the currency in question in commercial transactions;

- (b) 'published' shall mean made generally known in a manner designated by the Member State concerned;
- (c) 'currency' shall mean any monetary unit used as a means of settlement between monetary authorities or on the international market.

Article 169

1. Where factors used to determine the customs value of goods are expressed at the time when that value is determined in a currency other than that of the Member State where the valuation is made, the rate of exchange to be used to determine that value in terms of the currency of the Member State concerned shall be the rate recorded on the second-last Wednesday of a month and published on that or the following day.

2. The rate recorded on the second-last Wednesday of a month shall be used during the following calendar month unless it is superseded by a rate established under Article 171.

3. Where a rate of exchange is not recorded on the second-last Wednesday indicated in paragraph 1, or, if recorded, is not published on that or the following day, the last rate recorded for the currency in question published within the preceding 14 days shall be deemed to be the rate recorded on that Wednesday.

Article 170

Where a rate of exchange cannot be established under the provisions of Article 169, the rate of exchange to be used for the application of Article 35 of the Code shall be designated by the Member State concerned and shall reflect as effectively as possible the current value of the currency in question in commercial transactions in terms of the currency of that Member State.

Article 171

1. Where a rate of exchange recorded on the last Wednesday of a month and published on that or the following day differs by 5 % or more from the rate established in accordance with Article 169 for entry into use the following month, it shall replace the latter rate from the first Wednesday of that month as the rate to be applied for the application of Article 35 of the Code.

2. Where in the course of a period of application as referred to in the preceding provisions, a rate of exchange recorded on a Wednesday and published on that or the following day differs by 5 % or more from the rate being used in accordance with this Chapter, it shall replace the latter rate and enter into use on the

Wednesday following as the rate to be used for the application of Article 35 of the Code. The replacement rate shall remain in use for the remainder of the current month, provided that this rate is not superseded due to operation of the provisions of the first sentence of this paragraph.

3. Where, in a Member State, a rate of exchange is not recorded on a Wednesday or, if recorded, is not published on that or the following day, the rate recorded shall, for the application in that Member State of paragraphs 1 and 2, be the rate most recently recorded and published prior to that Wednesday.

Article 172

When the customs authorities of a Member State authorize a declarant to furnish or supply at a later date certain details concerning the declaration for free circulation of the goods in the form of a periodic declaration, this authorization may, at the declarant's request, provide that a single rate be used for conversion into that Member State's currency of elements forming part of the customs value as expressed in a particular currency. In this case, the rate to be used shall be the rate, established in accordance with this Chapter, which is applicable on the first day of the period covered by the declaration in question.

CHAPTER 7

Simplified procedures for certain perishable goods

Article 173

1. For the purpose of determining the customs value of products referred to in Annex 26, the Commission shall establish for each classification heading a unit value per 100 kg net expressed in the currencies of the Member States.

The unit values shall apply for periods of 14 days, each period beginning on a Friday.

2. Unit values shall be established on the basis of the following elements, which are to be supplied to the Commission by Member States, in relation to each classification heading:

(a) the average free-at-frontier unit price, not cleared through customs, expressed in the currency of the Member State in question per 100 kg net and calculated on the basis of prices for undamaged goods in the marketing centres referred to in Annex 27 during the reference period referred to in Article 174 (1);

(b) the quantities entered into free circulation over the period of a calendar year with payment of import duties.

3. The average free-at-frontier unit price, not cleared through customs, shall be calculated on the basis of the

gross proceeds of sales made between importers and wholesalers. However, in the case of the London, Milan and Rungis marketing centres the gross proceeds shall be those recorded at the commercial level at which those goods are most commonly sold at those centres.

There shall be deducted from the figures so arrived at:

- a marketing margin of 15 % for the marketing centres of London, Milan and Rungis and of 8 % for the other marketing centres,
- costs of transport and insurance within the customs territory,
- a standard amount of ECU 5 representing all the other costs which are not to be included in the customs value.

This amount shall be converted into the currencies of the Member States on the basis of the latest rates in force established in accordance with Article 18 of the Code,

- import duties and other charges which are not to be included in the customs value.

4. The Member States may fix standard amounts for deduction in respect of transport and insurance costs in accordance with paragraph 3. Such standard amounts and the methods for calculating them shall be made known to the Commission immediately.

Article 174

1. The reference period for calculating the average unit prices referred to in Article 173 (2) (a) shall be the period of 14 days ending on the Thursday preceding the week during which new unit values are to be established.

2. Average unit prices shall be notified by Member States not later than 12 noon on the Monday of the week during which unit values are established pursuant to Article 173. If that day is a non-working day, notification shall be made on the working day immediately preceding that day.

3. The quantities entered into free circulation during a calendar year for each classification heading shall be notified to the Commission by all Member States before 15 June in the following year.

Article 175

1. The unit values referred to in Article 173 (1) shall be established by the Commission on alternate Tuesdays on the basis of the weighted average of the average unit prices referred to in Article 173 (2) (a) in relation to the quantities referred to in Article 173 (2) (b).

2. For the purpose of determining the weighted average, each average unit price as referred to in Article 173 (2) (a) shall be converted into ecu on the basis of the last conversion rates determined by the Commission and

published in the *Official Journal of the European Communities* prior to the week during which the unit values are to be established. The same conversion rates shall be applied in converting the unit values so obtained back into the currencies of the Member States.

3. The last published unit values shall remain applicable until new values are published. However, in the case of major fluctuations in price in one or more Member States, as a result, for example, of an interruption in the continuity of imports of a particular product, new unit values may be determined on the basis of actual prices at the time of fixing those values.

Article 176

1. Consignments which at the material time for valuation for customs purposes contain not less than 5 % of produce unfit in its unaltered state for human consumption or the value of which has depreciated by not less than 20 % in relation to average market prices for sound produce, shall be treated as damaged.

2. Consignments which are damaged may be valued:

- either, after sorting, by application of unit values to the sound portion, the damaged portion being destroyed under customs supervision, or

- by application of unit values established for the sound produce after deduction from the weight of the consignment of a percentage equal to the percentage assessed as damaged by a sworn expert and accepted by the customs authorities, or

- by application of unit values established for the sound produce reduced by the percentage assessed as damaged by a sworn expert and accepted by the customs authorities.

Article 177

1. In declaring or causing to be declared the customs value of one or more products which he imports by reference to the unit values established in accordance with this Chapter, the person concerned joins the simplified procedure system for the current calendar year in respect of the product or products in question.

2. If subsequently the person concerned requires the use of a method other than the simplified procedures for the customs valuation of one or more of the products he imports, the customs authorities of the Member State concerned shall be entitled to notify him that he will not be allowed to benefit from the simplified procedures for the remainder of the current calendar year in regard to the product or products concerned; this exclusion can be

extended for the following calendar year. Such notified exclusion shall be communicated without delay to the Commission, which shall in turn immediately inform the customs authorities of the other Member States.

CHAPTER 8

Declarations of particulars and documents to be furnished

Article 178

1. Where it is necessary to establish a customs value for the purposes of Articles 28 to 36 of the Code, a declaration of particulars relating to customs value (value declaration) shall accompany the customs entry made in respect of the imported goods. The value declaration shall be drawn up on a form D.V. 1 corresponding to the specimen in Annex 28, supplemented where appropriate by one or more forms D.V. 1 *bis* corresponding to the specimen in Annex 29.

2. It shall be a particular requirement that the value declaration prescribed in paragraph 1 shall be made only by a person who has his residence or place of business in the customs territory of the Community and is in possession of the relevant facts.

3. The customs authorities may waive the requirement of a declaration on the form referred to in paragraph 1 where the customs value of the goods in question cannot be determined under the provisions of Article 29 of the Code. In such cases the person referred to in paragraph 2 shall furnish or cause to be furnished to the customs authorities such other information as may be requested for the purposes of determining the customs value under another Article of the said Code; and such other information shall be supplied in such form and manner as may be prescribed by the customs authorities.

4. The lodging with a customs office of a declaration required by paragraph 1 shall, without prejudice to the possible application of penal provisions, be equivalent to the engagement of responsibility by the person referred to in paragraph 2 in respect of:

- the accuracy and completeness of the particulars given in the declaration,
- the authenticity of the documents produced in support of these particulars, and
- the supply of any additional information or document necessary to establish the customs value of the goods.

5. This Article shall not apply in respect of goods for which the customs value is determined under the simplified procedure system established in accordance with the provisions of Articles 173 to 177.

Article 179

1. Except where it is essential for the correct application of import duties, the customs authorities shall

waive the requirement of all or part of the declaration provided for in Article 178 (1):

- (a) where the customs value of the imported goods in a consignment does not exceed ECU 5 000, provided that they do not constitute split or multiple consignments from the same consignor to the same consignee; or
- (b) where the importations involved are of a non-commercial nature; or
- (c) where the submission of the particulars in question is not necessary for the application of the Customs Tariff of the European Communities or where the customs duties provided for in the Tariff are not chargeable pursuant to specific customs provisions.

2. The amount in ecu referred to in paragraph 1 (a) shall be converted in accordance with Article 18 of the Code. The customs authorities may round-off upwards or downwards the sum arrived at after conversion.

The customs authorities may maintain unamended the exchange value in national currency of the amount determined in ecu if, at the time of the annual adjustment provided for in Article 18 of the Code, the conversion of this amount, before the rounding-off provided for in this paragraph, leads to an alteration of less than 5 % in the exchange value expressed in national currency or to a reduction thereof.

3. In the case of continuing traffic in goods supplied by the same seller to the same buyer under the same commercial conditions, the customs authorities may waive the requirement that all particulars under Article 178 (1) be furnished in support of each customs declaration, but shall require them whenever the circumstances change and at least once every three years.

4. A waiver granted under this Article may be withdrawn and the submission of a D.V. 1 may be required where it is found that a condition necessary to qualify for that waiver was not or is no longer met.

Article 180

Where computerized systems are used, or where the goods concerned are the subject of a general, periodic or recapitulative declaration, the customs authorities may authorize variations in the form of presentation of data required for the determination of customs value.

Article 181

1. The person referred to in Article 178 (2) shall furnish the customs authorities with a copy of the invoice on the basis of which the value of the imported goods is declared. Where the customs value is declared in writing this copy shall be retained by the customs authorities.

2. In the case of written declarations of the customs value, when the invoice for the imported goods is made out to a person established in a Member State other than that in which the customs value is declared, the declarant shall furnish the customs authorities with two copies of the invoice. One of these copies shall be retained by the customs authorities; the other, bearing the stamp of the office in question and the serial number of the declaration at the said customs office shall be returned to the declarant for forwarding to the person to whom the invoice is made out.

3. The customs authorities may extend the provisions of paragraph 2 to cases where the person to whom the invoice is made out is established in the Member State in which the customs value is declared.

TITLE VI

INTRODUCTION OF GOODS INTO THE CUSTOMS TERRITORY

CHAPTER 1

Examination of the goods and taking of samples by the person concerned

Article 182

1. Permission to examine the goods under Article 42 of the Code shall be granted to the person empowered to assign the goods a customs-approved treatment or use at his oral request, unless the customs authorities consider, having regard to the circumstances, that a written request is required.

The taking of samples may be authorized only at the written request of the person concerned.

TITLE VII

CUSTOMS DECLARATIONS — NORMAL PROCEDURE

CHAPTER 1

Customs declarations in writing

Section 1

General provisions

Article 198

1. Where a customs declaration covers two or more articles, the particulars relating to each article shall be regarded as constituting a separate declaration.
2. Component parts of industrial plant coming under a single CN Code shall be regarded as constituting a single item of goods.

Article 199

Without prejudice to the possible application of penal provisions, the lodging with a customs office of a declaration signed by the declarant or his representative shall render him responsible under the provisions in force for:

- the accuracy of the information given in the declaration,
- the authenticity of the documents attached,
and
- compliance with all the obligations relating to the entry of the goods in question under the procedure concerned.

Article 200

Documents accompanying a declaration shall be kept by the customs authorities unless the said authorities provide otherwise or unless the declarant requires them for other operations. In the latter case the customs authorities shall take the necessary steps to ensure that the documents in question cannot subsequently be used except in respect of the quantity or value of goods for which they remain valid.

Article 201

1. The declaration shall be lodged with the customs office where the goods were presented. It may be lodged as soon as such presentation has taken place.

⁽¹⁾ OJ No L 374, 31. 12. 1991, p. 4.

2. The customs authorities may authorize the declaration to be lodged before the declarant is in a position to present the goods. In this case, the customs authorities may set a time limit, to be determined according to the circumstances, for presentation of the goods. If the goods have not been presented within this time limit, the declaration shall be considered not to have been lodged.

3. Where a declaration has been lodged before the goods to which it relates have arrived at the customs office or at another place designated by the customs authorities, it may be accepted only after the goods in question have been presented to customs.

Article 202

1. The declaration shall be lodged with the competent customs office during the days and hours appointed for opening.

However, the customs authorities may, at the request of the declarant and at his expense, authorize the declaration to be lodged outside the appointed days and hours.

2. Any declaration lodged with the officials of a customs office in any other place duly designated for that purpose by agreement between the customs authorities and the person concerned shall be considered to have been lodged in the said office.

Article 203

The date of acceptance of the declaration shall be noted thereon.

Article 204

The customs authorities may allow or require the corrections referred to in Article 65 of the Code to be made by the lodging of a new declaration intended to replace the original declaration. In that event, the relevant date for determination of any duties payable and for the application of any other provisions governing the customs procedure in question shall be the date of the acceptance of the original declaration.

Section 2

Forms to be used

Article 205

1. The official model for written declarations to customs by the normal procedure, for the purposes of placing goods under a customs procedure or re-exporting them in accordance with Article 182 (3) of the Code, shall be the Single Administrative Document.

2. Other forms may be used for this purpose where the provisions of the customs procedure in question permit.

3. The provisions of paragraphs 1 and 2 shall not preclude:

— waiver of the written declaration prescribed in Articles 225 to 236 for release for free circulation, export or temporary importation,

— waiver by the Member States of the form referred to in paragraph 1 where the special provisions laid down in Articles 237 and 238 with regard to consignments by letter or parcel-post apply,

— use of special forms to facilitate the declaration in specific cases, where the customs authorities so permit,

— waiver by the Member States of the form referred to in paragraph 1 in the case of existing or future agreements or arrangements concluded between the administrations of two or more Member States with a view to greater simplification of formalities in all or part of the trade between those Member States,

— use by the persons concerned of loading lists for the completion of Community transit formalities in the case of consignments composed of more than one kind of goods,

— printing of export, transit or import declarations and documents certifying the Community status of goods not being moved under internal Community transit procedure by means of official or private-sector data-processing systems, if necessary on plain paper, on conditions laid down by the Member States,

— provision by the Member States to the effect that where a computerized declaration-processing system is used, the declaration, within the meaning of paragraph 1, may take the form of the Single Administrative Document printed out by that system.

4. When formalities are completed using public or private computers which also print out the declarations, the customs authorities may provide that:

— the handwritten signature may be replaced by another identification technique which may be based on the use of codes and having the same legal consequences as a handwritten signature. This facility shall only be granted if the technical and administrative conditions laid down by the competent authorities are complied with,

— the declarations thus produced may be directly authenticated by those systems, in place of the manual or mechanical application of the customs office stamp and the signature of the competent official.

5. Where in Community legislation, reference is made to an export, re-export or import declaration or a declaration placing goods under another customs procedure, Member States may not require any administrative documents other than those which are:

- expressly created by Community acts or provided for by such acts,
- required under the terms of international conventions compatible with the Treaty,
- required from operators to enable them to qualify, at their request, for an advantage or specific facility,
- required, with due regard for the provisions of the Treaty, for the implementation of specific regulations which cannot be implemented solely by the use of the document referred to in paragraph 1.

Article 206

The Single Administrative Document form shall, where necessary, also be used during the transitional period laid down in the Act of Accession of Spain and Portugal in connection with trade between the Community as constituted on 31 December 1985 and Spain or Portugal and between those two last-mentioned Member States in goods still liable to certain customs duties and charges having equivalent effect or which remain subject to other measures laid down by the Act of Accession.

For the purposes of the first paragraph, copy 2 or where applicable copy 7 of the forms used for trade with Spain and Portugal or trade between those Member States shall be destroyed.

It shall also be used in trade in Community goods between parts of the customs territory of the Community to which the provisions of Council Directive 77/388/EEC⁽¹⁾ apply and parts of that territory where those provisions do not apply, or in trade between parts of that territory where those provisions do not apply.

Article 207

Without prejudice to Article 205 (3), the customs administrations of the Member States may in general, for the purpose of completing export or import formalities, dispense with the production of one or more copies of the Single Administrative Document intended for use by the authorities of that Member State, provided that the information in question is available on other media.

Article 208

1. The Single Administrative Document shall be presented in subsets containing the number of copies required for the completion of formalities relating to the customs procedure under which the goods are to be placed.

2. Where the Community transit procedure or the common transit procedure is preceded or followed by another customs procedure, a subset containing the number of copies required for the completion of formalities relating to the transit procedure and the preceding or following procedure may be presented.

3. The subsets referred to in paragraphs 1 and 2 shall be taken from:

- either the full set of eight copies, in accordance with the specimen contained in Annex 31,
- or, particularly in the event of production by means of a computerized system for processing declarations, two successive sets of four copies, in accordance with the specimen contained in Annex 32.

4. Without prejudice to Articles 205 (3), 222 to 224 or 254 to 289, the declaration forms may be supplemented, where appropriate, by one or more continuation forms presented in subsets containing the declaration copies needed to complete the formalities relating to the customs procedure under which the goods are to be placed. Those copies needed in order to complete the formalities relating to preceding or subsequent customs procedures may be attached where appropriate.

The continuation subsets shall be taken from:

- either a set of eight copies, in accordance with the specimen contained in Annex 33,
- or two sets of four copies, in accordance with the specimen contained in Annex 34.

The continuation forms shall be an integral part of the Single Administrative Document to which they relate.

5. By way of derogation from paragraph 4, the customs authorities may provide that continuation forms shall not be used where a computerized system is used to produce such declarations.

Article 209

1. Where Article 208 (2) is applied, each party involved shall be liable only as regards the particulars relating to the procedure for which he applied as declarant, principal or as the representative of one of these.

⁽¹⁾ OJ No L 145, 13. 6. 1977, p. 1.

2. For the purposes of paragraph 1, where the declarant uses a Single Administrative Document issued during the preceding customs procedure, he shall be required, prior to lodging his declaration, to verify the accuracy of the existing particulars for the boxes for which he is responsible and their applicability to the goods in question and the procedure applied for, and to supplement them as necessary.

In the cases referred to in the first subparagraph, the declarant shall immediately inform the customs office where the declaration is lodged of any discrepancy found between the goods in question and the existing particulars. In this case the declarant shall then draw up his declaration on fresh copies of the Single Administrative Document.

Article 210

Where the Single Administrative Document is used to cover several successive customs procedures, the customs authorities shall satisfy themselves that the particulars given in the declarations relating to the various procedures in question all agree.

Article 211

The declaration must be drawn up in one of the official languages of the Community which is acceptable to the customs authorities of the Member State where the formalities are carried out.

If necessary, the customs authorities of the Member State of destination may require from the declarant or his representative in that Member State a translation of the declaration into the official language or one of the official languages of the latter. The translation shall replace the corresponding particulars in the declaration in question.

By way of derogation from the preceding subparagraph, the declaration shall be drawn up in an official language of the Community acceptable to the Member State of destination in all cases where the declaration in the latter Member State is made on copies other than those initially presented to the customs office of the Member State of departure.

Such additional sheets or photocopies must be signed by the declarant, presented to the customs authorities and endorsed by the latter under the same conditions as the Single Administrative Document. They shall be accepted by the customs authorities as if they were original documents provided that their quality and legibility are considered satisfactory by the said authorities.

Article 215

1. The forms referred to in Article 205 (1) shall be printed on self-copying paper dressed for writing purposes and weighing at least 40 g/m². The paper must be sufficiently opaque for the information on one side not to affect the legibility of the information on the other side and its strength should be such that in normal use it does not easily tear or crease.

The paper shall be white for all copies. However, on the copies used for Community transit (1, 4, 5 and 7), boxes 1 (first and third subdivisions), 2, 3, 4, 5, 6, 8, 15, 17, 18, 19, 21, 25, 27, 31, 32, 33 (first subdivision on the left), 35, 38, 40, 44, 50, 51, 52, 53, 55 and 56 shall have a green background.

The width of these margins shall be approximately 3 mm. The broken margin shall comprise a series of squares with a side measurement of 3 mm each one separated by 3 mm.

4. The copies on which the particulars contained in the forms shown in Annexes 31 and 33 must appear by a self-copying process are shown in Annex 35.

2. Where a check reveals that the act referred to in Article 233 has been carried out but the goods imported

or taken out do not fulfil the conditions in Articles 230 to 232, the goods concerned shall be considered to have been imported or exported unlawfully.

Section 3

Provisions common to Sections 1 and 2

- braille letters,
- printed matter not liable for import duties, and
- all other consignments sent by letter or parcel post which are exempt from the obligation to be conveyed to customs in accordance with

provisions pursuant to Article 38 (4) of the Code;

(b) at the time when they are presented to customs:

— consignments sent by letter or parcel post other than those referred to at (a), provided they are accompanied by a C1 and/or C2/CP3 declaration;

B. for export:

(a) at the time when they are accepted by the postal authorities, in the case of consignments by letter and parcel post which are not liable to export duties;

(b) at the time of their presentation to customs, in the case of consignments sent by letter or parcel post which are liable to export duties, provided they are accompanied by a C1 and/or a C2/CP3 declaration.

2. The consignee, in the cases referred to in paragraph 1A, and the consignor, in the cases referred to in paragraph 1B, shall be considered to be the declarant and, where applicable, the debtor. The customs authorities may provide that the postal administration shall be considered as the declarant and, where applicable, as the debtor.

3. For the purposes of paragraph 1, goods not liable to duty shall be considered to have been presented to customs within the meaning of Article 63 of the Code, the customs declaration to have been accepted and release granted:

Article 238

Article 237 shall not apply:

— where a customs declaration is made in writing, orally or using a data-processing technique,

— to consignments containing the goods referred to in Article 235.

TITLE VIII

EXAMINATION OF THE GOODS, FINDINGS OF THE CUSTOMS OFFICE AND OTHER MEASURES TAKEN BY THE CUSTOMS OFFICE

Article 239

1. The goods shall be examined in the places designated and during the hours appointed for that purpose by the customs authorities.

2. However, the customs authorities may, at the request of the declarant, authorize the examination of goods in places or during hours other than those referred to in paragraph 1.

Any costs involved shall be borne by the declarant.

Article 240

1. Where the customs authorities elect to examine goods they shall so inform the declarant or his representative.

2. Where they decide to examine a part of the goods only, the customs authorities shall inform the declarant or his representative which items they wish to examine. The customs authorities' choice shall be final.

Article 241

1. The declarant or the person designated by him to be present at the examination of the goods shall render the customs authorities the assistance required to facilitate their work. Should the customs authorities consider the assistance rendered unsatisfactory, they may require the declarant to designate another person able to give the necessary assistance.

2. Where the declarant refuses to be present at the examination of the goods or to designate a person able to give the assistance which the customs authorities consider necessary, the said authorities shall set a deadline for compliance, unless they consider that such an examination may be dispensed with.

If, on expiry of the deadline, the declarant has not complied with the requirements of the customs authorities, the latter, for the purpose of applying Article 75 (a) of the Code, shall proceed with the examination of the goods, at the declarant's risk and expense, calling if necessary on the services of an expert or any other person designated in accordance with the provisions in force.

3. The findings made by the customs authorities during the examination carried out under the conditions referred to in the preceding paragraph shall have the

same validity as if the examination had been carried out in the presence of the declarant.

4. Instead of the measures laid down in paragraphs 2 and 3, the customs authorities shall have the option of deeming a declaration invalid where it is clear that the declarant's refusal to be present at the examination of the goods or to designate a person able to give the necessary assistance neither prevents, nor seeks to prevent, those authorities from finding that the rules governing the entry of the goods for the customs procedure concerned have been breached, and neither evades, nor seeks to evade, the provisions of Article 66 (1) or Article 80 (2) of the Code.

Article 242

1. Where the customs authorities decide to take samples, they shall so inform the declarant or his representative.

2. Samples shall be taken by the customs authorities themselves. However, they may ask that this be done under their supervision by the declarant or a person designated by him.

Samples shall be taken in accordance with the methods laid down in the provisions in force.

3. The quantities taken as samples should not exceed what is needed for analysis or more detailed examination, including possible check analysis.

Article 243

1. The declarant or the person designated by him to be present at the taking of samples shall render the customs authorities all the assistance needed to facilitate the operation.

2. Where the declarant refuses to be present at the taking of samples or to designate a person to attend, or where he fails to render the customs authorities all the assistance needed to facilitate the operation, the provisions of Article 241 (1), (2) and (3) shall apply.

Article 244

Where the customs authorities take samples for analysis or more detailed examination, they shall authorize the release of the goods in question without waiting for the results of the analysis or examination, unless there are other grounds for not doing so, and provided that, where a customs debt has been or is likely to be incurred, the duties in question have already been entered in the accounts and paid or secured.

Article 245

1. The quantities taken by the customs office as samples shall not be deducted from the quantity declared.

2. Where an export or outward processing declaration is concerned, the declarant shall be authorized, where circumstances permit, to replace the quantities of goods taken as samples by identical goods, in order to make up the consignment.

Article 246

1. Unless destroyed by the analysis or more detailed examination, the samples taken shall be returned to the declarant at his request and expense once they no longer need to be kept by the customs authorities, in particular after all the declarant's means of appeal against the decision taken by the customs authorities on the basis of the results of that analysis or more detailed examination have been exhausted.

2. Where the declarant does not ask for samples to be returned, they may either be destroyed or kept by the customs authorities. In specific cases, however, the customs authorities may require the declarant to remove any samples that remain.

Article 247

1. Where the customs authorities verify the declarations and accompanying documents or examine the goods, they shall indicate, at least in the copy of the declaration retained by the said authorities, or in a document attached thereto, the basis and results of any such verification or examination. In the case of partial examination of the goods, particulars of the consignment examined shall also be given.

Where appropriate, the customs authorities shall also indicate in the declaration that the declarant or his representative was absent.

2. Should the result of the verification of the declaration and accompanying documents or examination of the goods not be in accordance with the particulars given in the declaration, the customs authorities shall specify, at least in the copy of the declaration retained by the said authorities, or in a document attached thereto, the particulars to be taken into account for the purposes of the application of charges on the goods in question and, where appropriate, calculating any refunds or other amounts payable on exportation, and for applying the other provisions governing the customs procedure for which the goods are entered.

3. The findings of the customs authorities shall indicate, where appropriate, the means of identification adopted. They shall be dated and bear the particulars needed to identify the official issuing them.

4. Where the customs authorities neither verify the declaration nor examine the goods, they need not endorse the declaration or attached document referred to in paragraph 1.

Article 248

1. The granting of release shall give rise to the entry in the accounts of the import duties determined according to the particulars in the declaration. Where the customs authorities consider that the checks which they have undertaken may enable an amount of customs duties higher than that resulting from the particulars made in the declaration to be assessed, they shall further require the lodging of a security sufficient to cover the difference between the amount according to the particulars in the declaration and the amount which may finally be payable on the goods. However, the declarant may request the immediate entry in the accounts of the amount of duties to which the goods may ultimately be liable instead of lodging this security.

2. Where, on the basis of the checks which they have carried out, the customs authorities assess an amount of import duties different from the amount which results from the particulars in the declaration, the release of the goods shall give rise to the immediate entry in the accounts of the amount thus assessed.

3. Where the customs authorities have doubts about whether or not a prohibition or restriction applies and this cannot be resolved until the results of the checks the authorities have carried out are available, the goods in question cannot be released.

Article 249

1. The customs authorities shall determine the form of release, taking due account of the place in which the goods are located and of the special arrangements for their supervision.

2. Where the declaration is made in writing, a reference to the release and its date shall be made on the declaration or, where applicable, a document attached, and a copy shall be returned to the declarant.

Article 250

1. Where the customs authorities have been unable to grant release for one of the reasons specified in the second or third indent of Article 75 (a) of the Code, they shall give the declarant a time limit to regularize the situation of the goods.

2. Where, in the circumstances referred to in the second indent of Article 75 (a) of the Code, the declarant has not produced the requisite documents within the time limit referred to in paragraph 1, the declaration in question shall be deemed invalid and the customs office shall cancel it. The provisions of Article 66 (3) of the Code shall apply.

3. In the circumstances referred to in the third indent of Article 75 (a) of the Code, and without prejudice to any measures taken under the first subparagraph of Article 66 (1) or Article 182 of the Code, where the declarant has neither paid nor guaranteed the duties due within the time limit referred to in paragraph 1, the customs authorities may start the preliminary formalities for the sale of the goods. In this case the goods shall be sold unless the requisite conditions have been fulfilled in the interim, if necessary by forced sale where the law of the Member State of the authorities in question so permits. The customs authorities shall inform the declarant thereof.

The customs authorities may, at the risk and expense of the declarant, transfer the goods in question to special premises under their supervision.

Article 251

By way of derogation from Article 66 (2) of the Code, a customs declaration may be invalidated after the goods have been released, as provided below:

1. where it is established that the goods have been declared in error for a customs procedure entailing the payment of import duties instead of being placed under another customs procedure, the customs authorities shall invalidate the declaration if a request to that effect is made within three months of the date of acceptance of the declaration provided that:

- any use of the goods has not contravened the conditions of the customs procedure under which they should have been placed,
- when the goods were declared, they were intended to be placed under another customs procedure, all the requirements of which they fulfilled, and
- the goods are immediately entered for the customs procedure for which they were actually intended.

The declaration placing the goods under the latter customs procedure shall take effect from the date of acceptance of the invalidated declaration.

The customs authorities may permit the three-month period to be exceeded in duly substantiated exceptional cases;

2. where the goods have been declared for export or for the outward processing procedure, the declaration shall be invalidated provided that:

- (a) in the case of goods which are subject to export duty, to an application for the repayment of

import duty, to refunds or other export amounts or to other special measures on export:

- the declarant provides the customs office of export with evidence that the goods have not left the customs territory of the Community,
- the declarant returns to the said office all copies of the customs declaration, together with any other documents issued to him on acceptance of the declaration,
- the declarant provides the customs office of export with evidence that any refunds and other amounts granted on the strength of the export declaration for the goods in question have been repaid or that the necessary measures have been taken by the departments concerned to ensure that they are not paid, and
- the declarant, in accordance with the provisions in force, complies with any other obligations laid down by the customs office of export to regularize the position of the goods.

Invalidation of the declaration shall entail cancellation of any adjustments made on an export licence or advance-fixing certificate presented in support of the declaration.

Where the goods declared for export are required to leave the customs territory of the Community by a specified time limit, failure to comply with that time limit shall entail invalidation of the relevant declaration;

- (b) in the case of other goods, the customs office of export has been informed in accordance with Article 796 that the goods declared have not left the customs territory of the Community.
3. In so far as the re-export of the goods entails the lodging of a declaration, (2) above shall apply *mutatis mutandis*.
 4. Where Community goods have been placed under the customs warehousing procedure within the meaning of Article 98 (1) (b) of the Code, invalidation of the declaration of entry for that procedure may be requested and effected provided that the measures provided for in the relevant legislation in the event of failure to comply with the treatment or use prescribed have been taken.

If, on the expiry of the period laid down for the goods to remain under the customs warehousing procedure, no application has been made for their assignment to a treatment or use provided for in the relevant legislation, the customs authorities shall take the measures provided for in that legislation.

Article 252

Where the customs authorities sell the goods pursuant to Article 75 of the Code, this shall be done in accordance with Article 188.

TITLE IX

SIMPLIFIED PROCEDURES

CHAPTER 1

Definitions

Article 253

1. The procedure for incomplete declarations shall allow the customs authorities to accept, in a duly justified case, a declaration which does not contain all the particulars required, or which is not accompanied by all documents necessary for the customs procedure in question.
2. The simplified declaration procedure shall enable goods to be entered for the customs procedure in question on presentation of a simplified declaration with subsequent presentation of a supplementary declaration which may be of a general, periodic or recapulative nature, as appropriate.
3. The local clearance procedure shall enable the entry of goods for the customs procedure in question to be carried out at the premises of the person concerned or at other places designated or approved by the customs authorities.

CHAPTER 2

Declarations for release for free circulation

Section 1

Incomplete declarations

Article 254

Declarations for release for free circulation which the customs authorities may accept, at the declarant's request, without their containing certain of the particulars referred to in Annex 37 shall contain at least the particulars referred to in Box 1 (first and second subdivisions), 14, 21, 31, 37, 40 and 54 of the Single Administrative Document and:

- a description of the goods in terms that are sufficiently precise to enable the customs authorities to determine immediately and unambiguously the combined nomenclature heading or subheading concerned,
- where the goods are liable to *ad valorem* duties, their value for customs purposes, or, where it appears that the declarant is not in a position to declare this value, a provisional indication of value which is considered acceptable by the customs authorities, due account being taken in particular of the information available to the declarant,

— any further particulars considered necessary by the customs authorities in order to identify the goods, implement the provisions governing their release for free circulation and determine the amount of any security required before the goods may be released.

Article 255

1. Declarations for release for free circulation which the customs authorities may accept at the declarant's request without their being accompanied by certain of the necessary supporting documents shall be accompanied at least by those documents which must be produced before the goods declared can be released for free circulation.

2. By way of derogation from paragraph 1, a declaration not accompanied by one or more of the documents required before the goods can be released for free circulation may be accepted once it is established to the satisfaction of the customs authorities that:

- (a) the document concerned exists and is valid;
- (b) it could not be annexed to the declaration for reasons beyond the declarant's control;
- (c) any delay in accepting the declaration would prevent the release of the goods for free circulation or make them liable to a higher rate of duty.

Data relating to missing documents shall in all cases be indicated in the declaration.

Article 256

1. The period allowed by the customs authorities to the declarant for the communication of particulars or production of documents missing at the time when the declaration was accepted may not exceed one month from the date of such acceptance.

In the case of a document required for the application of a reduced or zero rate of import duty, where the customs authorities have good reason to believe that the goods covered by the incomplete declaration may qualify for such reduced or zero rate of duty, a further period may, at the declarant's request, be allowed for the production of the document in question. Such additional period may not exceed three months.

Where the missing particulars to be communicated or documents to be supplied concern customs value, the customs authorities may, where this proves absolutely necessary, set a longer time limit or extend the period previously set. The total period allowed shall take account of the prescribed periods in force.

2. Where a reduced or zero rate of import duty is applicable to goods released for free circulation only within certain tariff quotas or ceilings, the goods may be charged against the authorized limits only when the document on which the granting of the reduced or zero rate is conditional is actually produced. The document must in any case be produced:

- before the date on which a Community measure re-establishes the levying of normal import duties, in the case of tariff ceilings,
- before the limits laid down have been reached, in the case of tariff quotas.

3. Subject to paragraphs 1 and 2, the document on whose presentation the granting of the reduced or zero rate of import duty is conditional may be produced after the expiry date of the period for which the reduced or zero rate was set, provided the declaration in respect of the goods in question was accepted before that date.

Article 257

1. The customs authorities' acceptance of an incomplete declaration shall not prevent or delay the release of the goods thus declared, unless other grounds exist for so doing. Without prejudice to the provisions of Article 248, release shall take place in accordance with the conditions laid down in paragraphs 2 to 5 below.

2. Where the late production of particulars or of a supporting document missing at the time when a declaration is accepted cannot affect the amount of duties to which the goods covered by the said declaration are liable, the customs authorities shall immediately enter in the accounts the sum payable, calculated in the usual manner.

3. Where, pursuant to Article 254, a declaration contains a provisional indication of value, the customs authorities shall:

- enter immediately in the accounts the amount of duties determined on the basis of this indication,
- require, if necessary, the lodging of a security adequate to cover the difference between that amount and the amount to which the goods may ultimately be liable.

4. Where, in circumstances other than those referred to in paragraph 3, the late production of particulars or of a supporting document missing at the time when a declaration is accepted may affect the amount of duties to which the goods covered by the said declaration are liable:

- (a) if late production of any missing particulars or document may lead to the application of duty at a reduced rate, the customs authorities shall:

- immediately enter in the accounts the import duties payable at the reduced rate,
 - require the lodging of a security covering the difference between that sum and the sum which would be payable were the import duties on the goods in question calculated at the normal rate;
- (b) if the late production of any missing particulars or document may lead to admission of the goods with total relief from duties, the customs authorities shall require the lodging of a security covering the amount which would be payable were the duties charged at the normal rate.

5. Without prejudice to any subsequent changes which may arise, particularly as a result of the final determination of the customs value, the declarant shall have the option, instead of lodging a security, of requesting the immediate entry in the accounts:

- where the second indent of paragraph 3 or the second indent of paragraph 4 (a) applies, of the amount of duties to which the goods may ultimately be liable, or
- where paragraph 4 (b) applies, of the amount of duties calculated at the normal rate.

Article 258

If, at the expiry of the period referred to in Article 256, the declarant has not supplied the details necessary for the final determination of the customs value of the goods, or has failed to provide the missing particulars or documents, the customs authorities shall immediately enter in the accounts as duties to which the goods in question are subject the amount of the security provided in accordance with the provisions of the second indent of Article 257 (3), the second indent of Article 257 (4) (a) or Article 257 (4) (b).

Article 259

An incomplete declaration accepted under the conditions set out in Articles 254 to 257 may be either completed by the declarant or, by agreement with the customs authorities, replaced by another declaration which complies with the conditions laid down in Article 62 of the Code.

In both cases, the operative date for the fixing of any duties and the application of other provisions governing the release of goods for free circulation shall be the date of acceptance of the incomplete declaration.

Section 2

Simplified declaration procedure

Article 260

1. The declarant shall, upon written request containing all the necessary information, be authorized

in accordance with the conditions and in the manner laid down in Articles 261 and 262, to make the declaration for release for free circulation in a simplified form when goods are presented to customs.

2. Such simplified declaration may be in the form

- either of an incomplete declaration on a Single Administrative Document, or
- of an administrative or commercial document, accompanied by a request for release for free circulation.

It shall contain at least the particulars necessary for identification of the goods.

3. Where circumstances permit, the customs authorities may allow the request for release for free circulation referred to in the second indent of paragraph 2 to be replaced by a general request in respect of release operations to take place over a given period. A reference to the authorization granted in response to such general request shall be entered on the commercial or administrative document presented pursuant to paragraph 1.

4. The simplified declaration shall be accompanied by all documents the production of which may be required to secure the release of the goods for free circulation. Article 255 (2) shall apply.

5. This Article shall be without prejudice to Article 278.

Article 261

1. The authorization referred to in Article 260 shall be granted to the declarant on condition that it is possible to guarantee an effective check on compliance with import prohibitions or restrictions or other provisions governing release for free circulation.

2. Such authorization shall in principle be refused where the person who has made the request:

- has committed a serious infringement or repeated infringements of customs rules,
- declares goods for release for free circulation only occasionally.

It may be refused where the person in question is acting on behalf of another person who declares goods for release for free circulation only occasionally.

3. Without prejudice to Article 9 of the Code, the authorization may be revoked where the cases referred to in paragraph 2 arise.

Article 262

1. The authorization referred to in Article 260 shall:

- designate the customs office(s) competent to accept simplified declarations,
- specify the form and content of the simplified declarations,
- specify the goods to which it applies and the particulars which must appear on the simplified declaration for the purposes of identifying the goods,
- make reference to the security to be provided by the person concerned to cover any customs debt which may arise.

It shall also specify the form and content of the supplementary declarations, and shall set the time limits within which they must be lodged with the customs authority designated for this purpose.

2. The customs authorities may waive the presentation of the supplementary declaration where the simplified declaration concerns goods the value of which is below the statistical threshold laid down by the Community provisions in force and the simplified declaration already contains all the information needed for release for free circulation.

Section 3.

Local clearance procedure*Article 263*

Authorization to use the local clearance procedure shall be granted in accordance with the conditions and in the manner laid down in Articles 264 to 266 to any person wishing to have goods released for free circulation at his premises or at the other places referred to in Article 253 and who submits to the customs authorities a written request to this end containing all the particulars necessary for the grant of the authorization:

- in respect of goods subject either to the Community or common transit procedure and for which the person referred to above is authorized to use the simplified procedures to be carried out at the office of destination in accordance with Articles 406 to 409,
- in respect of goods previously placed under a customs procedure with economic impact, without prejudice to Article 278,
- in respect of goods which, after having been presented to customs pursuant to Article 40 of the Code, are consigned to those premises or places in

accordance with a transit procedure other than that referred to in the first indent,

- in respect of goods which are brought into the customs territory of the Community with an exemption from the requirement that they be presented to customs, pursuant to Article 41 (b) of the Code.

Article 264

1. The authorization referred to in Article 263 shall be granted provided that:

- the applicant's records enable the customs authorities to carry out effective checks, in particular retrospective checks,
- it is possible to guarantee an effective check on compliance with import or export prohibitions or restrictions or any other provisions governing release for free circulation.

2. Authorization shall in principle be refused where the applicant:

- has committed a serious infringement or repeated infringements of customs rules,
- declares goods for release for free circulation only occasionally.

Article 265

1. Without prejudice to Article 9 of the Code, the customs authorities may refrain from revoking the authorization when:

- the holder fulfils his obligations within any time limit set by them, or
- the failure to fulfil an obligation is without any real consequence for the correct operation of the procedure.

2. An authorization shall in principle be revoked where the case referred to in the first indent of Article 264 (2) arises.

3. An authorization may be revoked where the case referred to in the second indent of Article 264 (2) arises.

Article 266

1. To enable the customs authorities to satisfy themselves as to the proper conduct of operations, the holder of the authorization referred to in Article 263 shall, upon arrival of the goods at the place designated for that purpose:

- (a) duly notify the customs authorities of such arrival in the form and manner specified by them for the purpose of obtaining release of the goods;
- (b) enter the said goods in his records. Such entry may be replaced by any other formality offering similar guarantees stipulated by the customs authorities. The entry shall indicate the date on which it is made and the particulars necessary for identification of the goods;
- (c) make available to the customs authorities all documents the production of which may be required for the application of the provisions governing the release of goods for free circulation.

2. On condition that checks on the proper conduct of operations are not thereby affected, the customs authorities may:

- (a) permit the notification referred to in paragraph 1 (a) to be effected as soon as the arrival of the goods becomes imminent;

2. For each part-consignment, the master or his representative shall make out an extract of the T2M document, using for this purpose a form taken from a booklet of T2M forms issued in accordance with Article 328.

Each extract shall include a reference to the original document and, in box 4, an indication of the quantity and nature of the products making up the part-consignment.

Each extract shall be clearly marked with one of the following words:

4. The customs office referred to in paragraph 3 shall immediately send the customs office at the port of registry or home port of the fishing vessel a certified copy of the extract of the T2M document. The said copy shall also include a reference to the customs declaration in respect of the designated customs procedure.

5. The original T2M document shall be retained until all the products to which it refers have been assigned to a customs-approved treatment or use.

The master or his representative shall enter in the 'Remarks' box of the original T2M, in respect of each such treatment or use, the number and nature of the packages, the gross weight (kg) and the treatment or use to which the goods are to be assigned. If such treatment consists of a split consignment being sent to the Community pursuant to paragraph 2, the number and date of the corresponding extract shall also be given. After all the fishery products covered by the original T2M document have been assigned to a customs-approved treatment or use that document shall be sent back immediately to the customs office at the port of registry or home port of the fishing vessel.

6. To ensure the collection of any duties and other charges due, the customs authorities of the office referred to in paragraph 3 shall permit the clearance of fishery products under Community status only upon provision of a security. Such security shall be released with the consent of the customs office of the port of registry or home port of the fishing vessel. Such consent shall be granted no later than one month after receipt of the original T2M document referred to in paragraph 5.

Article 336

Packings presented at the same time as the catch or resulting products referred to in Article 325 to which the T2M document relates shall be accorded intra-Community treatment only if a document proving their Community status is presented to the customs authorities.

Article 337

Each time the fishing vessel returns to its port of registry or home port, if use has been made since its departure of the booklet of T2M forms the owner or his representative shall be required to present the booklet at the customs office of issue so that the copies may be checked.

He shall also present the booklet whenever so required by the customs authorities.

The booklet shall be returned to the holder after each check until all the forms have been used.

Article 338

When a vessel to which a booklet of T2M forms as referred to in Article 327 has been issued ceases before all the forms have been used to satisfy the requisite conditions for according its catch intra-Community treatment in other Member States the booklet shall be returned immediately to the customs office of issue.

Article 339

In order that the provisions of Articles 325 to 340 may be properly applied, the administrations of the Member States shall afford each other mutual assistance in checking the authenticity of T2M documents and the accuracy of the particulars they contain.

Article 340

1. For the purposes of Articles 325 and 326, vessels definitively entered in the registers of the competent authorities at local level (*registros de base*) of Ceuta or Melilla shall not be considered as vessels of a Member State.

3. Article 334 (2) shall apply to fishery catches and resulting products referred to in Article 326 which are landed under a T2M document at a port in Ceuta or Melilla for transshipment and onward consignment to the customs territory of the Community. In addition, special quays shall be set aside for the landing, storage and transshipment of such products, which are separate from those for products for consignment to another destination.

CHAPTER 4

External Community transit

Section 1

Procedure

Article 341

1. All goods which are to move under the external Community transit procedure shall be the subject of a T1 declaration in accordance with this Section. A T1 declaration means a declaration on a form corresponding to the specimens in Annexes 31 to 34 and used in accordance with the notes referred to in Annexes 37 and 38.

2. Loading lists based on the specimen in Annex 45 may be used in accordance with Articles 343 to 345 and Article 383 as the descriptive part of Community transit declarations. Such use shall in no way affect obligations in respect of any formalities attaching to a dispatch/export procedure or any procedure in the Member State of destination, or in respect of the forms used for such formalities.

The loading list means any commercial document which complies with Articles 342 to 345 and Article 383, and Articles 386 to 388.

Article 342

The loading list shall include:

- (a) the heading 'Loading List';
- (b) a box measuring 70 × 55 mm, divided into a top part measuring 70 × 15 mm for the insertion of the symbol 'T' followed by one of the endorsements referred to in Article 346 (1) and a lower part measuring 70 × 40 mm for the references referred to in Article 345 (3);
- (c) columns, in the following order and headed as shown:

- serial No,
- marks, numbers, number and kind of package; description of goods,
- country of dispatch/export,
- gross mass (in kilograms),
- for official use only.

The width of the columns may be adapted as necessary. However, the width of the column headed 'For official use only' shall be not less than 30 mm. Spaces other than those referred to under (a), (b) and (c) above, may also be used.

Article 343

1. Only the front of the forms may be used as a loading list.
2. Each item shown on a loading list shall be preceded by a serial number.
3. Each item shall be followed, where appropriate, by any special reference required by Community legislation, in particular in regard to the common agricultural policy, documents produced, and certificates and authorizations.
4. A horizontal line shall be drawn after the last entry and the remaining unused spaces barred so that any subsequent addition is impossible.

Article 344

1. The customs authorities of each Member State may allow the use as loading lists within the meaning of Article 341 (2) of lists which do not comply with all the requirements of the second subparagraph of Article 341 (2), second subparagraph and Article 342, second subparagraph.

Use of such lists shall be allowed only where:

- (a) they are produced by firms whose records are based on an integrated electronic or automatic data processing system;
- (b) they are designed and completed in such a way that they can be used without difficulty by the customs authorities;
- (c) they include for each item, the number, kind and marks and numbers of packages, the description of the goods, the country of dispatch/export and the gross mass in kilograms.

2. Descriptive lists drawn up for the purposes of carrying out dispatch/export formalities may also be used as loading lists under paragraph 1, even where such

lists are produced by firms whose records are not based on an electronic or automatic data-processing system.

3. The customs authorities of each Member State may allow firms whose records are based on an electronic or automatic data-processing system, and which are already allowed under paragraphs 1 and 2 to use loading lists of a special type, to use such lists for Community transit operations involving only one type of goods where this facility is made necessary by the computer programs of the firms concerned.

Article 345

1. Where the principal uses loading lists for a consignment comprising two or more types of goods, boxes 15 'Country of dispatch/export', 33 'Commodity code', 35 'Gross mass (kg)', 38 'Net mass (kg)' and, where necessary, 44 'Additional information, documents produced, certificates and authorizations' of the form used for the purposes of Community transit shall be barred and box 31 'Packages and description of goods' of that form shall not be used to show the marks and numbers, number and kind of the packages and description of goods. In this case, supplementary forms shall not be used.

2. The loading list shall be produced in the same number of copies as the form used for Community transit purposes to which it relates.

3. When the declaration is registered, the loading list must bear the same registration number as the form used for Community transit purposes to which it relates. That number must be entered either by means of a stamp incorporating the name of the office of departure or by hand. In the latter case it must be accompanied by the official stamp of the office of departure.

The signature of an official of the office of departure shall be optional.

4. Where two or more loading lists accompany a single form used for Community transit purposes, each number must bear a serial number allotted by the principal: the number of accompanying loading lists shall be shown in box 4 'Loading lists' of the said form.

5. A declaration on a single administrative document form bearing the symbol 'T1' or 'T2' in the right-hand subdivision of box 1 and accompanied by one or more loading lists shall be treated as equivalent to an external or internal Community transit declaration, as the case may be, for the purposes of Article 341 (1) or Article 381.

Article 346

1. Where goods have to move under the external Community transit procedure, the principal shall enter the symbol 'T1' in the right-hand subdivision of box 1 of the form used. Where supplementary forms are used, the principal shall enter the symbol 'T1 bis' in the right-hand subdivision of box 1 of the supplementary forms used.

Where Member States do not authorize the use of supplementary forms when a computerized system is used to produce declarations, the Community transit declaration form shall be supplemented by one or more forms conforming to the specimens in Annexes 31 and 32. In this case, the symbol 'T1 bis' shall be entered in the right-hand subdivision of box 1 of the form.

2. The T1 declaration shall be signed by the principal and at least three copies thereof shall be produced at the office of departure.

3. Where the Community transit procedure in the Member State of departure succeeds another customs procedure, reference shall be made on the T1 declaration to that procedure or to the corresponding customs documents.

Article 347

1. The same means of transport may be used for the loading of goods at more than one office of departure and for unloading at more than one office of destination.

2. Each T1 declaration shall include only the goods loaded or to be loaded on a single means of transport for carriage from one office of departure to one office of destination.

For the purposes of the first subparagraph, the following shall be regarded as constituting a single means of transport, on condition that the goods transported are to be dispatched together:

- (a) a road vehicle accompanied by its trailer(s) or semi-trailer(s);
- (b) a line of coupled railway carriages or wagons;
- (c) boats constituting a single chain;
- (d) containers loaded on a means of transport within the meaning of this Article.

Article 348

1. The office of departure shall accept and register the T1 declaration, prescribe the period within which the goods must be presented at the office of destination and take such measures for identification as it considers necessary.

2. The office of departure shall enter the necessary particulars on the T1 declaration, retain its own copy and return the others to the principal or his representative.

Article 349

1. As a general rule, identification of the goods shall be ensured by sealing.

2. The following shall be sealed:

(a) the space containing the goods, where the means of transport has been approved under other rules or recognized by the office of departure as suitable for sealing;

(b) each individual package, in other cases.

3. Means of transport may be recognized as suitable for sealing on condition that:

(a) seals can be simply and effectively affixed to them;

(b) they are so constructed that no goods can be removed or introduced without leaving visible traces of tampering or without breaking the seals;

(c) they contain no concealed spaces where goods may be hidden;

and

(d) the spaces reserved for the load are readily accessible for inspection by the customs authorities.

4. The office of departure may dispense with sealing if, having regard to other possible measures for identification, the description of the goods in the T1 document or in the supplementary documents make them readily identifiable.

Article 350

1. The goods shall be transported under cover of the copies of the T1 document returned to the principal or his representative by the office of departure.

2. Copies of the T1 document shall be presented as required by the customs authorities.

Article 351

Each Member State shall provide the Commission with a list of the offices competent to deal with Community transit operations, stating at what hours they are open.

The Commission shall communicate this information to the other Member States.

Article 352

1. The consignment and the copies of the T1 document shall be presented at each office of transit.

2. The carrier shall give a transit advice note made out on a form conforming to the specimen in Annex 46 to each office of transit.

3. The offices of transit shall not inspect the goods unless some irregularity is suspected which could result in abuse.

4. Where goods are transported via an office of transit other than that mentioned in the T1 document, the said office shall without delay send the transit advice note to the office mentioned in the document.

Article 353

Where goods are loaded or unloaded in the presence of intermediate customs authorities the copies of the T1 document returned by the office(s) of departure shall be presented to those authorities.

Article 354

1. The goods described on a T1 document may be transferred to another means of transport under the supervision of the customs authorities of the Member State in the territory of which the transfer is to be made, without the need for a new declaration. In that case, the competent authorities shall record the relevant details on the T1 document.

2. The customs authorities, on such conditions as they shall determine, may authorize such transfer without their supervision. In that case, the carrier shall record the relevant details on the T1 document and shall inform the customs authorities of the Member State of transfer, for the purposes of obtaining their endorsement.

Article 355

1. If seals are broken in the course of the transport operation for reasons beyond the carrier's control, the carrier shall without delay request that a certified report be drawn up by the customs authorities in the Member State in which the means of transport is located. The customs authority concerned shall, if possible, affix new seals.

2. In the event of an accident necessitating transfer to another means of transport, Article 354 shall apply.

3. In the event of imminent danger necessitating immediate unloading of the whole or part of the load, the carrier may take action on his own initiative. He shall record such action on the T1 document. Paragraph 1 shall apply in such a case.

4. If, as a result of accidents or other incidents arising in the course of the transport operation, the carrier is not in a position to comply with the period referred to in Article 348, he shall inform the customs authority referred to in paragraph 1 as soon as possible. That authority shall then record the relevant details on the T1 document.

Article 356

1. The goods and the T1 document shall be presented at the office of destination.
2. The office of destination shall record on the copies of the T1 document the details of controls carried out and shall without delay send a copy to the office of departure and retain the other copy.
3. A Community transit operation may be concluded at an office other than that specified in the T1 document. That other office shall then become the office of destination.
4. The time limit prescribed by the office of departure within which the goods must be produced to the office of destination shall be binding on the customs authorities of the countries whose territory is entered during a Community transit operation and shall not be altered by those authorities.
5. Where the goods are presented at the office of destination after expiry of the time limit prescribed by the office of departure and the failure to comply with the time limit is due to circumstances which are explained to the satisfaction of the office of destination and are not attributable to the carrier or the principal, the latter shall be deemed to have complied with the time limit prescribed.

Article 357

1. The person presenting a Community transit document to the office of destination together with the consignment to which that document relates may obtain a receipt on request.
2. The form for the receipt certifying that a Community transit document and the relevant consignment have been presented at the office of destination shall conform to the specimen in Annex 47. However, the receipt in respect of the Community transit document may be made out on the specimen on the back of the return copy of that document.
3. The receipt shall be completed in advance by the person concerned. It may contain other particulars relating to the consignment, except in the space reserved for the office of destination, but the endorsement by the office of destination shall be valid only in respect of the particulars contained in that space.

Article 358

Each Member State shall have the right to designate one or more central offices to which documents shall be returned by the competent offices in the Member State of destination. Member States shall, after designating such offices for that purpose, inform the Commission accordingly and specify the category of documents to be returned thereto. The Commission shall in turn notify the other Member States.

Section 2

Guarantees

Subsection 1

General provisions*Article 359*

1. The guarantee referred to in Article 94 (1) of the Code shall be valid throughout the Community.
2. The guarantee may be comprehensive, covering a number of Community transit operations, or individual, covering a single Community transit operation.
3. Subject to Article 373 (2), the guarantee shall consist of the joint and several guarantee of any natural or legal third person fulfilling the conditions referred to in Article 195 of the Code.
4. The guarantee document referred to in paragraph 3 shall conform to the specimen contained in:
 - Annex 48, in the case of a comprehensive guarantee,
 - Annex 49, in the case of an individual guarantee,
 - Annex 50, in the case of a flat-rate guarantee.
5. Where the provisions laid down by national law, regulation or administrative action or common practice so require, each Member State may allow the guarantee to be in a different form, on condition that it has the same legal effects as the specimen document.

Subsection 2

Comprehensive guarantees*Article 360*

When external Community transit operations comprising goods imported into the customs territory of the Community from third countries having been or which must be made the subject of specific information, notably by application of the provisions of Council Regulation (EEC) No 1468/81 ⁽¹⁾, present increased risk of fraud, the customs administrations of the Member States shall, by agreement with the Commission, take specific measures with a view to temporarily forbidding the use of the comprehensive guarantee.

The decision to forbid the use of the comprehensive guarantee by the customs administration of a Member State shall apply with regard to those of other Member States.

⁽¹⁾ OJ No L 144, 2. 6. 1981, p. 1.

The customs administrations of the Member States shall keep each other and the Commission informed of decisions taken under this Article.

After six months the Commission shall determine whether or not the measures taken need to be continued.

Article 361

Without prejudice to the provisions of Article 360 the level of the comprehensive guarantee shall be determined as follows:

1. The amount of the guarantee shall be set at least at 30 % of the duties and other charges payable according to the procedures laid down in 4 below.
2. The comprehensive guarantee shall be fixed at a level equal to the full amount of duties and other charges payable, under the provisions of 4 below, when it is intended to cover external Community transit operations concerning goods:

- imported into the customs territory of the Community,
- listed in Annex 53, and
- having been the subject of specific information from the Commission concerning transit operations presenting increased risks of fraud, in particular pursuant to the provisions of Council Regulation (EEC) No 1468/81.

However, the customs authorities may set the amount of the guarantee at 50 % of the duties and other charges payable:

for persons:

- who are established in the Member State where the guarantee is furnished,
- who are regular users of the Community transit system,
- whose financial situation is such that they can meet their commitments, and
- who have not committed any serious infringement of customs or tax laws.

If this subparagraph is applied, the office of guarantee shall enter in box 7 of the certificate of guarantee provided for in Article 362 (3) one of the following statements:

- aplicación del punto 2 del artículo 361 del Reglamento (CEE) n° 2454/93,
- anvendelse af artikel 361, nr. 2, i forordning (EØF) nr. 2454/93,

— Εφαρμογή του άρθρου 361 σημείο 2 δεύτερο εδάφιο του κανονισμού (ΕΟΚ) αριθ. 2454/93,

— toepassing van artikel 361, punt 2, van Verordening (EEG) nr. 2454/93,

— aplicação do ponto 2 do artigo 361º do Regulamento (CEE) n° 2454/93.

3. Where the Community transit declaration includes other goods besides those covered by paragraph 2 of this Article the provisions relating to the amount of the guarantee shall be applied as if the two categories of goods were covered by separate declarations.

However, account shall not be taken of the presence of goods of either category if the quantity or value thereof is relatively insignificant.

4. In order to apply this Article an evaluation shall be made of:

- consignments made over a period of one week,
- the duties and other charges payable taking account of the highest level of taxation applicable in one of the countries concerned.

This evaluation shall be made on the basis of the commercial and accounting documentation of the person concerned in respect of goods transported during the past year, the amount obtained then being divided by 52.

In the case of new operators the office of guarantee shall in collaboration with the person concerned estimate the quantity, value and taxes applicable to the goods being transported over a given period based on data already available. The office of guarantee shall by extrapolation determine the likely value of and taxes on the goods to be transported during a period of one week.

The office of guarantee shall carry out an annual review of the amount of the comprehensive

guarantee, in particular on the basis of information from the offices of departure, and shall if appropriate adjust the amount.

Article 362

1. A comprehensive guarantee shall be lodged with an office of guarantee.
2. The office of guarantee shall determine the amount of the guarantee, accept the guarantor's undertaking and issue an authorization allowing the principal to carry out, within the limits of the guarantee, any Community transit operation irrespective of the office of departure.
3. Each person who has obtained authorization shall, subject to the conditions laid down in Articles 363 to 366, be issued with one or more copies of a guarantee certificate made out on a form conforming to the specimen in Annex 51.
4. Reference to the guarantee certificate shall be made in each T1 document.
5. The office of guarantee may revoke the authorization if the conditions under which it was issued no longer obtain.

Article 363

1. On issue of the certificate of guarantee or at any time during the validity thereof, the principal shall on his own responsibility designate on the reverse of the certificate the person or persons authorized to sign Community transit declarations on his behalf. The particulars shall include the surname and forename of each authorized person followed by the signature of that person. Each nomination of an authorized person shall be acknowledged by the signature of the principal. The principal shall be entitled at his discretion to cross through the unused boxes.
2. The principal may at any time delete the name of an authorized person from the reverse of the certificate.

Article 364

Any person named on the reverse of a guarantee certificate presented at an office of departure shall be deemed to be the authorized representative of the principal.

Article 365

The period of validity of a guarantee certificate shall not exceed two years. However, that period may be extended by the guarantee office for one further period not exceeding two years.

Article 366

If the guarantee is cancelled the principal shall be responsible for returning to the guarantee office forthwith all valid guarantee certificates issued to him.

Member States shall forward details of any unreturned valid certificates to the Commission. The Commission shall inform the other Member States of these.

Subsection 3

Flat-rate guarantees

Article 367

1. Each Member State may allow the guarantor to furnish by declaration a single guarantee for a flat-rate amount of ECU 7 000, guaranteeing payment of duties and other charges which may become chargeable in the course of a Community transit operation carried out under his responsibility, whoever the principal may be. This provision shall apply without prejudice to Article 368.
2. The flat-rate guarantee shall be lodged with an office of guarantee.

Article 368

1. Except in the cases referred to in paragraphs 2 and 3, the office of departure shall not require a guarantee in excess of the flat-rate amount of ECU 7 000 for each Community transit declaration, irrespective of the amount of duties and other charges relating to the goods covered by a particular declaration.
2. Where, because of circumstances peculiar to it, a transport operation involves increased risks and for that reason the guarantee of ECU 7 000 is clearly insufficient, the office of departure may require a guarantee of a greater amount in multiples of ECU 7 000 in order to guarantee the duties relating to the total quantity of goods to be dispatched.
3. The transport of goods listed in Annex 52 shall give rise to an increase in the amount of the flat-rate guarantee where the quantity of goods carried exceeds the quantity corresponding to the flat-rate amount of ECU 7 000.

In that case, the flat-rate amount shall be increased to the multiple of ECU 7 000 necessary to guarantee the quantity of goods to be dispatched.

4. In the cases referred to in paragraphs 2 and 3 the principal shall deliver to the office of departure flat-rate guarantee vouchers corresponding to the required multiple of ECU 7 000.

Article 369

1. Where the Community transit declaration includes other goods besides those shown in the list contained in Annex 52, the flat-rate guarantee provisions shall be applied as if the two categories of goods were covered by separate declarations.

2. By way of derogation from paragraph 1, account shall not be taken of the presence of goods of either category if their quantity or value is relatively insignificant.

Article 370

1. Acceptance by the guarantee office of the guarantor's undertaking shall confer on the guarantor authority to issue a flat-rate guarantee voucher or vouchers under the terms of the guarantee to persons who intend to act as principal in a Community transit operation from an office of departure of their choice.

2. The flat-rate guarantee voucher shall conform to the specimen in Annex 54. The entries on the back of that specimen may, however, be shown on the front, above the particulars of the individual or firm issuing the voucher, the following entries remaining unchanged.

3. The guarantor shall be liable up to an amount of ECU 7 000 in respect of each flat-rate guarantee voucher.

4. Without prejudice to Articles 368 and 371 the principal may carry out one Community transit operation under each flat-rate guarantee voucher. The voucher shall be delivered to the office of departure, where it shall be retained.

Article 371

The guarantor may issue flat-rate guarantee vouchers:

- which are not valid for a Community transit operation in respect of goods which are listed in Annex 52, and
- which may be used in multiples of up to seven vouchers per means of transport within the meaning of Article 347 (2) for goods other than those referred to in the preceding indent.

For this purpose the guarantor shall mark such flat-rate guarantee vouchers diagonally in capital letters with one of the following indications:

- VALIDEZ LIMITADA; APLICACIÓN DEL ARTÍCULO 371 DEL REGLAMENTO (CEE) N° 2454/93,

Article 372

The cancellation of a guarantee shall be notified forthwith to the other Member States by the Member State to which the relevant guarantee office belongs.

Subsection 4

Individual guarantees*Article 373*

1. An individual guarantee furnished for a single Community transit operation shall be lodged at the office of departure. The office of departure shall fix the amount of the guarantee.

2. The guarantee referred to in paragraph 1 may be a cash deposit lodged with the office of departure. In that case, it shall be returned when the T1 document is discharged at the office of departure.

Subsection 5

Provisions common to subsections 1 to 4*Article 374*

The guarantor shall be released from his obligations as provided for in Article 199 (1) of the Code and in addition he shall be released from his obligations upon expiry of a period of 12 months from the date of registration of the T1 declaration where he has not been advised by the customs authorities of the Member State of departure of the non-discharge of the T1 document.

Where, within the period provided for in the first subparagraph, the guarantor has been advised by the customs authorities of the non-discharge of the T1 document, he shall, in addition, be notified that he is or may be required to pay the amounts for which he is liable in respect of the Community transit operation in question. This notification shall reach the guarantor not

later than three years after the date of registration of the T1 declaration. Where no such notification has been made before the expiry of that time limit, the guarantor shall likewise be released from his obligations.

Subsection 6

Guarantee waiver

Article 375

1. For the purposes of granting the guarantee waiver for Community transit operations, the undertaking to be given by the person concerned in accordance with Article 95 (2) (e) of the Code shall be drawn up in accordance with the specimen shown in Annex 55.

2. Where the provisions laid down by national law, regulation or administrative action or common practice so require, each Member State may have the undertaking by the person concerned drawn up in a different form, on condition that it has the same binding effects as those of the undertaking provided for in the specimen.

Article 376

1. In accordance with Article 95 (3) of the Code, the guarantee waiver shall not apply to goods:

(a) the total value of which exceeds ECU 100 000 per consignment;

or

(b) which are listed in Annex 56 as involving increased risks.

2. The guarantee waiver shall not apply where, in accordance with the provisions of Article 360, the use of the comprehensive guarantee is forbidden.

Article 377

1. Where the guarantee waiver is applied, reference to the certificate referred to in Article 95 (4) of the Code shall be made on the corresponding T1 transit declaration.

2. The guarantee waiver certificate shall conform to the specimen in Annex 57.

3. On issue of the guarantee waiver certificate or at any other time during the validity thereof, the principal shall on his own responsibility designate on the reverse of the certificate the person or persons authorized to sign Community transit declarations on his behalf. Article 432

The transport undertaking shall ensure that transport operations carried out under the Community transit procedure are identified by labels bearing a pictogram, a specimen of which is shown in Annex 58. The labels shall be affixed to the TR transfer note and to the large container or containers concerned.

Article 433

Where a contract of carriage is modified so that:

- a transport operation which was to end outside the customs territory of the Community ends within it,
- a transport operation which was to end within the customs territory of the Community ends outside it,

the transport undertaking shall not perform the modified contract without the prior agreement of the office of departure.

In all other cases, the transport undertaking may perform the modified contract; it shall forthwith inform the office of departure of the modification made.

CHAPTER 8

Special provisions applicable to certain modes of transport

Section 1

Transport by air*Article 443*

The Community transit procedure shall only be compulsory in respect of goods transported by air if they are loaded or reloaded at an airport in the Community.

Article 444

1. Where, in accordance with Article 443, the Community transit procedure is compulsory for goods transported by air from a Community airport, the manifest, provided it contains the information specified in Appendix 3 of Annex 9 to the Convention on International Civil Aviation, shall be equivalent to a Community transit declaration.

2. Where the transport operation relates both to goods which must move under the external Community transit procedure and to goods which must move under the internal Community transit procedure, such goods shall be listed on separate manifests.

3. The manifest or manifests referred to in paragraphs 1 and 2 shall bear an endorsement dated and signed by the airline identifying them as a Community transit declaration and specifying the customs status of the goods to which they relate. Thus completed and signed, the manifest or manifests shall be treated as a T1 declaration or a T2 declaration, as the case may be.

The manifest or manifests referred to in paragraphs 1 and 2 shall contain the following:

- the name of the airline transporting the goods,
- the flight number,
- the date of the flight,

- the gross mass.

4. An airline which transports goods accompanied by the manifests referred to in paragraphs 1 to 3 shall be the principal for the transport operation in question.

5. Except where the airline has the status of an authorized consignor within the meaning of Article 398, the manifests referred to in paragraphs 1 to 3 shall be presented for authentication in two or more copies to the customs authorities at the airport of departure, who shall retain a copy.

The said authorities may, for control purposes, require production of all the air waybills relating to the consignments listed on the manifest.

6. The airline transporting the goods shall inform the customs authorities at the airport of destination of the name of the airport or airports of departure.

The customs authorities at the airport of destination may waive this requirement in respect of airlines for which, *inter alia* because of the nature of the routes flown or regions served by the airlines concerned, there is no doubt as to the airport or airports of departure.

7. A copy of the manifests provided for in paragraphs 1 to 5 shall be presented to the customs authorities at the airport of destination. The said authorities shall retain a copy of such manifests.

8. Without prejudice to paragraph 7, the customs authorities at the airport of destination may, for control purposes, require production of the manifests relating to all the goods unloaded at the airport.

The said authorities may also, for control purposes, require production of the air waybills relating to the consignments listed on the manifest.

9. The customs authorities at the airport of destination shall transmit monthly to the customs authorities at each airport of departure a list drawn up by the airlines of the manifests referred to in paragraphs 1 to 3 which were presented to them during the previous month. Customs authorities granting such authorizations shall advise the customs authorities of the other Member States accordingly.

In the event of irregularities being found in connection with the information on the manifests appearing on the said list, the office of destination shall inform the office of departure, referring in particular to the air waybills which relate to the goods in question.

10. The customs authorities in the Member States, at the request of the airlines concerned, may by bilateral or multilateral arrangement allow the use of simplified Community transit procedures, using data exchange technology in operation between the airlines concerned, instead of the manifest specified in paragraph 1.

11. (a) In the case of international airlines which are either established or have a regional office in the customs territory of the Community and:

- use data exchange systems to transmit information between airports of departure and destination in the said territory, and
- fulfil the conditions of subparagraph (b),

the Community transit procedure described in paragraphs 1 to 9 shall be simplified on request.

On receipt of a request, the customs authorities of the Member State where the airline is established shall notify the customs authorities of the other Member States in whose territories the airports of departure and destination connected by data exchange technology are situated.

Provided no objection is received within sixty days of the date of notification the customs authorities shall allow the simplified procedure described in subparagraph (c), subject to Article 97 (2) (a) of the Code.

This authorization shall be valid in all the Member States concerned and shall apply only to transit operations between the airports referred to in it.

(b) The simplified procedure provided for in subparagraph (c) shall be granted only to airlines:

- the airline shall indicate the appropriate status T1, T2, TE (equivalent to T2 ES), TP (equivalent to T2 PT), and C (equivalent to T2L) against each item on the manifest,
- the Community transit procedure shall be considered discharged when the data exchange manifest is made available to the customs authorities of the airport of destination and the goods have been presented to them,
- a printout of the data exchange manifest shall be presented on request to the customs authorities at the airports of departure and destination,

- the customs authorities at the airport of departure shall carry out retrospective systems audit checks based on a level of perceived risk analysis,

- the customs authorities at the airport of destination shall carry out systems audit checks based on a level of perceived risk analysis and if necessary send details of data-exchange manifests to the customs authorities at the airport of departure for verification,

- the airline shall be responsible for identifying and notifying to the customs authorities all offences and irregularities found at the airport of destination,

- the customs authorities at the airport of destination shall, after a reasonable time, notify all offences and irregularities to the customs authorities at the airport of departure,

10. The customs authorities of the port of destination shall transmit monthly to the customs authorities at each port of departure a list drawn up by the shipping companies or their representatives of the manifests referred to in paragraphs 1 to 4 which were presented during the previous month. 11. (a) In the case of international shipping companies which are either established or have a regional office in the customs territory of the Community and fulfil the conditions of subparagraph (b), the Community transit procedure described in paragraphs 1 to 10 may be simplified further on request.

On receipt of a request, the customs authorities of the Member State where the shipping company is established shall notify the customs authorities of the other Member States in whose territories the intended ports of departure and destination are situated.

Provided no objection is received within sixty days of the date of notification, the customs authorities, shall allow the simplified procedure described in subparagraph (c), subject to Article 97 (2) (a) of the Code.

This authorization shall be valid in all the Member States concerned and shall apply only to transit operations between the ports referred to in it.

CHAPTER 9

Transport under the TIR or ATA carnet procedure

Section 1

Common Provisions

Article 451

1. Where, in accordance with Articles 91 (2) (b) and (c) and 163 (2) (b) of the Code, goods are transported from one point in the customs territory of the Community to another:

- under the procedure for the international transport of goods under cover of TIR carnets (TIR Convention),
- under cover of ATA carnets (ATA Convention)

the customs territory of the Community shall, for the purposes of the rules governing the use of the TIR or ATA carnet for such transport, be considered to form a single territory.

2. For the purposes of using ATA carnets as transit documents, 'transit' shall mean the transport of goods from a customs office situated in the customs territory of the Community to another customs office situated within the same territory.

Article 452

Where, in the course of transport from one point in the customs territory of the Community to another, goods pass through the territory of a third country, the controls and formalities associated with the TIR or ATA procedure shall be carried out at the points where the goods temporarily leave the customs territory of the Community and where they re-enter that territory.

Article 453

1. Goods transported under cover of TIR or ATA carnets within the customs territory of the Community shall be deemed to be non-Community goods, unless their Community status is duly established.

2. The Community status of the goods referred to in paragraph 1 shall be determined in accordance with Articles 314 to 324.

Article 454

1. This Article shall apply without prejudice to the specific provisions of the TIR and ATA Conventions concerning the liability of the guaranteeing associations when a TIR or an ATA carnet is being used.

2. Where it is found that, in the course of or in connection with a transport operation carried out under cover of a TIR carnet or a transit operation carried out under cover of an ATA carnet, an offence or irregularity has been committed in a particular Member State, the recovery of duties and other charges which may be payable shall be effected by that Member State in accordance with Community or national provisions, without prejudice to the institution of criminal proceedings.

3. Where it is not possible to determine in which territory the offence or irregularity was committed, such offence or irregularity shall be deemed to have been committed in the Member State where it was detected unless, within the period laid down in Article 455 (1), proof of the regularity of the operation or of the place where the offence or irregularity was actually committed is furnished to the satisfaction of the customs authorities.

Where no such proof is furnished and the said offence or irregularity is thus deemed to have been committed in the Member State in which it was detected, the duties and other charges relating to the goods concerned shall be levied by that Member State in accordance with Community or national provisions.

If the Member State where the said offence or irregularity was actually committed is subsequently determined, the duties and other charges (apart from those levied, pursuant to the second subparagraph, as own resources of the Community) to which the goods are liable in that Member State shall be returned to it by the Member State which had originally recovered them. In that case, any overpayment shall be repaid to the person who had originally paid the charges.

Where the amount of the duties and other charges originally levied and returned by the Member State which had recovered them is smaller than that of the duties and other charges due in the Member State where the offence or irregularity was actually committed, that Member State shall levy the difference in accordance with Community or national provisions.

The customs administrations of the Member States shall take the necessary measures to deal with any offence or irregularity and to impose effective penalties.

Article 455

1. Where an offence or irregularity is found to have been committed in the course of or in connection with a transport operation carried out under cover of a TIR carnet or a transit operation carried out under cover of an ATA carnet, the customs authorities shall notify the holder of the TIR carnet or ATA carnet and the guaranteeing association within the period prescribed in Article 11 (1) of the TIR Convention or Article 6 (4) of the ATA Convention, as the case may be.

2. Proof of the regularity of the operation carried out under cover of a TIR carnet or an ATA carnet within the meaning of the first subparagraph of Article 454 (3) shall be furnished within the period prescribed in Article 11 (2) of the TIR Convention or Article 7 (1) and (2) of the ATA Convention, as the case may be.

3. Such proof may be furnished to the satisfaction of the customs authorities *inter alia*:

- (a) by production of a document certified by the customs authorities establishing that the goods in question have been presented at the office of destination. This document must include information enabling the goods to be identified; or
- (b) by the production of a customs document issued in a third country showing release for home use, or a copy or photocopy thereof; such copy or photocopy must be certified as a true copy either by the body which endorsed the original document, or by the authorities of the third country concerned, or by the authorities of one of the Member States. This document must include information enabling the goods in question to be identified; or
- (c) for the purposes of the ATA Convention, by the evidence referred to in Article 8 of that Convention.

Section 2

Provisions relating to the TIR carnet procedure

Article 456

For the purposes of Article 1 (h) of the TIR Convention, 'customs office en route' shall mean any customs office through which a road vehicle, combination of vehicles or container, as defined in the TIR Convention, is imported into or exported from the customs territory of the Community in the course of a TIR operation.

Article 457

For the purposes of Article 8 (4) of the TIR Convention, where a consignment enters the customs territory of the Community or starts from a customs office of departure situated in the customs territory of the Community, the guaranteeing association shall become or shall be responsible to the customs authorities of each Member State the territory of which the TIR consignment enters, up to the point at which it leaves the customs territory of the Community or up to the customs office of destination in that territory.

Section 3

Provisions relating to the ATA carnet procedure

Article 458

1. The customs authorities shall designate a coordinating office in each Member State for any action concerning infringements or irregularities relating to ATA carnets.

Those authorities shall inform the Commission of the designation of the coordinating offices together with their full address. A list of the offices shall be published in the *Official Journal of the European Communities*, C series.

2. For the purposes of determining the Member State responsible for levying the duties and other charges due, the Member State in which an offence or irregularity committed during a transit operation carried out under cover of an ATA carnet is detected within the meaning of the second subparagraph of Article 454 (3) shall be the Member State where the goods were found or, if they have not been found, the Member State whose coordinating office holds the most recent voucher from the carnet.

Article 459

1. Where the customs authorities of a Member State establish that a customs debt has been incurred, a claim shall be sent to the guaranteeing association with which that Member State is linked as soon as possible. Where the incurrence of the debt is due to the fact that the goods covered by the ATA carnet have not been re-exported or have not been assigned a customs-approved treatment or use within the periods laid down by the ATA Convention, this claim shall be sent at the earliest three months after the date of expiry of the carnet.

2. The coordinating office making the claim shall at the same time, as far as possible, send to the coordinating office in the jurisdiction of which the office of temporary admission is situated, an information memo drawn up in accordance with the model shown in Annex 59.

The information memo shall be accompanied by a copy of the undischarged voucher, if the coordinating office has it in its possession. The information memo may also be used whenever this is deemed necessary.

Article 460

1. The amount of duties and taxes arising from the claim referred to in Article 459 shall be calculated by means of the model taxation form set out in Annex 60 completed in accordance with the instructions attached to it.

The taxation form may be sent later than the claim, though not more than three months from the claim and in any event not more than six months from the date on which the customs authorities initiate the recovery proceedings.

2. In accordance with Article 461 and as provided therein, the sending of this form to a guaranteeing association by the customs administration with which that association is connected shall not release the other guaranteeing associations in the Community from an obligation to pay duties and other charges if it is found that the offence or irregularity was committed in a Member State other than the one in which the proceedings were initiated.

3. The taxation form shall be completed in duplicate or triplicate, as necessary. The first copy shall be for the guaranteeing association connected with the customs authority of the Member State in which the claim is made. The second copy shall be retained by the issuing coordinating office. Where necessary the issuing coordinating office shall send the third copy to the coordinating office in whose jurisdiction the office of temporary admission is situated.

Article 461

1. Where it is established that the offence or irregularity was committed in a Member State other than the one in which the proceedings were initiated, the coordinating office of the first Member State shall close the file as far as it is concerned.

2. For the purposes of closure it shall send to the coordinating office of the second Member State the contents of the file in its possession and if necessary shall refund to the guaranteeing association with which it is connected any sums which that association may have deposited or provisionally paid.

However, the file shall be closed only if the coordinating office of the first Member State receives a discharge from the coordinating office of the second Member State indicating that claim proceedings have been initiated in the latter Member State, in accordance with the rules of the ATA Convention. This discharge shall be drawn up in accordance with the model in Annex 61.

3. The coordinating office of the Member State where the offence or irregularity was committed shall take over the recovery proceedings and where necessary collect from the guaranteeing association with which it is connected the amount of duties and other charges due at the rates in force in the Member State where this office is situated.

4. The proceedings must be transferred within a period of one year counting from the expiry of the carnet on condition that payment has not become definitive pursuant to Article 7 (2) or (3) of the ATA Convention. Should this time limit be exceeded the third and fourth paragraphs of Article 454 (3) shall apply.

CHAPTER 10

Transport under the form 302 procedure

Where, in accordance with Articles 91 (2) (e) and 163 (2) (e) of the Code, goods are transported from one point in the customs territory of the Community to another under cover of form 302 established under the Convention between the Parties to the North Atlantic Treaty on the Status of their Forces, signed in London on 19 June 1951, the customs territory of the Community shall be considered, for the purposes of the rules governing the use of the said form for such transport, to form a single territory.

2. Where, in the course of a transport operation referred to in paragraph 1, goods pass through the territory of a third country, the controls and formalities associated with form 302 shall be carried out at the points where the goods temporarily leave the customs territory of the Community and where they re-enter that territory.

3. Where it is found that, in the course of or in connection with a transport operation carried out under cover of form 302, an offence or irregularity has been committed in a particular Member State, the recovery of duties and other charges which may be payable shall be effected by that Member State in accordance with Community or national provisions, without prejudice to the institution of criminal proceedings.

4. Article 454 (3) shall apply *mutatis mutandis*.

In the case of measures imposing an export duty or other charge, the guarantee need not be furnished where the goods are carried under the Community transit procedure, where a guarantee has been furnished otherwise than in cash or the guarantee is waived by reason of the identity of the principal.

Article 468

1. Article 465 shall also apply to goods referred to in Article 463 (1) which, in the course of transport between two points within the customs territory of the Community, cross the territory of an EFTA country and are reconsigned from such a country.

By way of derogation from Article 482, the original of control copy T5 shall accompany the goods to the competent customs office of the Member State of destination.

The office of departure shall specify the period within which the goods must be reimported into the customs territory of the Community.

2. If the measure referred to in Article 463 (2) provides for the lodging of a guarantee, then by way of derogation from Article 467 such guarantee shall be furnished for all transactions covered by paragraph 1.

Article 469

Where the goods are not restored to free movement immediately following their arrival at the office of destination, it shall be for that office to take the necessary steps to implement the measures referred to in Article 463 (2).

Any alterations made in this way shall be initialled by the person making them and expressly authenticated by the competent authorities.

Article 488

The competent authorities of each Member State may, within the scope of their competence, authorize any person who fulfils the conditions laid down in Article 489 and who intends to consign goods in respect of which a control copy T5 must be made out (hereinafter referred as 'the authorized consignor') not to present at the office of departure either the goods concerned or the control copy T5 covering them.

2. A customs warehouse as a private warehouse conforming to the second indent of the second paragraph of Article 99 of the Code where the warehousekeeper is the same person as the depositor but is not necessarily the owner of the goods, may also be applied under a system permitting the warehousing of goods in storage facilities belonging to the holder of the authorization in accordance with Article 98 (3) of the Code. This system is classified as a type E warehouse.

3. Where a customs warehouse is applied in respect of a public warehouse conforming to the first indent of the second paragraph of Article 99 of the Code and is operated by the customs authorities, this is classified as a type F warehouse.

4. The combination in the same premises or location of the types of warehouse referred to in paragraphs 1, 2 and 3 shall not be permitted.

Subsection 2

Location of customs warehouses

Article 505

1. With the exception of type E and type F warehouses, a customs warehouse shall consist of premises or any other defined location approved by the customs authorities.

2. Where the customs authorities decide to operate a type F warehouse, they shall designate the premises or location which constitute the warehouse. The decision shall be published in the form used by the Member State for publishing its administrative or legal instruments.

3. A place approved by the customs authorities as a 'temporary storage facility' in accordance with Article 185 or operated by the customs authorities may also be approved as a type A, type B, type C or type D warehouse or operated as a type F warehouse.

- (a) the release of goods for free circulation, they shall not apply when the goods are entered for the customs warehousing procedure, nor for such time as the goods remain there;
- (b) the introduction of goods into the customs territory of the Community, they shall apply when non-Community goods are entered for the customs warehousing procedure;
- (c) the export of goods, they shall apply when Community goods are exported from the customs territory of the Community after being entered for the customs warehousing procedure.

Section 2

Provisions concerning the granting of authorization

Article 508

The provisions of this Section shall apply to all types of warehouse except type F.

Article 509

The application for authorization shall be submitted, in accordance with Article 497 and Annex 67/A, to the customs authorities designated by the Member State where the places to be approved as customs warehouses are situated or, in the case of a type E warehouse, to the customs authorities designated by the Member State where the warehousekeeper's main accounts are kept.

(1) OJ No L 351, 14. 12. 1987, p. 1.

Article 510

1. Authorization may be granted only if the applicant shows that there is a real economic need for warehousing and if the warehouse is intended principally for the storage of goods; however, the goods may undergo usual forms of handling, inward processing or processing under customs control under the conditions referred to in Articles 106 and 109 of the Code, provided that such operations do not predominate over the storage of the goods.

2. For the purposes of Article 86 of the Code, the assessment of whether the administrative costs of supervision and control of the customs warehouse are in proportion to the economic needs for customs warehousing shall take account *inter alia* of the type of customs warehouse and the procedures which may be applied therein.

Article 511

1. Authorizations shall be issued by the customs authorities designated by each Member State in which an application has been presented under Article 509.

Authorizations shall take effect on the date of issue or on a later date if they so provide. However, where an applicant is seeking authorization to operate a private warehouse and the customs authorities exceptionally notifies him of its agreement to issue such authorization in writing otherwise than by means of the form referred to in Annex 68/A, the authorization shall take effect on the date of such notification. A copy of the notification shall be annexed to the authorization and shall form an integral part thereof.

2. Without prejudice to the rules governing annulment, revocation and amendment, authorizations shall be for an unlimited period.

3. Authorizations shall specify *inter alia* the customs office responsible for supervising the customs warehouse. They may also specify, where appropriate, that goods which present a danger or are likely to spoil other goods or which, for other reasons, require special facilities, must be placed in premises specially equipped to receive them.

In the case of a private warehouse, the authorization may also specify the categories of goods which may be admitted to that warehouse.

4. Where the person concerned asks permission to present the goods or declare them for the procedure at customs offices other than the supervising office and the proper conduct of the operations would not be affected, the customs authorities may empower one or more offices to act as office(s) of entry for the procedure.

Where more than one Member State is affected, the customs authorities which issued the authorization shall send a copy to the other customs authorities concerned.

Article 512

1. The economic need criterion referred to in Article 510 (1) shall be held to be no longer fulfilled where the person concerned asks in writing for the authorization to be revoked.

2. An authorization may also be revoked where the customs authorities considers that the customs warehouse is not or is no longer sufficiently used to warrant its existence.

Section 3

Entry of goods for the procedure*Article 513*

1. Goods to be entered for the customs warehousing procedure and the corresponding declarations of entry for the procedure shall be presented at the supervising office or, where Article 511 (4) is applied, at an office of entry for the procedure indicated in the authorization.

2. Where the second subparagraph of Article 511 (4) is applied, a copy or additional sheet of the declaration referred to in paragraph 1 or a copy of the administrative or commercial document used to enter the goods for the procedure shall be sent by the office of entry for the procedure to the supervising office as soon as release is granted. The name and address of the said office shall be indicated in box 44 of the declaration or on the commercial or administrative document.

Where the office of entry for the procedure sees fit, it may ask the supervising office to inform it of the arrival of the goods.

The provisions governing the customs warehousing procedure shall be applicable from the date on which the office of entry for the procedure accepts the declaration of entry for the procedure; such declaration shall also be used for transport of the goods, which shall take place as soon as possible, and their introduction into the premises of the customs warehouse without presentation to the supervising office.

This procedure shall not apply in a type B warehouse.

3. The procedure referred to in paragraph 2 may also be used without a request to that effect from the persons concerned, for reasons relating to the internal administration of the customs offices, in particular the use of computerized procedures.

Subsection 1

Normal procedure*Article 514*

The declaration referred to in Article 513 shall be made in accordance with Articles 198 to 252.

Subsection 2
Simplified procedures

Article 515

The simplified procedures provided for in Article 76 of the Code shall apply in accordance with Articles 268 to 274.

Article 516

The procedures provided for in Articles 514 and 515 shall also apply in respect of the transfer of goods in a temporary storage facility referred to in Article 505 (3) to the customs warehousing procedure.

Section 4

Operation of customs warehouses and the customs warehousing procedure

Subsection 1

Stock records

Article 517

1. In type A, type C, type D and type E warehouses, the customs authorities shall designate the warehouse-keeper as the person required to keep the stock records referred to in Article 105 of the Code.

The stock records shall be made available to the supervising office to enable it to carry out any checks.

2. In type B customs warehouses, the supervising office shall keep the declarations of entry for the procedure or the administrative documents used for such entry in order to monitor their discharge. Stock records shall not be kept.

Without prejudice to other Community provisions governing the keeping of customs documents, the supervising office may decide as part of its internal administration how long such declarations will be kept there. Such time limit may be extended.

Where the goods to which the declaration or document relates have not been assigned to a customs-approved treatment or use within the time limit the supervising office shall require that the goods be assigned such treatment or use or that the initial declaration or document of entry for the procedure be replaced by a new declaration reproducing all the particulars of the old declaration or old document.

3. In a type F warehouse, the customs records shall contain all the information referred to in Article 520. The said records shall replace the stock records referred to in Article 105 of the Code.

Article 518

Without prejudice to Article 517 (3), the supervising office shall not keep stock records.

However, for administrative purposes it may keep a register of all declarations accepted.

Article 519

Where records kept for commercial or tax purposes by the depositor contain all the particulars necessary for supervision, taking into account the type of customs warehouse and the procedures applicable for entry and discharge, and such particulars are usable for the purposes of supervision, the customs authorities shall approve those records as the stock records referred to in Article 105 of the Code.

Article 520

1. The stock records referred to in Article 105 of the Code shall contain all the particulars necessary for the proper application and supervision of the procedure.

They shall include:

- (a) the information contained in boxes 1, 31, 37 and 38 of the declaration of entry for the procedure;
- (b) reference particulars of the declarations by means of which the goods are assigned to a customs-approved treatment or use discharging the customs warehousing procedure;
- (c) the date and reference particulars of other customs documents and all other documents relating to entry and discharge;
- (d) information enabling the goods to be monitored, including their location and particulars of any transfer of goods between customs warehouses without termination of the arrangements;
- (e) information concerning the common storage of goods referred to in Article 524;
- (f) any other details which may be needed to identify the goods;
- (g) information concerning the usual forms of handling to which the goods are subject;
- (h) information concerning the temporary removal of goods from the premises of the customs warehouse.

2. The stock records of a type D warehouse shall contain, in addition to the particulars listed in paragraph 1, the information referred to in the minimum list provided for in Annex 37.

3. The stock records shall at all times show the current stock of goods which are still under the customs

warehousing procedure. At the times laid down by the customs authorities, the warehousekeeper shall lodge at the supervising office a list of the said stock.

4. Where Article 112 (2) of the Code applies, the customs value of the goods before handling shall appear in the stock records.

5. Where the simplified (entry or discharge) procedures apply, the provisions of this Article shall apply *mutatis mutandis*.

Article 521

1. Goods entered for the customs warehousing procedure in a type A, type C or type D warehouse shall be entered in the stock records in accordance with Article 107 of the Code at the time when they are physically placed in the customs warehouse, on the basis of particulars recognized or accepted by the supervising office or the office of entry for the procedure, in accordance with Article 513 (2).

2. Where goods are entered for the procedure in a type E warehouse, the entry in the stock records referred to in paragraph 1 shall take place at the time when they arrive at the storage facilities of the holder of the authorization.

3. Where the customs warehouse also serves as a temporary storage facility in accordance with Article 505 (3), the entry in the stock records referred to in paragraph 1 shall take place:

- before expiry of the time limit set under Article 49 of the Code, where the local clearance procedure referred to in Article 272 is applied in respect of transfer from temporary storage to the customs warehousing procedure,
- in other cases, at the time when the goods are released following the lodging of the declaration entering the goods for the customs warehousing procedure.

4. Particulars relating to discharge of the procedure must be entered in the stock records:

- by the time the goods leave the customs warehouse premises, where one of the simplified procedures is applied,
- at the time when the goods are released following presentation of a declaration entering them for a customs-approved treatment or use, in other cases.

Subsection 2

Usual forms of handling

Article 522

1. Without prejudice to paragraphs 2 and 3, the usual forms of handling which non-Community goods may undergo are listed in Annex 69.

2. Where handling could give rise to an advantage in terms of the import duties applicable to the goods after handling compared with those applicable before handling, it may be authorized only on condition that the request referred to in Article 112 (2) of the Code is lodged at the same time as the application for authorization to carry out usual forms of handling.

In that case, a request for the more favourable items of charge to apply in a type D warehouse as referred to in Article 112 (3) of the Code cannot be accepted.

3. Where handling would result in higher import duties than those applying to the goods before handling, the person concerned shall not present the request referred to in Article 112 (2) of the Code.

In this case, the warehousekeeper of a type D warehouse shall waive any advantage he might gain from the application of the items of charge recognized or accepted for the handled goods when they were entered for the procedure.

4. Where goods placed under the customs warehousing procedure are declared for a customs-approved treatment or use other than release for free circulation and paragraph 2 applies, box 31 of the declaration entering the goods for the customs-approved treatment or use in question shall contain one of the following indications:

- Mercancías MU,
- SB varer,
- UB-Waren,
- Εμπορεύματα ΣΕ,
- UFH goods,
- Marchandises MU,
- Merci MU,
- GB-goederen,
- Mercadorias MU.

Such indication shall be carried over to any document relating to the customs procedure under which or temporary storage in which the goods are subsequently placed.

5. Where goods to which paragraph 2 applies, having been placed under one customs procedure, are released for free circulation or placed under another customs procedure which could result in the incurrance of a customs debt, information sheet INF 8 shall be used. It shall be made out in an original and one copy on a form complying with the model and provisions set out in Annex 70.

The customs authorities with which the declaration for free circulation or for another customs procedure which could result in the incurrance of a customs debt is lodged shall use information sheet INF 8, which it shall endorse, to ask the supervising office for the customs warehouse where the usual forms of handling were carried out to indicate the nature, customs value and quantity of the

declared goods which would be taken into account if they had not undergone the said handling.

The original of the INF 8 sheet shall be sent to the supervising office for the customs warehouse; the copy shall be retained by the customs authorities which endorsed box 14 of the form.

The supervising office for the customs warehouse shall provide the information requested in boxes 11, 12 and 13, endorse box 15 and send the original of the INF 8 sheet back to the customs office referred to in box 4.

6. The declarant may ask for the INF 8 sheet to be issued at the time when the declaration referred to in paragraph 4 is lodged.

In this case, the supervising office shall provide the information referred to in boxes 11, 12 and 13, endorse box 15 and return the original of the INF 8 sheet to the declarant.

Article 523

1. The person concerned must apply to the supervising office in writing, on a case-by-case basis, for authorization to carry out usual forms of handling before such handling is carried out.

2. Applications for authorization to carry out usual forms of handling must provide all particulars necessary for application of the provisions governing the customs warehousing procedure, in particular Article 522 (2) and (3).

If the application is approved, the supervising office shall grant authorization by endorsing the application to that effect and stamping it. In that case Article 502 shall apply *mutatis mutandis*.

3. Without prejudice to Article 522, an authorization to operate a customs warehouse or, in the case of a type E warehouse, an authorization to use the procedure, may indicate the usual forms of handling which are expected to be carried out under the procedure. In this case notification to the supervising office, in the manner it shall determine, that handling is to be carried out shall replace the application referred to in paragraph 1.

Subsection 3

Common storage of goods of different customs status

Article 524

1. Provided the proper conduct of operations is not thereby affected, the supervising office shall allow

Community goods other than those referred to in Article 98 (1) (b) of the Code and non-Community goods to be stored together in the same storage facilities.

2. Where common storage, as referred to in paragraph 1, makes it impossible to identify at all times the customs status of each type of goods, it shall be permitted only if the goods are equivalent.

Equivalent goods are those falling within the same subheading of the combined nomenclature, having the same commercial quality and the same technical characteristics.

Subsection 4

Temporary removal

Article 525

1. Before temporarily removing goods from the premises of the customs warehouse, the person concerned shall apply to the supervising office in writing, on a case-by-case basis, for authorization to do so.

2. Applications for authorization to remove goods temporarily shall provide all particulars necessary for the application of the provisions governing the customs warehousing procedure. If the application is approved, the supervising office shall grant authorization by endorsing the application to that effect and stamping it.

In that case Article 502 shall apply *mutatis mutandis*.

3. Authorizations to operate customs warehouses may indicate that goods can be temporarily removed. In this case notification to the supervising office, in the manner it shall determine, that the goods are to be temporarily removed shall replace the application referred to in paragraph 1.

4. Articles 522 and 523 shall apply where usual forms of handling are to be carried out while the goods are temporarily absent from the warehouse.

Subsection 5

Transfer of goods between customs warehouses without termination of the procedure

Article 526

1. To transfer goods between customs warehouses without termination of the customs warehousing procedure, a form corresponding to the specimen form, made out in accordance with Article 205, shall be used in accordance with the procedure described in Annex 71.

2. The simplified procedure described in Annex 72 shall apply:

— where the customs warehouse from which the goods are dispatched is authorized to use the local clearance procedure, as referred to in Article 253 (3), and the customs warehouse in which the goods are to be placed is authorized to use the simplified local clearance procedure for entry of goods for the procedure, as referred to in Article 272,

or

— where the same person is responsible for both warehouses,

or

— where the stock records are interconnected by electronic means.

3. Responsibility for goods transferred between warehouses shall pass to the warehousekeeper of the customs warehouse in which the goods are to be placed when he receives the goods and enters them in his stock records.

4. When the goods to be transferred have undergone usual forms of handling and Article 522 (2) applies, the document referred to in paragraph 1 must include the nature, customs value and quantity of the transferred goods which would be taken into account in the event of the incurrence of a customs debt if the goods concerned had not undergone the said handling.

Article 522 (4), (5) and (6) shall apply to these goods where appropriate.

5. Goods entered for the procedure cannot be transferred from one customs warehouse to another without termination of the procedure where the warehouse from or to which the transfer is made is a type B warehouse.

Subsection 6

Inventory

Article 527

The supervising office may, where it considers this necessary to ensure the proper operation of the customs warehouse, require an inventory to be made of all or some of the goods placed under the customs warehousing procedure, periodically or otherwise.

Section 5

Discharge

Article 528

1. Where equivalent goods are stored in common, as referred to in Article 524 (2), goods declared for a customs-approved treatment or use may be considered to be either Community or non-Community goods, at the choice of the person concerned.

In no case may application of the first subparagraph result in a given customs status being assigned to a quantity of goods greater than the quantity actually having that status which is stored at the customs warehouse when the goods declared for a customs-approved treatment or use are removed.

2. In the event of the total destruction or irretrievable loss of goods, the portion of goods entered for the procedure which has been destroyed or lost shall be established by reference to the proportion of goods of the same type under the procedure on the premises of the customs warehouse at the time when the destruction or loss occurred, unless the warehousekeeper can produce evidence of the actual quantity of goods under the procedure which was destroyed or lost.

Article 550

The goods referred to in Article 114 (2) (d) of the Code which can be used as production accessories are listed in Annex 74.

Section 2

Authorizing use of the procedure — normal procedure

Article 551

1. An authorization to use the suspension system shall be granted only where the applicant has the actual intention of re-exporting the main compensating products from the customs territory of the Community. In that case use of the suspension system may be authorized for all the goods to be processed.

2. An authorization for use of the drawback system shall be granted only in the cases referred to in Article 124 of the Code, where opportunities exist for export of the main compensating products from the customs territory of the Community.

3. Where the conditions for use of both systems are fulfilled, the applicant may request that the authorization be for either the suspension system or the drawback system.

Article 552

1. The economic conditions laid down in Article 117 (c) of the Code shall be considered fulfilled *inter alia* where:

(a) the processing consists of one of the following, referred to by the appropriate code:

However, the value limit for goods and products listed in Annex 75 shall be ECU 100 000. The said value shall be the customs value of the goods estimated on the basis of the particulars known and the documents presented at the time when the application is lodged.

This paragraph may be waived in respect of particular import goods in accordance with the Committee procedure (code 6400);

(b) no goods comparable to the goods to be processed are produced in the Community (code 6101);

'Comparable goods' means goods falling within the same eight-digit CN code, being of the same commercial quality and having the same technical characteristics, having regard to the compensating products to be obtained;

(c) comparable goods as defined in paragraph (b) are not produced in the Community in sufficient quantity (code 6102);

(d) comparable goods as defined in paragraph (b) cannot be made available to the applicant within a suitable time by producers established in the Community. Such goods shall be considered unavailable within a

'suitable time' where producers established in the Community cannot make them available to the operator in time for the proposed commercial operation to be carried out, despite a request having been made to them in good time (code 6103);

(e) comparable goods as defined in paragraph (b) are produced in the Community but cannot be used for one of the following reasons:

(i) their price would make the proposed commercial operation uneconomic (code 6104).

In deciding whether the price of comparable goods produced in the Community would make the proposed commercial operation uneconomic, it shall be necessary to take account *inter alia* of the impact that the use of Community-produced goods would have on the cost price of the compensating product and hence on the disposal of the product on the third-country market, having regard to:

— the price before duty of the goods for processing and the price of comparable goods produced in the Community less domestic taxes refunded or refundable on export, including any refunds or other amounts applying under the common agricultural policy.

Conditions of sale, in particular payment terms, and proposed delivery terms for the Community goods shall also be taken into account when comparing prices,

— the price obtainable for the compensating products on the third-country market, as ascertained from commercial correspondence or other information;

(ii) they do not have the quality or characteristics necessary for the operator to produce the required compensating products (code 6105);

(iii) they do not conform to the expressly stated requirements of the third-country purchaser of the compensating products (code 6106);

(iv) the compensating products must be obtained from import goods in order to comply with provisions concerning the protection of industrial or commercial property rights (code 6107);

(f) the applicant for an authorization in respect of a particular type of goods to be entered for the procedure within a given period:

(i) during the period in question, obtains 80 % of his total requirements for such goods incor-

porated in the compensating products in the customs territory of the Community in the form of comparable goods, as defined in paragraph (b), produced in the Community; to make use of this provision, the applicant must supply the customs authorities with supporting documents which enable the said authorities to satisfy itself that the intended purchase of Community goods may be reasonably carried out. Such supporting documents, to be annexed to the application, may take the form, for example, of copies of commercial or administrative documents which refer to purchases made in an earlier reference period, or orders or intended purchases for the period under consideration.

Without prejudice to Article 87 (2) of the Code, the customs authorities shall, where appropriate, check that the percentage is correct at the end of the period in question (code 7001);

(ii) is trying to guard against real supply problems, proven to the satisfaction of the customs authorities, for that type of goods, and the proportion of supplies of goods produced in the Community is lower than the percentage indicated in paragraph (i) (code 7002);

(iii) satisfies the customs authorities that he is taking the necessary steps to obtain goods for processing in the Community, but has met with no response from Community producers (code 7003);

(iv) is building civil aircraft for delivery to airline companies (code 7004);

(v) is carrying out repair, modification or conversion of civil aircraft (code 7005).

2. Paragraph 1 (f) (i) shall not apply to goods listed in Annex II to the Treaty.

3. The applicant shall indicate in his application the reasons for which the economic conditions are considered to be fulfilled within the meaning of paragraph 1.

Article 553

1. In exceptional circumstances, where the applicant considers the economic conditions to be fulfilled for reasons other than those listed in Article 552, he shall state the said reasons in his application (code 8000).

2. Where the customs authorities consider that the economic conditions are fulfilled in cases other than those provided for in Article 552, the authorization shall be granted for a limited period, which may not exceed nine months.

The particulars of the application concerning economic conditions shall be communicated to the Commission within a month of the issue of the authorization. The Commission shall inform the other Member States thereof.

The customs authorities may, at the request of the holder of the authorization, extend the period of validity of the latter where relevant provisions have not been adopted in good time in accordance with the Committee procedure.

3. Where the customs authorities consider that consultation at Community level is advisable in order to ensure that the economic conditions enabling an authorization to be issued are fulfilled, the Member State of the authorities shall submit the case to the Commission, which shall inform the other Member States thereof.

If the customs authorities do not consider it advisable to issue an authorization before consultation has taken place at Community level, they shall communicate particulars of the application as soon as possible.

If the customs authorities consider the authorization can be issued before the consultation, paragraph 2 may be applied *mutatis mutandis*.

Article 554

In assessing the economic conditions, the following shall not in themselves be taken as grounds for granting the authorization:

- (a) the fact that the Community producer of comparable goods which could be used to carry out the processing operations is an undertaking in competition with the person applying to use the procedure;
- (b) the fact that the goods are produced in the Community by a single undertaking.

Article 555

1. The application shall be made in conformity with Article 497 and in accordance with the specimen in Annex 67/B, and presented by the person to whom the authorization may be granted under Articles 86, 116 and 117 of the Code.

- 2. (a) The application shall be presented to the customs authorities designated by the Member State where the processing operation is to be carried out.
- (b) Where it is expected that successive processing operations will be carried out by or on behalf of the applicant in different Member States, application for a single authorization may be made.

In this case, the application, which shall include all particulars of the sequence of operations and the exact places where they will be carried out, shall be presented to the customs authorities of

the Member State where the first such operation will be carried out.

3. Where processing is to be carried out under a job-processing contract between two persons established in the Community, the application shall be lodged by or on behalf of the principal.

4. For the purposes of the second sentence of Article 117 (a) of the Code, 'imports of a non-commercial nature' means imports of goods referred to in Article 1(6).

Article 556

1. Without prejudice to Article 568, the authorization shall be issued by the authorities to which the application was presented under Article 555 (2) and shall be made out in conformity with Article 500 and in accordance with the specimen in Annex 68/B.

By way of derogation from Article 500 (3) and in duly substantiated exceptional cases, the customs authorities may issue a retroactive authorization. However, the retrospective effect of such authorization may not go back beyond the time when the application was lodged.

2. Where Article 555 (2) (b) applies, the authorization may not be issued without the agreement of the customs authorities designated by the Member States in which the places indicated in the application are located. The following procedure shall apply:

- (a) the customs authorities to which the application was presented, after satisfying themselves that the economic conditions can be considered fulfilled in respect of the planned operation, shall communicate the application and the draft authorization to the customs authorities of the other Member States concerned; the said draft shall include at least the rate of yield, the approved methods of identification, the customs offices referred to at point 12 of the specimen authorization in Annex 68/B, any simplified procedures used for entry for the procedure, transfer or discharge and the rules to be observed *inter alia* as regards notification to the supervising office;
- (b) the customs authorities having received notification shall transmit any objections as soon as possible, and in any case within two months of the date of communication of the application and draft authorization;
- (c) the customs authorities referred to in subparagraph (a), after taking the necessary steps to ensure payment of the customs debt which may be incurred in respect of the import goods, may issue the authorization if they have received no information concerning the existence of objections to the draft authorization within the period referred to in subparagraph (b);

- (d) the Member State issuing the authorization shall send a copy thereof to all the Member States referred to above.

Authorizations issued in this way shall be valid only in the Member States referred to above.

The Member States shall communicate to the Commission the names and addresses of the customs authorities designated to receive the application and the draft authorization mentioned in subparagraph (a). The Commission shall inform the other Member States accordingly.

3. To ensure correct application of the provisions governing the procedure, the customs authorities may require the holder for the purposes of facilitating controls, to keep or ensure the keeping of stock records, hereafter called 'inward processing records' which indicate the quantities of import goods entered for the procedure and of compensating products obtained, and all particulars needed for the monitoring of the operations and the correct calculation of any import duties which may be payable.

The 'inward processing records' shall be made available to the supervising customs office to enable it to carry out the checks necessary for the proper implementation of the procedure. Where the processing operations are being carried out in two or more establishments, the stock records shall at all times show the information pertaining to the implementation of the procedure in each establishment.

Where the records kept by the holder for commercial purposes allow supervision of the procedure they shall be recognized by the customs authorities as valid 'inward processing records' within the meaning of the preceding subparagraph.

Article 557

Where Article 556 (2) does not apply and compensating products are to be obtained from other compensating products obtained under an authorization already issued, the person carrying out the further processing operations or having them carried out must submit a fresh application conforming to Annex 67/B, giving reference particulars of the authorization already issued. In this case the economic conditions shall be considered fulfilled and shall not be assessed again (code 6303).

Article 558

1. The period of validity of the authorization shall be set by the customs authorities having regard to the economic conditions and the specific needs of the applicant.

Where the period of validity exceeds two years, the conditions on the basis of which it was issued shall be reviewed periodically at intervals specified in the authorization.

2. By way of derogation from paragraph 1, the period of validity of an authorization to use the procedure in respect of products referred to in Article 560 (2) shall not exceed three months.

Article 559

1. When issuing the authorization the designated customs authorities shall specify the period within which the compensating products must be re-exported in accordance with Article 118 of the Code, taking into account the time required to carry out the processing operations as indicated in the authorization for a given quantity of goods, the quantity of import goods authorized for the procedure, and the time required to assign the compensating products to a customs-approved treatment or use.

2. Where the circumstances so warrant, the period specified for re-exportation may be extended even when that originally set has expired.

Article 560

1. Without prejudice to paragraph 2, in the case of agricultural products of the kind referred to in Article 1 of Council Regulation (EEC) No 565/80 which are to be re-exported in the form of processed products or goods within the meaning of Article 2 (b) or (c) of that Regulation, the period for re-exportation shall not exceed six months.

2. In the case of products referred to in Article 1 of Council Regulation (EEC) No 804/68⁽¹⁾ which are intended for the manufacture of products referred to in that Article or goods referred to in the Annex to the said Regulation, the period for re-exportation shall not exceed four months.

1. In the case of prior exportation the customs authorities shall specify the period referred to in Article 118 (3) of the Code taking account of the time required for the procurement and transport to the Community of the import goods.

2. The period referred to in paragraph 1 shall not exceed:

— three months in the case of goods subject to a price-regulating mechanism,

— the period of validity of the import licence issued in accordance with Commission Regulation (EEC) No 2630/81⁽²⁾ in the case of raw sugar falling within CN code 1701 11 or 1701 12,

⁽¹⁾ OJ No L 148, 28. 6. 1968, p. 13.

⁽²⁾ OJ No L 258, 11. 9. 1981, p. 16.

— six months in the case of all other goods. This period may, however, be extended where the holder of the authorization submits a reasoned request, provided that the total period does not exceed twelve months. Where the circumstances so warrant the extension may be allowed even after the original period has expired.

Article 562

1. The periods referred to in Articles 559 and 560 shall run from the date of acceptance of the declaration entering the goods for the procedure or, under the drawback system, of the declaration for release for free circulation.

2. The periods specified in accordance with Article 561 shall run from the date of acceptance of the export declaration.

Article 563

1. Monthly or quarterly aggregation shall be authorized by the customs authorities duly empowered by the Member State where the authorization is applied for, where the import goods are expected to be entered for the procedure for processing and re-exportation in the form of compensating products on a regular basis, so that the period for re-exportation will be more or less constant.

2. In the case of monthly aggregation, all periods for re-exportation beginning to run in a given month shall expire on the last day of the calendar month during which the period for re-exportation relating to the final entry for the procedure in the month in question would expire.

3. In the case of quarterly aggregation, all periods for re-exportation beginning to run in a given quarter shall expire on the last day of the quarter during which the period for re-exportation relating to the final entry for the procedure in the quarter in question would expire.

4. Monthly or quarterly aggregation shall be applied having regard to the examples in Annex 76.

Article 564

1. Where monthly aggregation is authorized for the agricultural products referred to in Article 560 (1), the periods for re-exportation referred to in Article 563 (2) shall expire no later than the last day of the fifth calendar month following that for which aggregation was authorized.

2. Where monthly aggregation is authorized for the agricultural products referred to in Article 560 (2), the periods for re-exportation shall expire no later than the last day of the fourth month following that for which aggregation was authorized.

3. Where quarterly aggregation is authorized for the agricultural products referred to in Article 560 (1), the periods for re-exportation referred to in Article 563 (3) shall expire no later than the last day of the quarter following that for which aggregation was authorized.

4. Quarterly aggregation shall not be authorized for the products referred to in Article 560 (2).

Article 565

The periods referred to in Articles 563 and 564 shall run from the date of acceptance of the declaration entering the goods for the procedure.

Article 566

1. Subject to Article 567, the rate of yield as defined in Article 114 (2) (e) of the Code or the method of determining such rate referred to in Article 119 of the Code shall as far as possible be set on the basis of production data and shall be identifiable in the records of the operator's undertaking.

2. The rate, or method of determining the rate, shall be set in accordance with paragraph 1 and shall be subject to retrospective verification by the customs authorities.

Article 567

1. The standard rates of yield referred to in paragraph 2 shall apply only to import goods of sound, genuine and merchantable quality which conform to any standard quality laid down in Community legislation.

2. The standard rates of yield shown in column 5 of Annex 77 shall apply to inward processing operations carried out on the import goods listed in column 1 of that Annex which result in the production of the compensating products listed in columns 3 and 4.

1. This Article shall apply where processing operations are to take place in a single Member State, except in cases where the equivalent compensation system is to be used.

2. Where the simplified procedures for entry for the procedure laid down in Article 76 of the Code are not applied, and in the cases referred to in Article 552 (1) (a), any customs office empowered by the customs authorities to grant authorizations using the simplified procedure shall allow the lodging of the declaration of

entry for the procedure, under the suspension system, or the declaration for release for free circulation, under the drawback system, to constitute an application for authorization.

In this case acceptance of the declaration shall constitute the authorization, the said acceptance remaining in any event subject to the conditions governing the granting of the authorization.

3. Declarations presented under paragraph 2 shall be accompanied by a document made out by the declarant containing the following information, as necessary, unless such information can be entered in box 44 of the form used for the declaration itself:

- (a) where the person applying to use the procedure is not the same as the declarant, the name or business name and address of the applicant;
- (b) where the operator is not the same as the applicant or declarant, the name or business name and address of the operator;
- (c) the nature of the processing operation;
- (d) the trade and/or technical description of the compensating products;

- (g) the place where it is intended to carry out the processing operation.

Article 498 shall apply *mutatis mutandis*.

4. Article 502 shall apply *mutatis mutandis*.

Section 4

Equivalent compensation and prior exportation

Subsection 1

Equivalent compensation under the suspension system and the drawback system

Article 569

1. Without prejudice to paragraph 2 and Article 570 (2), where use is to be made of equivalent compensation, the equivalent goods must fall within the same eight-digit subheading of the CN code, be of the same commercial quality and have the same technical characteristics as the import goods.

2. Special provisions, set out in Annex 78, shall apply in respect of the goods referred to in that Annex.

3. Use of equivalent compensation shall be possible only where it has been requested by the person concerned in the application and where the authorization

specifies the factors referred to in paragraph 1 common to the equivalent goods and the import goods, and the means by which these may be checked.

4. Where the authorization provides for use of equivalent compensation, the specific measures to be taken in order to ensure compliance with the provisions applying to that system shall be indicated in the authorization.

5. Where the authorization does not specify use of equivalent compensation but the holder of the authorization wishes to use that system, the said holder shall apply for the authorization initially granted to be modified. The application shall be made out in accordance with Article 497.

Article 570

1. Where the circumstances so warrant, the customs authorities may allow the equivalent goods to be at a more advanced stage of manufacture than the import goods, provided that the essential part of the processing to which the said equivalent goods are subjected is carried out in the undertaking of the holder of the authorization or in the undertaking where the operation is being carried out on his behalf.

2. The person concerned shall in every case make it possible for the customs authorities to identify the factors referred to in Article 569 (1) before he can use the equivalent compensation system.

Article 571

1. In the case of equivalent compensation without prior exportation, the change in customs status of the import goods and the equivalent goods, referred to in Article 115 (3) of the Code, shall take place at the time of acceptance of the declaration discharging the procedure. However, where the holder of the authorization puts the import goods on the Community market either in the unaltered state or in the form of compensating products before the procedure has been discharged, the change in customs status of the import goods and the equivalent goods shall take place at the time the goods are put on the market.

2. The change in customs status referred to in paragraph 1 shall not alter the origin of the exported goods.

3. In the event of the total destruction or irretrievable loss of goods in the unaltered state or compensating products the proportion of import goods destroyed or lost shall be calculated by reference to the proportion of import goods in stocks of goods of the same kind held by the holder of the authorization at the time when the destruction or loss occurred, unless he can produce evidence of the actual quantity of import goods destroyed or lost.

Subsection 2

Prior exportation under the suspension system*Article 572*

1. Where equivalent compensation is used under the suspension system, Article 569, 570 and 571 (2) and (3) shall apply *mutatis mutandis*.

2. In the case of prior exportation, the change in customs status referred to in Article 115 (3) of the Code shall take place:

— in respect of the exported compensating products, at the time of acceptance of the export declaration and on condition that the import goods are entered for the procedure,

— in respect of the import goods and equivalent goods, at the time of release of the import goods declared for the procedure.

Section 5

Provisions applying to the suspension system

Subsection 1

Entry of goods for the procedure*Article 573*

1. The procedures governing the entry of goods for the inward processing procedure (suspension system) shall also apply to import goods, under the equivalent compensation system whether with prior exportation or not.

2. Without prejudice to Article 570 (2), equivalent goods used under the equivalent compensation system, whether with prior exportation or not, shall not be subject to the procedures for entry of goods for the procedure.

(a) *Normal procedure**Article 574*

1. Except where Article 568 applies, the declaration entering import goods for the inward processing procedure (suspension system) shall be lodged at one of the offices of entry for the procedure specified in the authorization.

Article 575

1. The declaration referred to in Article 574 shall be made in accordance with Articles 198 to 252.

2. Without prejudice to the application of Article 568, the description of the goods given in the declaration referred to in paragraph 1 shall correspond to the specifications in the authorization.

Where the equivalent compensation system is used, the particulars in the declaration shall be sufficiently detailed to make it possible to identify the particulars referred to in Article 569 (1).

3. For the purposes of Article 62 (2) of the Code, the documents to accompany the declaration shall be those provided for in Article 220; where the triangular traffic system is used the declaration shall also be accompanied by the INF sheet, except where Article 605 applies, in accordance with Article 604.

(b) *Simplified procedures**Article 576*

1. The simplified procedures provided for in Article 76 of the Code shall apply in accordance with Articles 275 and 276.

2. The customs authorities shall withhold authorization to use the local clearance procedure provided for in Article 276, from persons whose stock records, as referred to in Article 556 (3), cannot be established.

3. The supplementary declaration referred to in Article 76 (2) of the Code shall be supplied within the stipulated period and in any case no later than the time when the bill of discharge is lodged.

Subsection 2

Discharge of the procedure*Article 577*

1. Pursuant to Article 89 of the Code, the inward processing procedure (**suspension system**) shall be discharged in respect of the import goods when the compensating products or goods in the unaltered state have been declared for another customs-approved treatment or use and all other conditions for use of the procedure have been complied with.

Where Article 115 (1) (b) of the Code applies, the procedure shall be discharged when the customs authorities have accepted the declaration in respect of the non-Community goods.

2. For the purposes of discharging the inward processing procedure, the following shall be treated as export from the customs territory of the Community:

(a) the delivery of compensating products to persons in third countries who are eligible for relief pursuant to either the Vienna Convention of 18 April 1961 on Diplomatic Relations, the Vienna Convention of 24 April 1963 on Consular Relations or other consular conventions, or the New York Convention of 16 December 1969 on Special Missions;

Article 578

The declaration to assign compensating products or goods in the unaltered state to one of the customs-approved treatments or uses shall contain all particulars necessary for discharge of the procedure.

Article 579

1. When the nature and/or technical characteristics of the import goods have been altered as a result of unforeseeable circumstances or *force majeure* so that it becomes impossible to obtain the compensating products for which an inward processing authorization (suspension system) has been issued, the holder of the authorization shall inform the supervising customs office of what has happened.

2. Article 571 (3) shall apply *mutatis mutandis*.

3. In cases where the alteration in question may affect the continuation in force or the substance of the authorization, paragraphs 1 and 2 shall be without prejudice to Articles 9 and 87 (2) of the Code.

4. This Article shall apply *mutatis mutandis* to compensating products.

Article 580

1. The conditions for the release for free circulation of goods in the unaltered state or main compensating products shall be deemed to be fulfilled where the person concerned declares that he is unable to assign those products or goods to a customs-approved treatment or use under which import duties would not be payable.

2. The customs authorities may authorize release for free circulation on a general basis. They shall do so only if this does not contravene other Community provisions relating to release for free circulation.

3. Import goods may be put on the Community market in the form either of compensating products or of goods in the unaltered state without the formalities for release for free circulation being completed at the time of their being put on the market.

For the purposes of paragraph 4 only, goods put on the market in such a manner shall not be considered to have been assigned one of the treatments or uses referred to in Article 89 of the Code.

4. Import goods, whether in the form of compensating products or of goods in the unaltered state, which are covered by a general authorization for release for free circulation and which, upon expiry of the period for re-exportation (having due regard to Article 561), have not been assigned to any of the customs-approved treatments or uses referred to in Article 89 of the Code shall be considered to have been released for free circulation, and the declaration for release for free circulation shall be considered to have been lodged and accepted and release granted upon expiry of the said period.

5. Goods put on the market in accordance with paragraph 3 shall be considered to be Community goods forthwith.

Article 581

Without prejudice to use of the simplified procedures, any compensating products or goods in the unaltered state to be assigned to a customs-approved treatment or use shall be presented to the office of destination in order to undergo the customs formalities specified for the treatment or use in question under the general provisions applicable.

However, the supervising office may allow the products or goods concerned to be presented at a customs office other than that referred to in the first subparagraph.

(a) Normal procedures

Article 582

1. Except where Article 568 is applied, the declaration discharging the inward processing procedure (suspension system) shall be lodged at one of the offices of discharge specified in the authorization.

2. Where Article 568 is applied, the declaration referred to in paragraph 1 shall be lodged with the customs office which issued the authorization.

3. However, the supervising office may allow the declaration referred to in paragraph 1 to be presented at a customs office other than those referred to in paragraphs 1 and 2.

Article 583

1. The declaration referred to in Article 582 shall be made in accordance with the provisions laid down for the customs-approved treatment or use concerned.

2. The description of the compensating products or goods in the unaltered state in the declaration referred to in paragraph 1 shall correspond to the specifications in the authorization.

3. For the purposes of Article 62 (2) of the Code, the documents to accompany the discharge declaration shall be those whose production is necessary for placing the goods under the procedure requested, as provided for in Articles 218 to 221.

*(b) Simplified procedures**Article 584*

The simplified procedures provided for in Article 76 of the Code shall apply in accordance with Article 278.

*(c) Provisions concerning application of charges**Article 585*

1. Where the import goods are olive oils falling within headings 1509 or 1510 of the combined nomenclature and their release for free circulation either in the unaltered state or in the form of compensating products falling within CN codes 1509 90 00 or 1510 00 90 has been authorized, the agricultural levy to be charged shall be:

— the agricultural levy indicated on the import licence issued under the tendering procedure, subject to the provisions of Article 4 (2) of Commission Regulation (EEC) No 3136/78 of 28 December 1978 ⁽¹⁾,

or

— the last minimum agricultural levy fixed by the Commission before the date of acceptance of the declaration for free circulation, when the licence referred to in Article 6 of the said Regulation has been presented or when the quantity released for free circulation does not exceed 100 kilograms.

2. Paragraph 1 shall also apply where the import goods are olives falling within CN code 0709 90 39 or 0711 20 90 and the release for free circulation of compensating products falling within tariff CN code 1509 90 00 or 1510 00 90 has been authorized.

Article 586

In the event of the release for free circulation of goods in the unaltered state or compensating products in a Member State other than the one in which the goods were entered for the procedure, the said Member State shall collect the import duties which are mentioned on information sheet INF 1 provided for in Article 611, in accordance with the corresponding indications.

Article 587

1. Where the compensating products are released for free circulation and the customs debt is calculated on the basis of the items of charge appropriate to the import goods, in accordance with Article 121 of the Code, boxes 15, 16, 34, 41 and 42 of the declaration shall refer to the goods in the unaltered state.

2. The particulars referred to in paragraph 1 need not be supplied where information sheet INF 1 referred to in Article 611 or another document containing the same particulars as the INF 1 sheet accompanies the declaration for release for free circulation.

Article 588

1. The list of compensating products and processing operations to which the first indent of Article 122 (a) of the Code applies is in Annex 79.

For the purposes of this Article, destruction of compensating products other than those to which the first indent of Article 122 (a) of the Code applies shall be treated as export from the customs territory of the Community.

2. The date to be used for determining import duties on the compensating products referred to in paragraph 1 shall be that on which the declaration for release for free circulation is accepted.

3. The supervising office may allow the first indent of Article 122 (a) of the Code to be applied to waste, scrap, residues, offcuts and rejects other than those in the list referred to in paragraph 1.

Each Member State shall notify the Commission every six months of cases in which this paragraph has been applied.

Article 589

1. Where a customs debt is incurred in respect of compensating products or goods in the unaltered state, compensatory interest shall be paid on the import duty applicable.

⁽¹⁾ OJ No L 370, 30. 12. 1978, p. 72.

2. Paragraph 1 shall not apply:

- where a customs debt is incurred pursuant to Article 216 of the Code,
- where waste and scrap resulting from destruction under Article 182 of the Code is released for free circulation,
- where the secondary compensating products referred to in Annex 79 are released for free circulation, provided they are in proportion to exported quantities of main compensating products,
- where compensatory interest calculated in accordance with paragraph 4 does not exceed ECU 20 per declaration for free circulation,
- where the holder of the authorization requests release for free circulation and supplies proof that particular circumstances not arising from any negligence or deception on his part make it impossible or uneconomic to carry out the export operation under the conditions he had anticipated and duly substantiated when applying for the authorization.

3. The request for consideration of a case under the terms of the fifth indent of paragraph 2 shall be submitted to the customs authorities indicated by the Member State which issued the authorization. It shall be admissible only if accompanied by all the supporting documents needed for a full examination of the case.

Where a customs authorities receive a request relating to compensatory interest on a sum of ECU 3 000 or less per bill of discharge and finds that the grounds supporting the request indicate a situation of the kind provided for in the fifth indent of paragraph 2, they shall waive application of paragraph 1. In this case the supporting documents shall be kept for three years by the customs authorities.

In all other cases, where they intend to grant the request they shall forward the said request to the Commission with the file containing the material needed for a full examination of the case. Release granted by the customs authorities for entry for free circulation of compensating products or goods in the unaltered state may be made subject to the provision of a security, the amount of which shall be determined in accordance with paragraph 4.

The Commission shall notify the Member State concerned immediately it receives the file. The Member State which forwarded the request shall waive application of paragraph 1 if the Commission has failed to inform it of any objections within two months of the date of acknowledgement of receipt.

The Commission shall inform the Member States of requests received and the action taken on them.

4. (a) The annual interest rates shall be set by the Commission on the basis of the arithmetical average of representative short-term rates for each Member State in the same six-month period of the previous year.

They shall apply to all customs debts incurred in the course of a six-month period.

The rate applied shall be that for the Member State where the inward processing operations, or the first such operation, took place or should have taken place.

Rates shall be published in the L series of the *Official Journal of the European Communities* at least one month before they become applicable.

- (b) Interest shall be applied per calendar month for the period running from the first day of the month following the month in which the import goods in respect of which the procedure is discharged were first entered for the procedure to the last day of the month in which the customs debt is incurred.

In order to simplify determination of the period to be taken into account for the application of compensatory interest, particularly in the case of operations in which the number of import goods and/or compensating products makes it economically impracticable to apply the normal provisions, the customs authorities, at the request of the person concerned, may allow the period for application of interest to be based on turnover periods of stocks of goods used to obtain the compensating products.

The stock turnover period should be taken to mean the average time from the moment the goods to be used for obtaining the compensating products enter the factory until the moment they leave the factory. This period shall be determined from the ratio at cost price of the value of the average stock of goods necessary for obtaining the compensating products to the annual turnover.

The figure obtained, multiplied by 12 and rounded up to the next whole number, shall constitute the number of months on which compensatory interest shall be applicable.

The simplification mentioned above shall be accorded by the customs authorities only on condition that the stock turnover period can be verified.

The period to take into account for the application of compensatory interest shall not be less than one month.

- (c) The amount of interest shall be calculated on the basis of the import duties, the interest rate

referred to in (a) above and the period referred to in (b) above.

Article 590

1. In specific cases, particularly in the case of processing operations involving two or more Member States, simplified methods may be used at the request of the persons concerned for the calculation and accounting of compensatory interest.

2. When the Member States concerned have satisfied themselves that the proposed procedures can be implemented, they shall communicate them to the Commission and the Commission shall inform the other Member States. The procedures communicated to the Commission may be applied unless the Commission notifies the Member States concerned, within two months of the date of receipt of the draft, of any objections to such application.

Article 591

1. The proportion of import goods incorporated in compensating products shall be calculated when necessary in order to determine the import duties to be charged. Such calculation shall not be effected when, *inter alia*, the amount of the debt is determined solely on the basis of Article 122 of the Code.

2. The calculations shall be effected in accordance with the methods referred to in Articles 592 to 594 or by any other method giving the results.

Article 592

The quantitative scale method (compensating products) shall be used where one kind of compensating product only is derived from the inward processing operations. In that case the quantity of import goods corresponding to the quantity of compensating products in respect of which a customs debt is incurred shall be calculated by applying to the total quantity of the said goods a coefficient corresponding to the ratio of the quantity of compensating products in respect of which a customs debt is incurred to the total quantity of compensating products.

Article 593

1. The quantitative scale method (import goods) shall be applied where all elements of the import goods are found in each compensating product.

In deciding whether this method shall apply, losses shall not be taken into account.

The quantity of import goods used in the manufacture of each compensating product shall be determined by successively applying to the total quantity of import goods a coefficient corresponding to the ratio of the

quantity of the said goods found in each type of compensating product to the total quantity of the goods found in the compensating products as a whole.

The quantity of import goods corresponding to the quantity of compensating products in respect of which a customs debt is incurred shall be determined by applying the coefficient arrived at by the method indicated in Article 592 to the quantity of import goods used in the manufacture of the said product calculated in accordance with the third subparagraph.

2. By way of derogation from paragraph 1, the quantitative scale method (import goods) shall also apply to operations in which durum wheat is processed to obtain 'couscous' meal, groats and other meal.

Article 594

1. Where Articles 592 and 593 do not apply, the value scale method shall be applied in all cases. However, with the agreement of the holder of the authorization and for the purposes of simplification, the customs authorities may apply the quantitative scale method (import goods) instead of the value scale method where either method would give similar results.

2. In order to determine the quantity of import goods used in the manufacture of each type of compensating product, successive coefficients corresponding to the ratio of the value of each compensating product to the total value of those products, calculated in accordance with paragraph 3, shall be applied to the total quantity of import goods.

3. Pursuant to Article 36 (1) of the Code, the value of each of the different compensating products to be used for applying the value scale shall be:

- the recent selling price in the Community of identical or similar products, provided that this has not been influenced by the relationship between buyer and seller, or, where this is not known,
- the recent ex-works price in the Community, provided that this has not been influenced by the relationship between buyer and seller.

Where the value cannot be ascertained under the first subparagraph it shall be determined by the supervising customs office using any reasonable method.

4. The quantity of import goods corresponding to the quantity of compensating products in respect of which a customs debt is incurred shall be calculated by applying the coefficient arrived at by the method indicated in Article 592 to the quantity of import goods used in the manufacture of the products in question, calculated in accordance with paragraph 2.

(d) *Bill of discharge**Article 595*

1. Without prejudice to Article 596 (3), the holder of the authorization shall supply the supervising office with a bill of discharge.
2. The bill of discharge shall contain *inter alia* the following particulars:
 - (a) reference particulars of the authorization;
 - (b) the quantity of each type of import goods and reference particulars of the declarations entering them for the procedure;
 - (c) the combined nomenclature code of the import goods;
 - (d) the customs value of the import goods and the rate of import duties to which they are liable;
 - (e) the rate of yield established;
 - (f) the nature and quantity of the compensating products and the customs-approved treatment or use to which they are assigned, together with reference particulars of the declarations assigning the said products to a customs-approved treatment or use;
 - (g) the value of the compensating products if the value scale method is used for the purposes of discharge;
 - (h) the amount of import duties to be paid on the quantity of import goods considered to be released for free circulation under Article 580 (3);
 - (i) the import goods entered for the procedure under the triangular traffic system.

3. Where simplified procedures are used for entry for the procedure or discharge of the procedure, the declarations and documents in question shall be those provided for in Article 76 (3) of the Code. The bill of discharge shall also show the quantity of goods considered to be released for free circulation pursuant to Article 580.

Article 596

1. The bill of discharge shall be supplied within 30 days of the expiry of the time limit for re-exportation, calculated, where appropriate, in accordance with Article 565. Where monthly or quarterly aggregation is used, a bill of discharge shall be presented for each month or quarter.
2. Without prejudice to paragraph 3 and Article 597 (4), where the prior exportation system is used the bill of discharge shall be supplied within 30 days of the expiry of the period fixed in accordance with Article 561.
3. The supervising office may itself make out the bill of discharge subject to the same time limits referred to in

paragraphs 1 and 2. This fact shall be indicated in the authorization.

Article 597

1. Import duties on import goods, whether in the form of compensating products or of goods in the unaltered state considered to have been released for free circulation in accordance with Article 580 (3), shall be paid at the latest on presentation of the bill of discharge, which may be based on a summary declaration.
2. Where identification of other items of charge relating to the import goods is necessary in order to determine the amount of import duties, the bill of discharge shall in addition show such items and, where appropriate, the proportion of the import goods incorporated in the compensating products, established in accordance with Articles 592 to 594.
3. The holder of the authorization shall make available to the supervising office any document relating to goods considered to have been released for free circulation in accordance with Article 580 (3) whose production is necessary for the correct application of the provisions governing the release of goods for free circulation.
4. The supervising office may agree that:
 - (a) the bill of discharge referred to in Article 595 (1) should be made out by computer or in any other form that the said office shall stipulate;
 - (b) the bill of discharge should be made out on the declaration entering the goods for the procedure.

Article 598

The supervising office shall annotate the bill of discharge on the basis of the verification which has been carried out, informing the holder of the authorization if necessary of the result of that verification, and shall keep the bill of discharge and related documents for at least three calendar years from the end of the year in which the bill was drawn up. However, the said customs office may decide that documents relating to the bill of discharge shall be kept by the holder of the authorization. In that case the said documents shall be kept for the same period.

Article 599

1. Where import goods have been entered for the procedure by virtue of a single authorization but under several declarations, the compensating products or goods in the unaltered state assigned to a customs-approved treatment or use shall be considered to have been obtained from the import goods entered for the procedure under the earliest of the declarations.

2. Where the holder of the authorization can show the specific import goods from which the compensating products or goods in the unaltered state referred to in paragraph 1 were obtained, paragraph 1 shall not apply.

Subsection 3

Triangular traffic

Article 600

The customs authorities referred to in Article 556 may allow triangular traffic only as part of the prior exportation system.

Article 601

1. For triangular traffic the information sheet referred to as 'information sheet INF 5' shall be used.

2. Information sheet INF 5 shall be made out on a form corresponding to the model and indications in Annex 81, in one original and three copies which must be presented together at the customs office where the export formalities are carried out.

Information sheet INF 5 shall be made out in respect of the quantity of import goods corresponding to the quantity of compensating products exported. Where it is planned to import the goods in successive consignments, more than one INF 5 sheet may be made out.

3. In the event of theft, loss or destruction of information sheet INF 5, the importer may ask the customs office which endorsed it for a duplicate to be issued. The said office shall comply with this request provided it can be shown that the import goods in respect of which the duplicate is requested have not been entered for the procedure.

The original and copies of the information sheet INF 5 so issued shall bear one of the following indications:

- DUPLICADO,
- DUPLIKAT,
- DUPLIKAT,
- ΑΝΤΙΓΡΑΦΟ,
- DUPLICATE,
- DUPLICATA,
- DUPLICATO,
- DUPLICAAT,
- SEGUNDA VIA.

Article 602

1. When the export declaration in respect of the compensating products is presented at the customs office where the export formalities are carried out, an INF 5

sheet made out in accordance with Article 601 (2) shall be presented.

2. Where the compensating products leave the customs territory of the Community via the customs office where the export declaration is accepted, the said office shall endorse boxes 9 and 10 of the INF 5 sheet, retain copy No 1 and return the original and the other copies to the declarant.

Where that customs office is not the supervising customs office, it shall endorse copy 1 and send it to the supervising office.

3. Where the compensating products leave the customs territory of the Community via a customs office other than the customs office where the export declaration is accepted, they shall be carried from the customs territory of the Community under the external Community transit procedure.

The box reserved for the description of the goods on the transit document shall contain one of the indications referred to in Article 610 (1) plus the letters EX-IM.

In cases provided for by this paragraph the customs office where the export declaration is accepted shall complete box 9, entering particulars of the T1 document and the symbol T1. The customs office of exit shall complete box 10, send copy 1 to the supervising office and return the original and the other copies to the declarant.

4. The compensating products referred to in paragraph 3 may not be assigned to any treatment or use other than direct export to a third country.

Article 603

The import goods may be entered for the procedure at a customs office of entry other than that originally specified, where the change is allowed by the supervising office or by the customs office where the entry formalities are actually carried out, which in that event shall notify the change to the supervising office.

Article 604

1. The declaration entering import goods for the procedure must be accompanied by the original and copy 2 and 3 of information sheet INF 5.

2. The customs office where the declaration of entry is presented shall note on the original and copies 2 and 3 of information sheet INF 5 the quantity of import goods entered for the procedure and the date of acceptance of the declaration. It shall send copy 3 to the supervising office without delay, returning the original to the declarant and retaining copy 2.

3. On receipt of copy 3 the supervising office shall notify the holder of the authorization without delay of the quantity of import goods entered for the procedure and the date of such entry.

Article 605

Where the office of entry for the procedure and the office where the export formalities are carried out are in the same Member State, the customs authorities may stipulate other procedures.

Subsection 4

Specific commercial policy measures

Article 606

Where the application for authorization relates to goods subject to the commercial policy measures referred to in Article 607 (1) (a) it shall not be necessary to present any licence, authorization or other similar document at the time when the application is submitted.

Article 607

1. Where Community acts provide for specific commercial policy measures on:

- (a) release of goods for free circulation, the said measures shall not apply on entry of the goods for the inward processing procedure nor for such time as they remain under the procedure;
- (b) goods brought into the customs territory of the Community, the said measures shall apply when the import goods are entered for the inward processing procedure.

2. Non-Community goods, even where they are not liable to import duties, may also be entered for the procedure using the suspension system:

- (a) with a view to waiver of commercial policy measures applying to the release of the goods for free circulation;
- (b) with a view to waiver of commercial policy measures applying to export of the goods in the unaltered state or the compensating products, without prejudice to commercial policy measures applying to the export of products originating in the Community.

3. Where paragraph 1 (a) or paragraph 2 applies, it shall not be necessary to present any licence, authorization or other related document at the time of entry for the procedure.

Article 608

Without prejudice to Articles 617 to 623 when products or goods are to be moved within the customs territory of the Community, either under a transfer of authorization or under a single authorization, the products or goods concerned shall be transported in accordance with the provisions concerning external transit.
2. The Community external transit document or the document treated as the external transit document shall carry the endorsements referred to in Article 610.
3. If permission is given for the use of such transfer procedures, they shall be set out in the authorization. They shall replace the movement procedures of the external transit arrangements. In the case of a transfer of products or goods from the holder of one authorization to the holder of a second authorization, both of these authorizations shall stipulate the procedures of transfer.

(b) Provisions governing transfers of goods or products from the holder of an authorization to the holder of another

Article 619

Article 620

1. Responsibility for transferred goods or products shall pass to the holder of the second authorization at the time at which he takes delivery of the said goods or products and enters them in his inward processing records.
2. Such entry in the inward processing records shall have the effect of placing the goods or products under the procedure again in the name of the holder of the second authorization.

(c) General provisions

Article 621

1. Provided the proper conduct of operations is not thereby affected, the customs authorities, on other conditions they shall lay down, shall permit:

2. Where paragraph 1 (a) is applied, the supervising office must be informed by the office of entry for the procedure that the import goods have been entered for

the procedure and by the office of discharge that the compensating products or goods in the unaltered state have been exported, by dispatching extra copies of the declaration made to that effect and the accompanying documents.

Article 622

The holder of the authorization shall be responsible for providing the customs authorities with advance notification of the transfers to be carried out in the form and manner which the said authorities shall determine.

Article 623

Article 626

1. The declaration referred to in Article 625 shall be made in accordance with Articles 198 to 252.

2. Article 575 (2) and (3) shall apply.

(b) *Simplified procedures*

Article 627

1. The simplified procedures provided for in Article 76 of the Code for release for free circulation under the drawback system shall apply in accordance with Articles 275 and 276.

2. Article 576 (2) shall apply.

3. The supplementary declaration referred to in Article 76 (2) of the Code shall be supplied within the time limit laid down, and in any case no later than the time when the repayment claim is lodged.

Subsection 2

Repayment or remission of duties

Article 628

The cases referred to in Article 577 (2) shall be treated as equivalent to the export of compensating products from the Community.

Article 629

The declaration or application to assign compensating products to one of the customs-approved treatments or uses referred to in Article 128 of the Code shall contain all the particulars necessary to support a repayment claim.

Article 630

Without prejudice to the use of the simplified procedures, any compensating product which is to be assigned to one of the accepted customs-approved treatments or uses shall be presented to the office of discharge and undergo the customs formalities specified for the treatment or use in question in accordance with the general provisions applicable.

Article 631

1. Except where Article 568 applies, the declaration assigning the compensating products to one of the customs-approved treatments or uses referred to in Article 128 of the Code shall be lodged at one of the offices of discharge specified in the authorization.

2. Where Article 568 applies, the declaration referred to in paragraph 1 shall be lodged at the office which issued the authorization.

Such calculation shall not be effected when all the compensating products are assigned to one of the treatments or uses referred to in Article 128 of the Code.

2. The calculation shall be effected in accordance with the methods referred to in Articles 635 to 637 or by any other method giving the same results.

Article 635

The quantitative scale method (compensating products) shall be used where one kind of compensating product only is obtained from the inward processing operations. In that case the quantity of import goods corresponding to the quantity of compensating products for which repayment or remission may be claimed shall be calculated by applying to the whole amount of the said goods a coefficient corresponding to the ratio of the quantity of compensating products for which repayment or remission may be claimed to the total quantity of compensating products.

Article 636

The quantitative scale method (import goods) shall be applied where all elements of the goods released for free circulation are found in each compensating product.

In deciding whether this method shall apply, losses shall not be taken into account.

The quantity of import goods under the drawback system used in the manufacture of each compensating

product shall be determined by successively applying to the total quantity of import goods a coefficient corresponding to the ratio of the quantity of the said goods found in each type of compensating product to the total quantity of the goods found in the compensating products as a whole.

The quantity of import goods under the drawback system corresponding to the quantity of compensating products for which repayment or remission may be claimed shall be determined by applying the coefficient arrived at by the method indicated in Article 635 to the quantity of import goods used in the manufacture of the said product calculated in accordance with the third subparagraph.

Article 637

1. Where Articles 635 and 636 cannot be applied, the value scale method shall be used. However, with the agreement of the holder of the authorization and for the purposes of simplification, the customs authorities may apply the quantitative scale method (import goods) instead of the value scale method where either method would give similar results.

2. In order to determine the quantity of import goods used in the manufacture of each type of compensating product, successive coefficients corresponding to the ratio between the comparable value of each compensating product, calculated in accordance with paragraph 3, shall be applied to the total quantity of import goods.

3. Article 594 (3) shall apply.

4. The quantity of import goods corresponding to the quantity of compensating products for which repayment or remission may be claimed shall be calculated by applying the coefficient arrived at by the method indicated in Article 635 to the quantity of import goods used in the manufacture of the products in question, calculated in accordance with paragraph 2.

Article 638

1. The repayment or remission of import duties shall be subject to the lodging by the holder of the authorization of a claim, hereinafter referred to as the 'repayment claim/IP', with the supervising office. The claim shall be submitted in duplicate.

2. Subject to paragraph 4, where an authorization was issued under Article 556 (2), the repayment claim/IP may be submitted only to the supervising office in the Member State which issued the authorization.

3. Where Article 557 is applied, repayment may be claimed only by a single holder.

4. In specific cases, following a written request from the persons concerned, where two or more Member States involved in processing operations are prepared to allow repayment claims/IP to be submitted to the customs authorities of a Member State other than the one specified in paragraph 2, they shall first communicate the requests to the Commission, together with a draft of the procedures planned to ensure that the claim referred to in Article 640 is correctly made out. The Commission shall inform the other Member States accordingly. The procedures communicated by the Commission may be applied unless the Commission notifies the Member States concerned, within two months of the date of receipt of the draft, of any objections to such application.

Article 639

1. The period referred to in Article 128 (3) of the Code within which the repayment claim/IP shall be lodged shall be a maximum of six months from the date on which the compensating products were assigned one of the customs-approved treatments or uses referred to in Article 128(1) of the Code.

2. Where special circumstances so warrant, the customs authorities may extend the period referred to in paragraph 1 even after it has expired.

Article 640

1. The repayment claim/IP shall contain *inter alia* the following particulars:

- (a) reference particulars of the authorization;
- (b) the quantity of each type of import goods in respect of which repayment or remission is claimed;

- (e) the date of release for free circulation of the import goods under the drawback system;
- (f) reference to the declarations under which the import goods were released for free circulation under the drawback system;

Article 641

1. Where the supervising office decides that the declarations referred to in Article 640 (1) (f) and (j) and such other documents as the said office shall stipulate should be kept by the holder of the authorization, the said declarations and documents shall be made available to that office.

2. However, where Article 646 applies, the claim shall be accompanied by the originals of the INF 7 sheets, duly endorsed.

Article 642

1. The supervising office may allow claims to omit some of the particulars referred to in Article 640 (1) where these do not affect calculation of the amount to be repaid or remitted.

2. The supervising office may allow the repayment claim /IP referred to in Article 640 (1) to be made out by computer or in such other form as the said office shall stipulate.

Article 643

The supervising office shall annotate the repayment claim /IP on the basis of the verification carried out and shall inform the holder of the authorization of the result of that verification; it shall keep the claim and related documents for at least three calendar years from the end of the year in which it takes a decision on the claim.

However, the supervising office may decide that documents relating to the claim should be kept by the holder of the authorization. In that case, the said documents shall be kept for the same period.

Article 646

1. The information sheet known as the INF 7 sheet shall comprise an original and one copy on a form conforming to the specimen and provisions in Annex 84.

The customs office where the products were assigned such treatment or use shall where necessary, at the request of the person concerned, issue the information sheet INF 7.

Subsection 1

Authorizing use of the procedure — normal procedure

Article 749

1. For the purposes of Article 148 (b) of the Code, the customs authorities shall satisfy themselves that it is possible to establish that the compensating products have been manufactured from temporary export goods, by means, in particular, of the following:

- (a) the statement or description of special marks or manufacturer's numbers;
- (b) the affixing of plombs, seals, clip-marks or other distinctive marks;
- (c) the taking of samples, illustrations or technical descriptions;
- (d) the carrying out of analyses;
- (e) the examination of supporting documents relating to the transaction under consideration (such as contracts, correspondence or invoices) which show clearly that the compensating products are to be manufactured from the temporary export goods.

The customs authorities may also use the 'information document to facilitate the temporary exportation of goods sent from one country for manufacture, processing or repair in another' provided for by the Customs Cooperation Council recommendation of 3 December 1963 and contained in Annex 104.

2. Where the procedure is requested for the repair of goods, whether or not with the standard exchange system, the customs authorities shall satisfy themselves that the temporary export goods are capable of being repaired. If the customs authorities consider that this condition is not fulfilled, they shall refuse authorization.

3. Where the standard exchange system is requested, the customs authorities shall, *inter alia*, make use of the verification methods listed in paragraph 1 (a), (c), (d) or (e). In the case of paragraph 1 (e), supporting documents shall indicate clearly that the repair in question will be carried out by supplying a replacement complying with the conditions set out in Article 155 (1) of the Code.

4. For the purposes of paragraph 3, the customs authorities shall, in particular, satisfy themselves that the use

of the procedure to carry out a replacement as provided for in Article 154 (1) of the Code is not authorized as a means of improving the technical performance of the goods.

To that end they shall check:

- the contracts and other supporting documents relating to the repair, and
- the sales or leasing contracts and/or invoices relating to the temporary export goods or the goods incorporating temporary export goods, in particular the terms set out therein.

5. Where it is not possible to establish whether the compensating products will be manufactured from the temporary export goods and a request is made to the customs authorities for a derogation under Article 148 (b) of the Code, the authorities shall submit the application to the Commission.

Article 750

1. The application shall be made in conformity with Article 497 and in accordance with the specimen in Annex 67/E, and presented by the person to whom the authorization may be granted under Article 86, 147 and 148 of the Code.

2. (a) The application shall be presented to the customs authorities designated by the Member State where the goods for temporary exportation are located.

(b) Where it is expected that the goods will be exported from several Member States, application for a single authorisation may be made. This application shall be presented to the customs authorities designated by the Member State where part of the goods are located.

In that case, the application shall include particulars of the sequence of operations and the expected places of temporary exportation.

Article 751

1. Without prejudice to Articles 760 and 761, authorizations shall be issued by the customs authorities to which the application was presented under Article 750 (2) and shall be made out in conformity with Article 500 and in accordance with the specimen in Annex 68/E.

By way of derogation from Article 500 (3) and in duly substantiated exceptional cases, the customs authorities may issue a retroactive authorization. The retroactive effect of such authorization may not go back beyond the time when the application was lodged. This derogation shall not apply to standard exchange with prior importation.

2. Where Article 750 (2) (b) applies, the authorization may not be issued without the agreement of the customs authorities designated by the Member States in which the places indicated in the application are located. The following procedure shall apply:

(a) the customs authorities to which the application was presented, after satisfying themselves that the economic conditions can be considered fulfilled in respect of the planned operation, shall communicate the application and the draft authorization to the other customs authorities concerned; the said draft shall include, at least, the rate of yield, the approved methods of identification, the customs offices referred to at point 11 of the model authorization in Annex 68/E, if appropriate the customs office responsible for the arrangements ('supervising office') and any simplified procedures used for entry for the arrangements or release for free circulation under the arrangements as well as the rules to be observed *inter alia* as regards notification to the supervising office;

(b) the other customs authorities concerned shall notify the existence of any objections as soon as possible, and in any case within two months of the date of communication of the application and draft authorization;

(c) the customs authorities referred to in subparagraph (a) may issue the authorization if they have received no information concerning the existence of objections to the draft authorization within the period referred to in subparagraph (b);

(d) the Member State issuing the authorization shall send a copy thereof to all the Member States referred to above.

Authorizations issued in this way shall be valid only in the Member States referred to above.

The Member States shall communicate, to the Commission, the names and addresses of the customs authorities designated to receive the application and the draft authorization mentioned in subparagraph (a). The Commission shall inform the other Member States accordingly.

Article 752

1. An authorization for use of the standard exchange system without prior importation may also be used for the reimportation of compensating products instead of the replacement products, provided that all the conditions are fulfilled.

2. Where circumstances so warrant and all the conditions for authorizing use of the standard exchange system without prior importation are fulfilled, the customs authorities may allow the holder of an outward processing authorization which does not provide for use of this system to import replacement products.

The persons concerned shall submit a request to this effect no later than the time the products are imported.

Article 753

The period of validity of an authorization shall be set by the customs authorities having regard to the economic conditions and the specific needs of the applicant.

Where the period of validity exceeds two years, the economic conditions on the basis of which the authorization was issued shall be reviewed periodically at intervals specified therein.

Article 754

1. The period within which compensating products must be reimported into the customs territory of the Community shall be determined with reference to the time required to complete the processing operations and to transport the temporary export goods and the compensating products. This period shall be calculated from the date of acceptance of the declaration of entry for the procedure.

2. Under the standard exchange system without prior importation, the period within which replacement products must be imported into the customs territory of the Community shall be determined with reference to the time required for the substitution of the temporary export goods and for transport of the temporary export goods and of the replacement products. This period shall be calculated from the date of acceptance of the declaration of entry for the procedure.

3. The reimportation of compensating products referred to in paragraph 1 and the importation of replacement products referred to in paragraph 2 shall be deemed to have been accomplished when the products are:

- released for free circulation, or
- placed in a free zone or free warehouse or under the customs warehousing or inward processing procedures,
- placed under the external Community transit procedure.

4. The date to be taken into account for the application of this Article shall be the date of acceptance of the declaration for release for free circulation or the declaration entering the products for one of the customs-approved treatments or uses referred to in paragraph 3, or the date of entry into a free zone or free warehouse.

Article 755

Where circumstances so warrant the period referred to in Article 754 may be extended, even if the initial period has already expired.

Article 756

1. Where circumstances so warrant, the period referred to in Article 157 of the Code may be extended even after the original period has expired.

2. For the purposes of Article 157 (1) of the Code, the placing of goods in a free zone or free warehouse or under the customs warehousing procedure for subsequent export shall be treated as export.

Article 757

Without prejudice to Article 758, the rate of yield referred to in Article 149 (2) of the Code shall be fixed no later than the time when the goods are entered for the procedure, taking into account the technical data concerning the operation or operations to be performed where these are available, or, where they are not, data available in the Community relating to operations of the same type.

Article 758

Where circumstances so warrant, the customs authorities may fix the rate of yield after the goods have been entered for the procedure, but not later than the time when the declaration for release for free circulation of the compensating products is accepted.

Article 759

1. For the purposes of Article 147 (2) of the Code, the authorization referred to in Article 751 shall be issued at the request of the person exporting the temporary export goods even where he is not the person carrying out the processing operations. This derogation shall be requested in the application presented to the customs authorities of the Member State in which the applicant is established. It shall also apply in the case of triangular traffic.

The authorization shall be issued to the applicant.

The derogation shall enable a person other than the holder of the authorization to declare compensating products for free circulation and to be authorized to use the procedure.

2. The application must be accompanied by all supporting documents required for its examination. These documents must show in particular:

- the advantages which would result from application of Article 147 (2) of the Code in terms of an increase in sales of the export goods compared with sales carried out under normal conditions,
 - evidence that the requested derogation would not cause damage to the essential interests of Community producers of products identical or similar to the compensating products to be reimported.
3. When the customs authorities have all the necessary information they shall transmit the application to the Commission together with its opinion.

On receipt of the application the Commission shall communicate the information to the Member States.

The Commission shall decide in accordance with the Committee procedure whether and on what conditions an authorization may be issued, and shall in particular specify control measures to ensure that the relief referred to in Article 151 of the Code is granted only for compensating products in which the temporary export goods are actually incorporated.

Subsection 2

Authorizing use of the procedure — simplified procedures

Article 760

1. Where the simplified procedures for entry for the procedure laid down in Article 76 of the Code are not applied, and the processing operations concern the repair of goods, a customs office empowered by the customs authorities to issue authorizations using the simplified procedure shall allow the lodging of the declaration of entry for the procedure to constitute an application for authorization.

In this case acceptance of the declaration shall constitute the authorization, and the said acceptance shall be subject to the conditions governing the granting of the authorization.

2. Declarations presented under paragraph 1 shall be accompanied by a document made out by the declarant containing the following information, as necessary, unless such information can be entered in box 44 of the form used for the declaration itself:

- (a) where the person applying to use the procedure is not the same as the declarant, the name or business name and address of the applicant;
- (b) the trade and/or technical description of the compensating products;
- (c) the nature of the processing operations;
- (d) the time required to reimport the compensating products;

- (f) the means of identification.

Article 498 shall apply *mutatis mutandis*.

3. Article 502 shall apply *mutatis mutandis*.

Article 761

1. Where the processing operations concern repairs of a non-commercial nature, whether for a consideration or free of charge, the customs office designated by the customs authorities shall, at the request of the declarant, allow the declaration for release for free circulation to constitute the application for authorization. In these cases, acceptance of the declaration shall constitute authorization and the said acceptance shall be subject to the conditions governing the granting of the authorization.

2. For the purposes of paragraph 1 'repairs of a non-commercial nature' means repairs to goods, including restoring them to their original condition and putting them in order, which:

- are carried out on an occasional basis, and
- relate exclusively to goods for the personal use of the importer or his family, which do not by their nature or quantity reflect any commercial interest.

3. It shall be for the applicant to prove the non-commercial nature of the goods. The customs office shall not grant the facilities provided for in paragraph 1 unless all the conditions are fulfilled.

Section 2

2. Where Article 760 applies, the declaration referred to in paragraph 1 shall be lodged at a duly empowered customs office.

Article 764

1. The declaration referred to in Article 763 shall be made in accordance with the provisions laid down for exportation.

3. The provisions of Article 658 (3) shall apply.

Subsection 2

Article 765

The simplified procedures provided for in Article 76 of the Code shall apply in accordance with Article 277.

Section 3

Without prejudice to Article 754 (running of period provided for in Article 149 (1) of the Code), entitlement to relief under the outward processing procedure shall be subject to the lodging of a declaration for release for free circulation.

Article 767

1. Except where Articles 760 and 761 are applied, the declaration for release for free circulation shall be lodged at one of the offices of discharge specified in the authorization.

2. Where Article 760 is applied, the declaration referred to in paragraph 1 shall be lodged with the customs office which issued the authorization.

3. Where Article 761 is applied, the declaration for release for free circulation shall be lodged with a customs office duly empowered by the customs authorities.

4. However, the supervising office may allow the declaration referred to in paragraph 1 to be presented at a customs office other than the ones referred to in paragraphs 1 and 2.

Article 768

1. The declaration referred to in Article 767 shall be made in accordance with Articles 198 to 252.

2. Without prejudice to the application of Article 761, the description of the compensating products or replacement products in the declaration referred to in paragraph 1 shall correspond to the specifications in the authorization.

3. For the purposes of Article 62 (2) of the Code, the documents to accompany the declaration shall be those whose production is necessary for the release of the goods for free circulation, as provided for in Articles 218 to 221 and:

— a copy of the declaration of entry for the procedure, or, in the case of triangular traffic, the INF 2 form as provided for in Article 781, and

— where the declaration for release for free circulation is lodged after the expiry of the periods fixed in accordance with Article 149 (1) of the Code, and Article 754 (3) is applied, any supporting documents making it possible to verify that the compensating or replacement products were assigned to the customs-approved treatments or uses within the said period.

Article 769

The simplified procedures provided for in Article 76 of the Code shall apply to release for free circulation under the procedure in accordance with Articles 254 to 267 and 278.

⁽³⁾ OJ No L 282, 1. 11. 1975, p. 49.

⁽⁴⁾ OJ No L 282, 1. 11. 1975, p. 77.

Article 771

1. Where the second subparagraph of Article 151 (2) of the Code is applied, the loading, transport and insurance costs for the temporary export goods to the place where the processing operation or the last such operation took place shall not be included in:

- the value of the temporary export goods which is taken into account when determining the customs value of the compensating products in accordance with Article 32 (1) (b) (i) of the Code,
- the processing costs, where the value of the temporary export goods cannot be determined by application of Article 32 (1) (b) (i) referred to in the first indent.

⁽¹⁾ OJ No L 118, 20. 5. 1972, p. 1.

⁽²⁾ OJ No L 84, 27. 3. 1987, p. 1.

Article 143 shall apply for the appraisal of the relationship between the holder of the authorization and the operator.

Article 772

1. The proportion of temporary export goods incorporated in the compensating products shall be calculated by one of the methods referred to in Articles 773 to 775 where all the compensating products, other than secondary compensating products referred to in Article 774 (3) resulting from a given processing operation are not released for free circulation at the same time.

2. The calculations referred to in Articles 773 to 775 shall be worked out on the basis of the examples set out in Annex 105 or by any other method giving the same results.

Article 773

1. Where one kind of compensating product only is derived from the outward processing operations from one or more kinds of temporary export goods, the quantitative scale method (compensating products) shall be used to determine the amount to be deducted on release for free circulation of the compensating products.

2. For the purposes of paragraph 1, the quantity of each kind of temporary export goods corresponding to the quantity of compensating products released for free circulation to be taken into account for determining the amount to be deducted shall be calculated by applying to the total quantity of each kind of the said goods a coefficient corresponding to the ratio of the quantity of compensating products released for free circulation to the total quantity of compensating products.

Article 774

1. Where several kinds of compensating product are derived from the outward processing operations from one or more kinds of temporary export goods and all elements of the said goods are found in each of the different kinds of compensating product, the quantitative scale method (temporary export goods) shall be used to determine the amount to be deducted on the release for free circulation of the compensating products.

2. In deciding whether the method referred to in paragraph 1 applies, no account shall be taken of losses.

3. In determining the proportion of temporary export goods, secondary compensating products which constitute waste, scrap, residues, offcuts and remainders shall be treated as losses.

4. Where paragraph 1 is applied, the quantity of each kind of temporary export goods used in the manufacture of each kind of compensating product shall be determined by successively applying to the total quantity of each kind of temporary export goods a coefficient corresponding to the ratio of the quantity of the said goods found in each kind of compensating product to the total quantity of the said goods found in the compensating products as a whole.

5. The quantity of each kind of temporary export goods corresponding to the quantity of each kind of compensating product released for free circulation to be taken into account for determining the amount to be deducted shall be calculated by applying the coefficient arrived at by the method indicated in Article 773 (2) to the quantity of each kind of temporary export goods used in the manufacture of each kind of the said products, calculated in accordance with paragraph 4.

Article 775

1. Where Articles 773 and 774 do not apply, the value scale method shall be used.

However, with the agreement of the holder of the authorization and for the purposes of simplification, the customs authorities may apply the quantitative scale method (temporary export goods) instead of the value scale method where either method would give similar results.

2. In order to determine the quantity of each kind of temporary export goods used in the manufacture of each kind of compensating product, successive coefficients corresponding to the ratio of the customs value of each compensating product to the total customs value of those products shall be applied to the total quantity of temporary export goods.

3. Where one type of compensating product is not reimported, the value of such products for the purposes of the value scale shall be the recent selling price in the Community of identical or similar products, provided such price is not influenced by a relationship between the buyer and seller.

Article 143 shall apply for the appraisal of the relationship between the buyer and seller.

If the value cannot be determined by application of the above provisions, it shall be determined by the customs authorities by any reasonable method.

4. The quantity of each kind of temporary export goods corresponding to the quantity of each kind of compen-

sating product released for free circulation to be taken into account for determining the amount to be deducted shall be calculated by applying the coefficient arrived at by the method indicated in Article 773 (2) to the quantity of each kind of temporary export goods used in the manufacture of those products, calculated in accordance with paragraph 2.

Article 776

1. Where an outward processing authorization is issued which does not provide for a repair and the customs authorities is able, by agreement with the holder of the authorization, to set an approximate amount of duty payable under the provisions on partial relief from import duties, the said authority may set an average rate applicable to all processing operations to be carried out under that authorization (aggregated discharge) in the case of undertakings which frequently carry out outward processing operations.

2. The rate referred to in paragraph 1 shall be determined for each period not exceeding six months on the basis of:

- an approximate estimate made in advance of the sum payable for that period, or
- experience gained with regard to the collection of the amount paid in respect of an earlier equivalent period.

The rate shall be increased as appropriate with a view to ensuring that the amount of import duty entered in the accounts is not less than the amount legally due.

3. The rate referred to in paragraph 1 shall apply provisionally to the processing charges for compensating products released for free circulation for a reference period identical to that used for the calculations referred to in paragraph 2, and it shall not be necessary to calculate precisely the amount of import duty payable every time items are released for free circulation.

4. The amount of import duty obtained by applying this Article shall be entered in the accounts under the conditions and within the periods provided for in Articles 217 to 232 of the Code.

5. At the end of each reference period the customs authorities shall undertake the aggregated discharge of the procedure and make the final calculation in accordance with the provisions relating to partial relief from import duties.

6. If it emerges from the final calculation that the amount of import duty which has been entered in the accounts is too high, or that, in spite of the increase

effected in accordance with paragraph 2, the amount of import duty entered in the accounts is less than the amount legally due, an adjustment shall be made.

Section 5

Triangular traffic

Article 777

1. The customs authorities referred to in Article 751 shall permit use of the triangular traffic system either:

- (a) in connection with the authorization referred to in Article 147 or Article 152 of the Code; or
- (b) at the special request of the holder of the authorization, presented after the authorization has been granted but before the compensating or replacement products have been released for free circulation.

2. Use of the triangular traffic system shall not be authorized under the standard exchange system with prior importation.

Article 778

3. In the event of theft, loss or destruction of information sheet INF 2, the holder of the outward processing authorization may ask the customs office which endorsed it for a duplicate to be issued. 3. The original of information sheet INF 2 shall be presented to the customs office where the goods leave the customs territory of the Community. That office shall certify on the original that the goods have left the said territory and shall return it to the person presenting it.

2. Where samples are taken or illustrations or technical descriptions are used, the office referred to in paragraph 1 shall authenticate such samples, illustrations or technical descriptions by affixing its customs seal either on the goods, where their nature permits it, or on the packaging, in such a way that it cannot be tampered with.

A label bearing the stamp of the office and reference particulars of the export declaration shall be attached to the samples, illustrations or technical descriptions in a manner which prevents substitution.

3. The samples, illustrations or technical descriptions, authenticated and sealed in accordance with paragraph 2, shall be returned to the exporter, who shall present them with the seals intact when the compensating or replacement products are reimported.

3. Where the compensating or replacement products are released for free circulation in more than one consignment at more than one customs office and Article 779 (2) has not been applied, the customs office where the first declaration for release for free circulation is lodged shall, at the request of the declarant, replace the initial information sheet INF 2 with further INF 2 sheets made out for the quantity of temporary export goods not yet released for free circulation. The customs office shall indicate on the replacement information sheet or sheets the number of the initial information sheet and the customs office which issued it. The quantities entered on the replacement information sheet or sheets shall be set off against the quantities entered on the initial information sheet INF 2 which, once discharged in this way, shall be annexed to the initial declaration for release for free circulation. As each of the replacement information sheets is discharged, it shall be annexed to the declaration for free circulation to which it refers.

Article 782

The office of discharge shall be empowered to ask the customs office which endorsed information sheet INF 2 for post-clearance verification of the authenticity of the information sheet and the accuracy of the particulars which it contains and any additional information entered on it.

IMPLEMENTING PROVISIONS RELATING TO EXPORT

CHAPTER 1

Permanent exportation

Article 788

1. The exporter, within the meaning of Article 161 (5) of the Code, shall be considered to be the person on whose behalf the export declaration is made and who is the owner of the goods or has a similar right of disposal over them at the time when the declaration is accepted.

2. Where ownership or a similar right of disposal over the goods belongs to a person established outside the Community pursuant to the contract on which the export is based, the exporter shall be considered to be the contracting party established in the Community.

Article 789

In cases involving sub-contracting, the export declaration may also be lodged at the customs office responsible for the place where the sub-contractor is established.

Article 790

Where, for administrative reasons, the first sentence of Article 161 (5) of the Code cannot be applied, the declaration may be lodged with any customs office, in the Member State concerned, which is competent for the operation in question.

Article 791

1. Where there are duly justified good reasons, an export declaration may be accepted:

— at a customs office other than that referred to in the first sentence of Article 161 (5) of the Code,

or

— at a customs office other than that referred to in Article 790.

In this case, controls relating to the application of prohibitions and restrictions shall take account of the special nature of the situation.

2. Where, in the cases referred to in paragraph 1, export formalities are not completed in the exporter's Member State, the customs office where the export declaration has been lodged shall send a copy of the Single Administrative Document to a designated office in the exporter's Member State.

Article 792

Without prejudice to Article 207, where the export declaration is made on the basis of the Single Administrative Document, copies 1, 2 and 3 shall be used. The customs office where the export declaration has been lodged (customs office of export) shall stamp Box A and, where appropriate, complete box D. On granting release of the goods, it shall retain copy 1, send copy 2 to the statistical office of the Member State of the customs office of export and return copy 3 to the person concerned.

Article 793

1. Copy 3 of the Single Administrative Document and the goods released for export shall be presented to customs at the customs office of exit.

2. *Customs office of exit* means:

(a) in the case of goods exported by rail, post, air or sea, the customs office competent for the place where the goods are taken over under a single transport contract for transport to a third country by the railway companies, the postal authorities, the airlines or the shipping companies;

(b) in the case of goods exported by pipeline and of electrical energy, the office designated by the Member State where the exporter is established;

(c) in the case of goods exported by other means or in circumstances not covered by (a) and (b), the last customs office before the goods leave the customs territory of the Community.

3. The customs office of exit shall satisfy itself that the goods presented correspond to those declared and shall

supervise and certify their physical departure by an endorsement on the reverse of copy 3. The endorsement shall take the form of a stamp showing the name of the office and the date. The customs office of exit shall return copy 3 to the person presenting it, for return to the declarant.

In the case of split exportation, the endorsement shall be given only for those goods which are actually exported. In the case of split exportation via several different customs offices, the customs office of exit where the original of copy 3 was presented shall, upon receiving a duly substantiated request, certify a copy of copy 3 for each part of the goods in question, with a view to it being presented to another office of exit concerned. The original of copy 3 shall be noted accordingly.

When the entire operation is carried out on the territory of one Member State, that Member State may provide for the non-endorsement of copy 3, in which case this copy shall not be returned.

4. Where the customs office of exit establishes that goods are missing, it shall note the copy of the declaration presented and inform the customs office of export.

Where the customs office of exit establishes that there are goods in excess, it shall refuse exit to these goods until the export formalities have been completed.

When the customs office of exit establishes a discrepancy in the nature of the goods, it shall refuse exit until the export formalities have been completed, and shall also inform the customs office of export.

5. In the cases referred to in paragraph 2 (a), the customs office of exit shall endorse copy 3 of the export declaration in accordance with paragraph 3 after making the endorsement 'Export' in red on the transport document and affixing its stamp. Where, in the case of regular shipping lines or direct transport or flights to third country destinations, the operators are able to guarantee the regularity of operations by other means, the endorsement 'Export' shall not be required.

6. Where goods sent to a third country or a customs office of exit under a transit procedure are concerned, the office of departure shall endorse copy 3 in accordance with paragraph 3 and return it to the declarant after making the endorsement 'Export', in red, on all copies of the transit document or any other document replacing it. The customs office of exit shall control the physical exit of the goods.

The first subparagraph shall not apply where presentation at the office of departure as referred to in Article 419 (4) and (7) and Article 434 (6) and (9) is dispensed with.

7. The customs office of exit may ask the exporter to provide evidence that the goods have left the customs territory of the Community.

Article 794

1. Goods not subject to prohibition or restriction and not exceeding ECU 3 000 in value per consignment and per declarant may be declared at the customs office of exit.

Member States may provide that this provision shall not apply when the person making the export declaration is acting as a professional customs agent on behalf of others.

2. Oral declarations may be made only at the customs office of exit.

Article 795

Where goods leave the customs territory of the Community without an export declaration, such declaration shall be lodged retrospectively by the exporter at the customs office competent for the place where he is established. The provisions of Article 790 shall apply in these circumstances.

Acceptance of this declaration shall be subject to presentation by the exporter, to the satisfaction of the customs authorities of the customs office concerned, of evidence concerning the nature and quantity of the goods in question and the circumstances under which they left the customs territory of the Community. That office shall also endorse copy 3 of the Single Administrative Document.

Retrospective acceptance of the declaration shall not preclude application of the penalties in force nor the consequences which may arise as regards the common agricultural policy.

Article 796

1. Where goods released for export do not leave the customs territory of the Community, the exporter shall immediately inform the customs office of export. Copy 3 of the declaration in question shall be returned to that office.

2. Where, in the cases referred to in Article 793 (5) or (6), a change in the transport contract has the effect of terminating inside the customs territory of the Community a transport operation which should have finished outside it, the companies or authorities in question may only carry out the amended contract with the agreement of the customs office referred to in Article 793 (2) (a) or, in the case of a transit operation, the office of departure. In this case copy 3 should be returned.

CHAPTER 2

*Temporary exportation using an ATA carnet**Article 797*

1. An ATA carnet may be used for export where the following conditions are fulfilled:

- (a) the ATA carnet shall be issued in a Member State of the Community and endorsed and guaranteed by an association established in the Community forming part of an international guarantee chain.

The Commission shall publish a list of the associations;

- (b) the ATA carnet shall be applicable only to Community goods:

— in respect of which no request for repayment has been submitted;

- (c) the documents referred to in Article 221 must be presented. The customs authorities may require production of the transport document;

- (d) the goods must be intended for reimportation.

- (a) verify the information given in boxes A to G of the exportation voucher against the goods under cover of the carnet;

- (b) complete, where appropriate, the box on the cover page of the carnet headed 'Certificate by customs authorities';

- (c) complete the counterfoil and box H of the exportation voucher;

- (d) enter its name in box H (b) of the reimportation voucher;

- (e) retain the exportation voucher.

3. If the customs office of export is not the office of exit, the customs office of export shall carry out the formalities referred to in paragraph 2, but it shall not complete box 7 of the exportation counterfoil, which must be completed by the customs office of exit.

4. The time limit for reimportation of the goods laid down by the customs authorities in box H (b) of the exportation voucher may not exceed the validity of the carnet.

Article 798

Where goods which left the customs territory of the Community under cover of an ATA carnet are no longer intended to be reimported, an export declaration containing the particulars referred to in Annex 37 shall be presented to the customs office of export.

On presentation of the carnet in question, the latter shall endorse copy 3 of the export declaration and shall invalidate the reimportation voucher and counterfoil.

TITLE VI

GOODS LEAVING THE CUSTOMS TERRITORY OF THE COMMUNITY

Article 843

1. Where goods not under a customs procedure whose exportation from the Community is prohibited or subject to restrictions, export duty or another charge on export leave the customs territory of the Community with the intention of their being re-introduced into another part of that territory, their exit shall give rise to the making out of a control copy T5 in accordance with the rules laid down in Articles 472 to 495.

2. The provisions of paragraph 1 shall not apply to transport by an airline company or by a shipping company, provided that the transport by sea is effected by a direct route and by regular shipping line without a stop outside the customs territory of the Community.

3. The control copy T5 may be made out by any customs office where the goods in question are presented and it must be presented together with the goods in question at the customs office of exit.

4. The said copy shall include:

- in boxes 31 and 33 respectively, the description of the goods and the appropriate combined nomenclature code,

6. The control copy T5 shall be returned without delay to the customs office which made it out by the customs office referred to in paragraph 5, after the latter has endorsed box 'J: Control of use and/or destination' by putting a cross in the first box and inserting the date when the goods were reintroduced into the customs territory of the Community.

Nevertheless in the case of irregularities, an appropriate note shall be made in the 'Remarks' box.

PART III

RETURNED GOODS

Article 844

1. In accordance with Article 185 (2) (b) of the Code, the following shall be exempt from import duties:

— goods previously exported from the customs territory of the Community, in respect of which the customs export formalities have been completed with a view to obtaining refunds or other amounts provided for on exportation under the common agricultural policy,

or

— goods in respect of which a financial advantage other than the said refunds or other amounts has been granted under the common agricultural policy, entailing an obligation to export the said goods,

provided it is established, as appropriate, that the refunds or other amounts paid have been repaid, or that the necessary steps have been taken by the competent authorities for such sums to be withheld, or that the other financial advantages granted have been cancelled, and that the goods:

- (i) could not be entered for home use in the country to which they were sent on account of laws in force in that country;

(ii) were returned by the consignee as being defective or not in accordance with the provisions of the contract relating to them;

(iii) were reimported into the customs territory of the Community because they could not be used for the purposes intended owing to other circumstances outside the exporter's control.

2. The circumstances referred to in paragraph 1 (iii) shall include the following:

(a) goods returned to the customs territory of the Community following damage occurring before delivery to the consignee, either to the goods themselves or to the means of transport on which they were carried;

(b) goods originally exported for the purposes of consumption or sale in the course of a trade fair or similar occasion which have not been so consumed or sold;

(c) goods which could not be delivered to the consignee on account of his physical or legal incapacity to honour the contract under which the goods were exported;

(d) goods which, because of natural, political or social disturbances, could not be delivered to their consignee or which reached him after the mandatory delivery date stipulated in the contract under which the goods were exported;

(e) products covered by the common organization of the market in fruit and vegetables, exported and sent for sale on consignment, but which were not sold in the market of the third country of destination.

3. Goods exported under the common agricultural policy with an export licence or an advance fixing certificate shall not be exempt from import duties unless it is established that the relevant Community provisions have been complied with.

4. The goods referred to in paragraph 1 shall not be exempt from import duties unless they are entered for free circulation in the customs territory of the Community within twelve months of the date of completion of the customs formalities relating to their exportation.

Article 845

Returned goods shall be exempt from import duties even where they represent only a proportion of the goods previously exported from the customs territory of the Community.

The same applies where the goods consist of parts or accessories belonging to machines, instruments, apparatus or other products previously exported from the customs territory of the Community.

Article 846

1. By way of derogation from Article 186 of the Code, returned goods in one of the following situations shall be exempt from import duties:

- (a) goods which, after having been exported from the customs territory of the Community, have received no treatment other than that necessary to maintain them in good condition or handling which alters their appearance only;
- (b) goods which, after having been exported from the customs territory of the Community, received treatment other than that necessary to maintain them in good condition or handling other than that altering their appearance, but which proved to be defective or unsuitable for their intended use, provided that one of the following conditions is fulfilled:

- such treatment or handling was applied to the goods solely with a view to repairing them or restoring them to good condition,
- their unsuitability for their intended use became apparent only after such treatment or handling had commenced.

2. Where returned goods have undergone treatment or handling permitted under paragraph 1 (b) and such treatment would have rendered them liable to import duties if they had come under outward processing

arrangements, the rules in force for charging duty under the said arrangements shall apply.

However, if goods have undergone an operation consisting of repair or restoration to good condition which became necessary as a result of unforeseen circumstances which arose outside the customs territory of the Community, this being established to the satisfaction of the customs authorities, relief from import duties shall be granted provided that the value of the returned goods is not higher, as a result of such operation, than their value at the time of export from the customs territory of the Community.

3. For the purposes of the second subparagraph of paragraph 2:

- (a) *repair or restoration to good condition which became necessary* means: any operation to remedy operating defects or material damage suffered by goods while they were outside the customs territory of the Community, without which the goods could no longer be used in the normal way for the purposes for which they were intended;
- (b) the value of returned goods shall be considered not to be higher, as a result of the operation which they have undergone, than their value at the time of export from the customs territory of the Community, when the operation does not exceed that which is strictly necessary to enable them to continue to be used in the same way as at that time.

When the repair or restoration to good condition of goods necessitates the incorporation of spare parts, such incorporation shall be limited to those parts strictly necessary to enable the goods to be used in the same way as at the time of export.

Article 847

When completing the customs export formalities, the customs authorities shall, at the request of the person concerned, issue a document containing the information necessary for identification of the goods in the event of their being returned to the customs territory of the Community.

Article 848

1. The following shall be accepted as returned goods:

- goods for which the following documents are produced in support of the declaration for release for free circulation:
 - (a) the copy of the export declaration returned to the exporter by the customs authorities, or a copy of such document certified true by the said authorities; or
 - (b) the information sheet provided for in Article 850.

Where evidence available to the customs authorities at the customs office of reimportation or ascertainable by them from the person concerned indicates

that the goods declared for free circulation were originally exported from the customs territory of the Community, and at that time satisfied the conditions for acceptance as returned goods, the documents referred to at (a) and (b) shall not be required.

- goods covered by an ATA carnet issued in the Community.

These goods may be accepted as returned goods, within the limits laid down by Article 185 of the Code, even when the validity of the ATA carnet has expired.

In all cases, the formalities laid down in Article 290 (2) shall be carried out.

2. The first indent of paragraph 1 shall not apply to the international movement of packing materials, means of transport or certain goods admitted under specific customs arrangements where autonomous or conventional provisions lay down that customs documents are not required in these circumstances.

Nor shall it apply in cases where goods may be declared for release for free circulation orally or by any other act.

3. Where they consider it necessary, the customs authorities at the customs office of reimportation may ask the person concerned to submit additional evidence for the purposes of identification of the returned goods.

Article 849

1. A declaration for release for free circulation relating to returned goods whose export may have given rise to the completion of customs export formalities with a view to obtaining refunds or other amounts provided for on exportation under the common agricultural policy, shall be supported not only by the documents referred to in Article 848, but by a certificate issued by the authorities responsible for the grant of such refunds or amounts in the Member State of exportation. Such certificate shall contain the particulars necessary to allow the customs office where the goods concerned were declared for free circulation to verify that it relates to the said goods.

2. When the export of the goods did not give rise to the completion of customs export formalities with a view to obtaining refunds or other amounts provided for on exportation under the common agricultural policy, the certificate shall bear one of the following indications:

— Sin concesión de restituciones u otras cantidades a la exportación;

— Ingen restitutioner eller andre beløb ydet ved udførslen;

5. When the customs authorities at the customs office where the goods are declared for release for free circulation have the means to satisfy themselves that no refund or other amount provided for on exportation under the common agricultural policy has been granted, and cannot subsequently be granted, the certificate referred to in paragraph 1 shall not be required.

Article 850

Information sheet INF 3 shall be drawn up in an original and two copies on forms which conform to the specimens appearing in Annex 110.

Article 851

1. Subject to paragraph 3, information sheet INF 3 shall be issued at the exporter's request by the customs authorities at the customs office of exportation at the time of completion of the export formalities for the goods concerned, if the exporter declares that it is probable that these goods will be returned via a customs office other than the customs office of exportation.

2. Information sheet INF 3 may also be issued, at the exporter's request, by the customs authorities at the customs office of exportation after completion of the export formalities for the goods concerned, provided

that these authorities can establish, on the basis of the information at their disposal, that the particulars in the exporter's request relate to the goods exported.

3. In the case of the goods referred to in Article 849 (1), information sheet INF 3 may be issued only after completion of the relevant customs export formalities, and subject to the proviso in paragraph 2.

In addition, it may be issued only on condition that:

- (a) box B has been completed and endorsed by the customs authorities beforehand; and
- (b) box A has been completed and endorsed by the customs authorities beforehand, where the information contained therein is required.

Article 852

1. Information sheet INF 3 shall contain all items of information required by the customs authorities for the purpose of identifying the exported goods.

2. Where it is expected that the exported goods will be returned to the customs territory of the Community through several customs offices other than the customs office of exportation, the exporter may ask for several information sheets INF 3 to be issued to cover the total quantity of the goods exported.

Similarly, the exporter may ask the customs authorities which issued an information sheet INF 3 to replace it by several information sheets INF 3 covering the total quantity of goods included in the information sheet INF 3 initially issued.

The exporter may also ask for an information sheet INF 3 to be issued in respect of a proportion only of the exported goods.

Article 853

The original and one copy of information sheet INF 3 shall be returned to the exporter for presentation at the customs office of reimportation. The second copy shall be kept in the official files of the customs authorities who issued it.

Article 854

The customs office of reimportation shall record on the original and on the copy of information sheet INF 3 the quantity of returned goods exempted from import duties, retaining the original and sending the copy, bearing the reference number and the date of declaration for free circulation, to the customs authorities who issued it.

2. Information sheet INF 3 may be used for the request and the transmission of the information referred to in paragraph 1.

Article 858

Where security is given by making a cash deposit, no interest thereon shall be payable by the customs authorities.

TITLE II

INCURRENCE OF THE DEBT

CHAPTER 1

*Failures which have no significant effect on the operation of temporary storage or of the customs procedure**Article 859*

The following failures shall be considered to have no significant effect on the correct operation of the temporary storage or customs procedure in question within the meaning of Article 204 (1) of the Code, provided:

- they do not constitute an attempt to remove the goods unlawfully from customs supervision,
- they do not imply obvious negligence on the part of the person concerned, and

— all the formalities necessary to regularize the situation of the goods are subsequently carried out:

1. exceeding the time limit allowed for assignment of the goods to one of the customs-approved treatments or uses provided for under the temporary storage or customs procedure in question, where the time limit would have been extended had an extension been applied for in time;
2. in the case of goods placed under a transit procedure, exceeding the time limit for presentation of the goods to the office of destination, where such presentation takes place later;
3. in the case of goods placed in temporary storage or under the customs warehousing procedure, handling not authorized in advance by the customs authorities, provided such handling would have been authorized if applied for;
4. in the case of goods placed under the temporary importation procedure, use of the goods otherwise than as provided for in the authorization, provided such use would have been authorized under that procedure if applied for;
5. in the case of goods in temporary storage or placed under a customs procedure, unauthorized movement of the goods, provided the goods can be presented to the customs authorities at their request;

7. in the case of goods having received favourable tariff treatment by reason of their end-use, transfer of the goods without notification to the customs authorities, before they have been put to the intended use, provided that:
 - (a) the transfer is recorded in the transferor's stock records; and
 - (b) the transferee is the holder of an authorization for the goods in question.

Article 860

The customs authorities shall consider a customs debt to have been incurred under Article 204 (1) of the Code unless the person who would be the debtor establishes that the conditions set out in Article 859 are fulfilled.

Article 861

The fact that the failures referred to in Article 859 do not give rise to a customs debt shall not preclude the application of provisions of criminal law in force or of provisions allowing cancellation and withdrawal of authorizations issued under the customs procedure in question.

CHAPTER 2

Natural wastage

Article 862

1. For the purposes of Article 206 of the Code, the customs authorities shall, at the request of the person concerned, take account of the quantities missing wherever it can be shown that the losses observed result solely from the nature of the goods and not from any negligence or manipulation on the part of that person.
2. In particular, negligence or manipulation shall mean any failure to observe the rules for transporting, storing, handling, working or processing the goods in question imposed by the customs authorities or by normal practice.

Article 863

The customs authorities may waive the obligation for the person concerned to show that the goods were irretrievably lost for reasons inherent in their nature where they are satisfied that there is no other explanation for the loss.

Article 864

The national provisions in force in the Member States concerning standard rates for irretrievable loss due to the nature of the goods themselves shall be applied where the person concerned fails to show that the real loss exceeds that calculated by application of the standard rate for the goods in question.

CHAPTER 3

Customs status of goods in certain irregular situations

Article 865

The presentation of a customs declaration for the goods in question, or any other act having the same legal effects, and the production of a document for endorsement by the competent authorities, shall be considered as removal of goods from customs supervision within the meaning of Article 203 (1) of the Code, where these acts have the effect of wrongly conferring on them the customs status of Community goods.

Article 866

Without prejudice to the provisions laid down concerning prohibitions or restrictions which may be applicable to the goods in question, where a customs debt on importation is incurred pursuant to Articles 202, 203, 204 or 205 of the Code and the import duties have been paid, those goods shall be deemed to be Community goods without the need for a declaration for entry into free circulation.

Article 867

The confiscation of goods pursuant to Article 233 (c) and (d) of the Code shall not affect the customs status of the goods in question.

TITLE III

ENTRY IN THE ACCOUNTS AND POST-CLEARANCE RECOVERY

Article 868

Member States need not enter in the accounts amounts of duty of less than ECU 10.

There shall be no post-clearance recovery of import duties or export duties where the amount per recovery action is less than ECU 10.

Article 869

The customs authorities shall themselves decide not to enter uncollected duties in the accounts:

- (a) in cases in which preferential tariff treatment has been applied in the context of a tariff quota, a tariff ceiling or other arrangements when entitlement to this treatment had been ended at the time of acceptance of the customs declaration without that fact having been published in the *Official Journal of the European Communities* before the release for free circulation of the goods in question or, where such fact is not published, having been made known in an appropriate manner in the Member State concerned, the person liable for payment for his part having acted in good faith and complied with all the provisions laid down by the legislation in force as regards the customs declaration;
- (b) in cases in which they consider that the conditions laid down in Article 220 (2) (b) of the Code are fulfilled, provided that the amount not collected from the operator concerned in respect of one or more import or export operations but in consequence of a single error is less than ECU 2 000;
- (c) in cases in which the Member State to which the said authorities are subject has been so authorized in accordance with Article 875.

Article 870

1. Each Member State shall send the Commission a list of the cases in which the provisions of Article 869 (a), (b) or (c) have been applied, giving a short summary of each case.

2. The list referred to in paragraph 1 shall be forwarded during the first and third quarters of each year for all cases where it was decided not to enter the uncollected duties in the accounts during the preceding half-year.

3. The Commission shall circulate the lists to all other Member States.

4. The lists shall be examined periodically by the Committee.

Article 871

In cases other than those referred to in Article 869, where the customs authorities either consider that the conditions laid down in Article 220 (2) (b) of the Code are fulfilled or are in doubt as to the precise scope of the criteria of that provision with regard to a particular case, those authorities shall submit the case to the Commission, so that a decision may be taken in accordance with the procedure laid down in Articles 872 to 876. The case submitted to the Commission shall contain all the information required for a full examination.

As soon as it receives the case the Commission shall inform the Member State concerned accordingly.

Should it be found that the information supplied by the Member State is not sufficient to enable a decision to be taken on the case concerned in full knowledge of the facts, the Commission may request that additional information be supplied.

Article 872

Within 15 days of receipt of the case referred to in the first paragraph of Article 871, the Commission shall forward a copy thereof to the Member States.

Consideration of the case in question shall be included as soon as possible on the agenda of a meeting of the Committee provided for in Article 247 of the Code.

Article 873

After consulting a group of experts composed of representatives of all Member States, meeting within the framework of the Committee to consider the case in question, the Commission shall decide whether the circumstances under consideration are or are not such that the duties in question need not be entered in the accounts.

Such decision must be taken within six months of the date on which the case referred to in the first paragraph of Article 871 is received by the Commission. Where the Commission has found it necessary to request additional information from the Member State in order that it may take a decision, the six months shall be extended by a period equivalent to that between the date the

Commission sent the request for additional information and the date it received that information.

Article 874

The Member State concerned shall be notified of the decision referred to in Article 873 as soon as possible and in any event within 30 days of the expiry of the period specified in that Article.

A copy of the decision shall be sent to the other Member States.

Article 875

Where it is established by the decision referred to in Article 873 that the circumstances under consideration are such that the duties in question need not be entered in the accounts, the Commission may, under conditions which it shall determine, authorize one or more Member States to refrain from post-clearance entry in the account in cases involving comparable issues of fact and of law.

In such a case, the decision referred to in Article 873 shall also be notified to each Member State so authorized.

Article 876

If the Commission fails to take a decision within the period referred to in Article 873 or fails to notify a decision to the Member State concerned within the period referred to in Article 874, the customs authorities of that Member State shall not enter the duties in question in the accounts.

TITLE IV

2. The functions of office of entry in the accounts, decision-making customs authority, supervising customs office and implementing customs office may be carried out wholly or in part by the same customs office.

CHAPTER 2

Implementing provisions relating to Articles 236 to 239 of the Code

Section 1

Application

Article 878

1. Application for repayment or remission of import or export duties, hereinafter referred to as 'application for repayment or remission', shall be made by the person who paid or is liable to pay those duties, or the persons who have taken over his rights and obligations.

Application for repayment or remission may also be made by the representative of the person or persons referred in the first subparagraph.

2. Without prejudice to Article 882, application for repayment or remission shall be made, in one original and one copy, on a form conforming to the specimen and provisions in Annex 111.

However, application for repayment or remission may also be made, at the request of the person or persons referred to in paragraph 1, on plain paper, provided it contains the information appearing in the said Annex.

Article 879

1. Applications for repayment or remission, accompanied by the documents referred to in Article 6 (1) of the Code, must be lodged with the customs office of entry in the accounts, unless the customs authorities designate another office for this purpose; the said office shall transmit it immediately after acceptance to the decision-making customs authority if it is not itself designated as such.

2. The customs office referred to in paragraph 1 shall enter the date of receipt on the original and the copy of the application. It shall return the copy to the applicant.

Where the second subparagraph of Article 878(2) is applied, the said customs office shall acknowledge receipt in writing to the applicant.

Article 880

Without prejudice to any specific provisions adopted in this connection under the common agricultural policy, an application relating to goods in respect of which an import or export licence or advance fixing certificate was produced when the relevant customs declaration was lodged must also be accompanied by certification issued by the authorities responsible for issuing such licence or certificate attesting that the necessary steps have been taken to cancel the effects of the said licence or certificate.

Such certification shall not be required, however:

- where the customs authority to which the application is submitted itself issued the licence or certificate in question,
- where the ground relied upon in support of the application is a substantive error that has no effect on the attribution of the licence or certificate in question.

Article 881

1. The customs office referred to in Article 879 may accept an application not containing all the information provided for on the form referred to in Article 878 (2). However, the application must contain at least the information to be entered in boxes 1 to 3 and 7.

2. Where paragraph 1 is applied, the said customs office shall set a time limit for the supply of any missing particulars and/or documents.

3. Where the time limit set by the customs office pursuant to paragraph 2 is not observed, the application shall be considered to have been withdrawn.

The applicant shall be informed of this immediately.

Article 882

1. For returned goods on which export duties were levied at the time of their export from the customs territory of the Community, repayment or remission of these duties shall be subject to the presentation to the customs authorities of a request accompanied by:

- (a) the document issued as evidence of payment, where the amounts concerned have already been collected;
- (b) the original, or the copy certified by the customs office of reimportation, of the declaration for free circulation relating to the returned goods.

This document shall bear one of the following endorsements made by the customs office of reimportation:

- (c) the copy of the export declaration returned to the exporter at the time of completion of the export formalities for the goods, or a copy thereof certified by the customs office of exportation.

Where the decision-making customs authority is already in possession of the particulars contained in one or more of the declarations referred to at (a), (b) or (c) above, the declaration or declarations concerned need not be produced.

2. The request referred to in paragraph 1 must be lodged with the customs office referred to in Article 879 within 12 months of the date of acceptance of the export declaration.

Section 2

Procedure for granting repayment or remission

Article 883

The decision-making customs authority may authorize completion of the customs formalities to which any repayment or remission may be subject before it has ruled on the application for repayment or remission. Such authorization shall be entirely without prejudice to its decision on the application.

Article 884

Without prejudice to Article 883 and until a decision has been taken on the application for repayment or remission, the goods in respect of which repayment or remission of duties has been requested may not be transferred to a location other than that specified in the said application unless the applicant notifies in advance the customs office referred to in Article 879, which shall in turn inform the decision-making customs authority.

Article 885

1. Where an application for repayment or remission relates to a case where supplementary information must be obtained or where the goods must be examined in order to ensure that the conditions for repayment or remission laid down in the Code and in this Title are satisfied, the decision-making customs authority shall adopt the measures necessary to that end, if necessary by requesting the assistance of the supervising customs office, specifying the nature of the information to be obtained or of the checks to be carried out.

The supervising customs office shall comply promptly with this request and shall forward the information obtained and the results of the checks carried out to the decision-making customs authority.

2. Where the application relates to goods which are situated in a Member State other than that in which the import or export duties were entered in the accounts, the provisions of Chapter 4 of this Title shall apply.

Article 886

1. When the decision-making customs authority possesses all the necessary particulars, it shall give its decision in writing on the application for repayment or remission in accordance with Article 6 (2) and (3) of the Code.

2. Where the application is approved, the decision shall include all the particulars necessary for its implementation.

Depending on the circumstances, some or all of the following particulars shall appear in the decision:

- (a) the information necessary for identifying the goods to which it applies;
- (b) the grounds for repayment or remission of the import or export duties and a reference to the corresponding article of the Code and, where appropriate, the corresponding article of this Title;
- (c) the use to which the goods may be put or the destination to which they may be sent, depending on the possibilities available in the particular case under the Code and where appropriate on the basis of a specific authorization by the decision-making customs authority;
- (d) the time limit for completion of the formalities to which repayment or remission of the import or export duties is subject;
- (e) a statement indicating that the import or export duties will not be repaid or remitted until the implementing customs office has informed the decision-making customs authority that the formalities to which repayment or remission is subject have been completed;

(f) particulars of any requirements to which the goods remain subject pending implementation of the decision;

(g) a notice informing the recipient that he must give the original of the decision to the implementing customs office of his choice when presenting the goods.

Article 887

1. The implementing customs office shall take steps to ensure:

— where appropriate, that the requirements referred to in Article 886 (2) (f) are met,

— that in all cases the goods are actually used in the manner or sent to the destination specified in the decision to repay or remit import or export duties.

2. Where the decision specifies that the goods may be placed in a customs warehouse, a free zone or a free warehouse, and the recipient avails himself of this opportunity, the necessary formalities must be carried out with the implementing customs office.

3. Where the decision to repay or remit duties specifies a use to which the goods are to be put or a destination to which they are to be sent which can be established only in a Member State other than that in which the implementing customs office is located, proof of compliance shall be furnished by production of a control copy T 5 issued and used in accordance with the provisions of Articles 471 to 495, and of this Article.

The control copy T 5 must contain the following:

- (a) box 33 shall contain the combined nomenclature code of the goods;
- (b) box 103 shall indicate in words the net quantity of the goods;
- (c) box 104 shall contain, as appropriate, either the words 'exit from the customs territory of the Community', or one of the following under the heading 'other':

— Delivery free of charge to the following charity . . . ,

— Destruction under customs supervision,

— Entry for the following customs procedure . . . ,

— Placing in a free zone or free warehouse;

(d) box 106 shall contain reference particulars of the decision granting repayment or remission of duties;

(e) box 107 shall contain the words 'Articles 877 to 912 of Regulation (EEC) No 2454/93'.

4. The supervising customs office which establishes or on whose responsibility it is established that the goods have actually been used for the purpose specified or have arrived at the prescribed destination shall complete the box entitled 'Control of use and/or destination' of the control document by entering a cross against 'have received the use and/or destination declared overleaf' and giving the relevant date.

5. When the implementing customs office has satisfied itself that the conditions set out in paragraph 1 are fulfilled, it shall send a certificate to that effect to the decision-making customs authority.

Article 888

A decision-making customs authority having approved an application for repayment or remission of duties shall repay or remit such duty only after receiving the certificate referred to in Article 887 (5).

Article 889

1. Where the request for repayment or remission is based on the existence, at the time when the declaration of release for free circulation was accepted, of a reduced or zero rate of import duty on the goods under a tariff quota, a tariff ceiling or other preferential tariff arrangements, repayment or remission shall be granted only on condition that, at the time of lodging the application for repayment or remission accompanied by the necessary documents:

- in the case of a tariff quota, its volume has not been exhausted,
- in other cases, the rate of duty normally due has not been re-established.

If the conditions laid down in the preceding paragraph are not fulfilled, repayment or remission shall nevertheless be granted where the failure to apply the reduced or zero rate of duty to the goods was the result of an error on the part of the customs authorities themselves and the declaration for free circulation contained all the particulars and was accompanied by all the documents necessary for application of the reduced or zero rate.

2. Each Member State shall send the Commission a list of the cases in which the provisions of the second subparagraph of paragraph 1 have been applied, giving a short summary of each case.

Article 870 (2), (3) and (4) shall apply.

Article 890

Where a certificate of origin, movement certificate, internal Community transit document or other appropriate document is produced in support of an application for repayment or remission, indicating that the imported goods were eligible, at the time of acceptance of the declaration for free circulation, for Community treatment or preferential tariff treatment, the decision-making customs authority shall grant such application only where it is duly established:

- that the document thus produced refers specifically to the goods in question and that all the conditions relating to acceptance of the said document are fulfilled,
- that all the other conditions for the granting of the preferential tariff treatment are fulfilled.

Repayment or remission shall take place upon presentation of the goods. Where the goods cannot be presented to the implementing customs office, the latter shall grant repayment or remission only where it has information indicating unequivocally that the certificate or document produced post-clearance applies to the said goods.

Article 891

Repayment or remission of duty shall not be granted where certificates for the advance fixing of levies are presented in support of the application.

Article 892

Import duties shall not be repaid or remitted under Article 238 of the Code where:

- the defective nature of the goods was taken into consideration in drawing up the terms of the contract, in particular the price, under which the goods were entered for a customs procedure involving the obligation to pay import duties,
- the goods are sold by the importer after it has been ascertained that they are defective or do not comply with the terms of the contract.

Article 893

1. Without prejudice to Article 900 (1) (c), the decision-making customs authority shall set a deadline, no later than two months from the date of notification of the decision to repay or remit import duties or export

duties, for completion of the customs formalities to which the repayment or remission of duties is subject.

2. Failure to observe the deadline referred to in paragraph 1 shall result in loss of entitlement to repayment or remission except where the person concerned by the decision proves that he was prevented from meeting this deadline by unforeseeable circumstances or force majeure.

Article 894

Where destruction of the goods authorized by the decision-making customs authority produces waste or scrap, such waste or scrap shall be regarded as non-Community goods once a decision has been taken accepting the application for repayment or remission.

Article 895

Where the authorization referred to in the second subparagraph of Article 238 (2) (b) of the Code is granted, the customs authorities shall take all necessary steps to ensure that goods placed in a customs warehouse, free zone or free warehouse may subsequently be recognized as non-Community goods.

Article 896

1. Goods which, under the common agricultural policy, are entered for a customs procedure involving the obligation to pay import duties under an import licence or advance fixing certificate shall benefit from Articles 237, 238 and 239 of the Code only where the customs office referred to in Article 879 is satisfied that the necessary steps have been taken by the competent authorities to cancel the effects with regard to the certificate under which the importation took place.

2. Paragraph 1 shall also apply in the case of re-exportation, placing in a customs warehouse, free zone or free warehouse, or destruction of the goods.

Article 897

Where it is not the complete article that is exported, re-exported or destroyed or assigned to another authorized customs treatment or use, but one or more parts or components of that article, the amount to be repaid or remitted shall be the difference between the amount of import duties on the complete article and the amount of import duties which would have been chargeable on the remainder of the article if the latter had been entered in the unaltered state for a customs procedure involving the obligation to pay such duties on the date on which the complete article was so entered.

Article 898

The amount referred to in Article 240 of the Code is hereby set at ECU 10.

CHAPTER 3

Specific provisions relating to the application of Article 239 of the Code

Section 1

Decisions to be taken by the customs authorities of the Member States

Article 899

Without prejudice to other situations to be considered case by case in accordance with the procedure laid down in Articles 905 to 909, where the decision-making customs authority establishes that an application for repayment or remission submitted to it under Article 239 (2) of the Code:

— is based on grounds corresponding to one of the circumstances referred to in Articles 900 to 903, and that these do not result from deception or obvious negligence on the part of the person concerned, it shall repay or remit the amount of import duties concerned.

'The person concerned' shall mean the person or persons referred to in Article 878 (1), or their representatives, and any other person who was involved with the completion of the customs formalities relating to the goods concerned or gave the instructions necessary for the completion of these formalities,

— is based on grounds corresponding to one of the circumstances referred to in Article 904, it shall not repay or remit the amount of import duties concerned.

Article 900

1. Import duties shall be repaid or remitted where:

(a) non-Community goods placed under a customs procedure involving total or partial relief from import duties or goods released for free circulation with favourable tariff treatment by reason of their end-use are stolen, provided that the goods are recovered promptly and placed again in their original customs situation in the state they were in when they were stolen;

(b) non-Community goods are inadvertently withdrawn from the customs procedure involving total or partial relief from the said duties under which they had been placed, provided that, as soon as the error is found, they are placed again in their original customs situation in the state they were in when they were withdrawn;

(c) it is impossible to operate the mechanism for opening the means of transport on which goods previously released for free circulation are located and accordingly to unload them on arrival at their desti-

- nation, provided that they are immediately re-exported;
- (d) goods originally released for free circulation are subsequently returned to their non-Community supplier, under the outward processing arrangements, to enable him — free of charge — to eliminate defects existing prior to the release of the goods (even if found after release of the goods) or to bring them into line with the provisions of the contract under which they were released for free circulation, and the said supplier decides to keep the goods permanently because he is unable to remedy the defects or because it would not be economic to do so;
- (e) it is found, when the customs authorities decide on post-clearance entry in the accounts of import duties actually due on goods released for free circulation with full relief from such duties, that the goods in question have been re-exported from the customs territory of the Community without customs supervision, provided it is established that the substantive conditions laid down in the Code for the repayment or remission of such import duties would actually have been met at the time of re-exportation if the amount had been levied when the goods were released for free circulation;
- (f) a judicial body has forbidden the marketing of an item previously entered for a customs procedure obliging the person concerned to pay import duties under normal conditions, and the said item is re-exported from the customs territory of the Community or destroyed under the control of the customs authorities, provided it is established that the item in question has not actually been used in the Community;
- (g) the goods have been entered for a customs procedure involving the obligation to pay such duties by a declarant empowered to do so on his own initiative and, through no fault of the declarant, it has not been possible to deliver them to the consignee;
- (h) the goods have been addressed to the consignee in error by the consignor;
- (i) the goods are found to be unsuitable for the use for which the consignee intended them because of an obvious factual error in his order;
- (j) after having been released for a customs procedure involving the obligation to pay import duties, the goods are found not to have complied, at the time of their release, with the rules in force concerning their use or marketing and therefore cannot be used for the purpose intended by the consignee;
- (k) the use of the goods by the consignee for the purpose intended is prevented or substantially restricted as a result of measures of general scope taken, after the date of release for a customs procedure involving the obligation to pay import duties, by an authority or other body having the appropriate power of decision;
- (l) total or partial import duty relief applied for by the person concerned in accordance with existing provisions cannot, through no fault of the person concerned, be granted by the customs authorities, who shall accordingly enter in the accounts the import duties which have become due;
- (m) the goods reached the consignee after the binding delivery dates stipulated in the contract under which they were entered for a customs procedure involving the obligation to pay import duties;
- (n) it has not been possible to sell the goods in the customs territory of the Community and they are delivered free of charge to charities:
- carrying out their activities in a third country, provided that they are represented in the Community,
- or
- carrying out their activities in the customs territory of the Community, provided that they are eligible for relief in the case of importation for free circulation of similar goods from third countries.
2. Without prejudice to paragraph 3, repayment or remission of import duties in the cases referred to in paragraph 1 (c) and (f) to (n) shall, except where the goods are destroyed by order of a public authority or delivered free of charge to charities carrying out their activities in the Community, be conditional upon their re-export from the customs territory of the Community under the supervision of the customs authorities.
- If requested, the decision-making authority shall permit re-export of the goods to be replaced by their destruction or by placing them, with a view to re-export, under the external Community transit procedure, under the customs warehousing arrangements, or in a free zone or free warehouse.
- Goods to be assigned one of these treatments shall be considered to be non-Community goods.
- In this case, the customs authorities shall take all requisite measures to ensure that the goods placed in a customs warehouse, in a free zone or in a free warehouse may later be recognised as non-Community goods.

3. In the cases referred to in paragraph 1 (h) and (i), repayment or remission of import duties shall be conditional on re-export of the goods to the original supplier or to another address specified by him.

4. In addition, the supervising customs office must be satisfied that the goods have been neither used nor sold before their re-exportation.

Article 901

1. Import duties shall be repaid or remitted where:

- (a) goods entered in error for a customs procedure involving the obligation to pay import duties have been re-exported from the customs territory of the Community without having been previously entered for the customs procedure under which they should have been placed, provided the other conditions laid down in Article 237 of the Code have been met;
- (b) the goods have been re-exported or destroyed in accordance with Article 238 (2) (b) of the Code without customs supervision, provided the other conditions laid down in the said Article have been met;
- (c) the goods have been re-exported or destroyed without customs supervision in accordance with Article 900 (1) (c) and (f) to (n), provided the other conditions laid down in Article 900 (2) and (4) have been met.

2. Repayment or remission of import duties in the circumstances referred to in paragraph 1 shall be conditional on:

- (a) production of all the evidence needed to enable the decision-making customs authority to satisfy itself that the goods in respect of which repayment or remission is requested:
 - have actually been re-exported from the customs territory of the Community, or
 - have been destroyed under the supervision of authorities or persons empowered to certify such destruction officially;
- (b) the return to the decision-making customs authority of any document certifying the Community status of the goods in question under cover of which the said goods may have left the customs territory of the Community, or the presentation of whatever evidence the said authority considers necessary to satisfy itself that the document in question cannot be

used subsequently in connection with any importation of goods into the Community.

Article 902

1. For the purposes of Article 901(2):

- (a) the evidence needed to enable the decision-making customs authority to satisfy itself that the goods in respect of which repayment or remission is requested have actually been re-exported from the customs territory of the Community shall consist of the presentation by the applicant of:

- the original or a certified copy of the declaration for export of the goods from the customs territory of the Community,

and

- certification by the customs office through which the goods actually left the customs territory of the Community.

Where such certification cannot be produced, proof that the goods have left the customs territory of the Community may be presented in the form of:

- certification by the customs office in the third country of destination confirming that the goods have arrived, or

- the original or a certified copy of the customs declaration for the goods made in the third country of destination.

These documents must be accompanied by administrative and commercial documentation enabling the decision-making customs authority to check that the goods exported from the customs territory of the Community are the same as those which had been declared for a customs procedure involving the obligation to pay import duties, namely:

- the original or a certified copy of the declaration for the said procedure,

and

- where this is considered necessary by the decision-making customs authority, commercial or administrative documents (such as invoices, dispatch details, transit documents or health certificates) containing a full description of the goods (trade description, quantities, marks and other identifying particulars) which were presented with the declaration for the said procedure or with the declaration for export from the customs territory of the Community or the customs declaration made for the goods in the third country of destination, as the case may be;

(b) the evidence needed to enable the decision-making customs authority to satisfy itself that the goods in respect of which repayment or remission is requested have actually been destroyed under the supervision of authorities or persons authorized to certify officially such destruction shall consist of the presentation by the applicant of:

- a report or declaration of destruction drawn up by the authorities under whose supervision the goods were destroyed, or a certified copy thereof, or
- a certificate drawn up by the person authorized to certify destruction, accompanied by evidence of his authority.

These documents shall contain a sufficiently full description of the destroyed goods (trade description, quantities, marks and other identifying particulars) to enable the customs authorities to satisfy themselves, by means of comparison with the particulars given in the declaration for a customs procedure involving the obligation to pay import duties and the accompanying commercial documents (invoices, dispatch details, etc.), that the destroyed goods are those which had been declared for the said procedure.

2. Where the evidence referred to in paragraph 1 is insufficient to allow the decision-making customs authority to take a decision on the case submitted to it in full knowledge of the facts, or where certain evidence is not available, such evidence may be supplemented or replaced by any other documents considered necessary by the said authority.

Article 903

1. For returned goods in respect of which an export duty was levied when they were exported from the customs territory of the Community, entry for free circulation shall give the right to repayment of the amounts levied.

2. Paragraph 1 shall apply only to goods which are in one of the situations referred to in Article 844.

It must be proved to the satisfaction of the customs office where the goods are declared for release for free circulation that the goods are in one of the situations referred to in Article 185 (2) (b) of the Code.

3. Paragraph 1 shall apply even where the returned goods constitute only a proportion of the goods previously exported from the customs territory of the Community.

Article 904

Import duties shall not be repaid or remitted where the only grounds relied on in the application for repayment or remission are, as the case may be:

- (a) re-export from the customs territory of the Community of goods previously entered for a customs procedure involving the obligation to pay import duties, for reasons other than those referred to in Article 237 or 238 of the Code or in Article 900 or 901, notably failure to sell;
- (b) destruction, for any reason whatsoever, save in the cases expressly provided for by Community legislation, of goods entered for a customs procedure involving the obligation to pay import duties after their release by the customs authorities;
- (c) presentation, for the purpose of obtaining preferential tariff treatment of goods declared for free circulation, of documents subsequently found to be forged, falsified or not valid for that purpose, even where such documents were presented in good faith.

Section 2

Decisions to be taken by the Commission

Article 905

1. Where the decision-making customs authority to which an application for repayment or remission under Article 239 (2) of the Code has been submitted cannot take a decision on the basis of Article 899, but the application is supported by evidence which might constitute a special situation resulting from circumstances in which no deception or obvious negligence may be attributed to the person concerned, the Member State to which this authority belongs shall transmit the case to the Commission to be settled under the procedure laid down in Articles 906 to 909.

The term 'the person concerned' shall be interpreted in the same way as in Article 899.

In all other cases, the decision-making customs authority shall refuse the application.

2. The case sent to the Commission shall include all the facts necessary for a full examination of the case presented.

As soon as it receives the case the Commission shall inform the Member State concerned accordingly.

Should it be found that the information supplied by the Member State is not sufficient to enable a decision to be taken on the case concerned in full knowledge of the facts, the Commission may ask for additional information to be supplied.

3. Without awaiting completion of the procedure laid down in Articles 906 to 909, the decision-making customs authority may, if requested, permit the customs formalities relating to the re-export or destruction of the goods to be carried out before the Commission has given a ruling on the application in question. Such permission shall be entirely without prejudice to the final decision on the application.

Article 906

Within 15 days of receipt of the case referred to in Article 905 (2) the Commission shall forward a copy thereof to the Member States.

Consideration of the case in question shall be included as soon as possible on the agenda of a meeting of the Committee provided for in Article 247 of the Code.

Article 907

After consulting a group of experts composed of representatives of all Member States, meeting within the framework of the Committee to consider the case in question, the Commission shall decide whether or not the special situation which has been considered justifies repayment or remission.

That decision shall be taken within six months of the date on which the case referred to in Article 905 (2) is received by the Commission. Where the Commission has found it necessary to ask for additional information from the Member State in order to reach its decision, the six months shall be extended by a period equivalent to that between the date the Commission sent the request for additional information and the date it received that information.

Article 908

1. The Member State concerned shall be notified of the decision referred to in Article 907 as soon as possible and in any event within 30 days of the expiry of the time limit set in Article 907.

A copy of the decision shall be sent to the other Member States.

2. The decision-making authority shall decide whether to grant or refuse the application made to it on the basis of the Commission's decision notified in accordance with paragraph 1.

3. Where it is established by the decision referred to in Article 907 that the circumstances under consideration justify repayment or remission, the Commission may, under conditions which it shall determine, authorize one or more Member States to repay or remit duties in cases

involving comparable issues of fact and of law.

In such a case, the decision referred to in Article 907 shall also be notified to each Member State so authorized.

Article 909

If the Commission fails to take a decision within the time limit set in Article 907, or fails to notify a decision to the Member State in question within the time limit set in Article 908, the decision-making customs authority shall grant the application.

CHAPTER 4

Administrative assistance between the Customs authorities of the Member States

Article 910

In the cases referred to in Article 885 (2), the decision-making customs authority shall send the supervising customs office two copies of its request made out in writing on a form conforming to the model in Annex 112. The request shall be accompanied by originals or copies of the application for repayment or remission and of all documents necessary to enable the supervising customs office to obtain the information or carry out the checks requested.

Article 911

1. Within two weeks of the date of receipt of the request the supervising customs office shall obtain the information or carry out the checks requested by the decision-making customs authority. It shall enter the results obtained in the portion of the original of the document referred to in Article 910 reserved for that purpose and shall return the said document to the decision-making customs authority together with all the documents forwarded to it.

2. Where it is unable to obtain the information or carry out the checks requested within the two-week period referred to in paragraph 1, the supervising customs office shall acknowledge receipt of the request submitted to it within that period by returning to the decision-making customs authority the copy of the document referred to in Article 910 duly annotated.

Article 912

The implementing customs office shall send the certificate referred to in Article 887 (5) to the decision-making customs authority on a form conforming to the specimen in Annex 113.

PART V

ANNEX 9

**INTRODUCTORY NOTES TO THE LISTS OF WORKING OR PROCESSING OPERATIONS
CONFERRING OR NON-CONFERRING ORIGINATING STATUS TO MANUFACTURED
PRODUCTS WHEN THEY ARE CARRIED OUT ON NON-ORIGINATING MATERIALS**

GENERAL CONSIDERATIONS

Note 1

- 1.1. The first two columns in the lists in Annexes 10 and 11 describe the product obtained. The first column gives the heading number, or the chapter number, used in the combined nomenclature and the second column gives the description of goods used in the combined nomenclature for that heading or chapter. For each entry in the first two columns, a rule is specified in column 3. Where the entry in the first column is preceded by an 'ex', this signifies that the rule in column 3 only applies to the part of that heading or chapter as described in column 2.
- 1.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of product in column 2 is therefore given in general terms, the adjacent rule in column 3 applies to all products which, under the combined nomenclature, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 1.3. Where the lists include different rules applying to different products within one heading, each indent contains the description of that part of the heading covered by the adjacent rule in column 3.

Note 2

- 2.1. The term 'manufacture' covers any kind of working or processing including 'assembly' or specific operations.
- 2.2. The term 'material' covers any 'ingredient', 'raw material', 'component' or 'part', etc., used in the manufacture of the product.
- 2.3. The term 'product' refers to the product being manufactured, even if it is intended for later use in another manufacturing operation.

Note 3

- 3.1. The working or processing required by a rule in column 3 has to be carried out only in relation to the non-originating materials used. The restrictions contained in a rule in column 3 likewise apply only to the non-originating materials used.
- 3.2. If a product, made from non-originating materials which has itself acquired originating status during manufacture, is used as a material in the process of manufacture of another product, then the list rule applicable to the product in which it is incorporated does not apply to it.

For example:

Unembroidered fabric may obtain origin by being woven from yarn. If this is then used in making embroidered bed linen, then the percentage value limit imposed on the use of unembroidered fabric does not apply in this case.

Note 4

- 4.1. The rules in the lists represent the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer origin. Thus if a rule says that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.

- 4.2. When a rule in a list specifies that a product may be manufactured from more than one material, this means that any one or more of the materials may be used. It does not require that all be used.

For example:

the rule for yarns says that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used, one can use one or the other or both.

- 4.3. When a rule in a list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule.

Note 5

For all products which are not mentioned in Annex 11 (other than textiles falling within Section XI), origin is determined case-by-case by evaluating any process or operation in relation to the concept of the last substantial processing or working as defined in Article 24 of the Code.

Note 6

- 6.1. The term 'fibres' used in the list in Annex 10 covers 'natural fibres' and 'man-made staple fibres' falling within CN codes 5501 to 5507, and fibres of a kind used for the manufacture of paper.
- 6.2. The term 'natural fibres' is used in the list in Annex 10 to refer to fibres other than artificial or synthetic fibres and is restricted to the stages before spinning takes place, including waste, and unless otherwise specified, the term 'natural fibres' includes fibres that have been carded, combed or otherwise processed but not spun.
- 6.3. The term 'natural fibres' includes horsehair falling within CN code 0503, silk falling within CN codes 5002 and 5003 as well as the wool fibres, fine or coarse animal hair falling within CN codes 5101 to 5105, cotton fibres falling within CN codes 5201 to 5203 and other vegetable fibres falling within CN codes 5301 to 5305.
- 6.4. The term 'man-made staple fibres' is used in the list in Annex 10 to refer to synthetic or artificial filament tow, staple fibres or waste, falling within CN codes 5501 to 5507.
- 6.5. The terms 'textile pulp' and 'chemical materials' are used in the list in Annex 10 to describe the non-textile materials (these are not classified in Chapters 50 to 63) which can be used to manufacture artificial or synthetic fibres or yarns, or fibres of a kind used for the manufacture of paper.
- 6.6. For products obtained from two or more textile materials the provisions appearing in column 3 are applicable for each of the textile materials of which the mixture is composed.

Note 7

- 7.1. The term 'prebleached', used in the list in Annex 10 to characterize the level of manufacture required when certain non-originating materials are used, applies to certain yarns, woven fabrics and knitted or crocheted fabrics which have only been washed after the spinning or weaving operation.

Prebleached products are at an earlier stage of manufacture than bleached products, which have undergone several baths in bleaching agents (oxydizing agents such as hydrogen peroxyde and reducing agents).

- 7.2. The term 'complete making-up' used in the list in Annex 10 means that all the operations following cutting of the fabric or knitting or crocheting of the fabric directly to shape have to be performed.

However, making-up shall not necessarily be considered as incomplete where one or more finishing operations have not been carried out.

The following is a list of examples of finishing operations:

- fitting of buttons and/or other types of fastenings,
- making of button-holes,
- finishing off the ends of trouser legs and sleeves or the bottom hemming of skirts and dresses,
- fitting of trimmings and accessories such as pockets, labels, badges, etc.,
- ironing and other preparations of garments for sale 'ready made'

Remarks concerning finishing operations — Special cases

It is possible that in particular manufacturing operations, the accomplishment of finishing operations, especially in the case of a combination of operations, is of such importance that these operations must be considered as going beyond simple finishing.

In these particular cases, the non-accomplishing of finishing operations will deprive the making-up of its complete nature.

- 7.3. The term 'Impregnation, coating, covering or laminating' does not cover those operations designed to bind fabrics together.

ANNEX 14

INTRODUCTORY NOTES APPLYING TO THE THREE PREFERENTIAL REGIMES

FOREWORD

Except where otherwise specified, these Notes apply to the three preferential regimes.

These notes shall apply, where appropriate, to all products manufactured using non-originating materials, even if they are not subject to specific conditions contained in the lists in Annexes 15, 19 and 20 and are simply subject to the change of heading rule set out in Articles 68 (1), 100 (1) and 122 (1).

Note 1

- 1.1. The lists in Annexes 15, 19 and 20 contain some products which do not benefit from tariff preferences but which may be used in the manufacture of products which do benefit.
- 1.2. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonized System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in column 3. Where, in some cases, the entry in the first column is preceded by an 'ex', this signifies that the rule in column 3 applies only to the part of that heading or chapter as described in column 2.
- 1.3. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rule in column 3 applies to all products which, under the Harmonized System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 1.4. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rule in column 3.

Note 2

- 2.1. The term 'manufacture' covers any kind of working or processing including 'assembly' or specific operations. However, see Note 3.5 below.
- 2.2. The term 'material' covers any ingredient, raw material, component or part, etc., used in the manufacture of the product.
- 2.3. The term 'product' refers to the product being manufactured, even if it is intended for later use in another manufacturing operation.
- 2.4. The term 'goods' covers both materials and products.

Note 3

- 3.1. In the case of any heading not in the list or any part of a heading that is not in the list, the 'change of heading' rule set out in Articles 68 (1) 100 (1) and 122 (1) applies. If a 'change of heading' condition applies to any entry in the list, then it is contained in the rule in column 3.
- 3.2. The working or processing required by a rule in column 3 has to be carried out only in relation to the non-originating materials used. The restrictions contained in a rule in column 3 likewise apply only to the non-originating materials used.
- 3.3. Where a rule states that 'materials of any heading' may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression 'manufacture from materials of any heading, including other materials of heading No . . . ' means that only materials classified in the same heading as the product of a different description than that of the product as given in column 2 of the list may be used.

- 3.4. If a product made from non-originating materials which has acquired originating status during manufacture by virtue of the change of heading rule or its own list rule, is used as a material in the process of manufacture of another product, then the rule applicable to the product in which it is incorporated does not apply to it.

For example:

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading No 7224.

If this forging has been forged in the country concerned from a non-originating ingot then the forging has already acquired origin by virtue of the rule for heading No ex 7224 in the list. It can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or another. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.5. Even if the change of heading rule or the other rules contained in the list are satisfied, a product shall not acquire originating status if the processing carried out taken as a whole, is insufficient within the meaning of Articles 68 (3), 100 (3) and 122 (3).
- 3.6. The unit of qualification for the application of the origin rules shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonized System. In the case of sets of products which are classified by virtue of General Rule 3 for the interpretation of the Harmonized System, the unit of qualification shall be determined in respect of each item in the set: this provision is equally applicable to sets of headings No 6308, 8206 and 9605.

Accordingly, it follows that:

- when a product composed of a group or assembly of articles is classified under the terms of the Harmonized System in a single heading, the whole constitutes the unit of qualification,
- when a consignment consists of a number of identical products classified under the same heading of the Harmonized System, each product must be taken individually when applying the origin rules,
- where, under General Rule 5 of the Harmonized System, packing is included with the product for classification purposes, it shall be included for the purposes of determining origin.

Note 4

- 4.1. The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer origin. Thus if a rule says that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
- 4.2. When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

For example:

The rule for fabrics says that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; one can use one or the other or both.

If, however, a restriction applies to one material and other restrictions apply to other materials in the same rule, then the restrictions only apply to the materials actually used.

For example:

The rule for sewing machines specifies that both the thread tension mechanism used and the zigzag mechanism used must originate; these two restrictions only apply if the mechanisms concerned are actually incorporated into the sewing machine.

- 4.3. When a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule.

For example:

If a rule specifically excludes the use of cereals or their derivatives this would not prevent the use of mineral salts, chemicals and other additives which are not produced from cereals.

For example:

In the case of an article made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth — even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn — that is the fibre stage.

See also Note 7.3 in relation to textiles.

- 4.4. If in a rule in the list two or more percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. The maximum value of all the non-originating materials used may never exceed the highest of the percentages given. Furthermore, the individual percentages must not be exceeded in relation to the particular materials they apply to.

Note 5

- 5.1. The term 'natural fibres' is used in the list to refer to fibres other than artificial or synthetic fibres and is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, the term 'natural fibres' includes fibres that have been carded, combed or otherwise processed but not spun.
- 5.2. The term 'natural fibres' includes horsehair of heading No 0503, silk of headings No 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of headings No 5101 to 5105, the cotton fibres of headings No 5201 to 5203 and the other vegetable fibres of headings No 5301 to 5305.
- 5.3. The terms 'textile pulp', 'chemical materials' and 'paper-making materials' are used in the list to describe the materials not classified in chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 5.4. The term 'man-made staple fibres' is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings No 5501 to 5507.

Note 6 (Occupied Territories and beneficiary Republics)

- 6.1. In the case of the products classified within those headings in the list to which a reference is made to this Note, the conditions set out in column 3 of the list shall not be applied to any basic textile materials used in their manufacture which, taken together, represent 10% or less of the total weight of all the basic textile materials used (but see also Notes 6.3 and 6.4 below).
- 6.2. However, this tolerance may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus *Agave*,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- synthetic man-made staple fibres,
- artificial man-made staple fibres.

For example:

A yarn of heading No 5205 made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 % of the yarn.

For example:

A woollen fabric of heading No 5112 made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used up to a weight of 10 % of the fabric.

For example:

Tufted textile fabric of heading No 5802 made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

For example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

For example:

A carpet with tufts made from both artificial yarns and cotton yarns and with a jute backing is a mixed product because three basic textile materials are used. Thus, any non-originating materials that are at a later stage of manufacture than the rule allows may be used, provided their total weight taken together does not exceed 10 % of the weight of the textile materials in the carpet. Thus, both the jute backing and/or the artificial yarns could be imported at that stage of manufacture, provided the weight conditions are met.

- 6.3. In the case of fabrics incorporating 'yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped' this tolerance is 20 % in respect of this yarn.
- 6.4. In the case of fabrics incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two films of plastic film, this tolerance is 30 % in respect of this strip.

Note 7

Occupied Territories and beneficiary Republics

- 7.1. In the case of those textile products which are marked in the list by a footnote referring to this note, textile materials with the exception of linings and interlinings which do not satisfy the rule set out in the list in column 3 for the made up products concerned may be used provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex works price of the product.

GSP, Occupied Territories and beneficiary Republics

- 7.2. Any non-textile trimmings and accessories or other materials used which contain textiles do not have to satisfy the conditions set out in column 3 even though they fall outside the scope of Note 4.3.
- 7.3. In accordance with Note 4.3, any non-originating non-textile trimmings and accessories or other product, which do not contain any textiles, may, anyway, be used freely where they cannot be made from the materials listed in column 3.

For example:

If a rule in the list says that for a particular textile item, such as a blouse, yarn must be used, this does not prevent the use of metal items, such as buttons, because they cannot be made from textile materials.

- 7.4. Where a percentage rule applies, the value of trimmings and accessories must be taken into account when calculating the value of the non-originating materials incorporated.

Note 8

- 8.1. For the purposes of headings No ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the 'specific processes' are the following:
- (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process ⁽¹⁾;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolorization and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerization;
 - (h) alkylation;
 - (i) isomerization.
- 8.2. For the purposes of headings No 2710, 2711 and 2712, the 'specific processes' are the following:
- (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;

ANNEX 23

INTERPRETATIVE NOTES ON CUSTOMS VALUE

First column	Second column
Reference to provisions of the Customs Code	Notes
Article 29 (1)	The price actually paid or payable refers to the price for the imported goods. Thus the flow of dividends or other payments from the buyer to the seller that do not relate to the imported goods are not part of the customs value.
Article 29 (1) (a), third indent	An example of such restriction would be the case where a seller requires a buyer of automobiles not to sell or exhibit them prior to a fixed date which represents the beginning of a model year.
Article 29 (1) (b)	<p>Some examples of this include:</p> <ul style="list-style-type: none"> (a) the seller establishes the price of the imported goods on condition that the buyer will also buy other goods in specified quantities; (b) the price of the import goods is dependent upon the price or prices at which the buyer of the imported goods sells other goods to the seller of the imported goods; (c) the price is established on the basis of a form of payment extraneous to the imported goods, such as where the imported goods are semi-finished goods which have been provided by the seller on condition that he will receive a specified quantity of the finished goods. <p>However, conditions or considerations relating to the production or marketing of the imported goods shall not result in rejection of the transaction value. For example, the fact that the buyer furnishes the seller with engineering and plans undertaken in the country of importation shall not result in rejection of the transaction value for the purposes of Article 29 (1).</p>
Article 29 (2)	<ol style="list-style-type: none"> 1. Paragraphs 2 (a) and (b) provide different means of establishing the acceptability of a transaction value. 2. Paragraph 2 (a) provides that where the buyer and the seller are related, the circumstances surrounding the sale shall be examined and the transaction value shall be accepted as the customs value provided that the relationship did not influence the price. It is not intended that there should be an examination of the circumstances in all cases where the buyer and the seller are related. Such examination will only be required where there are doubts about the acceptability of the price. Where the customs authorities have no doubts about the acceptability of the price, it should be accepted without requesting further information from the declarant. For example, the customs authorities may have previously examined the relationship, or it may already have detailed information concerning the buyer and the seller, and may already be satisfied from such examination or information that the relationship did not influence the price. 3. Where the customs authorities are unable to accept the transaction value without further inquiry, they should give the declarant an opportunity to supply such further detailed information as may be necessary to enable it to examine the circumstances surrounding the sale, in this context, the customs authorities should be prepared to examine relevant aspects of the transaction, including the way in which the buyer and seller organize their commercial relations and the way in which the price in question was arrived at, in order to determine whether the relationship influenced the price. Where it can be shown that the buyer and seller, although related under the provisions of Article 143 of this Regulation, buy from and sell to each other as if they were not related, this would demonstrate that the price had not been influenced by the relationship. As an example of this, if the price had been settled in a manner consistent with the normal pricing practices of the industry in question or with the way the seller settles prices for sales to buyers who are not related to him, this would demonstrate that the price had not been influenced by the relationship. As a further example, where it is shown that the price is adequate to ensure recovery of all costs plus a profit which is representative of the firm's overall profit realized over a representative period of time (e.g. on an annual basis) in sales of goods of the same class or kind, this would demonstrate that the price had not been influenced.

First column	Second column
Article 29 (2) (cont'd)	4. Paragraph 2 (b) provides an opportunity for the declarant to demonstrate that the transaction value closely approximates to a 'test' value previously accepted by the customs authorities and is therefore acceptable under the provisions of Article 29. Where a test under paragraph 2 (b) is met, it is not necessary to examine the question of influence under paragraph 2 (a). If the customs authorities already have sufficient information to be satisfied, without further detailed inquiries, that one of the tests provided in paragraph 2 (b) has been met, there is no reason for them to require the declarant to demonstrate that the test can be met.
Article 29 (2) (b)	A number of factors must be taken into consideration in determining whether one value 'closely approximates' to another value. These factors include the nature of the imported goods, the nature of the industry itself, the season in which the goods are imported, and, whether the difference in values is commercially significant. Since these factors may vary from case to case, it would be impossible to apply a uniform standard such as a fixed percentage, in each case. For example, a small difference in value in a case involving one type of goods could be unacceptable while a large difference in a case involving another type of goods might be acceptable in determining whether the transaction value closely approximates to the 'test' values set forth in Article 29 (2) (b).
Article 29 (3) (a)	An example of an indirect payment would be the settlement by the buyer, whether in whole or in part, of a debt owed by the seller.
Article 30 (2) (a) Article 30 (2) (b)	<ol style="list-style-type: none"> 1. In applying these provisions, the customs authorities shall, where possible, use a sale of identical or similar goods, as appropriate, at the same commercial level and in substantially the same quantity as the goods being valued. Where no such sale is found, a sale of identical or similar goods, as appropriate, that takes place under any one of the following three conditions may be used: <ol style="list-style-type: none"> (a) a sale at the same commercial level but in a different quantity; (b) a sale at a different commercial level but in substantially the same quantity; or (c) a sale at a different commercial level and in a different quantity. 2. Having found a sale under any one of these three conditions adjustments will then be made, as the case may be, for: <ol style="list-style-type: none"> (a) quantity factors only; (b) commercial level factors only; or (c) both commercial level and quantity factors. 3. The expression 'and/or' allows the flexibility to use the sales and make the necessary adjustments in any one of the three conditions described above. 4. A condition for adjustment because of different commercial levels or different quantities is that such adjustment, whether it leads to an increase or a decrease in the value, be made only on the basis of demonstrated evidence that clearly establishes the reasonableness and accuracy of the adjustment, e.g. valid price lists containing prices referring to different levels or different quantities. As an example of this, if the imported goods being valued consist of a shipment of 10 units and the only identical or similar imported goods, as appropriate, for which a transaction value exists involved a sale of 500 units, and it is recognized that the seller grants quantity discounts, the required adjustment may be accomplished by resorting to the seller's price list and using that price applicable to a sale of 10 units. This does not require that a sale had to have been made in quantities of 10 as long as the price list has been established as being bona fide through sales at other quantities. In the absence of such an objective measure, however, the determination of a customs value under the provisions of Article 30 (2) (a) and (b) is not appropriate.

Article 30 (2) (d)	<ol style="list-style-type: none"> <li data-bbox="408 286 1401 495">1. As a general rule, customs value is determined under these provisions on the basis of information readily available in the Community. In order to determine a computed value, however, it may be necessary to examine the cost of producing the goods being valued and other information which has to be obtained from outside the Community. Furthermore, in most cases the producer of the goods will be outside the jurisdiction of the authorities of the Member States. The use of the computed value method will generally be limited to those cases where the buyer and seller are related, and the producer is prepared to supply to the authorities of the country of importation the necessary costings and to provide facilities for any subsequent verification which may be necessary. <li data-bbox="408 551 1401 678">2. The 'cost or value' referred to in Article 30 (2) (d), first indent, is to be determined on the basis of information relating to the production of the goods being valued supplied by or on behalf of the producer. It is to be based upon the commercial accounts of the producer, provided that such accounts are consistent with the generally accepted accounting principles applied in the country where the goods are produced. <li data-bbox="408 734 1401 862">3. The 'amount for profit and general expenses' referred to in Article 30 (2) d), second indent, is to be determined on the basis of information supplied by or on behalf of the producer unless his figures are inconsistent with those usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to the country of importation. <li data-bbox="408 918 1401 969">4. No cost or value of the elements referred to in this Article shall be counted twice in determining the computed value. <li data-bbox="408 1025 1401 1496">5. It should be noted in this context that the 'amount for profit and general expenses' has to be taken as a whole. It follows that if, in any particular case, the producer's profit figure is low and his general expenses are high, his profit and general expenses taken together may nevertheless be consistent with that usually reflected in sales of goods of the same class or kind. Such a situation might occur, for example, if a product were being launched in the Community and the producer accepted a nil or low profit to offset high general expenses associated with the launch. Where the producer can demonstrate that he is taking a low profit on his sales of the imported goods because of particular commercial circumstances, his actual profit figures should be taken into account provided that he has valid commercial reasons to justify them and his pricing policy reflects usual pricing policies in the branch of industry concerned. Such a situation might occur, for example, where producers have been forced to lower prices temporarily because of an unforeseeable drop in demand, or where they sell goods to complement a range of goods being produced in the country of importation and accept a low profit to maintain competitiveness. Where the producer's own figures for profit and general expenses are not consistent with those usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to the country of importation, the amount for profit and general expenses may be based upon relevant information other than that supplied by or on behalf of the producer of the goods. <li data-bbox="408 1552 1401 1731">6. Whether certain goods are 'of the same class or kind' as other goods must be determined on a case-by-case basis with reference to the circumstances involved. In determining the usual profits and general expenses under the provisions of Article 30 (2) (d), sales for export to the country of importation of the narrowest group or range of goods, which includes the goods being valued, for which the necessary information can be provided, should be examined. For the purposes of Article 30 (2) (d), 'goods of the same class or kind' must be from the same country as the goods being valued.
Article 31 (1)	<ol style="list-style-type: none"> <li data-bbox="408 1895 1401 1946">1. Customs values determined under the provisions of Article 31 (1) should, to the greatest extent possible, be based on previously determined customs values. <li data-bbox="408 2002 1401 2074">2. The methods of valuation to be employed under Article 31 (1) should be those laid down in Articles 29 and 30 (2), but a reasonable flexibility in the application of such methods would be in conformity with the aims and provisions of Article 31 (1).

First column	Second column
Article 31 (1) (cont'd)	<p>3. Some examples of reasonable flexibility are as follows:</p> <p>(a) <i>identical goods</i> — the requirement that the identical goods should be exported at or about the same time as the goods being valued could be flexibly interpreted; identical imported goods produced in a country other than the country of exportation of the goods being valued could be the basis for customs valuation; customs values of identical imported goods already determined under the provisions of Articles 30 (2) (c) and (d) could be used;</p> <p>(b) <i>similar goods</i> — the requirement that the similar goods should be exported at or about the same time as the goods being valued could be flexibly interpreted; similar imported goods produced in a country other than the country of exportation of the goods being valued could be the basis for customs valuation; customs values of similar imported goods already determined under the provisions of Articles 30 (2) (c) and (d) could be used;</p> <p>(c) <i>deductive method</i> — the requirement that the goods shall have been sold in the 'condition as imported' in Article 152 (1) (a) of this Regulation could be flexibly interpreted; the '90 days' requirement could be administered flexibly.</p>
Article 32 (1) (b) (ii)	<p>1. There are two factors involved in the apportionment of the elements specified in Article 32 (1) (b) (ii) to the imported goods — the value of the element itself and the way in which that value is to be apportioned to the imported goods. The apportionment of these elements should be made in reasonable manner appropriate to the circumstances and in accordance with generally accepted accounting principles.</p> <p>2. Concerning the value of the element, if the buyer acquires the element from a seller not related to him at a given cost, the value of the element is that cost. If the element was produced by the buyer or by a person related to him, its value would be the cost of producing it. If the element had been previously used by the buyer, regardless of whether it had been acquired or produced by him, the original cost of acquisition or production would have to be adjusted downwards to reflect its use in order to arrive at the value of the element.</p> <p>3. Once a value has been determined for the element, it is necessary to apportion that value to the imported goods. Various possibilities exist. For example, the value might be apportioned to the first shipment, if the buyer wishes to pay duty on the entire value at one time. As another example, he may request that the value be apportioned over the number of units produced up to the time of the first shipment. As a further example, he may request that the value be apportioned over the entire anticipated production where contracts or firm commitments exist for that production. The method of apportionment used will depend upon the documentation provided by the buyer.</p> <p>4. As an illustration of the above, a buyer provides the producer with a mould to be used in the production of the imported goods and contracts with him to buy 10 000 units. By the time of arrival of the first shipment of 1 000 units, the producer has already produced 4 000 units. The buyer may request the customs authorities to apportion the value of the mould over 1 000, 4 000 or 10 000 units.</p>
Article 32 (1) (b) (iv)	<p>1. Additions for the elements specified in Article 32 (1) (b) (iv) should be based on objective and quantifiable data. In order to minimize the burden for both the declarant and customs authorities in determining the values to be added, data readily available in the buyer's commercial record system should be used insofar as possible.</p> <p>2. For those elements supplied by the buyer which were purchased or leased by the buyer, the addition would be the cost of the purchase or the lease. No addition shall be made for those elements available in the public domain, other than the cost of obtaining copies of them.</p> <p>3. The ease with which it may be possible to calculate the values to be added will depend on a particular firm's structure and management practice, as well as its accounting methods.</p> <p>4. For example, it is possible that a firm which imports a variety of products from several countries maintains the records of its design centre outside the country of importation in such a way as to show accurately the costs attributable to a given product. In such cases, a direct adjustment may appropriately be made under the provisions of Article 32.</p>

First column	Second column
Article 32 (1) (b) (iv) (<i>cont'd</i>)	<p>5. In another case, a firm may carry the cost of the design centre outside the country of importation as a general overhead expense without allocation to specific products. In this instance, an appropriate adjustment could be made under the provisions of Article 32 with respect to the imported goods by apportioning total design centre costs over total production benefiting from the design centre and adding such apportioned cost on a unit basis to imports.</p> <p>6. Variations in the above circumstances will, of course, require different factors to be considered in determining the proper method of allocation.</p> <p>7. In cases where the production of the element in question involves a number of countries and over a period of time, the adjustment should be limited to the value actually added to that element outside the Community.</p>
Article 32 (1) (c)	The royalties and licence fees referred to in Article 32 (1) (c) may include, among other things, payments in respect to patents, trademarks and copyrights.
Article 32 (2)	Where objective and quantifiable data do not exist with regard to the additions required to be made under the provisions of Article 32, the transaction value cannot be determined under the provisions of Article 29. As an illustration of this, a royalty is paid on the basis of the price in a sale in the importing country of a litre of a particular product that was imported by the kilogram and made up into a solution after importation. If the royalty is based partially on the imported goods and partially on other factors which have nothing to do with the imported goods (such as when the imported goods are mixed with domestic ingredients and are no longer separately identifiable, or when the royalty cannot be distinguished from special financial arrangements between the buyer and the seller), it would be inappropriate to attempt to make an addition for the royalty. However, if the amount of this royalty is based only on the imported goods and can be readily quantified, an addition to the price actually paid or payable can be made.
Article 143 (1) (e)	One person shall be deemed to control another when the former is legally or operationally in a position to exercise restraint or direction over the latter.
Article 152 (1) (a) (i)	<p>1. The words 'profit and general expenses' should be taken as a whole. The figure for the purposes of this deduction should be determined on the basis of information supplied by the declarant unless his figures are inconsistent with those obtaining in sales in the country of importation of imported goods of the same class or kind. Where the declarant's figures are inconsistent with such figures, the amount for profit and general expenses may be based upon relevant information other than that supplied by the declarant.</p> <p>2. In determining either the commissions or the usual profits and general expenses under this provision, the question whether certain goods are of the same class or kind as other goods must be determined on a case-by-case basis by reference to the circumstances involved. Sales in the country of importation of the narrowest group or range of imported goods of the same class or kind, which includes the goods being valued, for which the necessary information can be provided, should be examined. For the purposes of this provision, 'goods of the same class or kind' includes goods imported from the same country as the goods being valued as well as goods imported from other countries.</p>
Article 152 (2)	<p>1. Where this method of valuation is used, deductions made for the value added by further processing shall be based on objective and quantifiable data relating to the cost of such work. Accepted industry formulas, recipes, methods of construction, and other industry practices would form the basis of the calculations.</p> <p>2. This method of valuation would normally not be applicable when, as a result of the further processing, the imported goods lose their identity. However, there can be instances where, although the identity of the imported goods is lost, the value added by the processing can be determined accurately without unreasonable difficulty.</p> <p>On the other hand, there can also be instances where the imported goods maintain their identity but form such a minor element in the goods sold in the country of importation that the use of this valuation method would be unjustified. In view of the above, each situation of this type must be considered on a case-by-case basis.</p>

First column	Second column			
Article 152 (3)	1. As an example of this, goods are sold from a price list which grants favourable unit prices for purchases made in larger quantities.			
	Sale quantity	Unit price	Number of sales	Total quantity sold at each price
	1 to 10 units	100	10 sales of 5 units Five sales of 3 units	65
	11 to 25 units	95	Five sales of 11 units	55
	Over 25 units	90	One sale of 30 units One sale of 50 units	80
	The greatest number of units sold at a price is 80; therefore, the unit price in the greatest aggregate quantity is 90.			
	2. As another example of this, two sales occur. In the first sale 500 units are sold at a price of 95 currency units each. In the second sale 400 units are sold at a price of 90 currency units each. In this example, the greatest number of units sold at a particular price is 500; therefore, the unit price in the greatest aggregate quantity is 95.			
	3. A third example would be the following situation where various quantities are sold at various prices			
	(a) Sales			
	<i>Sale quantity</i>	<i>Unit price</i>		
	40 units	100		
	30 units	90		
	15 units	100		
	50 units	95		
	25 units	105		
	35 units	90		
	5 units	100		
	(b) Total			
	<i>Total quantity sold</i>	<i>Unit price</i>		
	65	90		
	50	95		
	60	100		
	25	105		
	In this example, the greatest number of units sold at a particular price is 65; therefore, the unit price in the greatest aggregate quantity is 90.			

ANNEX 24

APPLICATION OF GENERALLY ACCEPTED ACCOUNTING PRINCIPLES FOR THE DETERMINATION OF CUSTOMS VALUE

1. 'Generally accepted accounting principles' refers to the recognized consensus or substantial authoritative support within a country at a particular time as to which economic resources and obligations should be recorded as assets and liabilities, which changes in assets and liabilities should be recorded, how the assets and liabilities and changes in them should be measured, what information should be disclosed and how it should be disclosed, and which financial statements should be prepared. These standards may be broad guidelines of general application as well as detailed practices and procedures.
2. For the purposes of the application of the customs valuation provisions, the customs administration concerned shall utilize information prepared in a manner consistent with generally accepted accounting principles in the country which is appropriate for the Article in question. For example, the determination of usual profit and general expenses under the provisions of Article 152 (1) (a) (i) of this Regulation would be carried out utilizing information prepared in a manner consistent with generally accepted accounting principles of the country of importation. On the other hand, the determination of usual profit and general expenses under the provisions of Article 30 (2) (d) of the Code would be carried out utilizing information prepared in a manner consistent with generally accepted accounting principles of the country of production. As a further example, the determination of an element provided for in Article 32 (1) (b) (ii) of the Code undertaken in the country of importation would be carried out utilizing information in a manner consistent with the generally accepted accounting principles of that country.

ANNEX 25

AIR TRANSPORT COSTS TO BE INCLUDED IN THE CUSTOMS VALUE

Introduction

1. The following table shows:
 - (a) third countries listed by continent (column 1);
 - (b) airports of departure in third countries (column 2);
 - (c) airports of arrival in the Community with the percentages which represent the part of the air transport costs to be included in the customs value (column 3 and following columns).
2. When the goods are shipped to or from airports not included in the following table, other than the airports referred to in paragraph 3, the percentage given for the airport nearest to that of departure or arrival shall be taken.
3. As regards the French overseas departments of Guadeloupe, Guyana, Martinique and Réunion, of which territories the airports are not included in the table, the following rules shall apply:
 - (a) for goods shipped direct to those departments from third countries, the whole of the air transport cost is to be included in the customs value;
 - (b) for goods shipped to the European part of the Community from third countries and transhipped or unloaded in one of those departments, the air transport costs which would have been incurred for carrying the goods only as far as the place of transhipment or unloading are to be included in the customs value;
 - (c) for goods shipped to those departments from third countries and transhipped or unloaded in an airport in the European part of the Community, the air transport costs to be included in the customs value are those which result from the application of the percentages given in the following table to the costs which would have been incurred for carrying the goods from the airport of departure to the airport of transhipment or unloading.

The transhipment or unloading shall be certified by an appropriate endorsement by the customs authorities on the air waybill or other air transport document, with the official stamp of the office concerned; failing this certification the provisions of the last subparagraph of Article 163 (6) of this Regulation shall apply.

ANNEX 37

EXPLANATORY NOTE

TITLE I

General remarks

A. *General description*

The forms and continuation forms are to be used:

- (a) where Community legislation refers to a declaration of export (dispatch), release for free circulation (introduction), entry for any other customs procedure, including the Community transit procedure or re-exportation;
- (b) as necessary during the transitional period provided for in the Act of Accession for trade between the Community as constituted at 31 December 1985 and Spain or Portugal, and between those two Member States, in respect of goods for which customs duties and charges having equivalent effect have not yet been fully eliminated or which remain subject to other measures provided for in the act of accession;
- (c) where Community rules specifically provide for their use.

The forms and continuation forms used for this purpose comprise the copies needed to complete the formalities relating to one or more customs procedures (export, transit or other procedure at import), taken from a set of eight copies:

- copy 1 which is to be retained by the authorities of the Member State in which export (dispatch) or Community transit formalities are completed,
- copy 2 which is to be used for statistical purposes by the Member State of export. This copy can equally be used for statistical purposes by the Member State of dispatch in the cases of trade with parts of the customs territory of the Community with a different fiscal regime,
- copy 3 which is returned to the exporter after being stamped by the customs authority,
- copy 4 which is to be kept by the office of destination upon completion of the Community transit operation or as T2L document providing evidence of Community status of the goods,
- copy 5 which is the return copy for the Community transit procedure,
- copy 6 which is to be retained by the authorities of the Member State in which arrival formalities are completed,
- copy 7 which is to be used for statistical purposes by the Member State of destination (for Community transit and

arrival formalities) including the cases of trade between the parts of the customs territory of the Community with a different fiscal regime,

- copy 8 which is returned to the consignee after being stamped by the customs authority.

Various combinations are therefore possible, such as:

- export, outward processing or re-export: copies 1, 2 and 3,
- Community transit: copies 1, 4, 5 and 7,
- other customs procedures at import: copies 6, 7 and 8.

In addition, there are circumstances in which the Community status of the goods in question has to be proved at destination. In such cases copy 4 should be used as T2L document.

Operators may, if they wish, use privately printed subsets combining the appropriate copies provided that they conform to the official specimen.

Each subset must be designed in such a way that where boxes must contain identical information in the two Member States involved, this may be entered directly by the exporter or the principal on copy 1 and will then appear, by means of chemical treatment of the paper, on all the copies. Where, however, for any reason (in particular where the content of the information is different depending on the stage of the operation involved) the information is not to be transmitted from one Member State to another, the desensitization of the self-copying paper must restrict reproduction to the copies concerned.

Where declarations are to be processed by computer, it is possible to use subsets taken from sets in which each copy may have a dual function: 1/6, 2/7, 3/8, 4/5.

In this case, in each subset, the numbers of the copies being used must be shown by deleting the numbers, in the margin of the form, referring to the copies not being used.

Each subset thus defined must be designed so that the particulars which have to appear on each copy will be reproduced by means of chemical treatment of the paper.

When, pursuant to Article 205 of this Regulation, declarations for export (dispatch), transit or entry for another customs procedure at import (destination), or documents certifying the Community status of goods not being moved under internal Community transit procedure are drawn up on plain paper by means of official or private-sector data-processing systems, the said declarations or documents must comply as to their format with all the

conditions laid down by the Customs Code or this Regulation, including those relating to the back of the form (in respect of copies used under Community transit procedure) except:

- the colour used for printing,
- the use of italic characters,
- the printing of a background for the Community transit boxes.

B. Particulars required

1. Maximum list of boxes

The forms contain a number of boxes only some of which will be used, depending on the customs procedure(s) in question.

Without prejudice to the application of simplified procedures or the specific provisions concerning each box in Title II, the following is the maximum list of boxes which may be completed for each procedure:

- export formalities, outward processing and re-export:

Where goods eligible for relief from import duties are involved in accordance with Article 184 of the Code, the particulars referred to in box 16, 34 and 38 shall not be required, unless the customs authorities consider it necessary for the application of the provisions governing the release for free circulation of the goods concerned.

Where goods eligible for relief from import duties or those subject to a zero imposition are involved in accordance with Article 184 of the Code, the particulars referred to in box 47 shall not be required, unless the customs authorities consider it necessary for the application of the provisions governing the release for free circulation of the goods concerned.

boxes: 1 (first subdivision), 3, 5, 14, 19, 26, 31, 32, 33, 37, 38, 47, 49 and 54.

The boxes required for a declaration entering pre-financed goods for the customs warehousing procedure are the following:

boxes 1 (first subdivision), 3, 5, 14, 17, 19, 26, 31, 32, 33, 37, 38, 41, 44, 49 and 54;

- (g) the boxes to be used for a declaration of entry for a customs procedure discharging a customs procedure with economic impact, except for the outward processing procedure, shall be the boxes referred to in the minimum list laid down for the customs procedure in question.

In addition to the boxes referred to in the indent above, the following shall be necessary for the discharge of a customs procedure with economic impact, other than the outward processing procedure or customs warehousing:

- in box 44: the reference to the authorization,
- in box 31: where appropriate, the specific information laid down in Articles 610, 644 and 711.

For declarations for release for free circulation under the outward processing procedure, box 44 must show the reference to the authorization or, in the case referred to in Article 761, the information required for issue of the authorization.

In cases where the declaration of entry for a customs procedure serves to discharge the customs warehousing procedure, box 49 is to be filled in, in addition to the information laid down in the first two subparagraphs above;

- (h) the boxes to be used for a re-exportation declaration discharging a customs procedure with economic impact are as follows:
- (aa) in the cases discharging the customs warehousing procedure the particulars required at (f) (aa);

- (i) evidence of Community status of goods (T2L):
boxes 1 (third subdivision), 2, 3, 4, 5, 14, 31, 32, 33, 35, 38, 40, 44 and 54.

C. Instructions for use of the form

Whenever a particular subset contains one or more copies which may be used in a Member State other than the one in which it was first completed, the forms must be completed by typewriter or by a mechanographical or similar process. For ease of completion by typewriter the form should be inserted in the machine in such a way that the first letter of the particulars to be entered in box 2 is placed in the position box in the top left-hand corner.

Where all the copies of a subset are intended for use in the same Member State, they may be filled in legibly by hand, in ink and in block capitals, provided that this is allowed in that Member State. The same applies to the particulars to be given on the copies used for the purposes of the Community transit procedure.

The form must contain no erasures or overwriting. Any alterations must be made by crossing out the incorrect particulars and adding those required. Any alterations made in this way must be initialled by the person making them and expressly endorsed by the competent authorities. The latter may, where necessary, require a new declaration to be lodged.

In addition, the forms may be completed using an automatic reproduction process instead of any of the procedures mentioned above. They may also be produced and completed by this means on condition that the provisions concerning the specimen forms, format, language used, legibility, absence of erasures and overwriting, and amendments are strictly observed.

Only numbered boxes are to be completed by operators. The other boxes, identified by a capital letter, are for administrative use.

Without prejudice to Article 205 the copies which are to remain at the office of export/dispatch or departure must bear the original signature of the persons concerned.

The lodging with a customs office of a declaration signed by the declarant or his representative shall indicate that the person concerned is declaring the goods in question for the procedure applied for and, without prejudice to the possible application of sanctions, shall be held responsible, in accordance with the provisions in force in the Member States, in respect of:

- the accuracy of the information given in the declaration,
- the authenticity of the documents attached,
- the observance of all the obligations inherent in the entry of the goods in question under the procedure concerned.

The signature of the principal or, where applicable, of his authorized representative, commits him to all particulars relating to the Community transit operation pursuant to the

provisions on Community transit laid down in the Code and in this Regulation and as listed in section B above.

As regards Community transit formalities and formalities at destination, it should be noted that it is in the interests of each person intervening in the operation to check the contents of his declaration. In particular, any discrepancy found by the person concerned between the goods which he must declare and particulars already entered on the forms being used must immediately be notified by that person to the customs authority. In such cases the declaration must then be made on fresh forms.

Subject to Title III hereafter, where a box is not to be used, it should be left blank.

TITLE II

Particulars to be entered in the various boxes

A. *Export (or dispatch), re-export, outward processing and/or Community transit formalities*

1. Declaration

Enter 'EX' or 'EU' or 'COM' as appropriate, in the first subdivision; leave blank if the form is used for Community transit purposes only or where the Community transit procedure is not being used, but the form is used to prove the Community status of the goods.

In the second subdivision, enter the type of declaration in accordance with the Community code provided for that purpose (item for optional use by the Member States). Do not enter any symbol if the form is used only for Community transit or for evidence of Community status of goods.

In the third subdivision, enter 'T1', 'T2', 'T2 ES' or 'T2 PT' where the Community transit procedure is used or 'T2L', 'T2L ES' or 'T2L PT' where the Community transit procedure is not used, but the Community status of the goods must be proved.

2. Consignor/exporter

Enter the full name and address of the person or company concerned.

As to the identification number, the Member States may supplement the explanatory note to include the identification number allocated to the person or company concerned by the competent authorities for tax, statistical or other purposes. In the case of groupage consignments, the Member States may provide that the word 'various' be entered in this box and that the list of exporters be attached to the declaration.

Box for optional use by the Member States in respect of Community transit. However, this box is mandatory when the form is used for evidence of Community status of the goods.

3. Forms

Enter the number of the subset in relation to the total number of subsets of forms and continuation forms used. For example, if there is one EX form and two EX/c forms, indicate on the EX form '1/3', on the first EX/c form '2/3' and on the second EX/c form '3/3'.

Where the declaration covers only one item, i.e. only one 'description of the goods' box has to be completed, do not enter anything in box 3, but enter the figure 1 in box 5.

Where the declaration is made up from two sets of four copies instead of one set of eight copies, the two sets are to be treated as one for the purpose of establishing the number of forms.

4. Loading lists

Enter in figures the number of loading lists attached, if any, or of descriptive commercial lists authorized by the competent authority.

Box for optional use by the Member States in respect of export formalities, re-exportation or entry to outward processing.

5. Items

Enter the total number of items declared by the person concerned in all the forms and continuation forms (or loading lists or commercial lists) used. The number of items must correspond to the number of 'description of the goods' boxes to be completed.

6. Total packages

Box for optional use by the Member States.

Enter the total number of packages making up the consignment in question.

7. Reference number

Optional item for users, to contain the commercial reference number allocated by the person concerned to the consignment in question.

8. Consignee

Enter the full name address of the person(s) or company(ies) to whom the goods are to be delivered. In the case of groupage consignments, the Member States may provide that the word 'various' be entered in this

box, and the list of consignees attached to the declaration.

Box for optional use by the Member States in respect of export formalities, entry to outward processing and re-exportation of goods entered into an economic customs procedure. It must be completed in respect of Community transit formalities. However, the Member States may allow this box to be left blank where the consignee is established neither in the Community nor in an EFTA country.

Indication of the identification number is optional at this stage.

9. Person responsible for financial settlement

Box for optional use by the Member States (the person who is responsible for the repatriation of the funds relating to the transaction).

10. Country of first destination

Box for optional use by the Member States.

11. Trading country

Box for optional use by the Member States.

13. Common agricultural policy (CAP)

Box for optional use by the Member States (particulars concerning the implementation of agricultural policy).

14. Declarant or representative of the exporter/consignor

Enter the full name and address of the person or company concerned. If the declarant and the exporter/consignor are the same person, enter 'exporter' or 'consignor'.

As to the identification number, the Member States may supplement the user notice to include the identification number allocated to the person or company concerned by the competent authorities for tax, statistical or other purposes.

15. Country of dispatch/export

Box for optional use by the Member States in respect of export formalities, entry to outward processing and re-exportation of goods entered into an economic customs procedure. It must be completed in respect of the Community transit procedure. Enter the name of the Member State from which the goods are exported/discharged.

Box 37: Procedure on import/export

A. First subdivision:

The codes to be entered in this subdivision are based on those given in the second subdivision of box 1.

These are four-digit codes, composed of a two-digit code representing the procedure requested, followed by a second two-digit code representing the previous procedure. The list of two-digit codes is given below.

'Previous procedure' means the procedure under which the goods were placed before being placed under the procedure requested.

It should be noted that where the previous procedure is a warehousing procedure or temporary importation, or where the goods have come from a free zone, the relevant code should be used only where the goods have not been placed under a customs procedure with economic impact (inward processing, outward processing or processing under customs control).

For example:

re-export of goods imported under the customs inward processing procedure (suspension system) and subsequently placed under the customs warehousing procedure = 3151 (not 3171).

(First operation = 5100; second operation = 7151: re-export = 3151).

Similarly, where goods previously temporarily exported are reimported, entry under one of the abovementioned suspensive procedures is to be regarded as simple importation under that procedure. Indication of the 'reimportation' aspect is to be given only when the goods are released for free circulation.

For example:

entry for home use with simultaneous entry for free circulation of goods exported under the customs outward processing procedure and placed under a customs warehousing procedure on reimportation = 6121 (not 6171).

(First operation: temporary export for outward processing = 2100; second operation: storage in customs warehouse = 7121; third operation: entry for home use + entry for free circulation = 6121).

INSTRUCTIONS FOR USE OF THE FORMS REQUIRED TO DRAW UP CONTROL COPY T 5

A. General remarks

1. The control copy T 5 is a document drawn up on a form T 5 accompanied, where appropriate, by one or more T 5 *bis* continuation sheets or one or more T 5 loading lists.
2. The control copy T 5 is intended to supply proof that the goods in respect of which it was issued have been either used as, or have reached the destination, provided for by the specific Community provisions governing their use, it being the responsibility of the competent office in the Member State of destination to be satisfied either directly or through persons acting on its behalf as to the use and/or destination of the goods concerned. In some cases, the T 5 is also used to inform the Member State of destination that the goods which it covers are subject to special measures. The procedure thus instituted is a framework procedure, to be put into effect only if specific Community legislation expressly so provides. It can apply even where the goods are not moving under a Community transit or under another customs transit procedure.
3. The control copy T 5 must be drawn up in one original and at least one copy, each of which must bear an original signature.

When goods are transported under the Community transit or under another customs transit procedure, the original and the copy or copies of the control copy T 5 must be submitted together to the office of departure which retains one copy while the original accompanies the goods and must be presented with them at the office of destination.

When goods are not placed under transit procedure, the control copy T 5 shall be issued by the competent authorities of the Member State of consignment which shall keep a copy. The control copy T 5 shall contain the statement 'Goods not covered by a transit procedure'. In such cases, the original control copy T 5 may be sent direct or presented by the person concerned, to the competent office of destination.

4. If:
 - T 5 *bis* continuation sheets are used, the form T 5 and the T 5 *bis* continuation sheets must be completed,
 - T 5 loading lists are used, the form T 5 must be completed but boxes 31, 33, 35, 38, 100, 103 and 105 must be struck through and the information concerned must be entered only on the T 5 loading list or lists.
5. A form T 5 cannot be accompanied both by T 5 *bis* continuation sheets and by T 5 loading lists.

B. Rules relating to form T 5

1. Use of the form

The forms must be completed in typescript or by a mechanographical or similar process. They may also be completed legibly in manuscript, in ink and in block letters. In order to complete the form more easily in typescript, it should be inserted in such a way that the first letter to be entered in box 2 is located in the small positioning box in the top left hand corner.

Forms must contain no erasures or overwriting. Any alterations must be made by striking out the incorrect particulars and, where appropriate, adding those required. Any alterations made in this way must be initialled by the person making them and specifically endorsed by the competent authorities who may, where appropriate, require a new declaration to be lodged.

In addition, forms may be completed using an automatic reproduction process instead of any of the processes mentioned above. They may also be produced and completed by that means provided that the rules relating to the specimens, paper, size of forms, language to be used, legibility, prohibition of erasures and overwriting and alterations are strictly observed.

Only boxes marked with a serial number need, if appropriate, be completed. The other boxes, marked with a capital letter are for official use only except in cases provided for in specific regulations.

2. *Particulars to be entered in the different boxes*

Where the declaration covers only one item (i.e. where only one 'description of goods' box has to be completed), enter nothing in box 3 but enter the figure 1 in box 5.

Example A: monthly aggregation

Three consignments of goods entered for the arrangements in January are to be aggregated (1, 15 and 31 of the month).

The time limit for re-exportation for all these consignments is 30 April; the deadline for presentation of the bill of discharge in accordance with Article 596 of the implementing provisions is then 30 May.

The duties on import goods or compensating products put on the Community market specified in Article 580 (4) and (5) must be paid no later than 30 May possibly on the basis of a summary declaration in accordance with Article 597 (1) of the implementing provisions. The items of charge for the goods or products are determined on the basis of Article 121 of the Code or Article 122 of the Code if applicable. The date taken into consideration is 30 April.

Example B: quarterly aggregation

Nine consignments of goods entered for the arrangements in the course of a quarter are to be aggregated:

- 1, 15 and 31 January,
- 1, 15 and 28 February,
- 1, 15 and 31 March.

The time limit for re-exportation for all these consignments is 30 June; the deadline for presentation of the bill of discharge in accordance with Article 596 of the implementing provisions is then 30 July.

The duties on import goods or compensating products put on the Community market specified in Article 580 must be paid no later than 30 July possibly on the basis of a summary declaration in accordance with Article 597 (1) of the implementing provisions. The items of charge for the goods or products are determined on the basis of Article 121 of the provisions or Article 122 of the Code if applicable. The date taken into consideration is 30 June.

(1) The subheadings in this column correspond to those in the combined nomenclature. When further subdivision has been necessary this is shown in parentheses (). These subdivisions correspond to those used in the regulations fixing export refunds.

(2) Losses are calculated by subtracting from 100 the sum of the quantities shown in this column.

(3) Hulled grains are grains corresponding to the definition given in the Annex to Regulation (EEC) No 821/68 (OJ No L 149, 29. 6. 1968, p. 46).

(4) Cereal meal with an ash content, referred to dry matter, of less than 0,95 % by weight and a rate of passage through a sieve with an aperture of 0,25 mm of less than 10 % by weight.

(5) The standard rate of yield to be applied is based on the number of eggs used per kg of pasta produced, using the following formula:

$$\text{Numerical order 24: } T = \frac{100}{167 - (X \times 1,6)} \times 100$$

$$25: T = \frac{100}{150 - (X \times 1,6)} \times 100$$

$$26: T = \frac{100}{133 - (X \times 1,6)} \times 100$$

X represents the number of eggs in shell (or the 50th of their weight expressed in grams of their equivalent in other egg products) uses per kg of pasta produced, the result being given to two decimal points.

(6) Pearled grains are grains corresponding to the definition given in the Annex to Regulation (EEC) No 821/68 (OJ No L 149, 29. 6. 1968, p. 46).

(7) This concerns maize groats and meal:

- of which a percentage not exceeding 30 % by weight passes through a sieve with an aperture of 315 micrometers, or
- of which a percentage not exceeding 5 % by weight passes through a sieve with an aperture of 150 micrometers.

(8) For glucose in the form of white crystallins powder, of a concentration other than 92 %, the quantity to be shown is 43,81 kilograms of D-glucitol anhydrate per 100 kilograms of maize.

(9) For glucose other than in the form of white crystallins powder, of a concentration other than 82 %, the quantity to be shown is 50,93 kilograms of D-glucitol anhydrate per 100 kilograms of maize.

(10) For D-glucitol, of a concentration other than 70 %, the quantity to be shown is 40,7 kilograms of D-glucitol per 100 kilograms of maize.

(11) For D-glucitol, of a concentration other than 70 %, the quantity to be shown is 46,1 kilograms of D-glucitol anhydrate per 100 kilograms of maize.

(12) For the application of the alternatives (a) to (f), the real results from the operations have to be taken into account.

(13) For the purposes of completing the arrangements, the quantity of broken rice obtained shall correspond to the quantity of broken rice as determined at the time of importation for processing of rice under CN codes 1006 30 91 and 1006 30 99. In the case of polishing, this quantity shall be increased by 2 % of the imported rice excluding the broken rice as determined at importation.

(14) Pre-cooked rice is constituted by bleached rice in grains undergoing a pre-cooking and partial dehydration intended to facilitate final cooking.

(15) The double quantity of oleic acid contained in the untreated olive oil has to be deducted from the quantity of refined olive oil shown in column 5 and constitutes the quantity of acid oils from refining.

(16) In the case of soluble cocoa, add 1,5 % alkaline to the quantity shown in column 5.

(17) Yield fixed for bakers' yeast, with a content in the dry matter of 95 %, obtained from beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar. For bakers' yeasts with a different content in the dry matter, the quantity to be shown is 22,4 kilograms of yeast anhydrate per 100 kilograms of beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar.

(18) Yield fixed for bakers' yeast content in the dry matter of 28 % obtained from beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar. For bakers' yeasts with a different content in the dry matter, the quantity to be shown is 22,4 kilograms of yeast anhydrate per 100 kilograms of beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar.

ANNEX 78

SPECIAL PROVISIONS CONCERNING EQUIVALENT COMPENSATION AND PRIOR EXPORTATION FOR CERTAIN TYPES OF GOODS**1. Rice**

Rice classified under CN code 1006 shall not be deemed equivalent unless it falls within the same eight-digit subheading of the combined nomenclature. Nevertheless, for rice with a length not exceeding 6,0 mm and a length/width ratio equal to or more than 3 and for rice with a length equal to or less than 5,2 mm and a length/width ratio equal to or more than 2, equivalence shall be established by determination of the length/width ratio only.

The measurement of the grains shall be done in accordance with Annex A (2) (d) to Council Regulation (EEC) No 1418/76 of 21 June 1976 on the common organization of the market in rice ⁽¹⁾.

2. Wheat

Equivalent compensation may not be used between common wheat classified under CN code 1001 90 99 and harvested in the Community, all durum wheat classified under CN code 1001 10 90 and harvested in the Community, and imported wheat falling within the same subheadings of the combined nomenclature and harvested in a third country.

However, after consulting a group of experts consisting of representatives of the Member States meeting in the framework of the committee for customs procedures with economic impact, the Commission may decide to derogate from the prohibition of recourse to equivalent compensation for the abovementioned products.

3. Sugar

Recourse to equivalent compensation is permitted between raw cane sugar falling within CN code 1701 11 90 and raw beet sugar falling within CN code 1701 12 90.

ANNEX 80

EXAMPLES OF CALCULATING THE PROPORTION OF
IMPORT GOODS INCORPORATED IN COMPENSATING PRODUCTS

(Articles 591 to 594)

INTRODUCTION TO ANNEX 80

- Annex 80 is intended to provide guidance for the application of Articles 591 to 594.
- Note that the proportion of import goods incorporated in compensating products is to be calculated only where this is necessary to determine the amount of the customs debt under Article 121 of the Code.
This means that where:
 - all compensating products are assigned to a customs-approved treatment or use not involving the collection of import duties,
 - or
 - import duties are to be collected only on compensating products chargeable under Article 122 of the Code,
 the methods of calculation will not be applied.
- The quantity of compensating products to be obtained will be determined on the basis of the approved rates of yield.
- The addition of Community goods in the course of the manufacturing process does not affect the actual proportion of import goods incorporated in the compensating products and is therefore not taken into account.

I. Article 592: Quantitative scale method (compensating products)

(a) *Import goods:*

100 kg A

(b) *Compensating products:*

90 kg B

(c) *Customs debt in respect of:*

20 kg B

(d) *Quantity of import goods corresponding to quantity of B in respect of which a customs debt has been incurred:* $20/90 \times 100 \text{ kg} = 22,22 \text{ kg A}$

II. Article 593: Quantitative scale method (import goods)

(a) *Import goods:*

100 kg A

(b) *Compensating products:*

80 kg B, containing = 80 kg A

10 kg C, containing = 10 kg A

5 kg D, containing = 5 kg A

Total: 95 kg A

(c) *Apportionment basis in kg A:*B: $80/95 \times 100 \text{ kg} = 84,21 \text{ kg A}$ C: $10/95 \times 100 \text{ kg} = 10,53 \text{ kg A}$ D: $5/95 \times 100 \text{ kg} = 5,26 \text{ kg A}$

Total: 100 kg A

(d) *Customs debt in respect of:*

1. 10 kg B

2. 5 kg D

A. ARTICLE 122 OF THE CODE DOES NOT APPLY

*Quantity of import goods corresponding to the quantity of B in respect of which a customs debt has been incurred:*B: $10/80 \times 84,21 \text{ kg} = 10,53 \text{ kg A}$ D: $5/5 \times 5,26 \text{ kg} = 5,26 \text{ kg A}$

Total: 15,79 kg A

B. ARTICLE 122 OF THE CODE APPLIES

D is on the Article 122 list

(i) *Quantity of import goods corresponding to the quantity of B in respect of which a customs debt has been incurred:* $10/80 \times 84,21 \text{ kg} = 10,53 \text{ kg A}$ (ii) *Portion of D dutiable under Article 121/Article 122*

Under the first indent of Article 122 (1) (a), specific duties on product D can apply only to as much of that product as 'corresponds proportionally to the exported part of the other compensating products', i.e. those not included in the list.

— Quantity of products exported in kilograms A:

B: $70 \text{ kg} = 70/80 \times 84,21 = 73,68 \text{ kg A}$ C: $10 \text{ kg} = 10/10 \times 10,53 = 10,53 \text{ kg A}$

Total: 84,21 kg A

— Proportion exported:

 $[84,21/(100 - 5,26)] \times 100\% = 88,89\%$

— Dutiable under Article 122:

 $88,89\% \times 5 \text{ kg D} = 4,44 \text{ kg D}$

— Dutiable under Article 121:

 $5 \text{ kg} - 4,44 \text{ kg} = 0,56 \text{ kg D} = 0,56 \times 5,26 = 0,59 \text{ kg A}$

(iii) *Total dutiable:*

- Article 122: 4,4 kg D
- Article 121: 0,59 kg A + 10,53 kg A = 11,02 kg A

III. Article 594: Value scale method

Article 122 of the Code applies

(a) *Import goods:*

100 kg A

(b) *Quantity and value of compensating products:*

80 kg B at ECU 20/kg = ECU 1 600
 10 kg C at ECU 12/kg = ECU 120
 5 kg D at ECU 5/kg = ECU 25 (D is on the Article 122 list)

Total: ECU 1 745

(c) *Apportionment basis in kg A:*

B: $1\,600/1\,745 \times 100 \text{ kg} = 91,69 \text{ kg A}$
 C: $120/1\,745 \times 100 \text{ kg} = 6,88 \text{ kg A}$
 D: $25/1\,745 \times 100 \text{ kg} = 1,43 \text{ kg A}$

Total: 100 kg A

(d) *Customs debt in respect of:*

1. 10 kg B
2. 5 kg D

A. ARTICLE 122 OF THE CODE DOES NOT APPLY

Quantity of import goods corresponding to the quantity of B in respect of which a customs debt has arisen:

$10/80 \times 91,69 \text{ kg} = 11,46 \text{ kg A}$

B. ARTICLE 122 OF THE CODE APPLIES

D is on the Article 122 list

(i) *Quantity of import goods corresponding to the quantity of B in respect of which a customs debt has arisen:*

$10/80 \times 91,69 \text{ kg} = 11,46 \text{ kg A}$

(ii) *Portion of D dutiable under Article 122/Article 121:*

Under the first indent of Article 122 (1) (a), specific duties on product D can apply only to as much of that product as 'corresponds proportionally to the exported part of the other compensating products', i.e. those not included in the list.

— Value of exported portion of compensating products:

B: $70 \times \text{ECU } 20 = \text{ECU } 1\,400$
 C: $10 \times \text{ECU } 12 = \text{ECU } 120$

Total: ECU 1 520

— Proportion exported:

$[1\,520/(1\,745 - 25)] \times 100\% = 88,37\%$

— Dutiable under Article 122:

$88,37\% \times 5 \text{ kg} = 4,42 \text{ kg D}$

— Dutiable under Article 121:

$5 \text{ kg} - 4,42 \text{ kg} = 0,58 \text{ kg D} = 0,58 \times \frac{1,43}{5} = 0,17 \text{ kg A}$

(iii) *Total dutiable:*

- Article 122: 4,42 kg D
- Article 121: 0,17 kg A + 11,46 kg A = 11,63 kg A

NOTE FOR THE USE OF THE INFORMATION DOCUMENT

1. The exporter must ensure that, subject to any conditions they may lay down, the Customs authorities of the country of temporary importation are in a position to establish the identity of the goods.
2. The duly completed Information Document (I. D.) must be presented to the Customs authorities whenever the goods are cleared.
3. If the goods are to be re-imported in split consignments the following procedure applies.
 - (a) Temporary exportation:
The exporter produces the I. D. in duplicate. The Customs certify both copies (Part I) and return them to the exporter who sends the original I. D. to the importer who keeps it until the last split re-exportation. The exporter keeps the duplicate I. D.
 - (b) Temporary importation:
The importer produces the original I. D. to the Customs who certify Part II and return the I. D. to him.
 - (c) Split re-exportation:
The re-exporter completes an additional Part III (including Cage G) and produces it to the Customs together with the original I. D. The Customs certify the additional Part III after checking it against the I. D. The re-exporter sends the additional Part III to re-importer.
 - (d) Split re-importation:
The re-importer produces the additional Part III and his copy of the I. D. to the Customs for checking against each other.
 - (e) Last split re-exportation:
The re-exporter completes Part III of the original I. D. including Cage G. The Customs certify the original I. D. and return it to the re-exporter who sends it to the re-importer.
 - (f) Last split re-importation:
The re-importer produces both copies of the I. D. to the Customs.

ANNEX 105

METHODS FOR CALCULATING

THE PROPORTION OF TEMPORARILY EXPORTED GOODS INCORPORATED IN THE COMPENSATING PRODUCTS

Nature of compensating products released for free circulation	One kind only	Article 773, first case Obtained from one kind of temporarily exported goods only	I	
		Article 773, second case Obtained from several kinds of temporarily exported goods	II	
	Several kinds	Obtained from one kind of temporarily exported goods only	Article 774, first case Quantitative scale method (temporarily exported goods)	III
			Article 775, first case Value scale method	IV
		Obtained from several kinds of temporarily exported goods	Article 774, second case Quantitative scale method (temporarily exported goods)	V
			Article 775, second case Value scale method	VI

I. Article 773, first case:

One kind of compensating product only is obtained from one kind of temporarily exported goods only:

Quantitative scale method (compensating products)

(a) *Quantity of temporarily exported goods:*

100 kg A

(b) *Yield of 100 kg A:*

200 kg X

(c) *Quantity of compensating products released for free circulation:*

180 kg X

(d) *Quantity of temporarily exported goods to be taken into account for determining the import duties to be deducted:*

$180/200 \times 100 \text{ kg} = 90 \text{ kg A}$

II. Article 773, second case:

One kind of compensating product only is obtained from several kinds of exported goods:

Quantitative scale method (temporarily exported goods)

(a) *Quantity of temporarily exported goods:*

100 kg A and 50 kg B

(b) *Yield of 100 kg A and 50 kg B:*

300 kg X

(c) *Quantity of compensating products released for free circulation:*

180 kg X

(d) *Quantity of temporarily exported goods to be taken into account for determining the import duties to be deducted:*

$180/300 \times 100 \text{ kg} = 60 \text{ kg A}$

$180/300 \times 50 \text{ kg} = 30 \text{ kg A}$

III. Article 774, first case:

Several kinds of compensating products are obtained from one kind of temporarily exported goods only:

Quantitative scale method

(a) *Quantity of temporarily exported goods:*

100 kg A

(b) *Yield of 100 kg A:*

200 kg X, which incorporate 85 kg A

30 kg Y, which incorporate $\frac{10 \text{ kg A}}{95 \text{ kg A}}$

(c) *Calculation of respective proportions:*

$200 \text{ kg X} = 85/95 \times 100 \text{ kg} = 89,47 \text{ kg A}$

$30 \text{ kg Y} = \frac{10/95 \times 100 \text{ kg}}{100 \text{ kg A}} = 10,53 \text{ kg A}$

(d) *Quantity of compensating products released for free circulation:*

180 kg X and 20 kg Y

(e) *Quantity of temporarily exported goods to be taken into account for determining the import duties to be deducted:*

$180 \text{ kg X} = 180/200 \times 89,47 = 80,52 \text{ kg A}$

$20 \text{ kg Y} = \frac{20/30 \times 10,53}{87,54 \text{ kg A}} = 7,02 \text{ kg A}$

IV. Article 775, first case:

Several kinds of compensating products are obtained from one kind of temporarily exported goods only:

Value scale method

(a) *Quantity of temporarily exported goods:*

100 kg A

(b) *Yield of 100 kg A:*

200 kg X at ECU 12 = ECU 2 400

30 kg Y at ECU 5 = $\frac{\text{ECU } 150}{\text{ECU } 2 550}$

(c) *Calculation of respective proportions:*

$200 \text{ kg X} = 2 400/2 550 \times 100 \text{ kg} = 94,12 \text{ kg A}$

$30 \text{ kg Y} = \frac{150/2 550 \times 100 \text{ kg}}{100 \text{ kg A}} = 5,88 \text{ kg A}$

(d) *Quantity of compensating products released for free circulation:*

180 kg X and 20 kg Y

(e) *Quantity of temporarily exported goods to be taken into account for determining the import duties to be deducted:*

$180 \text{ kg X} = 180/200 \times 94,12 = 84,71 \text{ kg A}$

$20 \text{ kg Y} = \frac{20/30 \times 5,88}{88,63 \text{ kg A}} = 3,92 \text{ kg A}$
