COMISSION REGULATION (EC) No 1676/96

of 30 July 1996

amending Regulation (EEC) No 2454/93 laying down provisions for the implementation of Council Regulation (EEC) No 2913/92 establishing the Community Customs Code

THE COMMISSION OF THE EUROPEAN COMMUNITIES.

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EEC) No 2913/92 of 12 October 1992 establishing the Community Customs Code (1), as amended by the Act of Accession of Austria, Finland and Sweden, and in particular Article 249 thereof.

Whereas Article 19 of Regulation (EEC) No 2913/92 (hereinafter referred to as 'the Code') provides for the adoption of provisions dealing with the simplified application of customs legislation; whereas in this context it is appropriate to provide, in the field of customs valuation, for the simplified determination of certain elements whose inclusion or non-inclusion in the customs value is governed by Articles 32 and 33 of the Code;

Whereas a correction is required to Article 294 of Commission Regulation (EEC) No 2454/93 (²), as last amended by Regulation (EC) No 482/96 (³);

Whereas for reason of customs control, the designated area of a customs warehouse should always be clearly separated;

Whereas, in the framework of the inward processing procedure, in order to ensure that the legitimate interests of Community industry are not adversely affected by use of economic conditions code 6303, it is necessary to lay down more detailed provisions for the use of that code;

Whereas it is desirable to lay down special provisions to apply in certain circumstances to the discharge of the inward processing procedure in respect of certain secondary compensating products;

Whereas the provisions governing application of compensatory interest under the inward processing procedure should be supplemented;

Whereas the provisions governing entry for the inward processing procedure using the drawback system should be made clearer;

Whereas it is necessary to amend in part Annex 25 on air transport costs to be included in the value of goods for customs purposes following the creation of a Customs Union with Turkey;

Whereas Decisions 1/95 of 26 October 1995 of the EC-EFTA Joint Committee 'Common Transit/Single Administrative Document' invited the Czech Republic, Hungary, Poland and Slovakia to accede to the Convention of 20 May 1987 on a common transit procedure (4) and the Convention on the simplification of formalities in trade in goods (5); whereas the accession of these countries has to have been completed by 1 July 1996;

Whereas the explanatory notes to the single administrative document must be amended to take account of Council Regulation (EC) No 1172/95 of 22 May 1995 on the statistics relating to the trading of goods by the Community and its Member States with non-member countries (6);

⁽⁵⁾ OJ No L 134, 22. 5. 1987, p. 2.

⁽⁶⁾ OJ No L 118, 25. 5. 1995, p. 10.

Whereas it is desirable to adapt the legislation on inward processing to take into account changes in tariff classification of goods;

Whereas the wording of Annex 78 should be aligned on the terminology used in the Code;

Whereas, for economic reasons connected to an erroneous transposition of the CN code, it appears appropriate to amend the list contained in Annex 87;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Customs Code Committee.

In such cases, the declared customs value is not to be considered as provisional within the meaning of the second indent of Article 254.

- 2. The authorization shall be granted under the following conditions:

- the fifth indent is replaced by the following:
 - 'The simplification mentioned above, which shall be accorded by the customs authorities only on condition that the stock turnover period can be verified, may also be based, where applicable, on the length of time for which the compensating products in question are warehoused.';

⁽¹⁾ The subheadings in this column correspond to those in the combined nomenclature. When further subdivision has been necessary this is shown in parentheses (). These subdivisions correspond to those used in the regulations fixing export refunds.

Losses are calculated by subtracting from 100 the sum of the quantities shown in this column.

Hulled grains are grains corresponding to the definition given in Annex to Commission Regulation (EEC) No 821/68 (OJ No L 149, 29. 6. 1968, p. 46).

Cereal meal with an ash content, referred to dry matter, of less than 0,95 % by weight and a rate of passage through a sieve with an aperture of 0,25 mm of less than 10 % by weight.

- (5) The standard rate of yield to be applied is based on the number of eggs used per kilogram of pasta produced, using the following formula:
 - Numerical order 25 : $T = \frac{100}{160 (X \times 1.6)} \times 100$
 - Numerical order 26 : $T = \frac{100}{150 (X \times 1,6)} \times 100$
 - Numerical order 27 : T = $\frac{100}{140 (X \times 1,6)} \times 100$
 - Numerical order 28 : T = $\frac{100}{126 (X \times 1.6)} \times 100$

X represents the number of eggs in shell (or the 50th of their weight expressed in grams of their equivalent in other egg products) uses per kilogram of pasta produced, the result being given to two decimal points.

(6) Pearled grains are grains corresponding to the definition given in the Annex to Commission Regulation (EEC) No 821/68 (OJ No L 149, 29. 6. 1968, p. 46).

(7) This concerns maize groats and meal:

- of which a percentage not exceeding 30 % by weight passes through a sieve with an aperture of 315 micrometers, or

— of which a percentage not exceeding 5 % by weight passes through a sieve with an aperture of 150 micrometers.

- 8) For glucose in the form of white crystalline powder, of a concentration other than 92 %, the quantitiy to be shown is 43, 81 kilograms of D-glucitol anhydrate per 100 kilograms of maize.
- (2) For glucose other than in the form of white crystalline powder, of a concentration other than 82 %, the quantity to be shown is 50,93 kilograms of D-glucitol anhydrate per 100 kilograms of maize.
- (10) For D-glucitol, of a concentration other than 70 %, the quantity to be shown is 41,4 kilograms of D-glucitol per 100 kilograms of maize.
- (11) For D-glucitol, of a concentration other than 70 %, the quantity to be shown is 47,3 kilograms of D-glucitol anhydrate per 100 kilograms of maize.

(12) For the application of the alternatives (a) to (f), the real results from the operations have to be taken into account.

(13) For the purposes of completing the arrangements, the quantitiy of broken rice obtained shall correspond to the quantity of broken rice as determined at the time of importation for processing of rice under CN codes 1006 30 61 to 1006 30 98. In the case of polishing, this quantity shall be increased by 2 % of the imported rice excluding the broken rice as determined at importation.

(14) Pre-cooked rice is constituted by bleached rice in grains undergoing a pre-cooking and partial dehydration intended to facilitate final cooking.

(15) The double quantity of olsic acid contained in the untreated olive oil has to be deducted from the quantity of refined olive oil shown in column 5 and constitutes the quantity of acid oils from refining.

(16) In the case of soluble cocoa, add 1,5 % alkaline to the quantity shown in column 5.

- (17) Yield fixed for bakers' yeast, with a content in the dry matter of 95 %, obtained from beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar. For bakers' yeasts with a different content in the dry matter, the quantity to be shown is 22,4 kilograms of yeast anhydrate per 100 kilograms of beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar.
- (18) Yield fixed for bakers' yeast, with a content in the dry matter of 28 %, obtained from beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar. For bakers' yeasts with a different content in the dry matter, the quantity to be shown is 22,4 kilograms of yeast anhydrate per 100 kilograms of beet molasses brought to 48 % of total sugar, or of cane molasses brought to 52 % of total sugar.'

ANNEX V

Section 2 of Annex 78 is replaced by the following text:

'2. Wheat

Equivalent compensation may be used only between wheat harvested in a third country and already released for free circulation and non-Community wheat, of the same eight digit CN code, having the same commercial quality and the same technical characteristics.

However,

- derogations from the ban on use of the equivalent compensation system may be adopted in respect of wheat on the basis of a communication from the Commission to the Member States, after consultation of the Customs Code Committee (section for customs procedures with economic impact) in accordance with Article 248 of the Code,
- equivalent compensation is permitted between Community durum wheat and durum wheat of third-country origin provided it is for the production of pasta falling within CN codes 1902 11 00 and 1902 19.'
