**COUNCIL REGULATION (EC) No 338/97**  
**of 9 December 1996**  
**on the protection of species of wild fauna and flora by regulating**  
**trade therein**

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 130s (1) thereof,

Having regard to the proposal from the Commission<sup>(1)</sup>,

Having regard to the opinion of the Economic and Social Committee<sup>(2)</sup>,

Acting in accordance with the procedure laid down in Article 189c of the Treaty<sup>(3)</sup>,

- (1) Whereas Regulation (EEC) No 3626/82<sup>(4)</sup> applies the Convention on International Trade in Endangered Species of Wild Fauna and Flora in the Community with effect from 1 January 1984; whereas the purpose of the Convention is to protect endangered species of fauna and flora through controls on international trade in specimens of those species;
- (2) Whereas, in order to improve the protection of species of wild fauna and flora which are threatened by trade or likely to be so threatened, Regulation (EEC) No 3626/82 must be replaced by a Regulation taking account of the scientific knowledge acquired since its adoption and the current structure of trade; whereas, moreover, the abolition of controls at internal borders resulting from the Single Market necessitates the adoption of stricter trade control measures at the Community's external borders, with documents and goods being checked at the customs office at the border where they are introduced;
- (3) Whereas the provisions of this Regulation do not prejudice any stricter measures which may be taken or maintained by Member States, in compliance with the Treaty, in particular with regard to the holding of specimens of species covered by this Regulation;
- (4) Whereas it is necessary to lay down objective criteria for the inclusion of species of wild fauna and flora in the Annexes to this Regulation;
- (5) Whereas the implementation of this Regulation necessitates the application of common conditions for the issue, use and presentation of documents relating to authorization of the introduction into the Community and the export or re-export from the Community of specimens of the species covered by this Regulation; whereas it is necessary to lay down specific provisions relating to the transit of specimens through the Community;
- (6) Whereas it is for a management authority of the Member State of destination, assisted by the scientific authority of that Member State and, where appropriate, taking into account any opinion of the Scientific Review Group, to decide on the requests for introduction of specimens into the Community;
- (7) Whereas it is necessary to supplement the provisions on re-export with a consultation procedure, in order to limit the risk of infringement;

<sup>(1)</sup> OJ No C 26, 3. 2. 1992, p. 1, and OJ No C 131, 12. 5. 1994, p. 1.

<sup>(2)</sup> OJ No C 223, 31. 8. 1992, p. 19.

<sup>(3)</sup> Opinion of the European Parliament of 15 December 1995 (OJ No C 17, 22. 1. 1996, p. 430), Common position of the Council of 26 February 1996 (OJ No C 196, 6. 7. 1996, p. 58) and Decision of the European Parliament of 18 September 1996 (OJ No C 320, 28. 10. 1996).

<sup>(4)</sup> OJ No L 384, 31. 12. 1982, p. 1. Regulation as last amended by Commission Regulation (EC) No 558/95 (OJ No L 57, 15. 3. 1995, p. 1).

**VB**

- (8) Whereas, in order to guarantee effective protection of species of wild fauna and flora, additional restrictions may be imposed on the introduction of specimens into, and the export thereof from, the Community; whereas, with regard to live specimens, these restrictions may be supplemented by restrictions at Community level on the holding or movement of such specimens within the Community;
- (9) Whereas it is necessary to lay down specific provisions applicable to captive-born and bred, or artificially propagated specimens, to specimens which are personal or household effects, and to non-commercial loans, donations or exchanges between registered scientists and scientific institutions;
- (10) Whereas there is a need, in order to ensure the broadest possible protection for species covered by this Regulation, to lay down provisions for controlling trade and movement of specimens within the Community, and the conditions for housing specimens; whereas the certificates issued under this Regulation, which contribute to controlling these activities, must be governed by common rules on their issue, validity and use;
- (11) Whereas measures should be taken to minimize the adverse effects on live specimens of transport to their destination, from or within the Community;
- (12) Whereas, to ensure effective controls and to facilitate customs procedures, customs offices should be designated, with trained personnel responsible for carrying out the necessary formalities and corresponding checks where specimens are introduced into the Community, in order to assign them a customs-approved treatment or use within the meaning of Council Regulation (EEC) No 2913/92 of 12 October 1992 establishing the Community Customs Code<sup>(1)</sup>, or where they are exported or re-exported from the Community; whereas there should also be facilities guaranteeing that live specimens are adequately housed and cared for;
- (13) Whereas the implementation of this Regulation also calls for the designation of management and scientific authorities by the Member States;
- (14) Whereas informing the public and making them aware of the provisions of this Regulation, particularly at border crossing points, is likely to encourage compliance with these provisions;
- (15) Whereas, in order to ensure effective enforcement of this Regulation, Member States should closely monitor compliance with its provisions and, to that end, cooperate closely between themselves and with the Commission; whereas this requires the communication of information relating to the implementation of this Regulation;
- (16) Whereas the monitoring of levels of trade in the species of wild fauna and flora covered by this Regulation is of crucial importance for assessing the effects of trade on the conservation status of species; whereas detailed annual reports should be drawn up in a common format;
- (17) Whereas, in order to guarantee compliance with this Regulation, it is important that Member States impose sanctions for infringements in a manner which is both sufficient and appropriate to the nature and gravity of the infringement;
- (18) Whereas it is essential to lay down a Community procedure enabling the implementing provisions and amendments to the Annexes of this Regulation to be adopted within a suitable period; whereas a Committee must be set up to permit close and effective cooperation between the Member States and the Commission in this field;

<sup>(1)</sup> OJ No L 302, 19. 10. 1992, p. 1. Regulation as last amended by the 1994 Act of Accession.

**▼B**

- (19) Whereas the multitude of biological and ecological aspects to be considered in the implementation of this Regulation requires the setting up of a Scientific Review Group, whose opinions will be forwarded by the Commission to the Committee and the management bodies of the Member States, to assist them in making their decisions,

HAS ADOPTED THIS REGULATION:

*Article 1*

**Object**

The object of this Regulation is to protect species of wild fauna and flora and to guarantee their conservation by regulating trade therein in accordance with the following Articles.

This Regulation shall apply in compliance with the objectives, principles and provisions of the Convention defined in Article 2.

*Article 2*

**Definitions**

For the purposes of this Regulation:

- (a) ‘Committee’ shall mean the Committee on Trade in Wild Fauna and Flora, established under Article 18;
- (b) ‘Convention’ shall mean the Convention on International Trade in Endangered Species of Wild Fauna and Flora (Cites);
- (c) ‘country of origin’ shall mean the country in which a specimen was taken from the wild, captive-bred or artificially propagated;
- (d) ‘import notification’ shall mean the notification given by the importer or his agent or representative, at the time of the introduction into the Community of a specimen of a species included in Annexes C or D, on a form prescribed by the Commission in accordance with the procedure laid down in Article 18;
- (e) ‘introduction from the sea’ shall mean the introduction into the Community of any specimen which was taken in, and is being introduced directly from, the marine environment not under the jurisdiction of any State, including the air-space above the sea and the sea-bed and subsoil beneath the sea;
- (f) ‘issuance’ shall mean the completion of all procedures involved in preparing and validating a permit or certificate and its delivery to the applicant;
- (g) ‘management authority’ shall mean a national administrative authority designated, in the case of a Member State, in accordance with Article 13(1)(a) or, in the case of a third country party to the Convention, in accordance with Article IX of the Convention;
- (h) ‘Member State of destination’ shall mean the Member State of destination mentioned in the document used to export or re-export a specimen; in the event of introduction from the sea, it shall mean the Member State within whose jurisdiction the place of destination of a specimen lies;
- (i) ‘offering for sale’ shall mean offering for sale and any action that may reasonably be construed as such, including advertising or causing to be advertised for sale and invitation to treat;
- (j) ‘personal or household effects’ shall mean dead specimens, parts and derivatives thereof, that are the belongings of a private individual and that form, or are intended to form, part of his normal goods and chattels;
- (k) ‘place of destination’ shall mean the place at which at the time of introduction into the Community, it is intended that specimens will normally be kept; in the case of live specimens, this shall be the first place where specimens are intended to be kept following any

**▼B**

period of quarantine or other confinement for the purposes of sanitary checks and controls;

- (l) ‘population’ shall mean a biologically or geographically distinct total number of individuals;
- (m) ‘primarily commercial purposes’ shall mean all purposes the non-commercial aspects of which do not clearly predominate;
- (n) ‘re-export from the Community’ shall mean export from the Community of any specimen that has previously been introduced;
- (o) ‘reintroduction into the Community’ shall mean introduction into the Community of any specimen that has previously been exported or re-exported;
- (p) ‘sale’ shall mean any form of sale. For the purposes of this Regulation, hire, barter or exchange shall be regarded as sale; cognate expressions shall be similarly construed;
- (q) ‘scientific authority’ shall mean a scientific authority designated, in the case of a Member State, in accordance with Article 13(1)(b) or, in the case of a third country party to the Convention, in accordance with Article IX of the Convention;
- (r) ‘Scientific Review Group’ shall mean the consultative body established under Article 17;
- (s) ‘species’ shall mean a species, subspecies or population thereof;
- (t) ‘specimen’ shall mean any animal or plant, whether alive or dead, of the species listed in Annexes A to D, any part or derivative thereof, whether or not contained in other goods, as well as any other goods which appear from an accompanying document, the packaging or a mark or label, or from any other circumstances, to be or to contain parts or derivatives of animals or plants of those species, unless such parts or derivatives are specifically exempted from the provisions of this Regulation or from the provisions relating to the Annex in which the species concerned is listed by means of an indication to that effect in the Annexes concerned.

A specimen will be considered to be a specimen of a species listed in Annexes A to D if it is, or is part of or derived from, an animal or plant at least one of whose ‘parents’ is of a species so listed. In cases where the ‘parents’ of such an animal or plant are of species listed in different Annexes, or of species only one of which is listed, the provisions of the more restrictive Annex shall apply. However, in the case of specimens of hybrid plants, if one of the ‘parents’ is of a species listed in Annex A, the provisions of the more restrictive Annex shall apply only if that species is annotated to that effect in the Annex;

- (u) ‘trade’ shall mean the introduction into the Community, including introduction from the sea, and the export and re-export therefrom, as well as the use, movement and transfer of possession within the Community, including within a Member State, of specimens subject to the provisions of this Regulation;
- (v) ‘transit’ shall mean the transport of specimens between two points outside the Community through the territory of the Community which are shipped to a named consignee and during which any interruption in the movement arises only from the arrangements necessitated by this form of traffic;
- (w) ‘worked specimens that were acquired more than 50 years previously’ shall mean specimens that were significantly altered from their natural raw state for jewellery, adornment, art, utility, or musical instruments, more than 50 years before the entry into force of this Regulation and that have been, to the satisfaction of the management authority of the Member State concerned, acquired in such conditions. Such specimens shall be considered as worked only if they are clearly in one of the aforementioned categories and require no further carving, crafting or manufacture to effect their purpose;
- (x) ‘checks at the time of introduction, export, re-export and transit’ shall mean documentary checks on the certificates, permits and

**▼B**

notifications provided for in this Regulation and — in cases where Community provisions so provide or in other cases by representative sampling of the consignments — examination of the specimens, where appropriate accompanied by the taking of samples with a view to analysis or more detailed checks.

*Article 3***Scope**

1. Annex A shall contain:
  - (a) the species listed in Appendix I to the Convention for which the Member States have not entered a reservation;
  - (b) any species:
    - (i) which is, or may be, in demand for utilization in the Community or for international trade and which is either threatened with extinction or so rare that any level of trade would imperil the survival of the species;  
or
    - (ii) which is in a genus of which most of the species or which is a species of which most of the subspecies are listed in Annex A in accordance with the criteria in subparagraphs (a) or (b)(i) and whose listing in the Annex is essential for the effective protection of those taxa.
2. Annex B shall contain:
  - (a) the species listed in Appendix II to the Convention, other than those listed in Annex A, for which the Member States have not entered a reservation;
  - (b) the species listed in Appendix I to the Convention for which a reservation has been entered;
  - (c) any other species not listed in Appendices I or II to the Convention:
    - (i) which is subject to levels of international trade that might not be compatible:
      - with its survival or with the survival of populations in certain countries, or
      - with the maintenance of the total population at a level consistent with the role of the species in the ecosystems in which it occurs;  
or
    - (ii) whose listing in the Annex for reasons of similarity in appearance to other species listed in Annex A or Annex B, is essential in order to ensure the effectiveness of controls on trade in specimens of such species;
  - (d) species in relation to which it has been established that the introduction of live specimens into the natural habitat of the Community would constitute an ecological threat to wild species of fauna and flora indigenous to the Community.
3. Annex C shall contain:
  - (a) the species listed in Appendix III to the Convention, other than those listed in Annexes A or B, for which the Member States have not entered a reservation;
  - (b) the species listed in Appendix II to the Convention for which a reservation has been entered.
4. Annex D shall contain:
  - (a) species not listed in Annexes A to C which are imported into the Community in such numbers as to warrant monitoring;
  - (b) the species listed in Appendix III to the Convention for which a reservation has been entered.
5. Where the conservation status of species covered by this Regulation warrants their inclusion in one of the Appendices to the

**▼B**

Convention, the Member States shall contribute to the necessary amendments.

*Article 4***Introduction into the Community**

1. The introduction into the Community of specimens of the species listed in Annex A shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import permit issued by a management authority of the Member State of destination.

The import permit may be issued only in accordance with the restrictions established pursuant to paragraph 6 and when the following conditions have been met:

- (a) the competent scientific authority, after considering any opinion by the Scientific Review Group, has advised that the introduction into the Community:
  - (i) would not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species;
  - (ii) is taking place:
    - for one of the purposes referred to in Article 8(3)(e), (f) and (g), or
    - for other purposes which are not detrimental to the survival of the species concerned;
- (b) (i) the applicant provides documentary evidence that the specimens have been obtained in accordance with the legislation on the protection of the species concerned which, in the case of import from a third country of specimens of a species listed in the Appendices to the Convention, shall be an export permit or re-export certificate, or copy thereof, issued in accordance with the Convention by a competent authority of the country of export or re-export;
  - (ii) however, the issuance of import permits for species listed in Annex A in accordance with Article 3(1)(a) shall not require such documentary evidence, but the original of any such import permit shall be withheld from the applicant pending presentation of the export permit or re-export certificate;
- (c) the competent scientific authority is satisfied that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
- (d) the management authority is satisfied that the specimen is not to be used for primarily commercial purposes;
- (e) the management authority is satisfied, following consultation with the competent scientific authority, that there are no other factors relating to the conservation of the species which militate against issuance of the import permit; and
- (f) in the case of introduction from the sea, the management authority is satisfied that any live specimen will be so prepared and shipped as to minimize the risk of injury, damage to health or cruel treatment.

2. The introduction into the Community of specimens of the species listed in Annex B shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import permit issued by a management authority of the Member State of destination.

The import permit may be issued only in accordance with the restrictions established pursuant to paragraph 6 and when:

- (a) the competent scientific authority, after examining available data and considering any opinion from the Scientific Review Group, is of the opinion that the introduction into the Community would not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the

**▼B**

species, taking account of the current or anticipated level of trade. This opinion shall be valid for subsequent imports as long as the abovementioned aspects have not changed significantly;

- (b) the applicant provides documentary evidence that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
- (c) the conditions referred to in paragraph 1(b)(i), (e) and (f) have been met.

3. The introduction into the Community of specimens of the species listed in Annex C shall be subject to completion of the necessary checks and the prior presentation, at the border customs office at the point of introduction, of an import notification and:

- (a) in the case of export from a country mentioned in relation to the species concerned in Annex C, the applicant shall provide documentary evidence, by means of an export permit issued in accordance with the Convention by an authority of that country competent for the purpose, that the specimens have been obtained in accordance with the national legislation on the conservation of the species concerned; or
- (b) in the case of export from a country not mentioned in relation to the species concerned in Annex C or re-export from any country, the applicant shall present an export permit, a re-export certificate or a certificate of origin issued in accordance with the Convention by an authority of the exporting or re-exporting country competent for the purpose.

4. The introduction into the Community of specimens of the species listed in Annex D shall be subject to completion of the necessary checks and the prior presentation of an import notification at the border customs office at the point of introduction.

5. The conditions for the issuance of an import permit as referred to in paragraph 1(a) and (d) and in paragraph 2(a), (b) and (c) shall not apply to specimens for which the applicant provides documentary evidence:

- (a) that they had previously been legally introduced into or acquired in the Community and that they are, modified or not, being reintroduced into the Community; or
- (b) that they are worked specimens that were acquired more than 50 years previously.

6. In consultation with the countries of origin concerned, in accordance with the procedure laid down in Article 18 and taking account of any opinion from the Scientific Review Group, the Commission may establish general restrictions, or restrictions relating to certain countries of origin, on the introduction into the Community:

- (a) on the basis of the conditions referred to in paragraph 1(a)(i) or (e), of specimens of species listed in Annex A;
- (b) on the basis of the conditions referred to in paragraph 1(e) or paragraph 2(a), of specimens of species listed in Annex B; and
- (c) of live specimens of species listed in Annex B which have a high mortality rate during shipment or for which it has been established that they are unlikely to survive in captivity for a considerable proportion of their potential life span; or
- (d) of live specimens of species for which it has been established that their introduction into the natural environment of the Community presents an ecological threat to wild species of fauna and flora indigenous to the Community.

The Commission shall on a quarterly basis publish a list of such restrictions, if any, in the *Official Journal of the European Communities*.

7. Where special cases of transhipment, air transfer or rail transport occur following introduction into the Community, derogations from completion of the checks and presentations of import documents at the border customs office at the point of introduction which are referred to

**▼B**

in paragraphs 1 to 4 shall be granted in accordance with the procedure laid down in Article 18, in order to permit such checks and presentations to be made at another customs office designated in accordance with Article 12 (1).

*Article 5***Export or re-export from the Community**

1. The export or re-export from the Community of specimens of the species listed in Annex A shall be subject to completion of the necessary checks and the prior presentation, at the customs office at which the export formalities are completed, of an export permit or re-export certificate issued by a management authority of the Member State in which the specimens are located.
2. An export permit for specimens of the species listed in Annex A may be issued only when the following conditions have been met:
  - (a) the competent scientific authority has advised in writing that the capture or collection of the specimens in the wild or their export will not have a harmful effect on the conservation status of the species or on the extent of the territory occupied by the relevant population of the species;
  - (b) the applicant provides documentary evidence that the specimens have been obtained in accordance with the legislation in force on the protection of the species in question; where the application is made to a Member State other than the Member State of origin, such documentary evidence shall be furnished by means of a certificate stating that the specimen was taken from the wild in accordance with the legislation in force on its territory;
  - (c) the management authority is satisfied that:
    - (i) any live specimen will be so prepared and shipped as to minimize the risk of injury, damage to health or cruel treatment; and
    - (ii) — the specimens of species not listed in Annex I to the Convention will not be used for primarily commercial purposes, or
      - in the case of export to a State party to the Convention of specimens of the species referred to in Article 3(1)(a) of this Regulation, an import permit has been issued;
 and
  - (d) the management authority of the Member State is satisfied, following consultation with the competent scientific authority, that there are no other factors relating to the conservation of the species which militate against issuance of the export permit.
3. A re-export certificate may be issued only when the conditions referred to in paragraph 2 (c) and (d) have been met and when the applicant provides documentary evidence that the specimens:
  - (a) were introduced into the Community in accordance with the provisions of this Regulation;
  - (b) if introduced into the Community before the entry into force of this Regulation, were introduced in accordance with the provisions of Regulation (EEC) No 3626/82; or
  - (c) if introduced into the Community before 1984, entered international trade in accordance with the provisions of the Convention; or
  - (d) were legally introduced into the territory of a Member State before the provisions of the Regulations referred to in (a) and (b) or of the Convention became applicable to them, or became applicable in that Member State.
4. The export or re-export from the Community of specimens of the species listed in Annexes B and C shall be subject to completion of the necessary checks and the prior presentation, at the customs office at which the export formalities are completed, of an export permit or re-

**▼B**

export certificate issued by a management authority of the Member State in whose territory the specimens are located.

An export permit may be issued only when the conditions referred to in paragraph 2 (a), (b), (c) (i) and (d) have been met.

A re-export certificate may be issued only when the conditions referred to in paragraph 2 (c) (i) and (d) and in paragraph 3 (a) to (d) have been met.

5. Where an application for a re-export certificate concerns specimens introduced into the Community under an import permit issued by another Member State, the management authority must first consult the management authority which issued the permit. The consultation procedures and the cases in which consultation is necessary shall be established in accordance with the procedure laid down in Article 18.

6. The conditions for the issuance of an export permit or re-export certificate as referred to in paragraph 2 (a) and (c) (ii) shall not apply to:

- (i) worked specimens that were acquired more than 50 years previously; or
- (ii) dead specimens and parts and derivatives thereof for which the applicant provides documentary evidence that they were legally acquired before the provisions of this Regulation, or of Regulation (EEC) No 3626/82 or of the Convention became applicable to them.

- 7. (a) The competent scientific authority in each Member State shall monitor the issuance of export permits by that Member State for specimens of species listed in Annex B and actual exports of such specimens. Whenever such scientific authority determines that the export of specimens of any such species should be limited in order to maintain that species throughout its range at a level consistent with its role in the ecosystem in which it occurs, and well above the level at which that species might become eligible for inclusion in Annex A in accordance with Article 3 (1) (a) or (b) (i), the scientific authority shall advise the competent management authority, in writing, of suitable measures to be taken to limit the issuance of export permits for specimens of that species
- (b) Whenever a management authority is advised of the measures referred to in (a), it shall inform and send comments to the Commission which shall, if appropriate, recommend restrictions on exports of the species concerned in accordance with the procedure laid down in Article 18.

*Article 6*

**Rejection of applications for permits and certificates referred to in Articles 4, 5 and 10**

1. When a Member State rejects an application for a permit or certificate in a case of significance in respect of the objectives of this Regulation, it shall immediately inform the Commission of the rejection and of the reasons for rejection.

2. The Commission shall communicate information received in accordance with paragraph 1 to the other Member States in order to ensure uniform application of this Regulation.

3. When an application is made for a permit or certificate relating to specimens for which such an application has previously been rejected, the applicant must inform the competent authority to which the application is submitted of the previous rejection.

4. (a) Member States shall recognize the rejection of applications by the competent authorities of the other Member States, where such rejection is based on the provisions of this Regulation

(b) However, this need not apply where the circumstances have significantly changed or where new evidence to support an application has become available. In such cases, if a management

**▼B**

authority issues a permit or certificate, it shall inform the Commission thereof, stating the reasons for issuance.

*Article 7***Derogations**

1. *Specimens born and bred in captivity or artificially propagated*
  - (a) Save where Article 8 applies, specimens of species listed in Annex A that have been born and bred in captivity or artificially propagated shall be treated in accordance with the provisions applicable to specimens of species listed in Annex B.
  - (b) In the case of artificially propagated plants, the provisions of Articles 4 and 5 may be waived under special conditions laid down by the Commission, relating to:
    - (i) the use of phytosanitary certificates;
    - (ii) trade by registered commercial traders and by the scientific institutions referred to in paragraph 4 of this Article; and
    - (iii) trade in hybrids.
  - (c) The criteria for determining whether a specimen has been born and bred in captivity or artificially propagated and whether for commercial purposes, as well as the special conditions referred to in (b), shall be specified by the Commission in accordance with the procedure laid down in Article 18.
2. *Transit*
  - (a) By way of derogation from Article 4, where a specimen is in transit through the Community, checks and presentation at the border customs office at the point of introduction of the prescribed permits, certificates and notifications shall not be required.
  - (b) In the case of species listed in the Annexes in accordance with Article 3 (1) and Article 3 (2) (a) and (b), the derogation referred to in (a) shall apply only where a valid export or re-export document provided for by the Convention, relating to the specimens that it accompanies and specifying the destination of the specimens, has been issued by the competent authorities of the exporting or re-exporting third country.
  - (c) If the document referred to in (b) has not been issued before export or re-export, the specimen must be seized and may, where applicable, be confiscated unless the document is submitted retrospectively in compliance with the conditions specified by the Commission in accordance with the procedure laid down in Article 18.
3. *Personal and household effects*

By way of derogation from Articles 4 and 5, the provisions therein shall not apply to dead specimens, parts and derivatives of species listed in Annexes A to D which are personal or household effects being introduced into the Community, or exported or re-exported therefrom, in compliance with provisions that shall be specified by the Commission in accordance with the procedure laid down in Article 18.
4. *Scientific institutions*

The documents referred to in Articles 4, 5, 8 and 9 shall not be required in the case of non-commercial loans, donations and exchanges between scientists and scientific institutions, registered by the management authorities of the States in which they are located, of herbarium specimens and other preserved, dried or embedded museum specimens, and of live plant material, bearing a label, the model for which has been determined in accordance with the procedure laid down in Article 18 or a similar label issued or approved by a management authority of a third country.

**▼B***Article 8***Provisions relating to the control of commercial activities**

1. The purchase, offer to purchase, acquisition for commercial purposes, display to the public for commercial purposes, use for commercial gain and sale, keeping for sale, offering for sale or transporting for sale of specimens of the species listed in Annex A shall be prohibited.
2. Member States may prohibit the holding of specimens, in particular live animals of the species listed in Annex A.
3. In accordance with the requirements of other Community legislation on the conservation of wild fauna and flora, exemption from the prohibitions referred to in paragraph 1 may be granted by issuance of a certificate to that effect by a management authority of the Member State in which the specimens are located, on a case-by-case basis where the specimens:
  - (a) were acquired in, or were introduced into, the Community before the provisions relating to species listed in Appendix I to the Convention or in Annex C1 to Regulation (EEC) No 3626/82 or in Annex A became applicable to the specimens; or
  - (b) are worked specimens that were acquired more than 50 years previously; or
  - (c) were introduced into the Community in compliance with the provisions of this Regulation and are to be used for purposes which are not detrimental to the survival of the species concerned; or
  - (d) are captive-born and bred specimens of an animal species or artificially propagated specimens of a plant species or are parts or derivatives of such specimens; or
  - (e) are required under exceptional circumstances for the advancement of science or for essential biomedical purposes pursuant to Council Directive 86/609/EEC of 24 November 1986 on the approximation of laws, regulations and administrative provisions of the Member States regarding the protection of animals used for experimental and other scientific purposes<sup>(1)</sup> where the species in question proves to be the only one suitable for those purposes and where there are no specimens of the species which have been born and bred in captivity; or
  - (f) are intended for breeding or propagation purposes from which conservation benefits will accrue to the species concerned; or
  - (g) are intended for research or education aimed at the preservation or conservation of the species; or
  - (h) originate in a Member State and were taken from the wild in accordance with the legislation in force in that Member State.
4. General derogations from the prohibitions referred to in paragraph 1 based on the conditions referred to in paragraph 3, as well as general derogations with regard to species listed in Annex A in accordance with Article 3 (1) (b) (ii) may be defined by the Commission in accordance with the procedure laid down in Article 18. Any such derogations must be in accordance with the requirements of other Community legislation on the conservation of wild fauna and flora.
5. The prohibitions referred to in paragraph 1 shall also apply to specimens of the species listed in Annex B except where it can be proved to the satisfaction of the competent authority of the Member State concerned that such specimens were acquired and, if they originated outside the Community, were introduced into it, in accordance with the legislation in force for the conservation of wild fauna and flora.
6. The competent authorities of the Member States shall have discretion to sell any specimen of the species listed in Annexes B to D

<sup>(1)</sup> OJ No L 358, 18. 12. 1986, p. 1.

**▼B**

they have confiscated under this Regulation, provided that it is not thus returned directly to the person or entity from whom it was confiscated or who was party to the offence. Such specimens may then be treated for all purposes as if they had been legally acquired.

*Article 9***Movement of live specimens**

1. Any movement within the Community of a live specimen of a species listed in Annex A from the location indicated in the import permit or in any certificate issued in compliance with this Regulation shall require prior authorization from a management authority of the Member State in which the specimen is located. In other cases of movement, the person responsible for moving the specimen must be able, where applicable, to provide proof of the legal origin of the specimen.
2. Such authorization shall:
  - (a) be granted only when the competent scientific authority of such Member State or, where the movement is to another Member State, the competent scientific authority of the latter, is satisfied that the intended accommodation for a live specimen at the place of destination is adequately equipped to conserve and care for it properly;
  - (b) be confirmed by issuance of a certificate; and
  - (c) where applicable, be immediately communicated to a management authority of the Member State in which the specimen is to be located.
3. However, no such authorization shall be required if a live animal must be moved for the purpose of urgent veterinary treatment and is returned directly to its authorized location.
4. Where a live specimen of a species listed in Annex B is moved within the Community, the holder of the specimen may relinquish it only after ensuring that the intended recipient is adequately informed of the accommodation, equipment and practices required to ensure the specimen will be properly cared for.
5. When any live specimens are transported into, from or within the Community or are held during any period of transit or transhipment, they shall be prepared, moved and cared for in a manner such as to minimize the risk of injury, damage to health or cruel treatment and, in the case of animals, in conformity with Community legislation on the protection of animals during transport.
6. Under the procedure laid down in Article 18, the Commission may establish restrictions on the holding or movement of live specimens of species in relation to which restrictions on introduction into the Community have been established in accordance with Article 4 (6).

*Article 10***Certificates to be issued**

On receiving an application, together with all the requisite supporting documents, from the person concerned and provided that all the conditions governing their issuance have been fulfilled, a management authority of a Member State may issue a certificate for the purposes referred to in Article 5 (2) (b), 5 (3) and (4), Article 8 (3) and Article 9 (2) (b).

*Article 11***Validity of and special conditions for permits and certificates**

1. Without prejudice to stricter measures which the Member States may adopt or maintain, permits and certificates issued by the competent authorities of the Member States in accordance with this Regulation shall be valid throughout the Community.

**▼B**

2. (a) However, any such permit or certificate, as well as any permit or certificate issued on the basis of it, shall be deemed void if a competent authority or the Commission, in consultation with the competent authority which issued the permit or certificate, establishes that it was issued on the false premise that the conditions for its issuance were met
  - (b) Specimens situated in the territory of a Member State and covered by such documents shall be seized by the competent authorities of that Member State and may be confiscated.
3. Any permit or certificate issued in accordance with this Regulation may stipulate conditions and requirements imposed by the issuing authority to ensure compliance with the provisions thereof. Where such conditions or requirements need to be incorporated in the design of permits or certificates, Member States shall inform the Commission thereof.
4. Any import permit issued on the basis of a copy of the corresponding export permit or re-export certificate shall be valid for the introduction of specimens into the Community only when accompanied by the original of the valid export permit or re-export certificate.
5. The Commission shall establish time limits for the issuance of permits and certificates in accordance with the procedure laid down in Article 18.

*Article 12***Places of introduction and export**

1. Member States shall designate customs offices for carrying out the checks and formalities for the introduction into and export from the Community, in order to assign to them a customs-approved treatment or use, within the meaning of Regulation (EEC) No 2913/92, of specimens of species covered by this Regulation and shall state which offices are specifically intended to deal with live specimens.
2. All offices designated in accordance with paragraph 1 shall be provided with sufficient and adequately trained staff. Member States shall ensure that accommodation is provided in accordance with relevant Community legislation as regards the transport and accommodation of live animals and that, where necessary, adequate steps are taken for live plants.
3. All offices designated in accordance with paragraph 1 shall be notified to the Commission which shall publish a list of them in the *Official Journal of the European Communities*.
4. In exceptional cases and in accordance with criteria defined under the procedure laid down in Article 18, a management authority may authorize the introduction into the Community or the export or re-export therefrom at a customs office other than one designated in accordance with paragraph 1.
5. Member States shall ensure that at border crossing-points the public are informed of the implementing provisions of this Regulation.

*Article 13***Management and scientific authorities and other competent authorities**

1. (a) Each Member State shall designate a management authority with primary responsibility for implementation of this Regulation and for communication with the Commission
  - (b) Each Member State may also designate additional management authorities and other competent authorities to assist in implementation, in which case the primary management authority shall be responsible for providing the additional authorities with all the information required for correct application of this Regulation.

**▼B**

2. Each Member State shall designate one or more scientific authorities with appropriate qualifications whose duties shall be separate from those of any designated management authority.
3. (a) Not later than three months before the date of application of this Regulation, Member States shall forward the names and addresses of the designated management authorities, other authorities competent to issue permits or certificates and scientific authorities to the Commission, which shall publish this information in the *Official Journal of the European Communities* within a month
- (b) Each management authority referred to in paragraph 1 (a) shall, if so requested by the Commission, communicate to it within two months the names and specimen signatures of people authorized to sign permits or certificates, and impressions of the stamps, seals or other devices used to authenticate permits or certificates.
- (c) Member States shall communicate to the Commission any changes in the information already provided, not later than two months after the implementation of such change.

*Article 14***Monitoring of compliance and investigation of infringements**

1. (a) The competent authorities of the Member States shall monitor compliance with the provisions of this Regulation
- (b) If, at any time, the competent authorities have reason to believe that these provisions are being infringed, they shall take the appropriate steps to ensure compliance or to instigate legal action.
- (c) Member States shall inform the Commission and, in the case of species listed in the Appendices to the Convention, the Convention Secretariat of any steps taken by the competent authorities in relation to significant infringements of this Regulation, including seizures and confiscations.
2. The Commission shall draw the attention of the competent authorities of the Member States to matters whose investigation it considers necessary under this Regulation. Member States shall inform the Commission and, in the case of species listed in the Appendices to the Convention, the Convention Secretariat of the outcome of any subsequent investigation.
3. (a) An enforcement group shall be established consisting of the representatives of each Member State's authorities with responsibility for ensuring the implementation of the provisions of this Regulation. The group shall be chaired by the representative of the Commission
- (b) The enforcement group shall examine any technical question relating to the enforcement of this Regulation raised by the chairman, either on his own initiative or at the request of the members of the group or the committee.
- (c) The Commission shall convey the opinions expressed in the enforcement group to the committee.

*Article 15***Communication of information**

1. The Member States and the Commission shall communicate to one another the information necessary for implementing this Regulation.

The Member States and the Commission shall ensure that the necessary steps are taken to make the public aware and inform it of the provisions regarding implementation of the Convention and of this Regulation and of the latter's implementing measures.

2. The Commission shall communicate with the Convention Secretariat so as to ensure that the Convention is effectively implemented throughout the territory to which this Regulation applies.

**▼B**

3. The Commission shall immediately communicate any advice from the Scientific Review Group to the management authorities of the Member States concerned.
4. (a) The management authorities of the Member States shall communicate to the Commission before 15 June each year all the information relating to the preceding year required for drawing up the reports referred to in Article VIII.7 (a) of the Convention and equivalent information on international trade in all specimens of species listed in Annexes A, B and C and on introduction into the Community of specimens of species listed in Annex D. The information to be communicated and the format for its presentation shall be specified by the Commission in accordance with the procedure laid down in Article 18
  - (b) On the basis of the information referred to in (a), the Commission shall publish before 31 October each year a statistical report on the introduction into, and the export and re-export from, the Community of specimens of the species to which this Regulation applies and shall forward to the Convention Secretariat information on the species to which the Convention applies.
  - (c) Without prejudice to Article 20, the management authorities of the Member States shall, before 15 June of each second year, and for the first time in 1999, communicate to the Commission all the information relating to the preceding two years required for drawing up the reports referred to in Article VIII.7 (b) of the Convention and equivalent information on the provisions of this Regulation that fall outside the scope of the Convention. The information to be communicated and the format for its presentation shall be specified by the Commission in accordance with the procedure laid down in Article 18.
  - (d) On the basis of the information referred to in (c), the Commission shall, before 31 October of each second year, and for the first time in 1999, draw up a report on the implementation and enforcement of this Regulation.
5. With a view to the preparation of amendments to the Annexes, the competent authorities of the Member States shall forward all relevant information to the Commission. The Commission shall specify the information required, in accordance with the procedure laid down in Article 18.

**►C1** 6. Without prejudice to Council Directive 90/313/EEC ~~◀ of 7~~ June 1990 on the freedom of access to information on the environment<sup>(1)</sup>, the Commission shall take appropriate measures to protect the confidentiality of information obtained in implementation of this Regulation.

### *Article 16*

#### **Sanctions**

1. Member States shall take appropriate measures to ensure the imposition of sanctions for at least the following infringements of this Regulation:
  - (a) introduction into, or export or re-export from, the Community of specimens without the appropriate permit or certificate or with a false, falsified or invalid permit or certificate or one altered without authorization by the issuing authority;
  - (b) failure to comply with the stipulations specified on a permit or certificate issued in accordance with this Regulation;
  - (c) making a false declaration or knowingly providing false information in order to obtain a permit or certificate;
  - (d) using a false, falsified or invalid permit or certificate or one altered without authorization as a basis for obtaining a Community permit

<sup>(1)</sup> OJ No L 158, 23. 6. 1990, p. 56.

**▼B**

or certificate or for any other official purpose in connection with this Regulation;

- (e) making no import notification or a false import notification;
- (f) shipment of live specimens not properly prepared so as to minimize the risk of injury, damage to health or cruel treatment;
- (g) use of specimens of species listed in Annex A other than in accordance with the authorization given at the time of issuance of the import permit or subsequently;
- (h) trade in artificially propagated plants contrary to the provisions laid down in accordance with Article 7(1)(b);
- (i) shipment of specimens into or out of or in transit through the territory of the Community without the appropriate permit or certificate issued in accordance with this Regulation and, in the case of export or re-export from a third country party to the Convention, in accordance therewith, or without satisfactory proof of the existence of such permit or certificate;
- (j) purchase, offer to purchase, acquisition for commercial purposes, use for commercial gain, display to the public for commercial purposes, sale, keeping for sale, offering for sale or transporting for sale of specimens in contravention of Article 8;
- (k) use of a permit or certificate for any specimen other than one for which it was issued;
- (l) falsification or alteration of any permit or certificate issued in accordance with this Regulation;
- (m) failure to disclose rejection of an application for a Community import, export or re-export permit or certificate, in accordance with Article 6 (3).

2. The measures referred to in paragraph 1 shall be appropriate to the nature and gravity of the infringement and shall include provisions relating to the seizure and, where appropriate, confiscation of specimens.

3. Where a specimen is confiscated, it shall be entrusted to a competent authority of the Member State of confiscation which:

- (a) following consultation with a scientific authority of that Member State, shall place or otherwise dispose of the specimen under conditions which it deems to be appropriate and consistent with the purposes and provisions of the Convention and this Regulation; and
- (b) in the case of a live specimen which has been introduced into the Community, may, after consultation with the State of export, return the specimen to that State at the expense of the convicted person.

4. Where a live specimen of a species listed in Annex B or C arrives at a point of introduction into the Community without the appropriate valid permit or certificate, the specimen must be seized and may be confiscated or, if the consignee refuses to acknowledge the specimen, the competent authorities of the Member State responsible for the point of introduction may, if appropriate, refuse to accept the shipment and require the carrier to return the specimen to its place of departure.

*Article 17*

**The Scientific Review Group**

1. A Scientific Review Group is hereby established, consisting of the representatives of each Member State's scientific authority or authorities and chaired by the representative of the Commission.

- 2. (a) The Scientific Review Group shall examine any scientific question relating to the application of this Regulation — in particular concerning Article 4 (1) (a), (2) (a) and (6) — raised by the chairman, either on his own initiative or at the request of the members of the Group or the Committee.
- (b) The Commission shall convey the opinions of the Scientific Review Group to the Committee.

**▼B***Article 18***The Committee**

1. The Commission shall be assisted by a Committee composed of the representatives of the Member States and chaired by the representative of the Commission.

The representative of the Commission shall submit to the Committee a draft of the measures to be taken. The Committee shall deliver its opinion on the draft within a time limit which the chairman may lay down according to the urgency of the matter. The opinion shall be delivered by the majority laid down in Article 148 (2) of the Treaty in the case of decisions which the Council is required to adopt on a proposal from the Commission. The votes of the representatives of the Member States within the Committee shall be weighted in the manner set out in that Article. The chairman shall not vote.

The Commission shall adopt the measures envisaged if they are in accordance with the opinion of the Committee.

If the measures envisaged are not in accordance with the opinion of the Committee, or if no opinion is delivered, the Commission shall without delay submit to the Council a proposal relating to the measures to be taken. The Council shall act by a qualified majority.

2. As regards the Committee's tasks referred to in points 1 and 2 of Article 19, if, on the expiry of a period of three months from the date of referral to the Council, the Council has not acted, the proposed measures shall be adopted by the Commission.

3. As regards the Committee's tasks referred to in points 3 and 4 of Article 19, if, on the expiry of a period of three months from the date of referral to the Council, the Council has not acted, the proposed measures shall be adopted by the Commission, save where the Council has decided against the said measures by a simple majority.

*Article 19*

In accordance with the procedure laid down in Article 18, the Commission shall:

1. lay down uniform conditions and criteria for:
  - (i) the issue, validity and use of the documents referred to in Articles 4, 5, 7 (4) and 10; it shall determine the design thereof;
  - (ii) the use of phytosanitary certificates; and
  - (iii) the establishment of procedures, where necessary, for marking specimens in order to facilitate identification and ensure enforcement of the provisions;
2. adopt the measures referred to in Article 4 (6) and (7), Article 5 (5) and (7) (b), Article 7 (1) (c), (2) (c) and (3), Article 8 (4), Article 9 (6), Article 11 (5), Article 15 (4) (a), (c) and (5) and Article 21 (3);
3. amend Annexes A to D except in the case of amendments to Annex A which do not result from decisions of the Conference of the Parties to the Convention;
4. adopt, where necessary, additional measures to implement resolutions of the Conference of the Parties to the Convention, decisions or recommendations of the Standing Committee of the Convention and recommendations of the Convention Secretariat.

*Article 20***Final provisions**

Each Member State shall notify the Commission and the Convention Secretariat of the provisions which it adopts specifically for the implementation of this Regulation and of all legal instruments used and measures taken for its implementation and enforcement.

The Commission shall communicate this information to the other Member States.

**▼B**

*Article 21*

1. Regulation (EEC) No 3626/82 is hereby repealed.
2. Until the measures provided for in points 1 and 2 of Article 19 have been adopted, Member States may maintain or continue to apply the measures adopted in accordance with Regulation (EEC) No 3626/82 and Commission Regulation (EEC) No 3418/83 of 28 November 1983 laying down provisions for the uniform issue and use of the documents required for the implementation in the Community of the Convention on International Trade in Endangered Species of Wild Fauna and Flora<sup>(1)</sup>.
3. Two months before this Regulation is implemented the Commission, in accordance with the procedure laid down in Article 18 and in consultation with the Scientific Review Group:
  - (a) must check that there is no justification for restrictions on the introduction into the Community of the species listed in Annex C1 to Regulation (EEC) No 3626/82 which are not included in Annex A to this Regulation;
  - (b) shall adopt a Regulation amending Annex D into a representative list of species meeting the criteria laid down in Article 3 (4) (a).

*Article 22*

This Regulation shall enter into force on the date of its publication in the *Official Journal of the European Communities*.

It shall apply from 1 June 1997.

Articles 12, 13, 14 (3), 16, 17, 18, 19 and 21(3) shall apply from the date of entry into force of this Regulation.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

---

<sup>(1)</sup> OJ No L 344, 7. 12. 1983, p. 1.

**▼M5*****ANNEX*****Notes on interpretation of Annexes A, B, C and D**

1. Species included in these Annexes A, B, C and D are referred to:
  - (a) by the name of the species; or
  - (b) as being all of the species included in a higher taxon or designated part thereof.
2. The abbreviation ‘spp.’ is used to denote all species of a higher taxon.
3. Other references to taxa higher than species are for the purposes of information or classification only.
4. Species printed in bold in Annex A are listed there in consistency with their protection as provided for by Council Directive 79/409/EEC<sup>(1)</sup> (‘Birds Directive’) or Council Directive 92/43/EEC<sup>(2)</sup> (‘Habitats Directive’).
5. The following abbreviations are used for plant taxa below the level of species:
  - (a) ‘ssp’ is used to denote subspecies;
  - (b) ‘var(s)’ is used to denote variety (varieties); and
  - (c) ‘fa’ is used to denote *forma*.
6. The abbreviation ‘p.e.’ is used to denote species that are possibly extinct.
7. An asterisk ‘\*’ placed against the name of a species or higher taxon indicated that one or more geographically separate populations, subspecies or species of that species or taxon are included in Annex A and are excluded from Annex B.
8. Two asterisks ‘\*\*’ placed against the name of a species or higher taxon indicate that one or more geographically separate populations, subspecies or species of that species or taxon are included in Annex B and are excluded from Annex A.
9. The symbols ‘(I)’, ‘(II)’ and ‘(III)’ and the symbol ‘x’ followed by a number placed against the name of a species or higher taxon refer to the Appendices of the Convention in which the species concerned are listed, as indicated in notes 10 to 13. Where none of these annotations appears, the species concerned are not listed in the Appendices to the Convention.
10. (I) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix I to the Convention.
11. (II) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix II to the Convention.
12. (III) against the name of a species or higher taxon indicates that it is included in Appendix III to the Convention. In this case the country with respect to which the species or higher taxon is included in Appendix III is also indicated by a two-letter code as follows: BO (Bolivia), BR (Brazil), BW (Botswana), CA (Canada), CO (Colombia), CR (Costa Rica), GB (United Kingdom of Great Britain and Northern Ireland), GH (Ghana), GT (Guatemala), HN (Honduras), IN (India), MY (Malaysia), MU (Mauritius), NP (Nepal), TN (Tunisia) UY (Uruguay) and ZA (South Africa).
13. The symbol ‘×’ followed by a number placed against the name of a species or higher taxon in Annex A or B denotes that certain geographically separate populations, species, groups of species or families of that species or taxon are listed in Appendix I, II or III to the Convention, as follows:
  - ×701 The species is listed in Appendix II but subspecies *Cercocebus galeritus galeritus* is listed in Appendix I.
  - ×702 The species is listed in Appendix II but the subspecies *Procolobus pennantii kirkii* (also referenced as *Colobus bodius kirkii*) is listed in Appendix I

<sup>(1)</sup> OJ L 103, 25.4.1979, p. 1. Directive as last amended by Commission Directive 97/49/EC (OJ L 233, 13.8.1997, p. 9).

<sup>(2)</sup> OJ L 206, 22.7.1992, p. 7. Directive as last amended by Council Directive 97/62/EC (OJ L 305, 8.11.1997, p. 42).

**▼M5**

- ×703 All species are listed in Appendix II except *Lipotes vexillifer*, *Platanista* spp., *Bernardius* spp., *Hyperoodon* spp., *Physeter catodon* (includes synonym *Physeter macrocephalus*), *Sotalia* spp., *Sousa* spp., *Neophocaena phocaenoides*, *Phocoena sinus*, *Eschrichtius robustus* (includes synonym *Eschrichtius glaucus*), *Balaenoptera* spp. (except population of West Greenland of *Balaenoptera acutorostrata*), *Megaptera novaeangliae*, *Eubalaena* spp. (formerly included in genus *Balaena*) and *Caperea marginata* which are listed in Appendix I. Specimens of the species listed in Appendix II to the Convention, including products and derivatives other than meat products for commercial purposes, taken by the people of Greenland under licence granted by the competent authority concerned, shall be treated as belonging to Annex B.
- ×704 Populations of Bhutan, India, Nepal and Pakistan are listed in Appendix I, other populations are listed in Appendix II.
- ×705 Populations of Bhutan, China, Mexico and Mongolia and the subspecies *Ursus arctos isabellinus* are listed in Appendix I, other populations and subspecies listed in Appendix II.
- ×706 *Trichechus inunguis* and *Trichechus manatus* are listed in Appendix I. *Trichechus senegalensis* is listed in Appendix II.
- ×707 The species is listed in Appendix II but subspecies *Equus hemionus hemionus* is listed in Appendix I.
- ×708 *Haliaeetus albicilla* and *Haliaeetus leucocephalus* are listed in Appendix I, the other species are listed in Appendix II.
- ×709 The following species are listed in Appendix III: *Crax alberti*, *Crax daubentoni* and *Crax globulosa* for Colombia and *Crax rubra* for Colombia, Costa Rica, Guatemala and Honduras.
- ×710 *Pauxi pauxi* is listed in Appendix III for Colombia.
- ×711 The species is listed in Appendix II but subspecies *Grus canadensis nesiotis* and *Grus canadensis pulla* are listed in Appendix I.
- ×712 *Vini ultramarina* is listed in Appendix I, the other species are listed in Appendix II.

14. The symbol ‘–’ followed by a number placed against the name of a species or higher taxon denotes that designated geographically separate populations, species, groups of species or families of that species or taxon are excluded from the annex concerned, as follows:

- 101 Populations of Spain north of the Duero, Greek populations north of the 39th parallel.
- 102 Populations of Botswana, Namibia, South Africa and Zimbabwe
- 103 Population of *Pecari tajacu* of Mexico and the United States of America
- 104
  - **Argentina:** the population of the Province of Jujuy and the semi-captive populations of the provinces of Jujuy, Salta, Catamarca, La Rioja and San Juan.
  - **Bolivia:** the populations of the Conservation Units of Mauri-Desaguadero, Ulla Ulla and Lípez-Chichas.
  - **Chile:** part of the population of Parinacota Province, 1a. Region of Tarapacà
  - **Peru:** the whole population
- 105 Populations of Afghanistan, Bhutan, India, Myanmar, Nepal and Pakistan
- 106 Cathartidae
- 107 *Melopsittacus undulatus*, *Nymphicus hollandicus* and *Psittacula krameri*
- 108 Population of *Rhea pennata pennata* of Argentina
- 108a Population of Argentina
- 109 Population of Ecuador, subject to a zero annual export quota until an annual export quota has been approved by the CITES Secretariat and the IUCN/SSC Crocodile Specialist Group

**▼M5**

- 110 Populations of Botswana, Ethiopia, Kenya, Madagascar, Malawi, Mozambique, South Africa, Uganda, the United Republic of Tanzania (subject to an annual export quota of no more than 1600 wild specimens including hunting trophies, in addition to ranned specimens), Zambia and Zimbabwe.
- 111 Populations of Australia, Indonesia and Papua New Guinea
- 112 Populations of Argentina and Chile.
- 113 All species that are not succulent
- 114 *Aloe vera*; also referenced as *Aloe barbadensis*.
15. The symbol '+' followed by a number placed against the name of a species or higher taxon denotes that only designated geographically separate populations, subspecies or species of that species or taxon are included in the annex concerned, as follows:
- +201 Populations of Spain north of the Duero, Greek populations north of the 39th parallel.
- +202 Populations of Cameroon and Nigeria
- +203 Population of Asia
- +204 Population of Central and North America
- +205 Populations of Bangladesh, India and Thailand
- +206 Population of India
- +207 Populations of Botswana, Namibia, South Africa and Zimbabwe
- +208 Population of South Africa
- +209 — **Argentina**: the population of the Province of Jujuy and the semi-captive populations of the Provinces of Jujuy, Salta, Catamarca, La Rioja and San Juan  
 — **Bolivia**: the populations of the Conservation Units of Mauri-Desaguadero, Ulla Ulla and Lípez-Chichas.  
 — **Chile**: part of the population of Parinacota Province, 1a. Region of Tarapacá  
 — **Peru**: the whole population
- +210 Populations of Afghanistan, Bhutan, India, Myanmar, Nepal and Pakistan
- +211 Population of Mexico
- +212 Populations of Algeria, Burkina Faso, Cameroon, Central African Republic, Chad, Mali, Mauritania, Morocco, Niger, Nigeria, Senegal and Sudan
- +213 Population of Argentina
- +214 Population of the Seychelles
- +215 Population of Europe, except the area which formerly constituted the USSR
- +216 Population of the Russian Federation
- +217 Populations of Argentina and Chile.
- +218 Populations of the Americas.
16. The symbol '=' followed by a number placed against the name of a species or higher taxon denotes that the name of that species or taxon shall be interpreted as follows:
- =301 Also referenced as *Phalanger maculatus*
- =302 Also referenced as *Vampyrops lineatus*
- =303 Includes family Tupaiidae
- =304 Formerly included in family Lemuridae
- =305 Formerly included as subspecies of *Callithrix jacchus*
- =306 Includes generic synonym *Leontideus*
- =307 Formerly included in species *Saguinus oedipus*

**▼M5**

- =308 Formerly included as *Alouatta palliata*
- =309 Formerly included as *Alouatta palliata (villosa)*
- =310 Includes synonym *Cercopithecus roloway*
- =311 Formerly included in genus *Papio*
- =312 Includes generic synonym *Simias*
- =313 Includes synonym *Colobus badius rufomitratus*
- =314 Includes generic synonym *Rhinopithecus*
- =315 Also referenced as *Presbytis entellus*
- =316 Also referenced as *Presbytis geei* and *Semnopithecus geei*
- =317 Also referenced as *Presbytis pileata* and *Semnopithecus pileatus*
- =318 Formerly included as *Tamandua tetradactyla* (in part)
- =319 Includes synonyms *Bradypus boliviensis* and *Bradypus griseus*
- =320 Includes synonym *Cabassous gymnurus*
- =321 Includes synonym *Priodontes giganteus*
- =322 Includes generic synonym *Coendou*
- =323 Includes generic synonym *Cuniculus*
- =324 Formerly included in genus *Dusicyon*
- =325 Includes synonym *Dusicyon fulvipes*
- =326 Includes generic synonym *Fennecus*
- =327 Also referenced as *Selenarctos thibetanus*
- =328 Formerly included as *Nasua nasua*
- =329 Also referenced as *Aonyx microdon* or *Paraonyx microdon*
- =330 Includes synonym *Galictis allamandi*
- =331 Formerly included in genus *Lutra*
- =332 Formerly included in genus *Lutra*; includes synonyms *Lutra annectens*, *Lutra enudris*, *Lutra incarum* and *Lutra platensis*
- =333 Formerly included in *Martes flavigula*
- =334 Includes generic synonym *Viverra*
- =335 Includes synonym *Eupleres major*
- =336 Formerly included as *Viverra megaspila*
- =337 Formerly included as *Herpestes fuscus*
- =338 Formerly included as *Herpestes auropunctatus*
- =339 Also referenced as *Felis caracal* and *Lynx caracal*
- =340 Formerly included in genus *Felis*
- =341 Also referenced as *Felis pardina* or *Felis lynx pardina*
- =342 Formerly included in genus *Panthera*
- =343 Also referenced as *Equus asinus*
- =344 Formerly included in species *Equus hemionus*
- =345 Also referenced as *Equus caballus przewalskii*
- =346 Also referenced as *Choeropsis liberiensis*
- =347 Also referenced as *Cervus porcinus calamianensis*
- =348 Also referenced as *Cervus porcinus kuhlii*
- =349 Also referenced as *Cervus porcinus annamiticus*
- =350 Also referenced as *Cervus dama mesopotamicus*
- =351 Excludes the domesticated form of *Bos gaurus* referenced as *Bos frontalis*

**▼M5**

- =352 Excludes the domesticated form of *Bos mutus* referenced as *Bos grunniens*
- =353 Includes generic synonym *Novibos*
- =354 Excludes the domesticated form of *Bubalus arnee* referenced as *Bubalus bubalis*
- =355 Includes generic synonym *Anoa*
- =356 Also referenced as *Damaliscus dorcas dorcas*
- =357 Formerly included in species *Naemorhedus goral*
- =358 Also referenced as *Capricornis sumatraensis*
- =359 Includes synonym *Oryx tao*
- =360 Includes synonym *Ovis aries ophion*
- =361 Formerly included as *Ovis vignei*
- =362 Also referenced as *Rupicapra rupicapra ornata*
- =363 Also referenced as *Boocercus eurycerus*; includes generic synonym *Taurotragus*
- =364 Also referenced as *Pterocnemia pennata*
- =365 Also referenced as *Sula abbotti*
- =366 Also referenced as *Ardeola ibis*
- =367 Also referenced as *Egretta alba* and *Ardea alba*
- =368 Also referenced as *Ciconia ciconia boyciana*
- =369 Also referenced as *Hagedashia hagedash*
- =370 Also referenced as *Lampribis rara*
- =371 Includes *Phoenicopterus roseus*
- =372 Includes synonyms *Anas chlorotis* and *Anas nesiotis*
- =373 Also referenced as *Spatula clypeata*
- =374 Also referenced as *Anas platyrhynchos laysanensis*
- =375 Probably a hybrid between *Anas platyrhynchos* and *Anas superciliosa*
- =376 Also referenced as *Nyroca nyroca*
- =377 Includes synonym *Dendrocygna fulva*
- =378 Also referenced as *Cairina hartlaubii*
- =379 Also referenced as *Aquila heliaca adalberti*
- =380 Also referenced as *Chondrohierax wilsonii*
- =381 Also referenced as *Falco peregrinus babylonicus* and *Falco peregrinus pelegrinoides*
- =382 Also referenced as *Crax mitu mitu*
- =383 Also referenced as genus *Crax*

- =539 Includes *Hippocampus suezensis*
- =540 Includes *Hippocampus dahli* and *Hippocampus lenis*.
- =541 Includes *Hippocampus atrichus*, *Hippocampus guttulatus*, *Hippocampus jubatus*, *Hippocampus longirostris*, *Hippocampus microcoronatus*, *Hippocampus microstethophanus*, *Hippocampus multiannularis*, *Hippocampus rosaceus* and *Hippocampus trichus*.
- =542 Includes *Hippocampus obtusus* and *Hippocampus poeyi*.
- =543 Includes *Hippocampus chinensis*, *Hippocampus kampylotracelos*, *Hippocampus manadensis*, *Hippocampus mannulus* and *Hippocampus sexmaculatus*.
- =544 Includes *Hippocampus novaehollandiae*
- =545 Includes *Hippocampus regulus* and *Hippocampus rosamondae*

17. The symbol “◦” followed by a number placed against the name of a species or higher taxon shall be interpreted as follows:

- 601 A zero annual export quota has been established. All specimens shall be deemed to be specimens of species included in Annex A and the provisions of this Regulation shall be applied to them accordingly.
- 602 A zero annual export quota has been established for *Manis crassicaudata*, *Manis pentadactyla* and *Manis javanica* for specimens removed from the wild and traded for primarily commercial purposes.
- 603 Specimens of the domesticated form are not subject to the provisions of the Regulation.
- 604 Annual export quotas for live specimens and hunting trophies are granted as follows:  
 Botswana: 5  
 Namibia: 150  
 Zimbabwe: 50  
 The trade in such specimens is subject to the provisions of Article 4.1 of the Regulation.
- 605 *Populations of Botswana, Namibia and Zimbabwe.*  
 For the exclusive purpose of allowing: 1) export of hunting trophies for non-commercial purposes; 2) export of live animals to appropriate and acceptable destinations (Namibia: for non-commercial purposes only); 3) export of hides (Zimbabwe only); 4) export of leather goods and ivory carvings for non-commercial purposes (Zimbabwe only). All other specimens shall be deemed to be specimens of species included in Annex A and the provisions of this Regulation shall be applied to them accordingly. To ensure that where a) destinations for live animals are to be ‘appropriate and acceptable’ and/or b) the purpose of the import is to be ‘non-commercial’, export permits and re-export certificates may be issued only after the issuing Management Authority has received, from the Management Authority of the State of import, a certification to the effect that: in case a), in analogy to Article 4(I)(c) of the Regulation, the holding facility has been reviewed by the competent Scientific Authority, and the proposed recipient has been found to be suitably equipped to house and care for the animals; and/or

**▼M5**

in case b), in analogy to Article 4(I)(d), the Management Authority is satisfied that the specimens will not be used for primarily commercial purposes; and

*Population of South Africa*

For the exclusive purpose of allowing: 1) trade in hunting trophies for non-commercial purposes; 2) trade in live animals for re-introduction purposes into protected areas formally proclaimed in terms of legislation of the importing country; 3) trade in hides and leather goods. Trade in raw ivory shall be whole tusks of government-owned stock originating from the Kruger National Park, subject to a zero quota. All other specimens shall be deemed to be specimens of species included in Appendix A and the trade in them shall be regulated accordingly.

- °606 For the exclusive purpose of allowing international trade in live animals to appropriate and acceptable destinations and hunting trophies. All other specimens shall be deemed to be specimens of species included in Annex A and the provisions of this Regulation shall be applied to them accordingly.
- °607 For the exclusive purpose of allowing international trade in wool sheared from live vicuñas of the populations included in Annex B (see +209), and the stock extant at the time of the ninth meeting of the Conference of the Parties (November 1994) in Peru of 3 249 kg of wool, and in cloth and items made thereof, including luxury handicrafts and knitted articles. The reverse side of the cloth and the selvages must bear the logotype adopted by the range states of the species, which are signatories to the Convention para la Conservación y Manejo de la Vicuña, the words 'VICUNA — COUNTRY OF ORIGIN', depending on the country of origin. All other specimens shall be deemed to be specimens of species included in Annex A and the provisions of this Regulation shall be applied to them accordingly.
- °608 A zero annual export quota has been established for *Geochelone sulcata* for specimens removed from the wild and traded for primarily commercial purposes.
- °609 Designates, in addition to whole animals, fins and parts of fins only.
- °610 Fossils are not subject to the provisions of the Regulation.
- °611 Artificially propagated specimens of the following hybrids and/or cultivars are not subject to the provisions of the Regulation:
  - Hatiora x graeseri**
  - Schlumbergera x buckleyi**
  - Schlumbergera russelliana x Schlumbergera truncata**
  - Schlumbergera orssichiana x Schlumbergera truncata**
  - Schlumbergera opuntioides x Schlumbergera truncata**
  - Schlumbergera truncata** (cultivars)
  - Gymnocalycium mihanovichii** (cultivars) forms lacking chlorophyll, grafted on the following grafting stocks: *Harrisia 'Jusbertii'*, *Hylocereus trigonus* or *Hylocereus undatus*
  - Opuntia microdasys** (cultivars)
- °612 Artificially propagated specimens of cultivars of *Euphorbia trigona* are not subject to the provisions of the Regulation.
- °613 Seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers are not subject to the provisions of the Regulation.
- °614 Artificially propagated specimens of cultivars of *Cyclamen persicum* are not subject to the provisions of the Regulation. However, the exemption does not apply to such specimens traded as dormant tubers

18. In accordance with Article 2(t) of this Regulation, the symbol '#' followed by a number placed against the name of a species or higher taxon included in Annex B or C designates parts or derivatives which are specified in relation thereto for the purposes of the Regulation as follows:

**▼M5**

- #1 designates all parts and derivatives, except:
  - (a) seeds, spores and pollen (including pollinia);
  - (b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers, and
  - (c) cut flowers of artificially propagated plants;
- #2 designates all parts and derivations, except:
  - (a) seeds and pollen;
  - (b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
  - (c) cut flowers of artificially propagated plants; and
  - (d) chemical derivatives and finished pharmaceutical products;
- #3 designates whole and sliced roots and parts of roots, excluding manufactured parts or derivatives such as powders, pills, extracts, tonics, teas and confectionery;
- #4 designates all parts and derivatives, except:
  - (a) seeds, except those from Mexican cacti originating in Mexico, and pollen;
  - (b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
  - (c) cut flowers of artificially propagated plants;
  - (d) fruits and parts and derivatives thereof of naturalised or artificially propagated plants; and
  - (e) separate stem joints (pads) and parts and derivatives thereof of naturalised or artificially propagated plants of the genus *Opuntia* subgenus *Opuntia*;
- #5 designates logs, sawn wood and veneer sheets;
- #6 designates logs, wood-chips and unprocessed broken material;
- #7 designates all parts and derivatives, except:
  - (a) seeds and pollen (including pollinia);
  - (b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
  - (c) cut flowers of artificially propagated plants; and
  - (d) fruits and parts and derivatives thereof of artificially propagated plants of the genus *Vanilla*.

19. As none of the species or higher taxa of FLORA included in Annex A is annotated to the effect that its hybrids shall be treated in accordance with the provisions of Article 4.1 of the Regulation, this means that artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Regulation.
20. In respect of fauna species listed in Annex D, the provisions, shall apply only to live specimens and whole or substantially whole, dead specimens except for taxa which are annotated as follows to show that other parts and derivatives are also covered:
  - § 1 Any whole or substantially whole skins, raw or tanned;
  - § 2 Any feathers or any skin or other part with feathers on it.
21. In respect of flora species listed in Annex D, the provisions shall apply only to live specimens except for taxa which are annotated as follows to show that other parts and derivatives are also covered:
  - § 3 Dried and fresh plants, including; leaves, roots/rootstock, stems, seeds/spores, bark and fruits.

	<i>Lioheterodon madagascariensis</i>	Madagascar menarana snake
	<i>Ptyas korros</i> §1	Indian rat snake
	<i>Rhabdophis chrysargus</i> §1	Specklebelly keelback
	<i>Zaocys dhumnades</i> §1	Redneck keelback
	<i>Rhabdophis subminiatus</i> §1	Cantor's rat snake
<b>Elapidae</b>	<i>Bungarus candidus</i> §1	Blue krait
	<i>Laticauda</i> spp., viz.	
	<i>Laticauda colubrina</i> §1	Banded sea snake
	<i>Laticauda crockeri</i> §1	Crocker's sea snake
	<i>Laticauda laticaudata</i> §1	Black-banded sea krait
	<i>Laticauda schistorhynchus</i> §1	Flat-tailed sea snake
	<i>Laticauda semifasciata</i> §1	Chinese sea snake
<b>Viperidae</b>	<i>Calloselasma rhodostoma</i> §1	Malayan pit viper
<b>Hydrophiidae</b>	<i>Hydrophis</i> spp., viz.	
	<i>Hydrophis atriceps</i> §1	Southeast Asia sea snake
	<i>Hydrophis belcheri</i> §1	Belcher's sea snake
	<i>Hydrophis bituberculatus</i> §1	Belcher's sea snake
	<i>Hydrophis brookei</i> §1	Brooke's sea snake
	<i>Hydrophis caerulescens</i> §1	Dark blue-banded sea snake
	<i>Hydrophis cantoris</i> §1	Gunther's sea snake
	<i>Hydrophis coggeri</i> §1	Cogger's sea snake
	<i>Hydrophis cyanocinctus</i> §1	Annulated sea snake
	<i>Hydrophis czeblukovi</i> §1	Czeblukov's sea snake
	<i>Hydrophis elegans</i> §1	Elegant sea snake
	<i>Hydrophis fasciatus</i> §1	Striped sea snake
	<i>Hydrophis geometricus</i> §1	Geometric sea snake
	<i>Hydrophis gracilis</i> §1	Smallhead sea snake
	<i>Hydrophis inornatus</i> §1	Blue-grey sea snake
	<i>Hydrophis klossi</i> §1	Kloss's sea snake
	<i>Hydrophis lamberti</i> §1	Lambert's sea snake
	<i>Hydrophis lapemoides</i> §1	Persian Gulf sea snake
	<i>Hydrophis macdowelli</i> §1	McDowell's sea snake
	<i>Hydrophis mamillaris</i> §1	Bombay sea snake
	<i>Hydrophis melanocephalus</i> §1	Black-headed sea snake
	<i>Hydrophis melanosoma</i> §1	Black-striped sea snake
	<i>Hydrophis obscurus</i> §1	Russell's sea snake
	<i>Hydrophis ornatus</i> §1	Reef sea snake
	<i>Hydrophis pacificus</i> §1	Pacific sea snake
	<i>Hydrophis parviceps</i> §1	Smith's sea snake
	<i>Hydrophis semperi</i> §1	Garman's sea snake
	<i>Hydrophis spiralis</i> §1	Yellow sea snake

**▼M5**

	Annex D	Common name
	<i>Hydrophis stricticollis</i> §1	Collared sea snake
	<i>Hydrophis torquatus</i> §1	West Coast black-headed sea snake
	<i>Hydrophis vorisi</i> §1	Kharin's sea snake
	<i>Lapemis curtus</i> =528 §1	Shaw's sea snake
<i>PISCES</i>		
<i>SYNGNATHIFORMES</i>		
<i>Syngnathidae</i>	<i>Hippocampus</i> spp. , viz.	
	<i>Hippocampus abdominalis</i> =529	Big-bellied seahorse
	<i>Hippocampus aimei</i>	
	<i>Hippocampus angustus</i> =530	Western Australian seahorse
	<i>Hippocampus bargibanti</i>	
	<i>Hippocampus bicuspis</i>	
	<i>Hippocampus borbonensis</i>	
	<i>Hippocampus brachyrhynchus</i>	
	<i>Hippocampus breviceps</i> =531	Short-headed seahorse
	<i>Hippocampus camelopardalis</i> =532	Giraffe seahorse
	<i>Hippocampus capensis</i>	Knysna seahorse
	<i>Hippocampus comes</i>	
	<i>Hippocampus coronatus</i> =533	Crowned seahorse
	<i>Hippocampus erectus</i> =534	Lined seahorse
	<i>Hippocampus erinaceus</i>	
	<i>Hippocampus fuscus</i> =535	Sea pony
	<i>Hippocampus hippocampus</i> =536	Short-snouted seahorse
	<i>Hippocampus histrix</i>	Thorny/spiny seahorse
	<i>Hippocampus horai</i>	
	<i>Hippocampus ingens</i> =537	Giant seahorse
	<i>Hippocampus japonicus</i>	Japanese seahorse
	<i>Hippocampus jayakari</i>	
	<i>Hippocampus kaupii</i>	
	<i>Hippocampus kelloggi</i>	
	<i>Hippocampus kuda</i> =538	Yellow seahorse
	<i>Hippocampus lichensteinii</i> =539	
	<i>Hippocampus minotaur</i>	Bullneck seahorse
	<i>Hippocampus planifrons</i> =540	Low-crowned seahorse
	<i>Hippocampus ramulosus</i> =541	Long-snouted seahorse
	<i>Hippocampus reidi</i> =542	Slender seahorse
	<i>Hippocampus sindonis</i>	
	<i>Hippocampus spinosissimus</i>	Hedgehog seahorse
	<i>Hippocampus takakurae</i>	
	<i>Hippocampus taenios</i>	
	<i>Hippocampus trimaculatus</i> =543	Three-spotted seahorse
	<i>Hippocampus tristis</i>	
	<i>Hippocampus whitei</i> =544	White's seahorse
	<i>Hippocampus zebra</i>
