► **B** REGULATION (EC) No 48/2004 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

of 5 December 2003

on the production of annual Community statistics on the steel industry for the reference years 2003-2009

(OJ L 7, 13.1.2004, p. 1)

Amended by:

		Official Journal

► <u>M1</u>	Regulation (EC) No 1893/2006 of the European Parliament and of the Council of 20 December 2006	L 393	1	30.12.2006

**REGULATION (EC) No 48/2004 OF THE EUROPEAN
PARLIAMENT AND OF THE COUNCIL**

of 5 December 2003

**on the production of annual Community statistics on the steel
industry for the reference years 2003-2009**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE
EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and
in particular Article 285(1) thereof,

Having regard to the proposal from the Commission ⁽¹⁾,

Having regard to the opinion of the European Economic and Social
Committee ⁽²⁾,

Acting in accordance with the procedure laid down in Article 251 of the
Treaty ⁽³⁾,

Whereas:

- (1) The statistics on the steel industry were based on the Treaty
establishing the European Coal and Steel Community (ECSC)
which came to an end on 23 July 2002.
- (2) Regulation (EC) No 1840/2002 ⁽⁴⁾ of the European Parliament
and of the Council of 30 September 2002 was adopted to
ensure the prolongation until 31 December 2002 of the ECSC
steel statistics system after the expiry of the ECSC Treaty.
- (3) It is necessary to continue collecting statistics on the steel
industry in order to implement future Community policies on
the steel industry. No other existing statistical system at a
European level is able to satisfy the need for such statistics. A
new Regulation based on the EC Treaty is therefore needed on
the collection of Community statistics on the steel industry.
- (4) Council Regulation (EC) No 322/97 of 17 February 1997 on
Community Statistics ⁽⁵⁾ constitutes the reference framework for
the provisions of this Regulation.
- (5) A transitional phase running from 2003 to 2009 is needed to
determine whether steel statistics can be integrated into other
statistical systems.
- (6) Enterprises in the steel industry need worldwide information on
investment and capacity in order to assess possible future under-
capacity or overcapacity for particular classes of steel products.
Community statistics on investment and capacity contribute to a
global network of information on world steel capacity, organised
under the auspices of the OECD.
- (7) Statistics on energy consumption in the steel industry yield infor-
mation not only on energy use and production within the steel
industry but indirectly also on emission of pollutants.
- (8) Statistics on the availability of stocks of iron and steel scrap are
needed to monitor the use of this important raw material for steel
making.
- (9) The measures necessary for the implementation of this Regulation
should be adopted in accordance with Council Decision
1999/468/EC of 28 June 1999 laying down the procedures for

⁽¹⁾ OJ C 45 E, 25.2.2003, p. 154.

⁽²⁾ OJ C 133, 6.6.2003, p. 88.

⁽³⁾ Opinion of the European Parliament of 13 May 2003 (not yet published in
the Official Journal) and Council Decision of 17 November 2003.

⁽⁴⁾ OJ L 279, 17.10.2002, p. 1.

⁽⁵⁾ OJ L 52, 22.2.1997, p. 1.

▼B

the exercise of implementing powers conferred on the Commission ⁽¹⁾.

- (10) The Statistical Programme Committee has been consulted in accordance with Article 3 of Council Decision 89/382/EEC, Euratom ⁽²⁾,

HAVE ADOPTED THIS REGULATION:

*Article 1***Objective**

The objective of this Regulation is to establish a common framework for the systematic production of Community statistics on the steel industry for the reference years 2003-2009.

*Article 2***Definitions**

For the purpose of this Regulation, the terms 'Community statistics' and 'production of statistics' shall bear the meanings given to them by Regulation (EC) No 322/97.

*Article 3***Scope****▼M1**

This Regulation shall cover data on the steel industry, which is defined as group 24.1 of the statistical classification of economic activities in the European Community (NACE Rev. 2).

▼B

Where the value-added at factor cost of the enterprises in a Member State's steel industry represents less than 1 % of the Community total, the data on the characteristics need not be collected.

*Article 4***Characteristics**

The data supplied, which shall conform to the format set out in the Annex, shall relate to kind-of-activity unit characteristics as defined in Council Regulation (EEC) No 696/93 of 15 March 1993 on the statistical units for the observation and analysis of the production system in the Community ⁽³⁾ and to enterprises having 50 or more employees.

*Article 5***Time reference and periodicity**

Member States shall compile on an annual basis the data specified in the Annex for the first time for the year 2003 and for each year thereafter until 2009.

⁽¹⁾ OJ L 184, 17.7.1999, p. 23.

⁽²⁾ OJ L 181, 28.6.1989, p. 47.

⁽³⁾ OJ L 76, 30.3.1993, p. 1. Regulation as last amended by Regulation (EC) No 1882/2003.

Article 6

Transmission of data

1. Member States shall transmit to the Commission (Eurostat) data and metadata on the steel industry aggregated over the units referred to in Article 4. The transmission shall include confidential data in accordance with the existing Community provisions on the transmission of data subject to confidentiality.
2. Member States shall transmit the data and metadata in electronic form. Transmission shall conform to an appropriate interchange standard approved in accordance with the procedure referred to in Article 8(2). Eurostat shall make available detailed documentation in relation to approved standards and shall supply guidelines on how to implement these standards according to the requirements of this Regulation.
3. Member States shall transmit data and metadata within six months from the end of the reference year. However, in accordance with the procedure referred to in Article 8(2), the Commission may extend this period to 12 months for the first transmission for those Member States who have difficulties implementing this Regulation.

Article 7

Implementing measures

The following measures for the implementation of this Regulation shall be laid down in accordance with the procedure referred to in Article 8 (2):

- (a) any alteration to the list of characteristics, provided that no significant additional burden is imposed upon the Member States;
- (b) transmission formats and the first transmission period.

Article 8

Procedure

1. The Commission shall be assisted by the Statistical Programme Committee, instituted by Article 1 of Decision 89/382/EEC, Euratom.
2. Where reference is made to this paragraph, Articles 5 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

The period referred to in Article 5(6) of Decision 1999/468/EC shall be set at three months.
3. The Committee shall adopt its rules of procedure.

Article 9

Reports

Within five years of the entry into force of this Regulation, the Commission shall submit a report to the European Parliament and the Council on its implementation.

In particular, the report shall:

- (a) assess the benefits accruing to the Community, the Member States and the providers and users of statistical information of the statistics produced in relation to their costs;
- (b) assess the quality of the statistics produced;
- (c) verify synergy with other Community activities;

▼B

- (d) propose any changes considered necessary to improve the operation of this Regulation.

Article 10

Entry into force

This Regulation shall enter into force on the 20th day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

ANNEX

**DATA REFERRED TO IN ARTICLES 4, 5 AND 6 TO BE
TRANSMITTED TO EUROSTAT**

1. Yearly statistics on the steel and cast iron scrap balance sheet

(Unit: tonnes)

Code	Title
	Steel and cast iron scrap balance sheet
1010	Stocks on first day of year
1020	Arising within the works
1030	Receipts (1031+1032+1033)
1031	— from home sources
1032	— from other Community Member States
1033	— from third countries
1040	Total available (1010+1020+1030)
1050	Consumption total ...
1051	... of which electric furnaces
1052	... of which stainless scrap
1060	Deliveries
1070	Stocks on last day of year (1040-1050-1060)

2. Fuel and Energy Consumption and Balance Sheet for Electrical Energy in the Steel Industry

Part A: Annual statistics on the Fuel and Energy Consumption broken down by type of plant(*)

(Unit: tonnes or Giga Joules (GJ))

Code	Title	Comment
	Fuel and energy consumption	
2010	Solid fuels (2011+2012)	tonnes
2011	Coke	tonnes
2012	Other solid fuels	tonnes
2020	Liquid fuels	tonnes
2030	Gas (2031+2032+2033+2034)	GJ
2031	Blast furnace gas	GJ
2032	Coke oven gas	GJ
2033	Converter gas	GJ
2034	Other gas	GJ
2040	External deliveries of blast furnace gas	GJ
2050	External deliveries of converter gas	GJ

(*) Plant for load preparation: Rolling mill departments
 Blast furnaces and electric iron making furnaces: Electricity generating stations
 Melting shops: Other plant

▼B

Part B: Annual statistics on the balance sheet for electrical energy in the steel industry

(Unit: MWh)

Code	Title
	Balance sheet for electrical energy in the steel industry
3100	Resources (3101+3102)
3101	Gross production
3102	Receipts from outside
3200	Used (3210+3220+3230)
3210	Consumption by plant (3211+3212+3213+3214+3215+3216+3217)
3211	Sinter plant and plant for preparation of burden
3212	Blast furnaces and electric iron making furnaces
3213	Electric melting shops and continuing casting
3214	Other melting shops and continuing casting
3215	Rolling mill departments
3216	Electricity generating stations
3217	Other plant
3220	Deliveries to outside
3230	Losses

3. Enquiry on investments in the iron and steel industry
(Expenditure and capacity)

Part A: Annual statistics on expenditure

(Unit: millions of EUR)

Code	Title
	Investment expenditure in the iron and steel industry
4010	Coking plant
4020	Plant for load preparation
4030	Plant for ironmaking and ferro-alloys (including blast furnaces)
4040	Steelworks melting shops
4041	... of which electric
4050	Continuous casting
4060	Rolling mills (4061+4062+4063+4064)
4061	Flat products
4062	Long products
4063	Cold wide strip mills
4064	Coating installations
4070	Other plant
4100	General total (4010+4020+4030+4040+4050+4060+4070)
4200	... of which to combat pollution

▼B

Part B: Annual statistics on capacity

(Unit: 1 000 tonnes per year)

Code	Title
	Maximum possible production in the iron and steel industry (capacity)
5010	Coke
5020	Load preparation
5030	Pig iron and ferro-alloys
5040	Crude steel
5041	— of which electric
5042	— of which continuous casting
5050	Products obtained directly by hot rolling (5051+5052)
5051	Flat products
5052	Long products
5060	Products obtained from hot rolling products (excluding coated products)
5061	... of which products obtained by cold rolling
5070	Coated products
