COMMISSION REGULATION (EC) No 794/2004

of 21 april 2004

implementing Council Regulation (EC) No 659/1999 laying down detailed rules for the application of Article 93 of the EC Treaty

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EC) No 659/1999 of 22 March 1999 laying down detailed rules for the application of Article 93 of the EC Treaty (1), and in particular Article 27 thereof,

After consulting the Advisory Committee on State Aid,

Whereas:

- (1) In order to facilitate the preparation of State aid notifications by Member States, and their assessment by the Commission, it is desirable to establish a compulsory notification form. That form should be as comprehensive as possible.
- (2) The standard notification form as well as the summary information sheet and the supplementary information sheets should cover all existing guidelines and frameworks in the state aid field. They should be subject to modification or replacement in accordance with the further development of those texts.
- (3) Provision should be made for a simplified system of notification for certain alterations to existing aid. Such simplified arrangements should only be accepted if the Commission has been regularly informed on the implementation of the existing aid concerned.
- (4) In the interests of legal certainty it is appropriate to make it clear that small increases of up to 20 % of the original budget of an aid scheme, in particular to take account of the effects of inflation, should not need to be notified to the Commission as they are unlikely to affect the Commission's original assessment of the compatibility of the scheme, provided that the other conditions of the aid scheme remain unchanged.
- (5) Article 21 of Regulation (EC) No 659/1999 requires Member States to submit annual reports to the Commission on all existing aid schemes or individual aid granted outside an approved aid scheme in respect of which no specific reporting obligations have been imposed in a conditional decision.
- (6) For the Commission to be able to discharge its responsibilities for the monitoring of aid, it needs to receive accurate information from Member States about the types and amounts of aid being granted by them under existing aid schemes. It is possible to simplify and improve the arrangements for the reporting of State aid to the Commission which are currently described in the joint procedure for reporting and notification under the EC Treaty and under the World Trade Organisation (WTO) Agreement set out in the Commission's letter to Member States of 2 August 1995. The part of that joint procedure relating to Member States reporting obligations for subsidies and Counuder Article 25 of the WTO Agreement on Subsidies and Coun-

OJ L 83, 27.3.1999, p. 1. Regulation as amended by the 2003 Act of Accession.

- tervailing measures and under Article XVI of GATT 1994, adopted on 21 July 1995 is not covered by this Regulation.
- (7) The information required in the annual reports is intended to enable the Commission to monitor overall aid levels and to form a general view of the effects of different types of aid on competition. To this end, the Commission may also request Member States to provide, on an ad hoc basis, additional data for selected topics. The choice of subject matter should be discussed in advance with Member States.
- (8) The annual reporting exercise does not cover the information, which may be necessary in order to verify that particular aid measures respect Community law. The Commission should therefore retain the right to seek undertakings from Member States, or to attach to decisions conditions requiring the provision of additional information.
- (9) It should be specified that time-limits for the purposes of Regulation (EC) No 659/1999 should be calculated in accordance with Regulation (EEC, Euratom) No 1182/71 of the Council of 3 June 1971 determining the rules applicable to periods, dates and time limits (¹), as supplemented by the specific rules set out in this Regulation. In particular, it is necessary to identify the events, which determine the starting point for time-limits applicable in State aid procedures. The rules set out in this Regulation should apply to pre-existing time-limits which will continue to run after the entry into force of this Regulation.
- (10) The purpose of recovery is to re-establish the situation existing before aid was unlawfully granted. To ensure equal treatment, the advantage should be measured objectively from the moment when the aid is available to the beneficiary undertaking, independently of the outcome of any commercial decisions subsequently made by that undertaking.
- (11) In accordance with general financial practice it is appropriate to fix the recovery interest rate as an annual percentage rate.
- (12) The volume and frequency of transactions between banks results in an interest rate that is consistently measurable and statistically significant, and should therefore form the basis of the recovery interest rate. The inter-bank swap rate should, however, be adjusted in order to reflect general levels of increased commercial risk outside the banking sector. On the basis of the information on inter-bank swap rates the Commission should establish a single recovery interest rate for each Member State. In the interest of legal certainty and equal treatment, it is appropriate to fix the precise method by which the interest rate should be calculated, and to provide for the publication of the recovery interest rate applicable at any given moment, as well as relevant previously applicable rates.
- (13) A State aid grant may be deemed to reduce a beneficiary undertaking's medium-term financing requirements. For these purposes, and in line with general financial practice, the medium-term may be defined as five years. The recovery interest rate should therefore correspond to an annual percentage rate fixed for five years.
- (14) Given the objective of restoring the situation existing before the aid was unlawfully granted, and in accordance with general financial practice, the recovery interest rate to be fixed by the Commission should be annually compounded. For the same reasons, the recovery interest rate applicable in the first year of the recovery period should be applied for the first five years of

the recovery period, and the recovery interest rate applicable in the sixth year of the recovery period for the following five years.

(15) This Regulation should apply to recovery decisions notified after the date of entry into force of this Regulation,

HAS ADOPTED THIS REGULATION:

However an increase in the original budget of an existing aid scheme by up to 20 % shall not be considered an alteration to existing aid.
- The following alterations to existing aid shall be notified on the simplified notification form set out in Annex II:
- (a) increases in the budget of an authorised aid scheme exceeding 20 %;
- (b) prolongation of an existing authorised aid scheme by up to six years, with or without an increase in the budget;
- (c) tightening of the criteria for the application of an authorised aid scheme, a reduction of aid intensity or a reduction of eligible expenses:

CHAPTER III

1. Without prejudice to the second and third subparagraphs of this Article and to any additional specific reporting requirements laid down in a conditional decision adopted pursuant to Article 7(4) of Regulation (EC) No 659/1999, or to the observance of any undertakings provided by the Member State concerned in connection with a decision to approve aid, Member States shall compile the annual reports on existing aid schemes referred to in Article 21(1) of Regulation (EC) No 659/1999 in respect of each whole or part calendar year during which the scheme applies in accordance with the standardised reporting format set out in Annex IIIA.

Annex IIIB sets out the format for annual reports on existing aid schemes relating to the production, processing and marketing of agricultural products listed in Annex I of the Treaty.

Annex IIIC sets out the format for annual reports on existing aid schemes for state aid relating to the production, processing or marketing of fisheries products listed in Annex I of the Treaty.

In justified cases Member States may submit estimates, provided that the actual figures are transmitted at the very latest with the following year's data.

2. Each year the Commission shall publish a State aid synopsis containing a synthesis of the information contained in the annual reports submitted during the previous year.

Article 7

Status of annual reports

The transmission of annual reports shall not be considered to constitute compliance with the obligation to notify aid measures before they are put into effect pursuant to Article 88(3) of the Treaty, nor shall such transmission in any way prejudice the outcome of an investigation into allegedly unlawful aid in accordance with the procedure laid down in Chapter III of Regulation (EC) No 659/1999.

CHAPTER IV

TIME-LIMITS

Article 8

Calculation of time-limits

- 1. Time-limits provided for in Regulation (EC) No 659/1999 and in this Regulation or fixed by the Commission pursuant to Article 88 of the Treaty shall be calculated in accordance with Regulation (EEC, Euratom) No 1182/71, and the specific rules set out in paragraphs 2 to 5 of this Article. - 6. Any request for the extension of a time-limit shall be duly substantiated, and shall be submitted in writing to the address designated by the party fixing the time-limit at least two working days before expiry.

CHAPTER V

INTEREST RATE FOR THE RECOVERY OF UNLAWFUL AID

▼<u>M3</u>

Article 9

Method for fixing the interest rate

- 1. Unless otherwise provided for in a specific decision, the interest rate to be used for recovering State aid granted in breach of Article 88(3) of the Treaty shall be an annual percentage rate which is fixed by the Commission in advance of each calendar year.
- 2. The interest rate shall be calculated by adding 100 basis points to the one-year money market rate. Where those rates are not available, the three-month money market rate will be used, or in the absence thereof, the yield on State bonds will be used.
- 3. In the absence of reliable money market or yield on stock bonds or equivalent data or in exceptional circumstances the Commission may, in close co-operation with the Member State(s) concerned, fix a recovery rate on the basis of a different method and on the basis of the information available to it.

▼ M3

- 4. The recovery rate will be revised once a year. The base rate will be calculated on the basis of the one-year money market recorded in September, October and November of the year in question. The rate thus calculated will apply throughout the following year.
- 5. In addition, to take account of significant and sudden variations, an update will be made each time the average rate, calculated over the three previous months, deviates more than 15 % from the rate in force. This new rate will enter into force on the first day of the second month following the months used for the calculation.

▼<u>B</u>

Article 10

Publication

The Commission shall publish current and relevant historical State aid recovery interest rates in the *Official Journal of the European Union* and for information on the Internet.

Article 11

Method for applying interest

- 1. The interest rate to be applied shall be the rate applicable on the date on which unlawful aid was first put at the disposal of the beneficiary.
- 2. The interest rate shall be applied on a compound basis until the date of the recovery of the aid. The interest accruing in the previous year shall be subject to interest in each subsequent year.

▼M3

3. The interest rate referred to in paragraph 1 shall be applied throughout the whole period until the date of recovery. However, if more than one year has elapsed between the date on which the unlawful aid was first put at the disposal of the beneficiary and the date of the recovery of the aid, the interest rate shall be recalculated at yearly intervals, taking as a basis the rate in force at the time of recalculation.

PART III.4

SUPPLEMENTARY INFORMATION SHEET ON REGIONAL AID

This supplementary information sheet must be used for the notification of any aid scheme or ad hoc aid covered by the guidelines on national regional aid for 2007-2013 (RAG) (¹). The present annex cannot be used for the particular purpose of notification of new regional aid maps for the period 2007-2013. Transparent investment aid schemes falling under the scope of the exemption regulation on regional investment aid are exempted from the notification obligation. Therefore, Member States are invited to clarify the scope of their notification; in the particular case that a scheme covers both transparent and non-transparent forms of investment aid, they are invited to limit the scope of the notification only to the second category.

In the case of <u>ad hoc aid</u> (i.e. aid granted outside existing aid schemes), Member States will have to demonstrate that the project contributes towards a coherent regional development strategy and that, having regard to the nature and size of the project, it will not result in unacceptable distortions of competition. Moreover, Member States will have to demonstrate that the aid will not be unduly concentrated on a particular sector of activity and that it creates no adverse sectoral effects.

Another supplementary information sheet (Part III.5) must be submitted in case of notification of regional investment aid to large investment projects in the accordance with section 4.3 of the RAG.

SUPPLEMENTARY INFORMATION SHEET ON REGIONAL AID FOR LARGE INVESTMENT PROJECTS

This supplementary information sheet must be used for the notification of any regional investment aid exceeding the threshold for individual notification defined in point 64 of the Guidelines for national regional aid for 2007-2013.

For ad hoc aid (aid granted outside existing schemes) the Member State must also provide the Supplementary Information Sheet on regional aid (Part III.4). In addition, Member States will have to demonstrate that the project contributes towards a coherent regional development strategy and that, having regard to the nature and size of the project, it will not result in unacceptable distortions of competition. Moreover, Member States will have to demonstrate that the aid will not be unduly concentrated on a particular sector of activity and that it creates no adverse sectoral effects.

The Commission reserves the right to ask for further information in order to carry out an in-depth assessment if the thresholds for such an assessment as defined in point 68 of the Regional Aid Guidelines are reached.

Additionally to this supplementary information sheet(s) the Member State must provide:

Additional information on beneficiaries

- Part I. General Information,
- Part II. Summary Information for publication in the Official Journal of the European Union.

The Member State must also provide the relevant investment agreement, the (draft) aid contract and any other relevant document (including, in the case of ad hoc aid, the letter of intent), in order to confirm that the granting of the aid is in conformity with the general rules under the Guidelines for national regional aid for 2007-2013 and with any underlying aid scheme.

(B)	If the R&D projects encompass different research categories, please list and qualify the different asks as falling under the categories of fundamental research, industrial research or experimentad evelopment or as not falling under any of those categories at all.

5.1.2. Eligible costs

All eligible costs must be allocated to a specific category of R&D (114). Please specify the eligible costs and indicate their amount.

	Fundamental research	Industrial research	Experimental development
Personnel costs			
Costs of instruments and equipment			
Costs for building and land			
Cost of contractual research, technical knowledge and patents bought or licensed from outside sources at market prices			
Additional overheads incurred directly as a result of the research project			
Other operating expenses			

5.1.3. Aid intensities and bonuses

The aid intensity is calculated on the basis of the eligible costs of the project. It must be established for each beneficiary of the aid, including in a collaboration project (115).

Basic intensities (without bonuses) (116):

	Fundamental research	Industrial research	Experimental development
Maximum aid intensity			

Cf. Section 5.1.4 of the R&D&I Framework. These eligible costs apply to aid for R&D projects (Section 5.1) research

projects and to process and organisational innovation in services (Section 5.5). In the case of State aid for an R&D project being carried out in collaboration between research organisations and undertakings, the combined aid deriving from direct government support for a specific research project and, where they constitute aid, contributions from research organisations to that project may not exceed the applicable aid

intensities for each benefiting undertaking.

The aid intensity may not exceed 100% for fundamental research, 50% for industrial research and 25% for experimental development.

⁽²⁾ Please note that the Commission will consider the notified projects more favourably if they involve undertakings from a significant number of Member States.

⁽³⁾ Please note that the Commission may authorise aid at higher rates than otherwise laid

down in the Environmental aid guidelines.
(4) 'Community minimum tax level' means the minimum level of taxation provided for in Community legislation. For energy products and electricity, the Community minimum tax level means the minimum level of taxation laid down in Annex I to Council Directive 2003/96/EC of 27 October 2003 restructuring the Community framework for the taxation of energy products and electricity (OJ L 283, 31.10.2003, p. 51.

	and
	without the aid the substantial increase in production costs would lead to important sales reductions if it would be passed on to customers (2).
	Please provide evidence related to the above mentioned conditions:
6.3.	Proportionality of the aid
	Please specify which one of the following conditions is met:
	(A) Does the scheme lay down criteria ensuring that each individual beneficiary pays a proportion of the national tax level which is broadly equivalent to the environmental performance of each individual beneficiary compared to the performance related to the best performing technique within the EEA?
	□ yes □ no
	Please provide details and evidence demonstrating the compliance with this condition:

⁽¹⁾ With regard to energy products and electricity 'energy-intensive business' as defined in Article 17(1)(a) of Directive 2003/96/EC shall be regarded as fulfilling this criterion as long as that provision remains in force.

⁽²⁾ In this respect, Member States may provide estimations of, inter alia, the product price elasticity of the sector concerned in the relevant geographic market as well as estimates of lost sales and/or reduced profits for the companies in the sector/category concerned.

(B)	Are aid beneficiaries paying at least 20 $\%$ of the national tax?				
	yes no				
	If no, please demonstrate how a lower rate can be justified in view of a limited distortion of competition:				
(C)	Are the reductions or exemptions conditional on the conclusion of agreements between the Member State and the recipient undertakings or associations of undertakings?				
	yes no				
	If yes, please provide details and evidence illustrating that the undertakings or associations of undertakings commit themselves to achieve environmental protection objectives which have the same effect as (i) the taxation linked to environmental performance (¹), or (ii) 20 % of the national tax (²) or (iii) if the Community minimum tax level is applied.:

	Specify per sector the targets and time schedule and describe the monitoring and review mechanisms (for example by whom and with what periodicity) as well as the penalty mechanism:				
7. Crit	eria triggering a detailed assessment (3)				
	Please indicate if the notified measure falls within the following categories of aid:				
v	for measures covered by a Block Exemption Regulation, the case was notified to the Commission pursuant to a duty to notify aid individually as prescribed in the BER;				
	nvestment aid, where the aid amount exceeds EUR 7,5 million for one undertaking, (even if part of an approved aid scheme);				
	perating aid for energy saving, where the aid amount exceeds EUR 5 million per undertaking for five years;

 operating aid for the production of biofuel, when the aid is granted to a biofuel production installation in sites, where the resulting production exceeds 150 000 t per year;

operating aid for cogeneration, where aid is granted to cogeneration installation with the resulting cogeneration electricity capacity exceeding 200 MW (1)

on the basis of a calculation of the external costs avoided (2).

In this case please provide a reasoned and quantified comparative cost analysis, together with an assessment of competing energy producers' external costs, so as to demonstrate that the aid does genuinely compensate for external costs avoided (3).

If the notified measure falls within at least one of these aid categories, it is subject to a detailed assessment and additional information should be provided in order to enable the Commission to carry out a detailed assessment (Section 8 of this supplementary information sheet).

8. Additional information for detailed assessment (4)

If there are several beneficiaries participating in the notified project subject to a detailed assessment, please provide the information below for each of them. This is without prejudice to the full description of the notified project, including participants, in the previous sections of this supplementary sheet.

8.1. General observations

The purpose of this detailed assessment is to ensure that high amounts of aid for environmental protection do not distort competition to an extent contrary to the common interest, but actually contribute to the common interest. This happens when the benefits of State aid in terms of additional environmental benefits outweigh the harm for competition and trade (5).

The detailed assessment is conducted on the basis of the <u>positive and negative elements</u> which are specified in Sections 5.2.1 and 5.2.2 of the Environmental aid guidelines and they apply in addition to the criteria set out in Chapter 3 of the Environmental aid guidelines.

Provisions below represent a guidance as to the type of information the Commission may require in order to carry out a detailed assessment. The guidance is intended to make the Commission's decisions and their reasoning transparent and foreseeable in order to create predictability and legal certainty. Member States should provide all the elements that they consider useful for the assessment of the case.

The Member States are in particular invited to rely on the information sources listed below. Please indicate if these supporting documents are attached to the notification:

evaluations of past State aid schemes or r	neasures;
impact assessments made by the granting	authority;
other studies related to the environmental	protection

8.2. Existence of a market failure (6)

(A) Please identify the expected contribution of the measure to environmental protection (in quantifiable terms) and provide the supporting documents:

⁽¹⁾ Please note that aid for the production of heat from cogeneration will be assessed in the context of notification based on electricity.

⁽²⁾ For details see point 161 of the Environmental aid guidelines.

⁽³⁾ Please note that in order to calculate external avoided costs, the method of calculation used has to be internationally recognised and validated by the Commission. Please further note that in any event, the amount of aid granted to producers that exceeds the amount of aid resulting form option 1 (cf. point 109 of the Environmental aid guidelines) for operating aid for renewable sources of energy must be reinvested by the firms in renewable sources of energy in accordance with section 3.1.6.1.

(1) That is, farmers to the exclusion of processing and marketing undertakings.

⁽²⁾ Under Article 11(10) of the Exemption Regulation, aid must be disbursed within four years after the expenses or losses have been incurred.

⁽³⁾ The reference to crops does not mean that livestock are excluded from aid. The principles set out in point V.B.3 of the Guidelines will apply mutatis mutandis to aid intended to compensate for losses involving livestock due to adverse weather.

⁽⁴⁾ Commission Regulation (EC) No 1857/2006 of 15 December 2006 on the application of Articles 87 and 88 of the EC Treaty to State aid to small and medium-sized enterprises active in the production of agricultural products and amending Regulation (EC) No 70/2001. Under point 126 of the guidelines, the Commission will declare aid granted for losses due to adverse weather conditions compatible with Article 87(3)(c) of the Treaty, if all conditions of Article 11 of Regulation (EC) No 1857/2006 are met.

⁽⁵⁾ Normal gross annual production should be calculated either in proportion to the mean production of a farmer determined over the three preceding years or in proportion to the three-yearly average based on the five preceding years and excluding the top and bottom value. Other methods of calculating normal production (including regional reference figures) may however be accepted, provided that they are representative and not based on abnormally high production figures.

2.8.	Are losses calculated for each individual holding or for a whole area? In the latter case, please show that the averages used are representative and not likely to lead to considerable over-compensation for some beneficiaries.
2.9.	Will insurance payments be deducted from the amount eligible for aid?
2.10.	Will the normal costs no longer faced by the farmer (e.g. because there was no actual harvest) be taken into account in calculating the aid?
2.11.	If such normal costs go up because of the weather event, is additional aid envisaged to cover the extra costs? If yes, what percentage of the extra costs will the aid cover?
2.12.	Will aid be paid to compensate for damage caused by the weather event to buildings and equipment? If yes, what percentage of the damage will it cover?
2.13.	Please indicate the maximum rate of public aid as a percentage of eligible damage (1):
	in less-favoured areas (2) (max. 90 %);
	in other zones (max. 80 %).
2.14.	Will aid be paid directly to farmers or in some circumstances to the producer organisations to which those farmers belong? In the latter case, what mechanisms will be used to check that the amount of aid collected by a farmer will not be more than the losses suffered?
2.15.	From 1 January 2010 will the compensation granted be reduced by 50% if the farmer concerned has not taken insurance covering at least 50% of mean annual production or of income related to production and the statistically most frequent climatic risks in the Member State or region concerned?
	□ yes □ no
	If no, please note that under point 126 of the Guidelines the Commission will declare aid granted for losses due to adverse weather conditions compatible with Article 87(3)(c) of the Treaty only if all conditions of Article 11 of Regulation (EC) No 1857/2006 are met and that this condition is explicitly laid down by that Article 11. Please show too that, despite all reasonable efforts, no financially accessible insurance policy covering the statistically most frequent climatic risks in the Member State or region concerned was available at the time the damage was incurred.
2.16.	For aid pertaining to drought-related losses incurred after 1 January 2011, has the Member State fully implemented Article 9 of Directive 2000/60/EC of the European Parliament and of the Council (3) with regard to agriculture:
	□ yes □ no
	and does it guarantee that all costs for water services in the agricultural sector are recovered from the sector (Article 11(9) of Regulation (EC) No 1857/2006)?
	□ yes □ no

⁽¹⁾ This rate applies to the amount of aid as calculated according to the method indicated under 2.6 or 2.8, minus any insurance payments and normal costs not faced by the farmer, plus extra costs faced by the farmer as a result of the exceptional event.

⁽²⁾ This rate applies to less-favoured areas or the areas referred to in Article 36(a)(i), (ii) and (iii) of Regulation (EC) No 1698/2005.

⁽³⁾ Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy (OJ L 327, 22.12.2000, p. 1).

If no, please note that under point 126 of the Guidelines the Commission will declare aid granted for losses due to adverse weather conditions compatible with Article 87(3)(c) of the Treaty only if all conditions of [Article 11 of Regulation (EC) No 1857/2006] are met and that the above two conditions are explicitly laid down by that Article 11.

SUPPLEMENTARY INFORMATION SHEET FOR AID TO FISHERIES AND AQUACULTURE

This supplementary information sheet must be used for the notification of any aid scheme or individual aid covered by Guidelines for the examination of State aid to fisheries and aquaculture (the Guidelines).

OBJECTIVES OF THE SCHEME or AID (tick as appropriate and insert the required information):

This Section follows the order of the subparagraphs of paragraph 4 of the Guidelines: 'Aid which may be declared compatible'.

☐ Point 4.1 of the Guidelines: Aid for measures of the same kind as those covered by a block exemption Regulation

General remarks concerning this kind of aid

Two block exemption regulations are in force: Commission Regulation (EC) No 736/2008 (¹) which applies to the fisheries and aquaculture sector and Commission Regulation (EC) No 800/2008 (²) which is the general exemption regulation applying to all sectors.

Therefore, such aid should not in principle be notified.

However, according to recital 6 of Regulation No 736/2008 and recital 7 of Regulation No 800/2008, these regulations should be without prejudice to the possibility for Member States of notifying State aid, the objectives of which correspond to objectives covered by these Regulations.

In addition, the following kinds of aid cannot benefit from the exemption provided by Regulations (EC) No 736/2008 and (EC) No 800/2008: aid exceeding specified ceilings, as referred to in Article 1(3) of Regulation (EC) No 736/2008 or in Article 6 of Regulation (EC) No 800/2008, or having specific characteristics, in particular aid granted to undertakings other than SMEs, aid to undertakings in difficulty, non-transparent aid, aid for an undertaking which is subject to an outstanding recovery order following a Commission decision declaring an aid incompatible with the common market.

Compatibility with the common market

The Member State is requested to provide detailed and reasoned justification as to why the aid can be considered compatible with the common market.

☐ Point 4.2 of the Guidelines: Aid falling within the scope of certain horizontal Guidelines

The Member State is requested to provide the reference to the relevant Guidelines which are considered to be applicable to the aid measure concerned as well as a detailed and reasoned justification as to why the aid is considered compatible with those Guidelines.

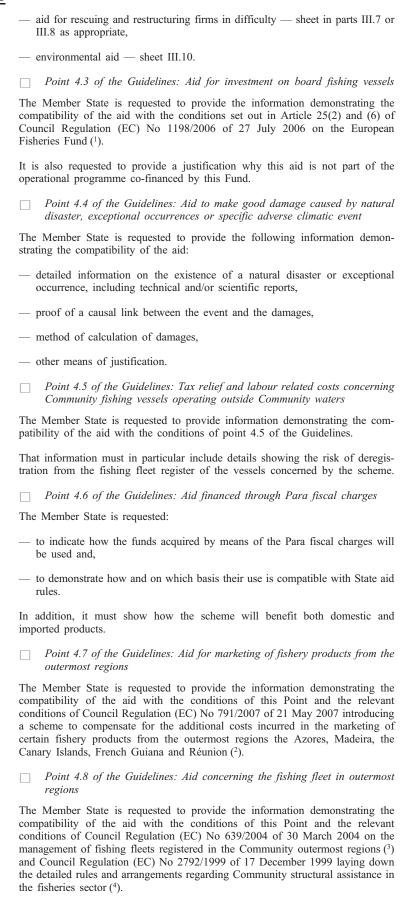

The Member State is requested to complete also the other relevant summary information sheets annexed to this Regulation.

- employment aid sheet in part III.3,

Point 4.9 of the Guidelines: Aid for other measures

The Member State is requested to describe very precisely the kind of aid and its objectives.

In addition, it is requested to provide a detailed and reasoned justification on the compatibility of the aid with the conditions of point 3 of the Guidelines and to demonstrate how this aid serves the objectives of the common fisheries policy.

GENERAL PRINCIPLES

The Member State is requested to declare that no aid will be granted in respect of operations that the beneficiary has already begun to implement and for aid for activities in which the beneficiary would already engage under market conditions alone.

The Member State is requested to declare that no aid will be granted in circumstances where Community law, and in particular the rules of the Common Fisheries Policy, are not complied with.

In that sense, the Member State is requested to declare that the aid measure explicitly provides that, during the grant period, the beneficiaries of the aid shall comply with the rules of the Common Fisheries Policy and that, if during this period it is found that the beneficiary does not comply with rules of the Common Fisheries Policy, the grant must be reimbursed in proportion to the gravity of the infringement.

The Member State is requested to declare that the aid is limited to a maximum of 10 years, or, if this is not the case, undertakes to re-notify the aid at least two months before the tenth anniversary of its entry into force.

OTHER REQUIREMENTS

The Member State is requested to provide a list of all supporting documents submitted with the notification as well as a summary of those documents (e.g. socioeconomic data on the recipient regions, scientific and economic justification).

The Member State is requested to indicate that this aid is not cumulated with another aid for the same eligible expenses or for the same compensation.

If such accumulation exists, the Member State is requested to indicate the references of the aid (aid scheme or individual aid) with which there is accumulation and to demonstrate that the whole aid granted remains compatible with the relevant rules. For that purpose, the Member State shall take into account every kind of State aid, including *de minimis* aid.

ANNEX III A

STANDARDISED REPORTING FORMAT FOR EXISTING STATE AID

(This format covers all sectors except agriculture)

With a view to simplifying, streamlining and improving the overall reporting system for State aid, the existing Standardised Reporting Procedure shall be replaced by an annual updating exercise. The Commission shall send a preformatted spreadsheet, containing detailed information on all existing aid schemes and individual aid, to the Member States by 1 March each year. Member States shall return the spreadsheet in an electronic format to the Commission by 30 June of the year in question. This will enable the Commission to publish State aid data in year t for the reporting period t-1 (1).

The bulk of the information in the pre-formatted spreadsheet shall be precompleted by the Commission on the basis of data provided at the time of approval of the aid. Member States shall be required to check and, where necessary, modify the details for each scheme or individual aid, and to add the annual expenditure for the latest year (t-1). In addition, Member States shall indicate which schemes have expired or for which all payments have stopped and whether or not a scheme is co-financed by Community Funds.

Information such as the objective of the aid, the sector to which the aid is directed, etc shall refer to the time at which the aid is approved and not to the final beneficiaries of the aid. For example, the primary objective of a scheme which, at the time the aid is approved, is exclusively earmarked for small and medium-sized enterprises shall be aid for small and medium-sized enterprises. However, another scheme for which all aid is ultimately awarded to small and medium-sized enterprises shall not be regarded as such if, at the time the aid is approved, the scheme is open to all enterprises.

The following parameters shall be included in the spreadsheet. Parameters 1-3 and 6-12 shall be pre-completed by the Commission and checked by the Member States. Parameters 4, 5 and 13 shall be completed by the Member States.

- 1. Title
- 2. Aid number
- 3. All previous aid numbers (e.g., following the renewal of a scheme)
- 4. Expiry

Member States should indicate those schemes which have expired or for which all payments have stopped.

Co-financing

Although Community funding itself is excluded, total State aid for each Member State shall include aid measures that are co-financed by Community funding. In order to identify which schemes are co-financed and estimate how much such aid represents in relation to overall State aid, Member States are required to indicate whether or not the scheme is co-financed and if so the percentage of aid that is co-financed. If this is not possible, an estimate of the total amount of aid that is co-financed shall be provided.

6. Sector

The sectoral classification shall be based largely on NACE (2) at the [three-digit level].

- 7. Primary objective
- 8. Secondary objective

A secondary objective is one for which, in addition to the primary objective, the aid (or a distinct part of it) was exclusively earmarked at the time the aid was approved. For example, a scheme for which the primary objective is research and development may have as a secondary objective small and medium-sized enterprises (SMEs) if the aid is earmarked exclusively for SMEs. Another scheme for which the primary objective is SMEs may have as secondary objectives training and employment if, at the time the aid was approved, the aid is earmarked for x% training and y% employment.

⁽¹⁾ t is the year in which the data are requested.

⁽²⁾ NACE Rev.1.1 is the Statistical classification of economic activities in the European Community.

9. Region(s)

Aid may, at the time of approval, be exclusively earmarked for a specific region or group of regions. Where appropriate, a distinction should be made between the Article 87(3)a regions and the Article 87(3)c regions. If the aid is earmarked for one particular region, this should be specified at NUTS (1) level II.

10. Category of aid instrument(s)

A distinction shall be made between six categories (Grant, Tax reduction/exemption, Equity participation, Soft loan, Tax deferral, Guarantee).

11. Description of aid instrument in national language

12. Type of aid

A distinction shall be made between three categories: Scheme, Individual application of a scheme, Individual aid awarded outside of a scheme (ad hoc aid)

13. Expenditure

As a general rule, figures should be expressed in terms of actual expenditure (or actual revenue foregone in the case of tax expenditure). Where payments are not available, commitments or budget appropriations shall be provided and flagged accordingly. Separate figures shall be provided for each aid instrument within a scheme or individual aid (e.g. grant, soft loans, etc.) Figures shall be expressed in the national currency in application at the time of the reporting period. Expenditure shall be provided for t-1, t-2, t-3, t-4, t-5.

⁽¹⁾ NUTS is the nomenclature of territorial units for statistical purposes in the Community.
