COMMISSION REGULATION (EC) No 1200/2005
of 26 July 2005
concerning the permanent authorisation of certain additives in feedingstuffs and the provisional authorisation of a new use of an additive already authorised in feedingstuffs
(Text with EEA relevance)

(OJ L 195, 27.7.2005, p. 6)

COMMISSION REGULATION (EC) No 1200/2005
of 26 July 2005

concerning the permanent authorisation of certain additives in
feedingstuffs and the provisional authorisation of a new use of an
additive already authorised in feedingstuffs

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

concerning additives in feedingstuffs (¹), and in particular Articles 3, 9a,
and 9d(1) thereof,

Having regard to Regulation (EC) No 1831/2003 of the European
Parliament and of the Council of 22 September 2003 on additives for
use in animal nutrition (²), and in particular Article 25 thereof,

Whereas:

(1) Regulation (EC) No 1831/2003 provides for the authorisation of
additives for use in animal nutrition.

(2) Article 25 of Regulation (EC) No 1831/2003 lays down transi-
tional measures for applications for the authorisation of feed
additives submitted in accordance with Directive 70/524/EEC
before the date of application of Regulation (EC) No 1831/2003.

(3) The applications for the authorisation of the additives listed in the
Annexes to this Regulation were submitted before the date of

(4) Initial comments on those applications, as provided for in
Article 4(4) of Directive 70/524/EEC, were forwarded to the
Commission before the date of application of Regulation (EC)
No 1831/2003. Those applications are therefore to continue to be
treated in accordance with Article 4 of Directive 70/524/EEC.

(5) The use of the growth promoter Formi LHS (potassium
diformate) was provisionally authorised, for the first time, for
piglets and pigs for fattening by Commission Regulation (EC)
No 1334/2001 (³). The person responsible for putting into circu-
lation Formi LHS (potassium diformate) submitted an application
to obtain a provisional authorisation for extension of use for four
years, as a growth promoter for sows, according to Article 4 of
that Directive. The European Food Safety Authority (EFSA) has
delivered an opinion on the safety of the use of this preparation
for humans, animals and environment, under the conditions set
out in Annex I to this Regulation. The assessment shows that the
conditions laid down in Article 9a(1) of Directive 70/524/EEC for
such authorisation are satisfied. Accordingly, the use of this
preparation, as specified in Annex I, should be authorised for
four years.

(6) The use of the micro-organism Bacillus cereus var. toyoi NCIMB
40112/CNCM I-1012 was provisionally authorised, for the first time, for
chickens for fattening and for rabbits for fattening by Commission Regulation (EC)
No 1411/1999 (⁴). New data were submitted in support of an application for authorisation without
time-limit of that micro-organism. The assessment shows that the

(²) OJ L 268, 18.10.2003, p. 29. Regulation as amended by Commission Regu-

(³) OJ L 180, 3.7.2001, p. 18. Regulation as amended by Commission Regu-

The conditions laid down in Article 3a of Directive 70/524/EEC for such authorisation are satisfied. Accordingly, the use of that micro-organism preparation, as specified in Annex II, should be authorised without a time-limit.

(7) The use of the micro-organism *Enterococcus faecium* NCIMB 10415 was provisionally authorised, for the first time, for sows by Commission Regulation (EC) No 866/1999 (1). New data were submitted in support of an application for authorisation without time-limit of that micro-organism. The assessment shows that the conditions laid down in Article 3a of Directive 70/524/EEC for such authorisation are satisfied. Accordingly, the use of that micro-organism preparation, as specified in Annex II, should be authorised without a time-limit.

(8) The use of the micro-organism *Enterococcus faecium* DSM 10663/NCIMB 10415 was provisionally authorised, for the first time, for piglets by Regulation (EC) No 1411/1999. New data were submitted in support of an application for authorisation without time-limit of that micro-organism. The assessment shows that the conditions laid down in Article 3a of Directive 70/524/EEC for such authorisation are satisfied. Accordingly, the use of that micro-organism preparation, as specified in Annex II, should be authorised without a time-limit.

(9) The use of the micro-organism *Saccharomyces cerevisiae* MUCL 39885 was provisionally authorised, for the first time, for piglets by Regulation (EC) No 1411/1999. New data were submitted in support of an application for authorisation without time-limit of that micro-organism. The assessment shows that the conditions laid down in Article 3a of Directive 70/524/EEC for such authorisation are satisfied. Accordingly, the use of that micro-organism preparation, as specified in Annex II, should be authorised without a time-limit.

(10) The use of the micro-organism *Saccharomyces cerevisiae* CNCM I-1077 was provisionally authorised, for the first time, for dairy cows and cattle for fattening by the Commission Regulation (EC) No 1436/98 (2). New data were submitted in support of an application for authorisation without time-limit of that micro-organism. The assessment shows that the conditions laid down in Article 3a of Directive 70/524/EEC for such authorisation are satisfied. Accordingly, the use of that micro-organism preparation, as specified in Annex II, should be authorised without a time-limit.

(11) The use of the micro-organism *Pediococcus acidilactici* CNCM MA 18/5M was provisionally authorised, for the first time, for chickens for fattening by Regulation (EC) No 866/1999. New data were submitted in support of an application for authorisation without time-limit of that micro-organism. The assessment shows that the conditions laid down in Article 3a of Directive 70/524/EEC for such authorisation are satisfied. Accordingly, the use of that micro-organism preparation, as specified in Annex II, should be authorised without a time-limit.

(12) The assessment of these applications shows that certain procedures should be required to protect workers from exposure to the additives set out in the Annexes. Such protection should be assured by the application of Council Directive 89/391/EEC of 12 June 1989 on the introduction of measures to encourage improvements in the safety and health of workers at work (3).

(13) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS REGULATION:

Article 1

The preparation belonging to the group ‘Growth promoters’, as specified in Annex I, is authorised provisionally for four years for use as an additive in animal nutrition under the conditions laid down in that Annex.

Article 2

The preparations belonging to the group ‘Micro-organisms’, as specified in Annex II, are authorised without a time-limit for use as additives in animal nutrition under the conditions laid down in that Annex.

Article 3

This Regulation shall enter into force on the third day following its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.
