

Commission Regulation (EC) No 1251/2008 of 12 December 2008 implementing Council Directive 2006/88/EC as regards conditions and certification requirements for the placing on the market and the import into the Community of aquaculture animals and products thereof and laying down a list of vector species (Text with EEA relevance)

COMMISSION REGULATION (EC) No 1251/2008

of 12 December 2008

implementing Council Directive 2006/88/EC as regards conditions and certification requirements for the placing on the market and the import into the Community of aquaculture animals and products thereof and laying down a list of vector species

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 2006/88/EC of 24 October 2006 on animal health requirements for aquaculture animals and products thereof, and on the prevention and control of certain diseases in aquatic animals<sup>(1)</sup>, and in particular Article 17(2), Articles 22 and 25 and Article 61(3) thereof,

Whereas:

- (1) Directive 2006/88/EC lays down the animal health requirements to be applied for the placing on the market and the import and the transit through the Community of aquaculture animals and products thereof. Directive 2006/88/EC repeals and replaces Council Directive 91/67/EEC concerning the animal health conditions governing the placing on the market of aquaculture animals and products<sup>(2)</sup> from 1 August 2008.
- (2) According to Directive 2006/88/EC aquaculture animal means any aquatic animal, including ornamental aquatic animals, at all its life stages, including eggs and sperm/gametes, reared in a farm or mollusc farming area, including any aquatic animal from the wild intended for a farm or mollusc farming area. Aquatic animals mean fish, molluscs and crustaceans.
- (3) Commission Decision 1999/567/EC of 27 July 1999 laying down the model of the certificate referred to in Article 16(1) of Directive 91/67/EEC<sup>(3)</sup> and Commission Decision 2003/390/EC of 23 May 2003 establishing special conditions for placing on the market of aquaculture animals species considered not susceptible to certain diseases and the products thereof<sup>(4)</sup> lay down certain rules for the placing on the market of aquaculture animals, including certification requirements. Commission Decision 2003/804/EC of 14 November 2003 laying down the animal health conditions and certification requirements for imports of molluscs, their eggs and gametes for further growth, fattening, relaying or human consumption<sup>(5)</sup>, Commission Decision 2003/858/EC of 21 November 2003 laying down the animal health conditions and

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

certification requirements for introduction of live fish, their eggs and gametes intended for farming, and live fish of aquaculture origin and products thereof intended for human consumption<sup>(6)</sup> and Commission Decision 2006/656/EC of 20 September 2006 laying down the animal health conditions and certification requirements for imports of fish for ornamental purpose<sup>(7)</sup> lay down conditions for imports of aquaculture animals into the Community. Those Decisions implement Directive 91/67/EEC.

- (4) Directive 2006/88/EC provides that the placing on the market of aquaculture animals is to be subject to animal health certification when the animals are introduced into a Member State, zone or compartment declared disease-free in accordance with that Directive or subject to a surveillance or eradication programme. Accordingly, it is appropriate to lay down certification requirements and harmonised model animal health certificates in this Regulation to replace the certification requirements laid down under Directive 91/67/EEC and the Decisions implementing that Directive.
- (5) Regulation (EC) No 853/2004 of the European Parliament and of the Council of 29 April 2004 laying down specific hygiene rules for food of animal origin<sup>(8)</sup> lays down specific rules on the hygiene of food of animal origin for food business operators, including packaging and labelling requirements. The animal health certification requirements provided for in the present Regulation for the placing on the market and import of aquaculture animals and products thereof intended for further processing before human consumption should not apply to those animals and products packed and labelled in accordance with Regulation (EC) No 853/2004, subject to certain conditions.
- (6) Directive 2006/88/EC provides that Member States are to ensure that the placing on the market of ornamental aquatic animals does not jeopardise the health status of aquatic animals with regard to non-exotic diseases listed in Part II of Annex IV thereto.
- (7) Ornamental aquatic animals placed on the market in the Community and intended for facilities without any direct contact with natural waters, namely closed ornamental facilities, do not pose the same risks to other sectors of Community aquaculture or to wild stocks. Accordingly, animal health certification should not be required under this Regulation for such animals.
- (8) In order to provide Member States, where the entire territory, or certain zones or compartments thereof, are declared free of one of more of the non-exotic diseases for which ornamental aquatic animals are susceptible, with information on the movements into their territory of ornamental aquatic animals intended for closed ornamental facilities, it is appropriate that such movements are notified through the Traces system as provided for in Council Directive 90/425/EEC of 26 June 1990 concerning veterinary and zootechnical checks applicable in intra-Community trade in certain live animals and products with a view to the completion of the internal market<sup>(9)</sup> and introduced by Commission Decision 2004/292/EC of 30 March 2004 on the introduction of the Traces system<sup>(10)</sup>.
- (9) Movements within the Community from closed ornamental facilities to open ornamental facilities or into the wild, may represent a high risk to other sectors of Community aquaculture, and should not be allowed without the authorisation of the competent authorities of the Member States.

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

- (10) Directive 2006/88/EC provides that Member States are to take certain minimum control measures in the event of confirmation of an exotic or non-exotic disease listed in Part II of Annex IV thereto in aquaculture animals or wild aquatic animals or in the case of emerging diseases. In addition, that Directive provides that Member States are to ensure that the placing on the market of aquaculture animals is subject to animal health certification when the animals are allowed to leave an area subject to those control measures.
- (11) Accordingly, this Regulation should lay down animal health conditions and certification requirements for consignments of aquaculture animals and products thereof leaving Member States, zones or compartments subject to disease control measures.
- (12) Directive 2006/88/EC provides that Member States are to ensure that aquaculture animals and products thereof are introduced into the Community only from third countries or parts thereof that appear on a list drawn up in accordance with that Directive.
- (13) Imports into the Community of aquaculture animals should only be permitted from third countries that have animal health legislation and control system equivalent to those in the Community. Accordingly, this Regulation should establish a list of third countries, territories, zones or compartments, from which Member States are permitted to introduce into the Community aquaculture animals for farming, relaying areas, put and take fisheries and open ornamental facilities. However, the import into the Community of certain ornamental fish, molluscs and crustaceans intended for closed ornamental facilities should be permitted from third countries that are members of the World Organisation for Animal Health (OIE).
- (14) Third countries and territories which are allowed to export to the Community aquaculture animals for human consumption based on public health considerations should also be allowed to export to the Community under the animal health provisions of this Regulation. Aquaculture animals and products thereof intended for human consumption should therefore only be imported into the Community from third countries, territories, zones or compartments which are included on a list drawn up in accordance with Article 11(1) of Regulation (EC) No 854/2004 of the European Parliament and of the Council of 29 April 2004 laying down specific rules for the organisation of official controls on products of animal origin intended for human consumption<sup>(11)</sup>.
- (15) Such lists are set out in Annexes I and II to Commission Decision 2006/766/EC of 6 November 2006 establishing the lists of third countries and territories from which imports of bivalve molluscs, echinoderms, tunicates, marine gastropods and fishery products are permitted<sup>(12)</sup> and, for a transitional period until 31 December 2009, by Commission Regulation (EC) No 2076/2005 of 5 December 2005 laying down transitional arrangements for the implementation of Regulations (EC) No 853/2004, (EC) No 854/2004 and (EC) No 882/2004 of the European Parliament and of the Council and amending Regulations (EC) No 853/2004 and (EC) No 854/2004<sup>(13)</sup>. In the interest of consistency of Community legislation, those lists should be taken into account in this Regulation.

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

- (16) Directive 2006/88/EC provides that import of aquaculture animals and products thereof are to be accompanied by a document containing an animal health certificate upon their entry into the Community. It is necessary to lay down in this Regulation in detail the animal health conditions for imports of aquaculture animals into the Community, including model animal health certificates, which should replace the import conditions laid down under Directive 91/67/EEC.
- (17) Commission Regulation (EC) No 2074/2005 of 5 December 2005 laying down implementing measures for certain products under Regulation (EC) No 853/2004 of the European Parliament and of the Council and for the organisation of official controls under Regulation (EC) No 854/2004 of the European Parliament and of the Council and Regulation (EC) No 882/2004 of the European Parliament and of the Council, derogating from Regulation (EC) No 852/2004 of the European Parliament and of the Council and amending Regulations (EC) No 853/2004 and (EC) No 854/2004<sup>(14)</sup> lays down model health certificates for import of fishery products and of live bivalve molluscs intended for human consumption. In the interests of coherency of Community legislation, this Regulation should provide that those model health certificates accompany import of products covered by this Regulation.
- (18) Ornamental aquatic animals, including fish, molluscs and crustaceans, are to a large extent introduced into the Community from third countries and territories. To protect the animal health status of ornamental facilities within the Community, it is necessary to lay down certain animal health requirements for the import of such animals.
- (19) It is important to ensure that the animal health status of aquaculture animals imported into the Community is not jeopardised during transport to the Community.
- (20) The release of imported aquaculture animals into the wild in the Community poses a particularly high risk to the animal health status of the Community, since the control and eradication of diseases in natural waters are difficult. Accordingly, such release should require a specific authorisation from the competent authority and only be authorised under the condition that appropriate measures are taken to secure the animal health status at the place of release.
- (21) Aquaculture animals intended for transiting through the Community should comply with the same requirements as aquaculture animals intended for import into the Community.
- (22) Specific conditions for transit via the Community of consignments to and from Russia should be provided for owing to the geographical situation of Kaliningrad which affects only Latvia, Lithuania and Poland. In the interests of consistency of Community legislation, Commission Decision 2001/881/EC of 7 December 2001 drawing up a list of border inspection posts agreed for veterinary checks on animals and animal products from third countries and updating the detailed rules concerning the checks to be carried out by the experts of the Commission<sup>(15)</sup> and Council Directive 97/78/EC of 18 December 1997 laying down the principles governing the organisation of veterinary checks on products entering the Community from third countries<sup>(16)</sup> should be taken into account in this Regulation.

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

- (23) Council Directive 96/93/EC of 17 December 1996 on the certification of animals and animal products<sup>(17)</sup> which lays down the rules to be observed in issuing veterinary certificates, should apply to animal health certificates issued under this Regulation.
- (24) Article 17 of Directive 2006/88/EC provides that where scientific data or practical experience substantiates that species other than the susceptible species referred to in Part II of Annex IV to that Directive may be responsible for the transmission of a specific disease by acting as vector species, Member States are to ensure that where those species are introduced for farming or restocking purposes into a Member State, zone or compartment declared free of that specific disease, certain requirements provided for in the Directive are to be complied with. Article 17 of Directive 2006/88/EC also provides for the drawing up of a list of vector species. A list of vector species should therefore be adopted.
- (25) The European Food Safety Authority (EFSA) has delivered three opinions on that issue: Scientific Opinion of the Panel on Animal Health and Welfare on a request from the European Commission on possible vector species and live stages of susceptible species not transmitting disease as regards certain fish diseases<sup>(18)</sup>, Scientific Opinion of the Panel on Animal Health and Welfare on a request from the European Commission on possible vector species and live stages of susceptible species not transmitting disease as regards certain mollusc diseases<sup>(19)</sup>, and Scientific Opinion of the Panel on Animal Health and Welfare on a request from the European Commission on possible vector species and live stages of susceptible species not transmitting disease as regards certain crustacean diseases<sup>(20)</sup>.
- (26) According to those scientific opinions, the likelihood of the transfer and establishment of the diseases listed in Directive 2006/88/EC by the potential vector species or groups of vector species assessed ranked from negligible/extremely low to moderate, under certain conditions. That assessment covered aquatic species which are used in aquaculture and traded for the purpose of farming.
- (27) In drawing up the list of vector species, the EFSA opinions should be taken into account. In deciding which species should be included in that list, an appropriate level of protection of the animal health status of aquaculture animals in the Community should be ensured, while at the same time avoiding the introduction of unnecessary trade restrictions. Consequently, species which pose a moderate risk of disease transmission, according to those opinions, should be included in the list.
- (28) Many of the species identified as possible vectors for certain diseases in the EFSA opinions, should only be regarded as such when they originate from an area where species susceptible to the disease in question are present and are intended for an area where those same susceptible species are also present. Accordingly, aquaculture animals of possible vector species should only be regarded as vector species for the purposes of Article 17 of Directive 2006/88/EC under such conditions.
- (29) In the interest of clarity and coherence of Community legislation, Decisions 1999/567/EC, 2003/390/EC, 2003/804/EC, 2003/858/EC and 2006/656/EC should be repealed and replaced by this Regulation.

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

- (30) It is appropriate to provide for a transitional period to permit Member States and industry to take the necessary measures to comply with the new requirements laid down in this Regulation.
- (31) Bearing in mind the large trade flow of ornamental aquatic animals of species susceptible to epizootic ulcerative syndrome (EUS) and the need to carry out further studies on the risk of that disease to the ornamental aquatic animal industry, including a re-assessment of the list of susceptible species, an immediate interruption of import of ornamental fish species susceptible to EUS intended only for closed ornamental facilities should be avoided. It is therefore appropriate to introduce a transitional period as regards the requirements related to that disease for those consignments. A transitional period is also necessary in order to give third countries sufficient time to document freedom from that disease.
- (32) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS REGULATION:

## CHAPTER I

### SUBJECT MATTER, SCOPE AND DEFINITIONS

#### *Article 1*

#### **Subject matter and scope**

This Regulation lays down:

- (a) a list of vector species;
- (b) [F<sup>1</sup>animal health conditions for the placing on the market of:
- (i) ornamental aquatic animals either originating from or intended for closed ornamental facilities; and
  - (ii) [F<sup>2</sup>aquaculture animals intended for farming, relaying areas, put and take fisheries, open ornamental facilities and restocking, and for dispatch centres, purification centres and similar businesses before human consumption in Member States and parts thereof with national measures approved by Commission Decision 2010/221/EU<sup>(21)</sup>;]
- (c) animal health certification requirements for the placing on the market of:
- (i) aquaculture animals intended for farming, including relaying areas, put and take fisheries and open ornamental facilities, and restocking; and
  - (ii) aquaculture animals and products thereof intended for human consumption;
- (d) animal health conditions and certification requirements for imports into the Community, and transit therein, including storage during transit, of:

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

- (i) aquaculture animals intended for farming, including relaying areas, put and take fisheries and open ornamental facilities;
- (ii) aquaculture animals and products thereof intended for human consumption;
- (iii) ornamental aquatic animals intended for closed ornamental facilities.

#### **Textual Amendments**

- F1** Substituted by [Commission Regulation \(EU\) No 346/2010 of 15 April 2010 amending Regulation \(EC\) No 1251/2008 as regards the placing on the market and import requirements for consignments of aquaculture animals intended for Member States or parts thereof with national measures approved by Decision 2010/221/EU \(Text with EEA relevance\).](#)
- F2** Substituted by [Commission Regulation \(EU\) No 350/2011 of 11 April 2011 amending Regulation \(EC\) No 1251/2008 as regards the placing on the market requirements for consignments of Pacific oysters intended for Member States or parts thereof with national measures regarding ostreid herpes virus 1  \$\mu\$ var \(OsHV-1  \$\mu\$ var\) approved by Decision 2010/221/EU \(Text with EEA relevance\).](#)

### *Article 2*

#### **Definitions**

For the purposes of this Regulation, the following definitions shall apply:

- (a) ‘closed ornamental facilities’ means pet shops, garden centres, garden ponds, commercial aquaria or wholesalers keeping ornamental aquatic animals:
  - (i) without any direct contact with natural waters in the Community; or
  - (ii) which are equipped with an effluent treatment system reducing the risk of transmitting diseases to the natural waters to an acceptable level;
- (b) ‘open ornamental facility’ means ornamental facilities other than closed ornamental facilities;
- (c) ‘restocking’ means the release of aquaculture animals into the wild.

### CHAPTER II

#### **VECTOR SPECIES**

### *Article 3*

#### **List of vector species**

Aquaculture animals of species listed in Column 2 of the table in Annex I to this Regulation shall only be regarded as vectors for the purposes of Article 17 of Directive 2006/88/EC where those animals fulfil the conditions set out in Columns 3 and 4 of that table.

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

## CHAPTER III

### PLACING ON THE MARKET OF AQUACULTURE ANIMALS

#### *Article 4*

#### **Ornamental aquatic animals originating from or intended for ornamental facilities**

1 Movements of ornamental aquatic animals shall be subject to notification under the computerised system provided for in Article 20(1) of Directive 90/425/EEC (Traces) where the animals:

- a originate from ornamental facilities in one Member State;
- b are intended for closed ornamental facilities in another Member State, where the entire territory, or certain zones or compartments thereof:
  - (i) are declared free of one or more of the non-exotic diseases listed in Part II of Annex IV to Directive 2006/88/EC in accordance with Articles 49 or 50 thereof; or
  - (ii) are subject to a surveillance or eradication programme in accordance with Article 44(1) or (2) of that Directive; and
- c are of species susceptible to one or more of the diseases for which the Member State or zone or compartment concerned is declared disease-free, or for which a surveillance or eradication programme applies, as referred to in point (b).

2 Ornamental aquatic animals kept in closed ornamental facilities shall not be released into open ornamental facilities, farms, relaying areas and put- and take fisheries, mollusc farming areas or into the wild, unless authorised by the competent authority.

The competent authority shall only grant such authorisation where the release does not jeopardise the health status of the aquatic animals at the place of release and it shall ensure that appropriate risk mitigating measures are taken.

#### *Article 5*

#### **Aquaculture animals intended for farming, relaying areas, put and take fisheries, open ornamental facilities and restocking**

Consignments of aquaculture animals intended for farming, relaying areas, put and take fisheries, open ornamental facilities, or restocking shall be accompanied by an animal health certificate completed in accordance with the model set out in Part A of Annex II and the explanatory notes in Annex V, where the animals:

- (a) are introduced into Member States, zones or compartments:
  - (i) declared free of one or more of the non-exotic diseases listed in Part II of Annex IV to Directive 2006/88/EC in accordance with Articles 49 or 50 thereof; or
  - (ii) subject to a surveillance or eradication programme in accordance with Article 44(1) or (2) of that Directive;
- (b) are of species susceptible to one or more of the diseases, or vector species for one or more of the diseases, for which the Member State, zone or compartment concerned is

---

*Status: Point in time view as at 03/02/2014.*

---

declared disease-free, or for which a surveillance or eradication programme applies, as referred to in point (a).

### *Article 6*

#### **Aquaculture animals and products thereof intended for further processing before human consumption**

1 Consignments of aquaculture animals and products thereof intended for further processing before human consumption, shall be accompanied by an animal health certificate completed in accordance with the model set out in Part B of Annex II and the explanatory notes in Annex V, where they:

- a are introduced into Member States, zones or compartments:
  - (i) declared free of one or more of the non-exotic diseases in Part II of Annex IV to Directive 2006/88/EC in accordance with Articles 49 or 50 of that Directive; or
  - (ii) subject to a surveillance or eradication programme in accordance with Article 44(1) or (2) of that Directive;
- b are of species susceptible to one or more of the diseases for which the Member State, zone or compartment concerned is declared disease-free, or for which a surveillance or eradication programme applies, as referred to in point (a).

2 Paragraph 1 shall not apply to:

- a fish which have been slaughtered and eviscerated before dispatch;
- b molluscs or crustaceans which are intended for human consumption and packed and labelled for that purpose in accordance with Regulation (EC) No 853/2004, and which are:
  - (i) non-viable, which means no longer able to survive as living animals if returned to the environment from which they were obtained; or
  - (ii) intended for further processing without temporary storage at the place of processing;
- c aquaculture animals or products thereof placed on the market for human consumption without further processing, provided that they are packed in retail-sale packages which comply with the provisions for such packages in Regulation (EC) No 853/2004.

### *Article 7*

#### **Live molluscs and crustaceans intended for purification centres, dispatch centres and similar businesses before human consumption**

Consignments of live molluscs and crustaceans intended for purification centres, dispatch centres and similar businesses before human consumption, shall be accompanied by an animal health certificate completed in accordance with the model set out in Part B of Annex II and the explanatory notes in Annex V, where they:

- (a) are introduced into Member States, zones or compartments:
  - (i) declared free of one or more of the non-exotic diseases listed in Part II of Annex IV to Directive 2006/88/EC in accordance with Articles 49 or 50; or

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

- (ii) subject to a surveillance or eradication programme in accordance with Article 44(1) or (2) of that Directive;
- (b) are of species susceptible to one or more of the diseases for which the Member State, zone or compartment concerned is declared disease-free, or for which a surveillance or eradication programme applies, as referred to in point (a).

### *Article 8*

#### **Aquaculture animals and products thereof leaving Member States, zones and compartments subject to disease control measures, including eradication programmes**

1 Consignments of aquaculture animals and products thereof leaving Member States, zones or compartments subject to the disease control measures provided for in Sections 3 to 6 of Chapter V of Directive 2006/88/EC, but for which an exemption from those disease control measures has been granted by the competent authority, shall be accompanied by an animal health certificate completed in accordance with the model set out in:

- a Part A of Annex II and the explanatory notes in Annex V where the consignments consist of aquaculture animals intended for farming, relaying areas, put and take fisheries, open ornamental facilities or restocking; and
- b Part B of Annex II and the explanatory notes in Annex V where the consignments consist of aquaculture animals and products thereof intended for further processing, purification centres, dispatch centres or similar businesses before human consumption.

2 Consignments of aquaculture animals intended for farming, relaying areas, put and take fisheries, open ornamental facilities or restocking shall be accompanied by an animal health certificate completed in accordance with the model set out in Part A of Annex II and the explanatory notes in Annex V, where they:

- a are leaving a Member State, zone or compartment with an eradication programme approved in accordance with Article 44(2) of Directive 2006/88/EC;
- b are of species susceptible to one or more of the diseases, or vector species for one or more of the diseases, for which the eradication programme applies, as referred to in point (a).

3 Consignments of aquaculture animals and products thereof intended for further processing, purification centres, dispatch centres or similar businesses before human consumption shall be accompanied by an animal health certificate completed in accordance with the model set out in Part B of Annex II and the explanatory notes in Annex V, where they:

- a are leaving a Member State, zone or compartment with an eradication programme approved in accordance with Article 44(2) of Directive 2006/88/EC;
- b are of species susceptible to one or more of the diseases for which the eradication programme applies, as referred to in point (a).

4 This Article shall not apply to:

- a fish which have been slaughtered and eviscerated before dispatch;
- b molluscs or crustaceans which are intended for human consumption and packed and labelled for that purpose in accordance with Regulation (EC) No 853/2004, and which are:
  - (i) non-viable, which means no longer able to survive as living animals if returned to the environment from which they were obtained; or

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

- (ii) intended for further processing without temporary storage at the place of processing;
- c aquaculture animals or products thereof placed on the market for human consumption without further processing, provided that they are packed in retail-sale packages which comply with the provisions for such packages in Regulation (EC) No 853/2004.

### *[<sup>F3</sup>Article 8a*

#### **Aquaculture animals intended for farming, relaying areas, put and take fisheries, open ornamental facilities and restocking in Member States and parts thereof with national measures approved by Decision 2010/221/EU**

1 Consignments of aquaculture animals intended for farming, relaying areas, put and take fisheries, open ornamental facilities, or restocking shall be accompanied by an animal health certificate completed in accordance with the model set out in Part A of Annex II and the explanatory notes set out in Annex V, where the animals:

- a are introduced into Member States or parts thereof listed in the second and fourth column of the table set out in:
  - (i) Annex I to Decision 2010/221/EU as free of one or more of the diseases listed in the first column of that table; or
  - (ii) Annex II to Decision 2010/221/EU as subject to an eradication programme for one or more of the diseases listed in the first column of that table;
  - (iii) [<sup>F4</sup>Annex III to Decision 2010/221/EU as subject to a surveillance programme for one or more of the diseases listed in the first column of that table;]
- b are of species which are listed in Part C of Annex II as species susceptible to the diseases, for which the Member State concerned or part thereof is regarded as disease-free, or for which an eradication programme applies in accordance with Decision 2010/221/EU, as referred to in point (a).

2 Consignments of animals referred to in paragraph 1 shall comply with the animal health requirements set out in the model animal health certificate and explanatory notes as referred to in paragraph 1.

3 Paragraph 1 and 2 shall apply to consignments of fish of any species originating from waters where species listed in Part C of Annex II as species susceptible to infection with *Gyrodactylus salaris*, are present, where those consignments are intended for a Member State or part thereof listed in Annex I to Decision 2010/221/EU as free of *Gyrodactylus salaris* (GS).]

#### **Textual Amendments**

- F3** Inserted by Commission Regulation (EU) No 346/2010 of 15 April 2010 amending Regulation (EC) No 1251/2008 as regards the placing on the market and import requirements for consignments of aquaculture animals intended for Member States or parts thereof with national measures approved by Decision 2010/221/EU (Text with EEA relevance).
- F4** Inserted by Commission Regulation (EU) No 350/2011 of 11 April 2011 amending Regulation (EC) No 1251/2008 as regards the placing on the market requirements for consignments of Pacific oysters intended for Member States or parts thereof with national measures regarding ostreid herpes virus 1  $\mu$ var (OsHV-1  $\mu$ var) approved by Decision 2010/221/EU (Text with EEA relevance).

### *[<sup>F4</sup>Article 8b*

#### **Live molluscs intended for dispatch centres, purification centres or similar businesses before human consumption in Member States and parts thereof with national measures approved by Decision 2010/221/EU**

1 Consignments of live molluscs intended for dispatch centres, purification centres or similar businesses before human consumption shall be accompanied by an animal health certificate completed in accordance with the model set out in Part B of Annex II and the explanatory notes set out in Annex V, where the animals:

- a are introduced into Member States or parts thereof listed in the second and fourth column of the table set out in Annex III to Decision 2010/221/EU as subject to a surveillance programme for one or more of the diseases listed in the first column of that table;
- b are of species which are listed in Part C of Annex II as species susceptible to the disease(s), for which a surveillance programme applies in accordance with Decision 2010/221/EU, as referred to in point (a).

2 Consignments of live molluscs referred to in paragraph 1 shall comply with the animal health requirements set out in the model animal health certificate and explanatory notes as referred to in that paragraph.

3 This Article shall not apply to consignments intended for dispatch centres, purification centres or similar businesses which are equipped with an effluent treatment system validated by the competent authority that:

- a inactivates enveloped viruses; or
- b reduces the risk of transmitting diseases to the natural waters to an acceptable level.]

## CHAPTER IV

### CONDITIONS FOR IMPORTS

#### *Article 10*

#### **Aquaculture animals intended for farming, relaying areas, put and take fisheries and open ornamental facilities**

- 1 Aquaculture animals intended for farming, relaying areas, put and take fisheries and open ornamental facilities shall only be imported into the Community from third countries, territories, zones or compartments listed in Annex III.
- 2 Consignments of the aquaculture animals referred to in paragraph 1 shall:
  - a be accompanied by an animal health certificate completed in accordance with the model set out in Part A of Annex IV and the explanatory notes in Annex V;
  - b comply with the animal health requirements set out in the model certificate and explanatory notes, as referred to in point (a).

#### *Article 11*

#### **Ornamental aquatic animals intended for closed ornamental facilities**

- 1 Ornamental fish of species susceptible to one or more of the diseases listed in Part II of Annex IV to Directive 2006/88/EC and intended for closed ornamental facilities shall only be imported into the Community from third countries, territories, zones or compartments listed in Annex III to this Regulation.
- [<sup>F52</sup> Ornamental fish which are not of susceptible species to any of the diseases listed in Part II of Annex IV to Directive 2006/88/EC, and ornamental molluscs and ornamental crustaceans, intended for closed ornamental facilities, shall only be imported into the Community from third countries or territories that:
  - a are members of the World Organisation for Animal Health (OIE); or
  - b are listed in Annex III and have a formal agreement with the OIE to regularly submit information concerning their animal health status to the members of that organisation.]
- 3 Consignments of the animals referred to in paragraphs 1 and 2 shall:
  - a be accompanied by an animal health certificate completed in accordance with the model set out in Part B of Annex IV and the explanatory notes in Annex V; and
  - b comply with the animal health requirements set out in the model certificate and explanatory notes, as referred to in point (a).

#### **Textual Amendments**

- F5** Substituted by [Commission Regulation \(EC\) No 719/2009 of 6 August 2009 amending Regulation \(EC\) No 1251/2008 as regards the list of third countries and territories from which certain crustaceans and ornamental aquatic animals may be imported into the Community \(Text with EEA relevance\).](#)

---

### Article 12

#### **Aquaculture animals and products thereof intended for human consumption**

- 1 Aquaculture animals and products thereof intended for human consumption shall only be imported into the Community from third countries, territories, zones or compartments which are included on a list drawn up in accordance with Article 11(1) of Regulation (EC) No 854/2004.
- 2 Consignments of the animals and products referred to in paragraph 1 shall:
  - a be accompanied by a joint public and animal health certificate completed in accordance with the relevant models set out in Appendixes IV and V of Annex VI to Regulation (EC) No 2074/2005; and
  - b comply with the animal health requirements and notes set out in the model certificates and attestations, as referred to in point (a).
- 3 This Article shall not apply where the aquaculture animals are intended for relaying areas or re-immersion into Community waters, in which case Article 10 shall apply.

### Article 13

#### **Electronic certification**

Electronic certification and other agreed systems harmonised at Community level may be used for the certificates and attestations provided for in this Chapter.

### Article 14

#### **Transport of aquaculture animals**

- 1 Aquaculture animals for import into the Community shall not be transported under conditions that may alter their health status. In particular they shall not be transported in the same water or micro-container as aquatic animals which are of a lower health status or which are not intended for import into the Community.
- 2 During transportation to the Community, the aquaculture animals shall not be unloaded from their micro-container and the water in which they are transported shall not be changed in the territory of a third country which is not approved for import of such animals into the Community or which has a lower health status than the place of destination.
- 3 Where consignments of aquaculture animals are transported by sea to the Community border, an addendum for transport of live aquaculture animals by sea, completed in accordance with the model set out in Part D of Annex IV, shall be attached to the relevant animal health certificate.

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

## Article 15

### **Requirements for the release of aquaculture animals and products thereof and for transport water**

1 Aquaculture animals and products thereof imported into the Community and intended for human consumption shall be handled appropriately to avoid contamination of natural waters in the Community.

2 Aquaculture animals imported into the Community shall not be released into the wild within the Community, unless authorised by the competent authority of the place of destination.

The competent authority may only grant authorisations where the release does not jeopardise the health status of the aquatic animals at the place of release and it shall ensure that appropriate risk-mitigating measures are taken.

3 Transport water from imported consignments of aquaculture animals and products thereof shall be handled appropriately to avoid contamination of natural waters in the Community.

## CHAPTER V

### **CONDITIONS FOR TRANSIT**

## Article 16

### **Transit and storage**

Consignments of live aquaculture animals, fish eggs and un-eviscerated fish which are introduced into the Community, but intended for a third country, either by transit immediately through the Community, or after storage in the Community, shall comply with the requirements laid down in Chapter IV. The certificate, which accompanies the consignments, shall bear the words 'for transit through the EC'. The consignments shall also be accompanied by a certificate required by the third country of destination.

However, where those consignments are intended for human consumption, they shall be accompanied by an animal health certificate completed in accordance with the model set out in Part C of Annex IV and the explanatory notes in Annex V.

## Article 17

### **Derogation for transit through Latvia, Lithuania and Poland**

1 By way of derogation from Article 16, transit by road or by rail shall be authorised between the border inspection posts in Latvia, Lithuania and Poland listed in the Annex to Commission Decision 2001/881/EC, of consignments coming from and bound for Russia, directly or via another third country, where the following conditions are met:

- a the consignment is sealed with a serially numbered seal by the official veterinarian at the border inspection post of entry;

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

- b the documents accompanying the consignment, as provided for in Article 7 of Directive 97/78/EC, are stamped with the words ‘Only for transit to Russia via the EC’ on each page by the official inspector at the border inspection post of entry;
  - c the procedural requirements provided for in Article 11 of Directive 97/78/EC are complied with; and
  - d the consignment is certified as acceptable for transit on the common veterinary entry document issued by the official inspector at the border inspection post of entry.
- 2 The consignments referred to in paragraph 1 may not be unloaded or put into storage, as referred to in Article 12(4) or in Article 13 of Directive 97/78/EC, within the Community.
- 3 Regular audits shall be conducted by the competent authority to ensure that the number of consignments, as referred to in paragraph 1, and the corresponding quantities of products leaving the Community match the number and quantities entering the Community.

## CHAPTER VI

### GENERAL, TRANSITIONAL AND FINAL PROVISIONS

#### <sup>F6</sup>Article 18

#### [<sup>F6</sup>Certification requirements laid down in other Community legislation]

---

#### Textual Amendments

- F6** Deleted by Commission Regulation (EU) No 346/2010 of 15 April 2010 amending Regulation (EC) No 1251/2008 as regards the placing on the market and import requirements for consignments of aquaculture animals intended for Member States or parts thereof with national measures approved by Decision 2010/221/EU (Text with EEA relevance).

#### Article 19

#### Repeal

Decisions 1999/567/EC, 2003/390/EC, 2003/804/EC, 2003/858/EC and 2006/656/EC are repealed with effect from 1 January 2009.

References to the repealed Decisions shall be construed as references to this Regulation.

#### [<sup>F7</sup>Article 20

For a transitional period until 31 December 2012, Member States may authorise the import of ornamental aquatic animals of species susceptible to epizootic ulcerative syndrome (EUS) intended solely for closed ornamental facilities from third countries or territories that are Members of the World Organisation for Animal Health (OIE).

During that transitional period, the requirements concerning EUS set out in Part II.2 of the model animal health certificate set out in Part B of Annex IV, shall not apply to ornamental aquatic animals intended solely for closed ornamental facilities.]

### Textual Amendments

- F8** Deleted by Commission Implementing Regulation (EU) No 1012/2012 of 5 November 2012 amending Regulation (EC) No 2074/2005 and Regulation (EC) No 1251/2008 as regards the list of vector species, the health requirements and the certification requirements concerning epizootic ulcerative syndrome and as regards the entry for Thailand in the list of third countries from which imports of certain fish and fishery products into the Union are permitted (Text with EEA relevance).

Status: Point in time view as at 03/02/2014.

Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)

EUROPEAN UNION		Placing on the market of aquaculture animals for farming, relaying, put and take fisheries, open ornamental facilities and restocking	
II. Health information		II.a. Certificate reference No	II.b.
Part II: Certification	<b>II.1 General requirements</b>		
			I, the undersigned official inspector, hereby certify that the aquaculture animals referred to in Part I of this certificate:
	II.1.1		either <sup>(1)</sup> [have been inspected within <sup>(1)(2)</sup> [72] <sup>(1)</sup> [24] hours of loading, and showed no clinical signs of disease]
			or <sup>(1)</sup> [in the case of eggs and molluscs, come from a farm or mollusc farming area where, according to the records of the farm or mollusc farming area, there is no indication of disease problems]
			or <sup>(1)(3)</sup> [in the case of wild aquatic animals, according to the best of my knowledge and belief are clinically healthy];
	II.1.2		are not subject to any prohibitions due to unresolved increased mortality;
	II.1.3		are not intended for destruction or slaughter for the eradication of diseases;
	II.1.4		comply with the requirements for placing on the market laid down in Directive 2006/88/EC;
	II.1.5		<sup>(1)</sup> [in the case of molluscs, were subject to an individual visual check of each part of the consignment, and no molluscs species other than those specified in Part I of the certificate were detected.]
	<b>II.2</b>		<sup>(1)(4)(5)</sup> [Requirements for species susceptible to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (ISA), Koi herpes virus (KHV), Marteilia refringens, Bonamia ostreae, and/or White spot disease]
		I, the undersigned official inspector, hereby certify that the aquaculture animals referred to above:	
		either <sup>(1)(6)</sup> [originate from a Member State, zone or compartment declared free from <sup>(1)</sup> [VHS] <sup>(1)</sup> [IHN] <sup>(1)</sup> [ISA] <sup>(1)</sup> [KHV] <sup>(1)</sup> [Marteilia refringens] <sup>(1)</sup> [Bonamia ostreae] <sup>(1)</sup> [White spot disease] in accordance with Chapter VII of Directive 2006/88/EC.]	
		or <sup>(1)(5)(6)</sup> [in the case of wild aquatic animals, have been subject to quarantine in accordance with Decision 2008/946/EC.]	
<b>II.3</b>		<sup>(1)(7)</sup> [Requirements for vector species to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (ISA), Koi herpes virus (KHV), Marteilia refringens, Bonamia ostreae, and/or White spot disease]	
		I, the undersigned official inspector, hereby certify that the aquaculture animals referred to above which are to be regarded as possible vectors to <sup>(1)</sup> [VHS] <sup>(1)</sup> [IHN] <sup>(1)</sup> [ISA] <sup>(1)</sup> [KHV] <sup>(1)</sup> [Marteilia refringens] <sup>(1)</sup> [Bonamia ostreae] <sup>(1)</sup> [White spot disease] as they are of species listed in Column 2 and fulfil the conditions set out in Column 3 of the table in Annex I to Regulation (EC) No 1251/2008:	
		either <sup>(1)(6)</sup> [originate from a Member State, zone or compartment declared free from <sup>(1)</sup> [VHS] <sup>(1)</sup> [IHN] <sup>(1)</sup> [ISA] <sup>(1)</sup> [KHV] <sup>(1)</sup> [Marteilia refringens] <sup>(1)</sup> [Bonamia ostreae] <sup>(1)</sup> [White spot disease] in accordance with Chapter VII of Directive 2006/88/EC.]	
		or <sup>(1)(6)(7)</sup> [have been subject to quarantine in accordance with Decision 2008/946/EC.]	
<b>II.4 Transport and labelling requirements</b>			
			I, the undersigned official inspector, hereby certify that:
II.4.1			the aquaculture animals referred to above,
			(i) are placed under conditions, including with a water quality, that do not alter their health status,
			(ii) as appropriate, comply with the general conditions for the transport of animals laid down in Article 3 of Regulation (EC) No 1/2005;

Status: Point in time view as at 03/02/2014.

Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)

EUROPEAN UNION		Placing on the market of aquaculture animals for farming, relaying, put and take fisheries, open ornamental facilities and restocking	
II.	Health information	II.a. Certificate reference No	II.b.
II.4.2	the transport container or well boat prior to loading is clean and disinfected or previously unused; and		
II.4.3	the consignment is identified by a legible label on the exterior of the container, or when transported by well boat, in the ship's manifest, with the relevant information referred to in boxes I.8 to I.13 of Part I of this certificate, and the following statement:  either <sup>(1)</sup> [ <sup>(1)</sup> Wild] <sup>(1)</sup> [Fish] <sup>(1)</sup> [Molluscs] <sup>(1)</sup> [Crustaceans] intended for farming in the European Union",  or <sup>(1)</sup> [ <sup>(1)</sup> Wild] <sup>(1)</sup> [Molluscs] intended for relaying in the European Union",  or <sup>(1)</sup> [ <sup>(1)</sup> Wild] <sup>(1)</sup> [Fish] <sup>(1)</sup> [Molluscs] <sup>(1)</sup> [Crustaceans] intended for put and take fisheries in the European Union",  or <sup>(1)</sup> [ <sup>(1)</sup> Wild] <sup>(1)</sup> [Ornamental fish] <sup>(1)</sup> [Ornamental molluscs] <sup>(1)</sup> [Ornamental crustaceans] intended for open ornamental facilities in the European Union",  or <sup>(1)</sup> [ <sup>(1)</sup> Fish] <sup>(1)</sup> [Molluscs] <sup>(1)</sup> [Crustaceans] intended for restocking in the European Union",  or <sup>(1)</sup> [ <sup>(1)</sup> Wild] <sup>(1)</sup> [Fish] <sup>(1)</sup> [Molluscs] <sup>(1)</sup> [Crustaceans] intended for quarantine in the European Union",		
II.5	<sup>(1)(8)</sup> [Attestation for consignments originating from an area subject to disease control measures as provided for in Section 3 to 6 of Chapter V of Directive 2006/88/EC  I, the undersigned official inspector, hereby certify that:		
II.5.1	the animals referred to above originate from an area subject to disease control measures regarding <sup>(1)</sup> [Epizootic ulcerative syndrome (EUS)] <sup>(1)</sup> [Epizootic haematopoietic necrosis (EHN)] <sup>(1)</sup> [Viral haemorrhagic septicaemia (VHS)] <sup>(1)</sup> [Infectious haematopoietic necrosis (IHN)] <sup>(1)</sup> [Infectious salmon anaemia (ISA)] <sup>(1)</sup> [Koi herpes virus (KHV)] <sup>(1)</sup> [Bonamia exitiosa] <sup>(1)</sup> [Perkinsus marinus] <sup>(1)</sup> [Mikrocytos mackini] <sup>(1)</sup> [Martellia refringens] <sup>(1)</sup> [Bonamia ostreae] <sup>(1)</sup> [Taura syndrome] <sup>(1)</sup> [Yellowhead disease] <sup>(1)</sup> [White spot disease] <sup>(1)(9)</sup> [the following emerging disease: .....];		
II.5.2	the animals referred to above are allowed to be placed on the market according to the control measures laid down; and		
II.5.3	the consignment is identified by a legible label on the exterior of the container, or when transported by well boat, in the ship's manifest, with the relevant information referred to in boxes I.8 to I.13 of Part I of this certificate, and the following statement:  " <sup>(1)</sup> [Wild] <sup>(1)</sup> [Fish] <sup>(1)</sup> [Molluscs] <sup>(1)</sup> [Crustaceans] originating from an area subject to disease control measures".]		
II.6	<sup>(1)(10)</sup> [Requirements for species susceptible to Spring viraemia of carp (SVC), Bacterial kidney disease (BKD), Infectious pancreatic necrosis virus (IPN) and infection with Gyrodactylus salaris (GS)  I, the undersigned official inspector, hereby certify that the aquaculture animals referred to above,  either <sup>(1)</sup> [originate from a Member State or part thereof:  (a) where <sup>(1)</sup> [SVC] <sup>(1)</sup> [GS] <sup>(1)</sup> [BKD] <sup>(1)</sup> [IPN] are notifiable to the competent authority and reports of suspicion of infection of the relevant disease must be immediately investigated by the competent authority,  (b) where all aquaculture animals of species susceptible to the relevant disease(s) introduced into that Member State or part thereof comply with the requirements set out in II.6 of this certificate,  (c) where species susceptible to the relevant diseases are not vaccinated against the relevant diseases, and		

*Status: Point in time view as at 03/02/2014.*

EUROPEAN UNION		Placing on the market of aquaculture animals for farming, relaying, put and take fisheries, open ornamental facilities and restocking	
II.	Health information	II.a.	Certificate reference No
		II.b.	
<p>(3) Only applicable to consignments of aquaculture animals caught in the wild and immediately transported to a farm or mollusc farming area without any temporary storage.</p> <p>(4) Part II.2 of this certificate applies to species susceptible to one or more of the diseases referred to in the title. Susceptible species are listed in Part II of Annex IV to Directive 2006/88/EC.</p> <p>(5) Consignments of wild aquatic animals may be placed on the market regardless of the requirements in Part II.2 of this certificate if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946/EC.</p> <p>(6) To be authorised into a Member State, zone or compartment declared free from VHS, IHN, ISA, KHV, Martellia refringens, Bonamia ostreae, or Whitespot disease or with a surveillance or eradication programme established in accordance with Article 44(1) or (2) of Directive 2006/88/EC, one of these statements must be kept if the consignment contain susceptible or vector species to the disease(s) for which disease freedom or programme(s) apply(ies). Data on the disease status of each farm and mollusc farming area in the Union are accessible at <a href="http://ec.europa.eu/food/animal/liveanimals/aquaculture/index_en.htm">http://ec.europa.eu/food/animal/liveanimals/aquaculture/index_en.htm</a></p> <p>(7) Part II.3 of this certificate applies to vector species to one or more of the diseases referred to in the title. Possible vector species and the conditions, under which consignments of such species are to be considered vector species, are listed in Annex I to Regulation (EC) No 1251/2008. Consignments of possible vector species may be placed on the market regardless of the requirements in Part II.3 if the conditions set out in Column 4 of the table in Annex I to Regulation (EC) No 1251/2008 are not fulfilled or they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946/EC.</p> <p>(8) Part II.5 of this certificate applies to consignments of aquaculture animals which according to Article 8 of Regulation (EC) No 1251/2008 must be accompanied by a certificate and which in compliance with the placing on the market requirements of Directive 2006/88/EC are allowed by the competent authority to leave an area subject to control provisions provided for in Sections 3 to 6 of Chapter V of Directive 2006/88/EC or a Member State, zone or compartment with an eradication programme approved in accordance with Article 44(2) of that Directive.</p> <p>(9) Applicable when measures are taken in accordance with Article 41 of Directive 2006/88/EC.</p> <p>(10) Part II.6 of this certificate only applies to consignments intended for a Member State or part thereof which is regarded as disease-free, or for which an programme is approved in accordance with Decision 2010/221/EU as regards SVC, BKD, IPN or GS, and the consignment comprises species listed in Part C of Annex II as susceptible to the disease(s) for which the disease-free status or programme(s) apply(ies).</p> <p>Part II.6 shall also apply to consignments of fish of any species originating from waters where species listed in Part C of Annex II as species susceptible to infection with GS, are present, where those consignments are intended for a Member State or part thereof listed in Annex I to Decision 2010/221/EU as free of GS.</p> <p>Consignments of wild aquatic animals for which SVC, IPN and/or BKD related requirements are applicable, may be placed on the market regardless of the requirements in Part II.6 of this certificate if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946/EC.</p> <p>(11) Part II.7 of this certificate only applies to consignments intended for a Member State or compartment which is regarded as disease-free, or for which a programme is approved by Decision 2010/221/EU as regards OsHV-1 µvar, and the consignment comprises species listed in Part C of Annex II to Regulation (EC) No 1251/2008 as susceptible to OsHV-1 µvar.</p> <p>The requirements set out in part II.7 shall not apply to consignments intended for a quarantine facility complying with the requirements at least equivalent to those laid down in Decision 2008/946/EC.</p>

EUROPEAN UNION		Placing on the market of aquaculture animals or products thereof for human consumption	
	II. Health information	II.a. Certificate reference No	II.b.
Part II: Certification	<b>II.1 General requirements</b>		
		I, the undersigned official inspector, hereby certify that the aquaculture animals or products thereof referred to in Part I of this certificate:	
	II.1.1	comply with the requirements for placing on the market laid down in Council Directive 2006/88/EC.	
	<b>II.2</b>	<sup>(1)(2)</sup> [Requirements for species susceptible to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (ISA), Koi herpes virus (KHV), Marteilia refringens, Bonamia ostreae, and/or White spot disease]	
		I, the undersigned official inspector, hereby certify that the aquaculture animals or products thereof referred to above:	
	II.2.1	<sup>(1)</sup> originate from a Member State, zone or compartment declared free from <sup>(1)</sup> [VHS] <sup>(1)</sup> [IHN] <sup>(1)</sup> [ISA] <sup>(1)</sup> [KHV] <sup>(1)</sup> [Marteilia refringens] <sup>(1)</sup> [Bonamia ostreae] <sup>(1)</sup> [White spot disease] in accordance with Chapter VII of Directive 2006/88/EC.]	
	<b>II.3 Transport and labelling requirements</b>		
		I, the undersigned official inspector, hereby certify that:	
	II.3.1	the aquaculture animals or products thereof referred to above,	
		(i) are placed under conditions, including with a water quality, that do not alter their health status;	
		(ii) as appropriate, comply with the general conditions for the transport of animals laid down in Article 3 of Council Regulation (EC) No 1/2005;	
	II.3.2	the transport container or well boat prior to loading is clean and disinfected or previously unused; and	
	II.3.3	the consignment is identified by a legible label on the exterior of the container, or when transported by well boat, in the ship's manifest, with the relevant information referred to in boxes I.8 to I.13 of Part I of this certificate, and the following statement:  "^(1)[Fish] ^^(1)[Molluscs] ^^(1)[Crustaceans] intended for ^^(1)[further processing] ^^(1)[dispatch centres or similar businesses] ^^(1)[purification centres or similar businesses] before human consumption in the European Union".	
	<b>II.4</b>	<sup>(1)(3)</sup> [Attestation for consignments originating from an area subject to disease control measures]	
		I, the undersigned official inspector, hereby certify that:	
II.4.1	either <sup>(1)</sup> [the animals referred to above have been inspected within 24 hours of loading, and showed no clinical signs of disease],  or <sup>(1)</sup> [in the case of eggs and molluscs, come from a farm or mollusc farming area where, according to the records of the farm or mollusc farming area, there is no indication of disease problems];		
II.4.2	the animals referred to above originate from an area subject to disease control measures regarding <sup>(1)</sup> [Epizootic ulcerative syndrome (EUS)] <sup>(1)</sup> [Epizootic haematopoietic necrosis (EHN)] <sup>(1)</sup> [Viral haemorrhagic septicaemia (VHS)] <sup>(1)</sup> [Infectious haematopoietic necrosis (IHN)] <sup>(1)</sup> [Infectious salmon anaemia (ISA)] <sup>(1)</sup> [Koi herpes virus (KHV)] <sup>(1)</sup> [Bonamia exitiosa] <sup>(1)</sup> [Perkinsus marinus] <sup>(1)</sup> [Mikrocytos mackini] <sup>(1)</sup> [Marteilia refringens] <sup>(1)</sup> [Bonamia ostreae] <sup>(1)</sup> [Taura syndrome] <sup>(1)</sup> [Yellowhead disease] <sup>(1)</sup> [White spot disease] <sup>(1)(4)</sup> [the following emerging disease: .....];		
II.4.3	the animals referred to above are allowed to be placed on the market according to the control measures laid down; and		
II.4.4	the consignment is identified by a legible label on the exterior of the container, or when transported by well boat, in the ship manifest, with the relevant information referred to in boxes I.8 to I.13 of Part I of this certificate, and the following statement:  "^(1)[Fish] ^^(1)[Molluscs] ^^(1)[Crustaceans] originating from an area subject to disease control measures"		
<b>II.5</b>	<sup>(1)(5)</sup> [Requirements for species susceptible to OsHV-1 µvar]		
	I, the undersigned official inspector, hereby certify that the aquaculture animals referred to above,		
either	<sup>(1)</sup> originate from a Member State or compartment:		
	(a) where OsHV-1 µvar is notifiable to the competent authority and reports of suspicion of infection of that disease must be immediately investigated by the competent authority,

## PART C

### List of species susceptible to diseases for which national measures are approved under Decision 2010/221/EU

Disease	Susceptible species
Spring Viraemia of Carp (SVC)	Bighead carp ( <i>Aristichthys nobilis</i> ), goldfish ( <i>Carassius auratus</i> ), crucian carp ( <i>Carassius carassius</i> ), grass carp ( <i>Ctenopharyngodon idellus</i> ), common carp and koi carp ( <i>Cyprinus carpio</i> ), silver carp ( <i>Hypophthalmichthys molitrix</i> ), sheatfish ( <i>Silurus glanis</i> ), and tench ( <i>Tinca tinca</i> ), Orfe ( <i>Leuciscus idus</i> )
Bacterial kidney disease (BKD)	Family: <i>Salmonidae</i>
Infectious pancreatic necrosis virus (IPN)	Rainbow trout ( <i>Oncorhynchus mykiss</i> ), brook trout ( <i>Salvelinus fontinalis</i> ), brown trout ( <i>Salmo trutta</i> ), Atlantic salmon ( <i>Salmo salar</i> ) and ( <i>Oncorhynchus spp.</i> ), whitefish ( <i>Coregonus lavaretus</i> )
Infection with <i>Gyrodactylus salaris</i>	Atlantic salmon ( <i>Salmo salar</i> ), rainbow trout ( <i>Oncorhynchus mykiss</i> ), Arctic char ( <i>Salvelinus alpinus</i> ), North American brook trout ( <i>Salvelinus fontinalis</i> ), grayling ( <i>Thymallus thymallus</i> ), North American lake trout ( <i>Salvelinus namaycush</i> ) and brown trout ( <i>Salmo trutta</i> )
Ostreid herpesvirus 1 $\mu$ var (OsHV-1 $\mu$ var)	Pacific oyster ( <i>Crassostrea gigas</i> )

## [<sup>F9</sup> ANNEX III

### List of third countries, territories, zones or compartments<sup>(22)</sup> (referred to in Article 10(1) and Article 11)

#### Textual Amendments

- F9** Substituted by Commission Implementing Regulation (EU) No 1012/2012 of 5 November 2012 amending Regulation (EC) No 2074/2005 and Regulation (EC) No 1251/2008 as regards the list of vector species, the health requirements and the certification requirements concerning epizootic ulcerative syndrome and as regards the entry for Thailand in the list of third countries from which imports of certain fish and fishery products into the Union are permitted (Text with EEA relevance).

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

COUNTRY		Aquaculture animals for farming, relaying, put and take fisheries and open ornamental facilities	
		II.a. Certificate reference number	II.b.
Part II: Certification	II. Health information		
	II.1. General requirements		
	I, the undersigned official inspector, hereby certify that the aquaculture animals referred to in Part I of this certificate:		
	II.1.1. have been inspected within 72 hours of loading, and showed no clinical signs of disease;		
	II.1.2. are not subject to any prohibitions due to unresolved increased mortality;		
	II.1.3. are not intended for destruction or slaughter for the eradication of diseases; and		
	II.1.4. originate from aquaculture farms which are all under the supervision of the competent authority;		
	II.1.5. <sup>(1)</sup> [in the case of molluscs, were subject to an individual visual check of each part of the consignment, and no molluscs species other than those specified in Part I of the certificate were detected.]		
	II.2. <sup>(1)</sup> <sup>(2)</sup> <sup>(3)</sup> [Requirements for species susceptible to Epizootic haematopoietic necrosis (EHN), Bonamia exitiosa, Perkinsus marinus, Mikrocytos mackini, Taura syndrome and/or Yellowhead disease		
	I, the undersigned official inspector, hereby certify that the aquaculture animals referred to above:		
	either <sup>(1)</sup> <sup>(5)</sup> [originate from a country/territory, zone or compartment declared free from <sup>(1)</sup> [EHN] <sup>(1)</sup> [Bonamia exitiosa] <sup>(1)</sup> [Perkinsus marinus] <sup>(1)</sup> [Mikrocytos mackini] <sup>(1)</sup> [Taura syndrome] <sup>(1)</sup> [Yellowhead disease] in accordance with Chapter VII of Council Directive 2006/88/EC or the relevant OIE Standard by the competent authority of the country of origin, and		
	(i) where the relevant disease(s) is (are) notifiable to the competent authority and reports of suspicion of infection of the relevant disease(s) must be immediately investigated by the competent authority,		
	(ii) all introduction of species susceptible to the relevant disease(s) come from an area declared free of the disease(s), and		
	(iii) species susceptible to the relevant disease(s) are not vaccinated against the relevant disease(s);		
	or <sup>(1)</sup> <sup>(3)</sup> <sup>(5)</sup> [in the case of wild aquatic animals, have been subject to quarantine in accordance with Decision 2008/946/EC.]		
	II.3. <sup>(1)</sup> <sup>(4)</sup> [Requirements for vector species to Epizootic haematopoietic necrosis (EHN), Bonamia exitiosa, Perkinsus marinus, Mikrocytos mackini, Taura syndrome and/or Yellowhead disease		
	I, the undersigned official inspector, hereby certify that the aquaculture animals referred to above which are to be regarded as possible vectors to <sup>(1)</sup> [EHN] <sup>(1)</sup> [Bonamia exitiosa] <sup>(1)</sup> [Perkinsus marinus] <sup>(1)</sup> [Mikrocytos mackini] <sup>(1)</sup> [Taura syndrome] <sup>(1)</sup> [Yellowhead disease] as they are of species listed in Column 2 and fulfil the conditions set out in Column 3 of the table in Annex I to Regulation (EC) No 1251/2008:		
	either <sup>(1)</sup> <sup>(5)</sup> [originate from a country/territory, zone or compartment declared free from <sup>(1)</sup> [EHN] <sup>(1)</sup> [Bonamia exitiosa] <sup>(1)</sup> [Perkinsus marinus] <sup>(1)</sup> [Mikrocytos mackini] <sup>(1)</sup> [Taura syndrome] <sup>(1)</sup> [Yellowhead disease] in accordance with Chapter VII of Council Directive 2006/88/EC or the relevant OIE Standard by the competent authority of the country of origin, and		
	(i) where the relevant disease(s) is (are) notifiable to the competent authority and reports of suspicion of infection of the relevant disease(s) must be immediately investigated by the competent authority,		
	(ii) all introduction of species susceptible to the relevant disease(s) come from an area declared free of the disease(s), and		
	(iii) species susceptible to the relevant disease(s) are not vaccinated against the relevant disease(s);		
	or <sup>(1)</sup> <sup>(5)</sup> [have been subject to quarantine in accordance with Decision 2008/946/EC.]		
	II.4. <sup>(1)</sup> <sup>(2)</sup> <sup>(3)</sup> [Requirements for species susceptible to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (ISA), Koi herpes virus (KHV), Marteilia refringens, Bonamia ostreae, and/or White spot disease		
	I, the undersigned official inspector, hereby certify that the aquaculture animals referred to above:		
	either <sup>(1)</sup> <sup>(6)</sup> [originate from a country/territory, zone or compartment declared free from <sup>(1)</sup> [VHS] <sup>(1)</sup> [IHN] <sup>(1)</sup> [ISA] <sup>(1)</sup> [KHV] <sup>(1)</sup> [Marteilia refringens] <sup>(1)</sup> [Bonamia ostreae] <sup>(1)</sup> [White spot disease] in accordance with Chapter VII of Directive 2006/88/EC or the relevant OIE Standard by the competent authority of the country of origin, and		
	(i) where the relevant disease(s) is (are) notifiable to the competent authority and reports of suspicion of infection of the relevant disease(s) must be immediately investigated by the competent authority,		
	(ii) all introduction of species susceptible to the relevant disease(s) come from an area declared free of the disease(s), and

COUNTRY		Ornamental aquatic animals intended for closed ornamental facilities	
II. Health information		II.a. Certificate reference number	II.b.
Part II: Certification	<b>II.1. General requirements</b>		
	I, the undersigned official inspector, hereby certify that the ornamental aquatic animals referred to in Part I of this certificate:		
	II.1.1. have been inspected within 72 hours of loading, and showed no clinical signs of disease;		
	II.1.2. are not subject to any prohibitions due to unresolved increased mortality; and		
	II.1.3. are not intended for destruction or slaughter for the eradication of diseases.		
<b>II.2. <sup>(1)</sup> <sup>(2)</sup> <sup>(3)</sup> [Requirements for species susceptible to Epizootic haematopoietic necrosis (EHN), <i>Bonamia exitiosa</i>, <i>Perkinsus marinus</i>, <i>Mikrocytos mackini</i>, <i>Taura syndrome</i> and/or Yellowhead disease]</b>			
I, the undersigned official inspector, hereby certify that the ornamental aquatic animals referred to above:			
<i>either</i> <sup>(1)</sup> <sup>(4)</sup> [originate from a country/territory, zone or compartment declared free from <sup>(1)</sup> [EHN] <sup>(1)</sup> [ <i>Bonamia exitiosa</i> ] <sup>(1)</sup> [ <i>Perkinsus marinus</i> ] <sup>(1)</sup> [ <i>Mikrocytos mackini</i> ] <sup>(1)</sup> [ <i>Taura syndrome</i> ] <sup>(1)</sup> [Yellowhead disease] in accordance with Chapter VII of Council Directive 2006/88/EC or the relevant OIE Standard by the competent authority of the country of origin, and			
(i) where the relevant disease(s) is (are) notifiable to the competent authority and reports of suspicion of infection of the relevant disease(s) must be immediately investigated by the competent authority;			
(ii) all introduction of species susceptible to the relevant disease(s) come from an area declared free of the disease(s); and			
(iii) species susceptible to the relevant disease(s) are not vaccinated against the relevant disease(s);			
<i>or</i> <sup>(1)</sup> <sup>(4)</sup> <sup>(5)</sup> [have been subject to quarantine in accordance with Decision 2008/946/EC].			
<b>II.3. <sup>(1)</sup> <sup>(2)</sup> <sup>(3)</sup> [Requirements for species susceptible to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (ISA), Koi herpes virus (KHV), <i>Marteilia refringens</i>, <i>Bonamia ostreae</i>, and/or White spot disease]</b>			
I, the undersigned official inspector, hereby certify that the ornamental aquatic animals referred to above:			
<i>either</i> <sup>(1)</sup> <sup>(5)</sup> [originate from a country/territory, zone or compartment declared free from <sup>(1)</sup> [VHS] <sup>(1)</sup> [IHN] <sup>(1)</sup> [ISA] <sup>(1)</sup> [KHV] <sup>(1)</sup> [ <i>Marteilia refringens</i> ] <sup>(1)</sup> [ <i>Bonamia ostreae</i> ] <sup>(1)</sup> [White spot disease] in accordance with Chapter VII of Directive 2006/88/EC or the relevant OIE Standard by the competent authority of the country of origin, and			
(i) where the relevant disease(s) is (are) notifiable to the competent authority and reports of suspicion of infection of the relevant disease(s) must be immediately investigated by the competent authority,			
(ii) all introduction of species susceptible to the relevant disease(s) come from an area declared free of the disease(s), and			
(iii) species susceptible to the relevant disease(s) are not vaccinated against the relevant disease(s)			
<i>or</i> <sup>(1)</sup> <sup>(3)</sup> <sup>(5)</sup> [have been subject to quarantine in accordance with Decision 2008/946/EC].			
<b>II.4. Transport and labelling requirements</b>			
I, the undersigned official inspector, hereby certify that:			
II.4.1. the ornamental aquatic animals referred to above are placed under conditions, including with a water quality, that do not alter their health status;			
II.4.2. the transport container is clean and disinfected or previously unused; and			
II.4.3. the consignment is identified by a legible label on the exterior of the container with the relevant information referred to in boxes I.7 to I.13 of Part I of this certificate, and the following statement:			
<i>either</i> <sup>(1)</sup> ["Ornamental <sup>(1)</sup> [fish] <sup>(1)</sup> [molluscs] <sup>(1)</sup> [crustaceans] intended for closed ornamental facilities in the European Union"]

## PART D

### Addendum for transport of live aquaculture animals by sea

*(To be completed and attached to the animal health certificate where transport to the European Community border includes transport by ship, even for part of the journey.)*

<b>Declaration by the master of the ship</b>	
I, the undersigned, master of ship (name .....), declare that the live aquaculture animals referred to in attached animal health certificate No ..... have remained on board the ship during the voyage from ..... in ..... (exporting country, zone or compartment) to ..... in the European Community and that the ship did not call at any place outside ..... (exporting country, zone or compartment) en route to the European Community other than: ..... (Ports of call en route). Moreover, during the journey, the aquaculture animals have not been in contact with other aquatic animals of a lower health status on board.	
Done at ..... (Port of arrival)	on ..... (Date of arrival)
 (Stamp)	(Signature of master)  (Name in capital letters and title)

## [<sup>F1</sup>ANNEX V

### Explanatory notes

- (a) Certificates shall be issued by the competent authorities of the country of origin, based on the appropriate model set out in Annex II and IV to this Regulation taking into account the place of destination and use of the consignment after the arrival at the destination.
- (b) Considering the status of the place of destination as regards non-exotic diseases referred to in Part II of Annex IV to Directive 2006/88/EC in the EU Member State or diseases for which the place of destination has measures approved by Decision 2010/221/EU approving national measures in accordance with Article 43 of Council Directive 2006/88/EC, the appropriate specific requirements shall be incorporated and completed in the certificate.
- (c) The 'Place of origin' shall be the localisation of the farm or mollusc farming area where the aquaculture animals were reared reaching their commercial size relevant for the consignment covered by this certificate. For wild aquatic animals 'place of origin' shall be the place of harvest.
- (d) Where the model certificate states that certain statements shall be kept as appropriate, statements which are not relevant, may be crossed out and initialled and stamped by the certifying officer, or completely deleted from the certificate.

---

*Status: Point in time view as at 03/02/2014.*

*Changes to legislation: There are outstanding changes not yet made to Commission Regulation (EC) No 1251/2008. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details)*

---

- (e) The original of each certificate shall consist of a single sheet of paper, or, where more text is required it must be in such a form that all sheets of paper required are part of an integrated whole and indivisible.
- (f) For import into the Union from third countries, the original of the certificate and the labels referred to in the model certificate shall be drawn up in at least one of the official languages of the Member State of the border inspection post of introduction of the consignment into the Union and of the Member State of destination. However, those Member States may authorise the certificate to be drawn up in the official language of another Member State, and accompanied, if necessary, by an official translation.
- (g) Where additional sheets are attached to the certificate for the purpose of identifying the items making up the consignment, such additional sheets shall also be considered to form part of the original of the certificate, provided the signature and stamp of the certifying official inspector appear on each page.
- (h) When the certificate, including any additional sheets as referred to in (g), comprises more than one page, each page shall be numbered ‘*x*(page number) of *y*(total number of pages)’ on the bottom and shall bear the certificate reference number allocated by the competent authority on the top.
- (i) The original of the certificate must be completed and signed by an official inspector not more than 72 hours prior to loading of the consignment, or not more than 24 hours in those cases where the aquaculture animals must be inspected within 24 hours of loading. The competent authorities of the country of origin shall ensure that principles of certification equivalent to those laid down in Directive 96/93/EC are followed.
- (j) The colour of the signature shall be different from that of the printing. The same requirement shall apply to stamps other than embossed stamps or watermarks.
- (k) For import into the Union from third countries, the original of the certificate must accompany the consignment until it reaches the EU border inspection post. For consignments placed on the market within the Union, the original of the certificate must accompany the consignment until it reaches its final destination.
- (l) A certificate issued for live aquaculture animals shall be valid for 10 days from the date of issue. In the case of transport by ship, the time of validity is prolonged by the time of journey at sea. To that end, the original of a declaration by the ship's master, drawn up in accordance with the addendum drawn up in conformity with the model laid down in Part D of Annex IV, shall be attached to the animal health certificate.
- (m) Please note that the general conditions on the transport of animals laid down in Council Regulation (EC) No 1/2005 on the protection of animals during transport and related operations and amending Directives 64/432/EEC and 93/119/EC and Regulation (EC) No 1255/97 may, where applicable, require measures to be taken after entry into the Union if the requirements of that Regulation are not fulfilled.]
