Part II:			
⁽¹⁾ Keep as appropriate.			
⁽²⁾ Part II.2 and II.4 of this certificate only applies to species susceptible to one or more of the diseases referred to in the title. Susceptible species are listed in Part II of Annex IV to Directive 2006/88/EC.			
⁽³⁾ Consignments of wild aquatic animals may be imported regardless of the requirements in Part II.2 and II.4 of this certificate if they are intended for a quarantine facility complying with the requirements laid down in Commission Decision 2008/946/EC.			
⁽⁴⁾ Part II.3 and II.5 of this certificate only applies to vector species to one or more of the diseases referred to in the title. Possible vector species and the conditions, under which consignments of such species are to be considered vector species, are listed in Annex I to Regulation (EC) No 1251/2008. Consignments of possible vector species may be imported regardless of the requirements in Parts II.3 and II.5 if the conditions set out in Column 4 of the table in Annex I to Regulation (EC) No 1251/2008 are not fulfilled or they are intended for a quarantine facility complying with the requirements laid down in Commission Decision 2008/946/EC.			
⁽⁵⁾ To be authorised into the Community one of these statements must be kept if the consignments contain susceptible or vector species to EUS, EHN, Bonamia exitiosa, Perkinsus marinus, Mikrocytos mackini, Taura syndrome and/or Yellowhead disease.			
⁽⁶⁾ To be authorised into a Member State, zone or compartment declared free from VHS, IHN, ISA, KHV, Marteilia refringens, Bonamia ostreae, or Whitespot disease or with a surveillance or eradication programme established in accordance with Article 44(1) or (2) of Directive 2006/88/EC, one of these statements must be kept if the consignment contain susceptible or vector species to the disease(s) for which disease freedom or programme(s) apply(ies). Data on the disease status of each farms and mollusc farming areas in the Community are accessible at http://ec.europa.eu/food/animal/liveanimals/aquaculture/index_en.htm			
⁽⁷⁾ Part II.7 of this certificate only applies to consignments intended for a Member State, zone or compartment approved free from SVC, BKD, IPN or GS, or with a control and eradication programme as regards one or more of these diseases approved in accordance with Decision 2004/453/EC, and the consignment comprises species susceptible to the disease for which the freedom status or control and eradication programme(s) apply. Susceptible species are species which are referred to as such in Annex III to Decision 2004/453/EC or in the latest edition of the OIE International aquatic animal health code and/or the OIE Manual of diagnostic tests for aquatic animals.			
⁽⁸⁾ Only applicable to consignments intended for an area approved free from or with an approved control and eradication programme concerning SVC, BKD or IPN according to Decision 2004/453/EC.			
⁽⁹⁾ Only applicable to continental farms where epizootiological investigations have shown that the disease has not spread to other farms or into the wild.			
⁽¹⁰⁾ Only applicable to consignments intended for an area approved free from or with an approved control and eradication programme concerning GS according to Decision 2004/453/EC.			
⁽¹¹⁾ According to the requirements in Chapter 1 B of Annex I to Decision 2004/453/EC. When declaring continental zones free of GS, it must be taken into account that the diseases may spread by migrating fish between different continental zones if the salinity between them is low or intermediate (below 25 ppt.). Hence one individual continental zone can not be declared free if another continental zone draining into the same coastal zone is infected or has unknown status, unless they are separated by seawater with salinity above 25 ppt.

ANNEX V

Explanatory notes

(a)

The certificates shall be produced by the competent authorities of the country of origin, based on the appropriate model appearing in Annexes II or IV to this Regulation taking into account the place of destination and use of the consignment after the arrival at the destination.

(b)

Considering the status of the place of destination as regards non-exotic diseases referred to in Part II of Annex IV to Directive 2006/88/EC in the EU Member State or diseases for which the place of destination has additional guarantees according to Decision 2004/453/EC or measures approved in accordance with Article 43 of Directive 2006/88/EC, the appropriate specific requirements shall be incorporated and completed in the certificate.

(c)

The 'Place of origin' shall be the localisation of the farm or mollusc farming area where the aquaculture animals were reared reaching their commercial size relevant for the consignment covered by this certificate. For wild aquatic animals 'place of origin' shall be the place of harvest.

(d)

The original of the certificate shall consist of a single page printed on both sides or, where more text is required, such that all the pages form a whole and cannot be separated.

Status: This is the original version (as it was originally adopted).

- (e) For import into the Community from third countries, the original of the certificate and the labels referred to in the model certificate shall be drawn up in at least one official language of the EU Member State where border inspection takes place and of the EU Member State of destination. However, those Member States may allow another Community language instead of their own, accompanied, if necessary, by an official translation.
- (f) Where additional pages are attached to the certificate for the purpose of identifying the items making up the consignment, such additional pages shall also be considered to form part of the original of the certificate, provided the signature and stamp of the certifying official inspector appear on each page.
- (g) Where the certificate, including any additional pages as provided for in (f), comprises more than one page, each page shall be numbered ‘*x*(page number) of *y*(total number of pages)’ on the bottom and shall bear the code number of the certificate allocated by the competent authority on the top.
- (h) The original of the certificate must be completed and signed by an official inspector not more than 72 hours prior to loading of the consignment, or not more than 24 hours in those cases where the aquaculture animals must be inspected within 24 hours of loading. The competent authorities of the country of origin shall ensure that principles of certification equivalent to those laid down in Directive 96/93/EC are followed.
- (i) The colour of the signature shall be different from that of the printing. The same rule shall apply to stamps other than embossed stamps or watermarks.
- (j) For import into the Community from third countries, the original of the certificate must accompany the consignment until it reaches the EU border inspection post. For consignments placed on the market within the Community, the original of the certificate must accompany the consignment until it reaches its final destination.
- (k) A certificate issued for live aquaculture animals shall be valid for 10 days from the date of issue. In the case of transport by ship, the time of validity is prolonged by the time of journey at sea. To that end, the original of a declaration by the ship's master, drawn up in accordance with the addendum drawn up in conformity with the model laid down in Part D of Annex IV, shall be attached to the animal health certificate.
- (l) Please note that the general conditions on the transport of animals laid down in Council Regulation (EC) No 1/2005 on the protection of animals during transport and related operations and amending Directives 64/432/EEC and 93/119/EC and Regulation (EC) No 1255/97 may, where applicable, require measures to be taken after entry into the Community if the requirements of that Regulation are not fulfilled.

- (1) According to Article 11 ornamental fish which are not of susceptible species to any of the diseases listed in Part II of Annex IV to Directive 2006/88/EC, and ornamental molluscs and ornamental crustaceans, intended for closed ornamental facilities, may be imported into the Community from third countries or territories that are members of the World Organisation for Animal Health (OIE).
