

Commission Regulation (EU) No 115/2010 of 9 February 2010 laying down the conditions for use of activated alumina for the removal of fluoride from natural mineral waters and spring waters (Text with EEA relevance)

Article 2

The release of residues into the water as a result of the fluoride removal treatment shall be as low as technically feasible according to the best practices and shall not pose a risk to public health. To ensure this, the operator shall implement and monitor the critical processing steps set in the Annex.

Changes to legislation:

There are outstanding changes not yet made to Commission Regulation (EU) No 115/2010. Any changes that have already been made to the legislation appear in the content and are referenced with annotations.
