- (7) The product concerned is manufactured in different forms falling into two main categories: granular and powder products on the one hand and tablets on the other. Prices for tablets are higher than prices for granular and/or powder products. This means that the prices of the product concerned may vary according to the variation in composition of the given product mix. In other words, a product mix containing a higher proportion of tablets would be more expensive than a product mix containing comparatively more granular and powder products.
- (8) See the pre-tax profit margin fixed in recital 181 of Commission Regulation (EC) No 538/2005 (OJ L 89, 8.4.2005, p. 4).
