

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

## ANNEX II

## INFORMATION REQUIREMENTS FOR ACTIVE SUBSTANCES

## TITLE 1

## CHEMICAL SUBSTANCES

## Core data set and additional data set for active substances

Information required to support the approval of an active substance is listed in the table below.

Conditions for not requiring a specific test that are set out in the appropriate test methods in the Regulation (EC) No 440/2008 and are not repeated in column 3, also apply.

Column 1 Information required	Column 2 All data is CDS unless indicated as ADS	Column 3 Specific rules for adaptation from standard information concerning some of the information requirements that may require recourse to testing of vertebrates
<b>1. APPLICANT</b>		
1.1. Name and address		
1.2. Contact person		
1.3. Active substance manufacturer (name, address and location of manufacturing plant(s))		
<b>2. IDENTITY OF THE ACTIVE SUBSTANCE</b>		
For the active substance, the information given in this Section shall be sufficient to enable the active substance to be identified. If it is not technically possible or if it does not appear scientifically necessary to give information on one or more of the items		
a	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.	
b	The information provided should be for the purified active substance of stated specification.	
c	OJ L 20, 26.1.1980, p. 43.	
d	OJ L 372, 27.12.2006, p. 19.	
e	OJ L 348, 24.12.2008, p. 84.	

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

below, the reasons shall be clearly stated		
2.1. Common name proposed or accepted by ISO and synonyms (usual name, trade name, abbreviation)		
2.2. Chemical name (IUPAC and CA nomenclature or other international chemical name(s))		
2.3. Manufacturer's development code number(s)		
2.4. CAS number plus EC, INDEX and CIPAC numbers		
2.5. Molecular and structural formula (including SMILES notation, if available and appropriate)		
2.6. Information on optical activity and full details of any isomeric composition (if applicable and appropriate)		
2.7. Molar mass		
2.8. Method of manufacture (syntheses)		
<b>a</b>	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.	
<b>b</b>	The information provided should be for the purified active substance of stated specification.	
<b>c</b>	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>	
<b>d</b>	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>	
<b>e</b>	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>	

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

	pathway) of active substance including information on starting materials and solvents including suppliers, specifications and commercial availability		
2.9.	Specification of purity of the active substance as manufactured in g/kg, g/l or %w/w (v/v) as appropriate, providing inclusively the upper and lower limit		
2.10.	The identity of any impurities and additives including by-products of synthesis, optical isomers, degradation products (if the substance is unstable) un-reacted and end-groups etc. of polymers and un-reacted starting materials of UVC-substances		
2.11.	Analytical profile of at least five representative batches (g/kg active substance) including information on content of the		
a	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.		
b	The information provided should be for the purified active substance of stated specification.		
c	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>		
d	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>		
e	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>		

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

	impurities referred to in 2.10.		
2.12.	The origin of the natural active substance or the precursor(s) of the active substance, e.g. an extract of a flower		

### 3. PHYSICAL AND CHEMICAL PROPERTIES OF THE ACTIVE SUBSTANCE

#### 3.1. Appearance<sup>a</sup>

3.1.1.	Aggregate state (at 20 °C and 101,3 kPa)		
3.1.2.	Physical state (i.e. viscous, crystalline, powder) (at 20 °C and 101,3 kPa)		
3.1.3.	Colour (at 20 °C and 101,3 kPa)		
3.1.4.	Odour (at 20 °C and 101,3 kPa)		
3.2.	Melting/freezing point <sup>b</sup>		
3.3.	Acidity, alkalinity		
3.4.	Boiling point <sup>b</sup>		
3.5.	Relative Density <sup>b</sup>		
3.6.	Absorption spectra data (UV/VIS, IR, NMR) and a		

**a** The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.

**b** The information provided should be for the purified active substance of stated specification.

**c** [OJ L 20, 26.1.1980, p. 43.](#)

**d** [OJ L 372, 27.12.2006, p. 19.](#)

**e** [OJ L 348, 24.12.2008, p. 84.](#)

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

	mass spectrum, molar extinction coefficient at relevant wavelengths, where relevant <sup>b</sup>		
<b>3.7. Vapour pressure<sup>b</sup></b>			
3.7.1.	Henry's law constant must always be stated for solids and liquids if it can be calculated		
3.8.	Surface tension <sup>b</sup>		
3.9.	Water solubility <sup>b</sup>		
3.10.	Partition coefficient (n-octanol/ water) and its pH dependency <sup>b</sup>		
3.11.	Thermal stability, identity of breakdown products <sup>b</sup>		
3.12.	Reactivity towards container material		
3.13.	Dissociation constant	ADS	
3.14.	Granulometry		
3.15.	Viscosity	ADS	
3.16.	Solubility in organic solvents, including effect	ADS	
<b>a</b>	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.		
<b>b</b>	The information provided should be for the purified active substance of stated specification.		
<b>c</b>	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>		
<b>d</b>	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>		
<b>e</b>	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>		

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

	of temperature on solubility <sup>b</sup>		
3.17.	Stability in organic solvents used in biocidal products and identity of relevant breakdown products <sup>a</sup>	ADS	

#### **4. PHYSICAL HAZARDS AND RESPECTIVE CHARACTERISTICS**

4.1.	Explosives		
4.2.	Flammable gases		
4.3.	Flammable aerosols		
4.4.	Oxidising gases		
4.5.	Gases under pressure		
4.6.	Flammable liquids		
4.7.	Flammable solids		
4.8.	Self-reactive substances and mixtures		
4.9.	Pyrophoric liquids		
4.10.	Pyrophoric solids		
4.11.	Self-heating substances and mixtures		
4.12.	Substances and mixtures which in contact with water		

**a** The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.

**b** The information provided should be for the purified active substance of stated specification.

**c** [OJ L 20, 26.1.1980, p. 43.](#)

**d** [OJ L 372, 27.12.2006, p. 19.](#)

**e** [OJ L 348, 24.12.2008, p. 84.](#)

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

	emit flammable gases		
4.13.	Oxidising liquids		
4.14.	Oxidising solids		
4.15.	Organic peroxides		
4.16.	Corrosive to metals		
<b>4.17. Additional physical indicators for hazards</b>			
4.17.1.	Auto-ignition temperature (liquids and gases)		
4.17.2.	Relative self ignition temperature for solids		
4.17.3.	Dust explosion hazard		
<b>5. METHODS OF DETECTION AND IDENTIFICATION</b>			
5.1.	Analytical methods including validation parameters for the determination of active substance as manufactured and where appropriate, for relevant residues, isomers and impurities of the active substance and additives (e.g. stabilisers) For impurities other than relevant impurities this only		
a	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.		
b	The information provided should be for the purified active substance of stated specification.		
c	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>		
d	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>		
e	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>		

*Changes to legislation: There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. 	producing animals, food of plant or animal origin or feeding stuffs)		
<b>6. EFFECTIVENESS AGAINST TARGET ORGANISMS</b>			
6.1.	Function, e.g. fungicide, rodenticide, insecticide, bactericide and mode of control e.g. attracting, killing, inhibiting		
6.2.	Representative organism(s) to be controlled and products, organisms or objects to be protected		
6.3.	Effects on representative target organism(s)		
6.4.	Likely concentration at which the active substance will be used in products and, where appropriate, in treated articles		
6.5.	Mode of action (including time delay)		
6.6.	Efficacy data to support these claims on biocidal		
a	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.		
b	The information provided should be for the purified active substance of stated specification.		
c	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>		
d	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>		
e	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>		

*Changes to legislation: There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes*

	products and, where label claims are made, on treated articles, including any available standard protocols, laboratory tests or field trials used including performance standards where appropriate		
<b>6.7. Any known limitations on efficacy</b>			
6.7.1.	Information on the occurrence or possible occurrence of the development of resistance and appropriate management strategies		
6.7.2.	Observations on undesirable or unintended side-effects, e.g. on beneficial and other non-target organisms		
<b>7. INTENDED USES AND EXPOSURE</b>			
7.1.	Field of use(s) envisaged for biocidal products and, where appropriate, treated articles		
7.2.	Product-type(s)		
a	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.		
b	The information provided should be for the purified active substance of stated specification.		
c	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>		
d	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>		
e	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>		

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

	intended uses of the active substance	
7.6.4.	Information on exposure from treated articles including leaching data (either laboratory studies or model data)	
<b>8. TOXICOLOGICAL PROFILE FOR HUMAN AND ANIMAL INCLUDING METABOLISM</b>		
8.1.	Skin irritation or skin corrosion The assessment of this endpoint shall be carried out according to the sequential testing strategy for dermal irritation and corrosion set out in the Appendix to Test Guideline B.4. Acute Toxicity-Dermal Irritation/Corrosion (Annex B.4. to Regulation (EC) No 440/2008)	
8.2.	Eye irritation The assessment of this endpoint shall be carried out according to the sequential testing strategy for eye irritation and corrosion as set down in the Appendix to Test Guideline B.5. Acute Toxicity: Eye Irritation/Corrosion (Annex B.5. to Regulation (EC) No 440/2008)	
8.3.	Skin sensitisation	Step 2 does not need to be conducted if:
a	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.	
b	The information provided should be for the purified active substance of stated specification.	
c	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>	
d	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>	
e	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>	

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

<p>The assessment of this endpoint shall comprise the following consecutive steps:</p> <ol style="list-style-type: none"> <li>1. an assessment of the available human, animal and alternative data</li> <li>2. in vivo testing The Murine Local Lymph Node Assay (LLNA) including, where appropriate, the reduced variant of the assay, is the first-choice method for in vivo testing. If another skin sensitisation test is used justification shall be provided</li> </ol>		<p>— the available information indicates that the substance should be classified for skin sensitisation or corrosivity, or</p> <p>— the substance is a strong acid (pH &lt; 2,0) or base (pH &gt; 11,5)</p>
8.4. Respiratory sensitisation	ADS	

### 8.5. Mutagenicity

<p>The assessment of this endpoint shall comprise the following consecutive steps:</p> <ul style="list-style-type: none"> <li>— an assessment of the available in vivo genotoxicity data</li> <li>— an in vitro test for gene mutations in bacteria, an in vitro cytogenicity test in mammalian cells and an in vitro gene mutation test in mammalian cells are required</li> <li>— appropriate in vivo genotoxicity studies shall be considered in case of a positive result in any of the</li> </ul>		
a	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.	
b	The information provided should be for the purified active substance of stated specification.	
c	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>	
d	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>	
e	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>	

*Changes to legislation:* There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

	in vitro genotoxicity studies		
8.5.1.	In vitro gene mutation study in bacteria		
8.5.2.	In vitro cytogenicity study in mammalian cells		
8.5.3.	In vitro gene mutation study in mammalian cells		
8.6.	In vivo genotoxicity study The assessment of this endpoint shall comprise the following consecutive steps: — If there is a positive result in any of the in vitro genotoxicity studies and there are no results available from an in vivo study already, an appropriate in vivo somatic cell genotoxicity study shall be proposed/ conducted by the applicant — If either of the in vitro gene mutation tests is positive, an in vivo test to investigate unscheduled DNA synthesis shall be conducted — A second in vivo somatic cell test may be necessary, depending on the	ADS	The study/ies do(es) not generally need to be conducted if: — the results are negative for the three in vitro tests and if no metabolites of concern are formed in mammals or — valid in vivo micronucleus data is generated within a repeat dose study and the in vivo micronucleus test is the appropriate test to be conducted to address this information requirement — the substance is known to be carcinogenic category 1A or 1B or mutagenic category 1A, 1B or 2.
a	The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.		
b	The information provided should be for the purified active substance of stated specification.		
c	<a href="#">OJ L 20, 26.1.1980, p. 43.</a>		
d	<a href="#">OJ L 372, 27.12.2006, p. 19.</a>		
e	<a href="#">OJ L 348, 24.12.2008, p. 84.</a>		

**Changes to legislation:** There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

<p>— results, quality and relevance of all the available data</p> <p>— If there is a positive result from an in vivo somatic cell study available, the potential for germ cell mutagenicity should be considered on the basis of all available data, including toxicokinetic evidence to demonstrate that the substance reached the tested organ. If no clear conclusions about germ cell mutagenicity can be made, additional investigations shall be considered</p>		
<p>8.7. Acute toxicity</p> <p>In addition to the oral route of administration (8.7.1), for substances other than gases, the information mentioned under 8.7.2 to 8.7.3 shall be provided for at least one other route of administration</p> <p>— The choice for the second route will depend on the nature of the substance and the likely route of human exposure</p> <p>— Gases and volatile liquids should be administered by the inhalation route</p>		<p>The study/ies do(es) not generally need to be conducted if:</p> <p>— the substance is classified as corrosive to the skin</p>
<p><b>a</b> The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.</p>		
<p><b>b</b> The information provided should be for the purified active substance of stated specification.</p>		
<p><b>c</b> <a href="#">OJ L 20, 26.1.1980, p. 43.</a></p>		
<p><b>d</b> <a href="#">OJ L 372, 27.12.2006, p. 19.</a></p>		
<p><b>e</b> <a href="#">OJ L 348, 24.12.2008, p. 84.</a></p>		

*Changes to legislation:* There are outstanding changes not yet made to Regulation (EU) No 528/2012 of the European Parliament and of the Council. Any changes that have already been made to the legislation appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

<p>— If the only route of exposure is the oral route, then information for only that route need be provided. If either the dermal or inhalation route is the only route of exposure to humans then an oral test may be considered. Before a new dermal acute toxicity study is carried out, an in vitro dermal penetration study (OECD 428) should be conducted to assess the likely magnitude and rate of dermal bioavailability</p> <p>— There may be exceptional circumstances where all routes of administration are deemed necessary</p>		
<p>8.7.1. By oral route The Acute Toxic Class Method is the preferred method for the determination of this endpoint</p>		<p>The study need not be conducted if:</p> <p>— the substance is a gas or a highly volatile substance</p>
<p>8.7.2. By inhalation Testing by the inhalation route is appropriate if exposure of humans via inhalation is likely taking into account:</p> <p>— the vapour pressure of the substance (a</p>		
<p><b>a</b> The information provided should be for the purified active substance of stated specification or for the active substance as manufactured, if different.</p>		
<p><b>b</b> The information provided should be for the purified active substance of stated specification.</p>
