

Council Regulation (Euratom) No 1314/2013 of 16 December 2013  
on the Research and Training Programme of the European Atomic  
Energy Community (2014-2018) complementing the Horizon 2020  
Framework Programme for Research and Innovation (repealed)

COUNCIL REGULATION (EURATOM) No 1314/2013

of 16 December 2013

on the Research and Training Programme of the European Atomic  
Energy Community (2014-2018) complementing the Horizon 2020  
Framework Programme for Research and Innovation (repealed)

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Atomic Energy Community, and in particular the first paragraph of Article 7 thereof,

Having regard to the proposal from the European Commission,

Having regard to the opinion of the European Parliament,

Having regard to the opinion of the European Economic and Social Committee<sup>(1)</sup>,

Whereas:

- (1) One of the aims of the European Atomic Energy Community (the 'Community') is to contribute to the raising of the standard of living in the Member States including by promoting and facilitating nuclear research in the Member States and complementing it by carrying out a Community research and training programme.
- (2) Nuclear research can contribute to social and economic prosperity and environmental sustainability by improving nuclear safety, security and radiation protection. Equally important is the potential contribution of nuclear research to the long term decarbonisation of the energy system in a safe, efficient and secure way.
- (3) By supporting nuclear research, the Research and Training Programme of the Community for the period from 1 January 2014 to 31 December 2018 (the 'Euratom Programme') will contribute to achieving the objectives of the Horizon 2020 Framework Programme for Research and Innovation (the 'Horizon 2020 Framework Programme') established by Regulation (EU) No 1291/2013 of the European Parliament and of the Council<sup>(2)</sup> and will facilitate implementation of the Europe 2020 strategy and the creation and operation of the European Research Area.
- (4) Notwithstanding the potential impact of nuclear energy on energy supply and economic development, severe nuclear accidents may endanger human health. Therefore, nuclear safety and, where appropriate, security aspects dealt with by the Joint Research Centre (the 'JRC') should be given the greatest possible attention in the Euratom Programme.
- (5) The European Strategic Energy Technology Plan (the 'SET Plan'), set out in the conclusions of the Council meeting of 28 February 2008 in Brussels, is accelerating the

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

development of a portfolio of low carbon technologies. The European Council agreed, at its meeting on 4 February 2011, that the Union and its Member States would promote investment in renewables, and safe and sustainable low carbon technologies and would focus on implementing the technology priorities established in the SET Plan. Each Member State remains free to choose the type of technologies that it would support.

- (6) As all Member States have nuclear installations or make use of radioactive materials particularly for medical purposes, the Council has recognised, in the conclusions of its meeting in Brussels on 1 and 2 December 2008, the continuing need for skills in the nuclear field, in particular through appropriate education and training linked with research and coordinated at Community level.
- (7) While it is for each Member State to choose whether or not to make use of nuclear power, it is also acknowledged that nuclear energy plays different roles in different Member States.
- (8) By signing the Agreement on the Establishment of the ITER International Fusion Energy Organisation for the Joint Implementation of the ITER Project<sup>(3)</sup>, the Community has undertaken to participate in the construction of the ITER Project (ITER) and its future exploitation. The Community contribution is managed through the 'European Joint Undertaking for ITER and the Development of Fusion Energy (Fusion for Energy)', established by Council Decision 2007/198/Euratom<sup>(4)</sup>. The activities of that joint undertaking, including ITER, are to be regulated by a separate legislative act.
- (9) For fusion to become a credible option for commercial energy production, it is, firstly, necessary to successfully complete, in a timely manner, the construction of ITER and start its operation. Secondly it is necessary to establish an ambitious, yet realistic roadmap towards the production of electricity by 2050. Reaching those goals requires the European fusion programme to be redirected towards a joint programme of activities implementing this roadmap. In order to secure the achievements of on-going fusion research activities, as well as the long-term commitment of, and collaboration between, the fusion stakeholders, continuity of the Community's support should be ensured. A stronger focus should be placed primarily on the activities in support of ITER but also on the developments towards the demonstration reactor, including the stronger involvement, as appropriate, of the private sector. Such rationalisation and refocusing should be achieved without jeopardising the European leadership of the fusion scientific community.
- (10) The JRC should continue to provide independent customer-driven scientific and technological support for the formulation, development, implementation and monitoring of Community policies, in particular in the field of nuclear safety and security research and training. To optimize human resources and ensure no duplication of research in the Union, any new activity carried out by the JRC should be analysed to check its consistency with existing activities in the Member States. The security aspects of the Horizon 2020 Framework Programme should be limited to the direct actions of the JRC.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

- (11) The JRC should continue to generate additional resources through competitive activities, including participation in indirect actions of the Euratom Programme, third party work and, to a lesser extent, the exploitation of intellectual property.
- (12) In the interest of all its Member States, the role of the Union is to develop a framework to support joint cutting-edge research, knowledge creation and knowledge preservation on nuclear fission technologies, with special emphasis on safety, security, radiation protection and non-proliferation. That requires independent scientific evidence, to which the JRC can make a key contribution. That has been recognised in the Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions, dated 6 October 2010, entitled 'Europe 2020 Flagship Initiative Innovation Union', in which the Commission stated its intention to strengthen scientific evidence for policy making through the JRC. The JRC proposes to respond to that challenge by focusing its nuclear safety and security research on the Union's policy priorities.
- (13) With the aim of deepening the relationship between science and society and reinforcing public confidence in science, the Euratom Programme should favour an informed engagement of citizens and civil society on research and innovation matters by promoting science education, by making scientific knowledge more accessible, by developing responsible research and innovation agendas that meet the concerns and expectations of citizens and civil society, and by facilitating their participation in activities under the Euratom Programme.
- (14) The implementation of the Euratom Programme should respond to the evolving opportunities and needs relating to science and technology, industry, policies and society. As such, the agendas should be set in close liaison with stakeholders from all sectors concerned, and sufficient flexibility should be allowed for new developments. External advice might be sought during the Euratom Programme, also making use of relevant structures such as European Technology Platforms.
- (15) The outcomes of the debates that took place at the Symposium on 'Benefits and Limitations of Nuclear Fission Research for a Low Carbon Economy' prepared by an interdisciplinary study involving, among others, experts from the fields of energy, economics and social sciences, co-organised by the Commission and the European Economic and Social Committee in Brussels on 26 and 27 February 2013, recognised the need to continue nuclear research at the European level.
- (16) The Euratom Programme should contribute to the attractiveness of the research profession in the Union. Adequate attention should be paid to the European Charter for Researchers and Code of Conduct for the Recruitment of Researchers<sup>(5)</sup>, together with other relevant reference frameworks defined in the context of the European Research Area, while respecting their voluntary nature.
- (17) The activities developed under the Euratom Programme should aim at promoting equality between women and men in research and innovation, by addressing in particular the underlying causes of gender imbalance, by exploiting the full potential of both female and male researchers, and by integrating the gender dimension into the

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

- content of projects in order to improve the quality of research and stimulate innovation. Activities should also aim at the implementation of the principles relating to the equality between women and men as laid down in Articles 2 and 3 of the Treaty on European Union and Article 8 of the Treaty on the Functioning of the European Union (TFEU).
- (18) Research and innovation activities supported by the Euratom Programme should respect fundamental ethical principles. The opinions on energy matters of the European Group on Ethics in Science and New Technologies should be taken into account as appropriate. Research activities should also take into account Article 13 of the TFEU and reduce the use of animals in research and testing, with a view to ultimately replacing animal use. All activities should be carried out ensuring a high level of human health protection.
- (19) A greater impact should also be achieved by combining the Euratom Programme and private sector funds within public-private partnerships in key areas where research and innovation could contribute to the Union's wider competitiveness goals. Particular attention should be given to the involvement of small and medium-sized enterprises.
- (20) The Euratom Programme should promote cooperation, in particular in the field of safety, with third countries based on common interest and mutual benefit notably to promote continuous improvement of nuclear safety.
- (21) In order to maintain a level playing field for all undertakings that are active in the internal market, funding provided by the Euratom Programme should be designed in accordance with state aid rules so as to ensure the effectiveness of public spending and prevent market distortions such as crowding-out of private funding, creating ineffective market structures or preserving inefficient firms.
- (22) The need for a new approach to control and risk management in Union research funding was recognised by the European Council in its conclusions of 4 February 2011, which called for a new balance between trust and control and between risk-taking and risk avoidance. The European Parliament, in its Resolution of 11 November 2010 on simplifying the implementation of the Research Framework Programmes<sup>(6)</sup>, called for a pragmatic shift towards administrative and financial simplification and stated that the management of Union research funding should be more trust-based and risk-tolerant towards participants.
- (23) The financial interests of the Union should be protected through proportionate measures throughout the expenditure cycle, including the prevention, detection and investigation of irregularities, the recovery of funds lost, wrongly paid or incorrectly used and, where appropriate, penalties. A revised control strategy, shifting focus from minimisation of error rates towards risk-based control and fraud detection, should reduce the control burden for participants.
- (24) It is important to ensure sound financial management of the Euratom Programme and its implementation in the most effective and user-friendly manner possible, while also ensuring legal certainty and its accessibility to all participants. It is necessary to ensure compliance with the relevant provisions of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council (the "Financial Regulation")<sup>(7)</sup> and with the requirements of simplification and better regulation.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

- (25) To ensure the most efficient implementation possible, and easy access for all participants through simplified procedures, and to achieve a coherent, comprehensive and transparent framework for participants, participation in the Euratom Programme and dissemination of research results should be subject to the rules applicable to the Horizon 2020 Framework Programme, as set out in Regulation (EU) No 1291/2013 of the European Parliament and of the Council with certain adaptations or exceptions.
- (26) It is important to continue to facilitate the exploitation of intellectual property developed by participants while protecting the legitimate interests of other participants and the Community in accordance with Chapter 2 of the Treaty.
- (27) The participant guarantee funds, managed by the Commission and established pursuant to Council Regulation (Euratom) No 1908/2006<sup>(8)</sup> and Council Regulation (Euratom) No 139/2012<sup>(9)</sup>, have proved to be an important safeguard mechanism which mitigates the risks associated with the amounts due and not reimbursed by defaulting participants. The participant guarantee fund established pursuant to Regulation (EU) No 1290/2013 of the European Parliament and of the Council<sup>(10)</sup> should also cover actions under Regulation (Euratom) No 1908/2006, Regulation (Euratom) No 139/2012 and this Regulation.
- (28) In order to ensure uniform conditions for the implementation of the indirect actions under the Euratom Programme, implementing powers should be conferred on the Commission to adopt work programmes and the decision on the approval of the funding of indirect actions. Those implementing powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council<sup>(11)</sup>.
- (29) Achieving the objectives of the Euratom Programme in relevant areas requires support for cross-cutting activities, both within the Euratom Programme and jointly with the activities of the Horizon 2020 Framework Programme.
- (30) Effective performance management, including evaluation and monitoring, requires development of specific performance indicators that can be measured over time, are both realistic and reflect the logic of the intervention and are relevant to the appropriate hierarchy of objectives and activities. Appropriate coordination mechanisms should be put in place between the implementation and monitoring of the Euratom Programme, on the one hand, and the monitoring of progress, achievements and functioning of the European Research Area, on the other.
- (31) The Board of Governors of the JRC, set up by Commission Decision 96/282/Euratom<sup>(12)</sup>, has been consulted on the scientific and technological content of the direct actions of the JRC.
- (32) For reasons of legal certainty, the Council Decision of 16 December 1980 setting up the Consultative Committee for the Fusion Programme<sup>(13)</sup>, Council Decision 84/338/Euratom, ECSC, EEC<sup>(14)</sup>, Council Decision 2006/970/Euratom<sup>(15)</sup>, Council Decision 2006/976/Euratom<sup>(16)</sup>, Council Decision 2006/977/Euratom<sup>(17)</sup>, Regulation (Euratom) No 1908/2006, Council Decision 2012/93/Euratom<sup>(18)</sup>, Regulation (Euratom) No 139/2012, Council Decision 2012/94/Euratom<sup>(19)</sup> and Council Decision 2012/95/Euratom<sup>(20)</sup> should be repealed.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

(33) The Commission has consulted the Euratom Scientific and Technical Committee,  
HAS ADOPTED THIS REGULATION:

## TITLE I

### ESTABLISHMENT

#### *Article 1*

##### **Establishment**

This Regulation establishes the Research and Training Programme of the European Atomic Energy Community for the period from 1 January 2014 to 31 December 2018 (the 'Euratom Programme'), and lays down the rules for participation in that Programme, including the participation in programmes of funding bodies managing the funds granted in accordance with this Regulation and in activities conducted jointly under this Regulation and under the Horizon 2020 Framework Programme for Research and Innovation (the 'Horizon 2020 Framework Programme') established by Regulation (EU) No 1291/2013 of the European Parliament and of the Council.

#### *Article 2*

##### **Definitions**

For the purposes of this Regulation, the following definitions shall apply:

- (a) 'research and innovation activities' means the whole spectrum of activities of research, technological development, demonstration and innovation, including the promotion of cooperation with third countries and international organisations, dissemination and optimisation of results and stimulation of the training and mobility of researchers in the European Atomic Energy Community (hereinafter 'the Community');
- (b) 'direct actions' means research and innovation activities undertaken by the Commission through its Joint Research Centre (the 'JRC');
- (c) 'indirect actions' means research and innovation activities to which the Union or the Community (hereinafter the 'Union') provides financial support and which are undertaken by participants;
- (d) 'public-private partnership' means a partnership where private sector partners, the Community and, where appropriate, other partners, such as public sector bodies, commit to jointly support the development and implementation of a research and innovation programme or activities;
- (e) 'public-public partnership' means a partnership where public sector bodies or bodies with a public service mission at local, regional, national or international level commit with the Community to jointly support the development and implementation of a research and innovation programme or activities.

### Article 3

#### Objectives

1 The general objective of the Euratom Programme is to pursue nuclear research and training activities with an emphasis on continuous improvement of nuclear safety, security and radiation protection, notably to potentially contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. The general objective shall be implemented through the activities specified in Annex I in the form of direct and indirect actions which pursue the specific objectives set out in paragraphs 2 and 3 of this Article.

2 The Euratom Programme indirect actions shall have the following specific objectives:

- a supporting safety of nuclear systems;
- b contributing to the development of safe, longer term solutions for the management of ultimate nuclear waste, including final geological disposal as well as partitioning and transmutation;
- c supporting the development and sustainability of nuclear expertise and excellence in the Union;
- d supporting radiation protection and development of medical applications of radiation, including, inter alia, the secure and safe supply and use of radioisotopes;
- e moving towards demonstration of feasibility of fusion as a power source by exploiting existing and future fusion facilities;
- f laying the foundations for future fusion power plants by developing materials, technologies and conceptual design;
- g promoting innovation and industrial competitiveness;
- h ensuring availability and use of research infrastructures of pan-European relevance.

3 The Euratom Programme direct actions shall have the following specific objectives:

- a improving nuclear safety including: nuclear reactor and fuel safety, waste management, including final geological disposal as well as partitioning and transmutation; decommissioning, and emergency preparedness;
- b improving nuclear security including: nuclear safeguards, non-proliferation, combating illicit trafficking, and nuclear forensics;
- c increasing excellence in the nuclear science base for standardisation;
- d fostering knowledge management, education and training;
- e supporting the policy of the Union on nuclear safety and security.

Any new attribution of activity to the JRC shall be analysed by the Board of Governors of the JRC to check its consistency with existing activities in the Member States.

4 The Euratom Programme shall be implemented in such a way as to ensure that the priorities and activities supported are relevant to changing needs and take account of the evolving nature of science, technology, innovation, policy making, markets and society, with the aim of optimizing human and financial resources, and to avoid duplication on nuclear research and development in the Union.

5 Within the specific objectives referred to in paragraphs 2 and 3, account may be taken of new and unforeseen needs that arise during the period of implementation of the Euratom Programme. This may, if duly justified, include responses to emerging opportunities, crises and threats, to needs relating to the development of new Union policies, and to the piloting of actions foreseen for support under future programmes.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

## Article 4

### Budget

1 The financial envelope for the implementation of the Euratom Programme shall be EUR 1 603 329 000. That amount shall be distributed as follows:

- a indirect actions for the fusion research and development programme, EUR 728 232 000;
- b indirect actions for nuclear fission, safety and radiation protection, EUR 315 535 000;
- c direct actions, EUR 559 562 000.

For the implementation of indirect actions of the Euratom Programme, the Commission's administrative expenditure shall reach up to 7 % on average during the duration of the Euratom Programme and no more than 6 % in 2018.

2 The financial envelope of the Euratom Programme may cover expenses pertaining to preparatory, monitoring, control, audit and evaluation activities which are required for the management of that Programme and the achievement of its objectives, in particular studies and meetings of experts, as far as they relate to the general objectives of this Regulation, and expenses linked to information technology networks focusing on information processing and exchange, together with all other technical and administrative assistance expenses incurred by the Commission for the management of the Euratom Programme. The expenses for continuous and repetitive actions such as control, audit and IT networks will be covered within the limits of the Commission's administrative expenditure specified in paragraph 1.

3 Where necessary and duly justified, appropriations may be entered in the budget beyond 2018 to cover technical and administrative assistance expenses, in order to enable the management of actions not yet completed by 31 December 2018.

4 Where the direct actions contribute to initiatives established by entities entrusted by the Commission with implementation tasks in accordance with Article 6(2) and Article 15, such contribution shall not be considered as part of the financial contribution allocated to those initiatives.

5 Budgetary commitments may be divided into annual instalments. Each year the Commission shall commit the annual instalments taking into account the progress of the actions receiving financial support, the estimated needs and the budget available.

## Article 5

### Association of third countries

- 1 The Euratom Programme shall be open to the association of:
- a acceding countries, candidate countries and potential candidates, in accordance with the general principles and general terms and conditions for the participation of those countries in Union programmes established in the respective framework agreements and decisions of association councils or similar agreements;
  - b European Free Trade Association (EFTA) members, or countries or territories covered by the European Neighbourhood Policy that fulfil all of the following criteria:
    - (i) a good capacity in science, technology and innovation;

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

- (ii) a good track record of participation in Union research and innovation programmes;
- (iii) fair and equitable dealing with intellectual property rights;
- c countries or territories associated to the Seventh Euratom Framework Programme.

2 Specific terms and conditions regarding the participation of associated countries in the Euratom Programme, including the financial contribution, based on the gross domestic product of the associated country, shall be determined by international agreements between the Union and the associated countries.

## TITLE II

### IMPLEMENTATION

#### CHAPTER I

##### *Implementation, management and forms of support*

###### *Article 6*

###### **Management and forms of Community support**

1 The Euratom Programme shall be implemented through indirect actions using one or several of the forms of funding provided for by the Financial Regulation, in particular grants, prizes, procurement and financial instruments. The Community support shall also consist of direct actions in the form of research and innovation activities undertaken by the JRC.

2 Without prejudice to Article 10 of the Treaty, the Commission may entrust part of the implementation of the Euratom Programme to the funding bodies referred to in Article 58(1) (c) of the Financial Regulation.

The Commission may also entrust the implementation of indirect action under the Euratom Programme to bodies created under, or referred to in, the Horizon 2020 Framework Programme.

3 The Commission shall adopt, by means of implementing acts, in accordance with the examination procedure referred to in Article 12(3), the decision on the approval of the funding of indirect actions.

###### *Article 7*

###### **Rules for participation and dissemination of research results**

1 Subject to paragraphs 2 and 3 of this Article, the participation of any legal entity in indirect actions undertaken under the Euratom Programme shall be governed by the rules laid down in Regulation (EU) No 1290/2013 of the European Parliament and of the Council.

2 For the purposes of the Euratom Programme, 'the security rules' referred to in the first subparagraph of Article 43(2) of Regulation (EU) No 1290/2013 shall include the defence interests of the Member States within the meaning of Article 24 of the Treaty.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

By way of derogation from the first subparagraph of Article 41(3) of Regulation (EU) No 1290/2013, the Commission or the funding body may, with regard to results which are generated by participants having received Community financial contribution, object to transfers of ownership or to grants of both an exclusive and a non-exclusive licence, to third parties established in a third country not associated to the Euratom Programme where it considers that the grant or transfer is not in accordance with the interest of developing the competitiveness of the Union economy or is inconsistent with ethical principles or security considerations. 'Security considerations' shall include the defence interests of the Member States within the meaning of Article 24 of the Treaty.

By way of derogation from the first subparagraph of Article 46(1) of Regulation (EU) No 1290/2013, the Community and its joint undertakings shall, for the purpose of developing, implementing and monitoring Community policies and programmes or obligations assumed through international cooperation with third countries and international organisations, enjoy access rights to the results of a participant having received a Community financial contribution. Such access rights shall include the right to authorise third parties to use the results in public procurement and the right to sub-license and shall be limited to non-commercial and non-competitive use and shall be granted on a royalty-free basis.

3 The participant guarantee fund established pursuant to Regulation (EU) No 1290/2013 shall replace and succeed the participant guarantee funds established pursuant to Regulation (Euratom) No 1908/2006 and Regulation (Euratom) No 139/2012.

Any sums from the participant guarantee funds established pursuant to Regulations (Euratom) No 1908/2006 and (Euratom) No 139/2012 shall be transferred, as of 31 December 2013, to the participant guarantee fund established pursuant to Regulation (EU) No 1290/2013. The participants in actions under Decision 2012/93/Euratom signing grant agreements after 31 December 2013 shall make their contribution to the participant guarantee fund.

#### *Article 8*

### **Cross-cutting activities**

1 In order to achieve the objectives of the Euratom Programme and to address challenges common to the Euratom Programme and the Horizon 2020 Framework Programme, activities cutting across the indirect actions set out in Annex I and/or those implementing the Specific Programme of the Horizon 2020 Framework Programme, as established by Council Decision 2013/743/EU<sup>(21)</sup>, may benefit from the Union financial contribution.

2 The financial contribution referred to in paragraph 1 of this Article may be combined from the financial contributions for indirect actions set out in Article 4 of this Regulation and in Article 6 of Regulation (EU) No 1291/2013, and implemented through a single funding scheme.

#### *Article 9*

### **Gender equality**

The Euratom Programme shall ensure the effective promotion of gender equality and the gender dimension in research and innovation content.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

## Article 10

### **Ethical principles**

1 All the research and innovation activities carried out under the Euratom Programme shall comply with ethical principles and relevant national, Union and international legislation, including the Charter of Fundamental Rights of the European Union and the European Convention on Human Rights and its Supplementary Protocols.

Particular attention shall be paid to the principle of proportionality, the right to privacy, the right to the protection of personal data, the right to the physical and mental integrity of a person, the right to non-discrimination and the need to ensure high levels of human health protection.

2 Research and innovation activities carried out under the Euratom Programme shall have an exclusive focus on civil applications.

## Article 11

### **Work programmes**

1 The Commission shall adopt, by means of implementing acts, in accordance with the examination procedure referred to in Article 12(3), work programmes for the implementation of the indirect actions. Such work programmes shall allow for bottom-up approaches that address the objectives in innovative ways.

The work programmes shall set out the essential elements for implementing the actions in accordance with the Financial Regulation, including their detailed objectives, the associated funding and a timetable, as well as a multi-annual approach and strategic orientations for the following years of implementation.

2 For direct actions, the Commission shall, in accordance with Decision 96/282/Euratom, draw up a multi-annual work programme, setting out in greater detail the objectives and scientific and technological priorities presented in Annex I, and a timetable for implementation.

That multi-annual work programme shall also take account of relevant research activities carried out by the Member States, associated countries and European and international organisations. It shall be updated as and when appropriate.

3 The work programmes referred to in paragraphs 1 and 2 shall take account of the state of science, technology and innovation at national, Union and international level and of relevant policy, market and societal developments. They shall be updated as and where appropriate.

4 The work programmes referred to in paragraphs 1 and 2 shall contain a section which identifies the cross-cutting activities as referred to in Article 8.

## Article 12

### **Committee procedure**

1 The Commission shall be assisted by a Committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

2 The Committee<sup>(22)</sup> shall meet in two different configurations, dealing respectively with fission related aspects and fusion related aspects of the Euratom Programme.

3 Where reference is made to this paragraph, the examination procedure in accordance with Article 5 of Regulation (EU) No 182/2011 shall apply.

4 Where the opinion of the Committee is to be obtained by written procedure, that procedure shall be terminated without result when, within the time-limit for delivery of the opinion, the chair of the Committee so decides or a simple majority of Committee members so requests.

#### *Article 13*

The Commission shall regularly inform the Committee referred to in Article 12 of overall progress in implementing the Euratom Programme, and shall provide it with timely information on all indirect actions proposed or funded under the Euratom Programme.

#### *Article 14*

### **External advice and societal engagement**

1 For the implementation of the Euratom Programme, account shall be taken of advice and inputs provided, where appropriate, by:

- a the Euratom Scientific and Technical Committee pursuant to Article 134 of the Treaty;
- b independent advisory groups of high-level experts set up by the Commission;
- c dialogue structures created under international science and technology agreements;
- d forward-looking activities;
- e targeted public consultations (including, where appropriate, regional and national authorities or stakeholders); and
- f transparent and interactive processes that ensure support to responsible research and innovation.

2 Full account shall also be taken of the research and innovation agendas established by, inter alia, European Technology Platforms, Joint Programming Initiatives and European Innovation Partnerships.

## *CHAPTER II*

### ***Specific fields of action***

#### *Article 15*

### **Small and medium-sized enterprises**

Particular attention shall be paid to ensuring the adequate participation of, and innovation impact on, small and medium-sized enterprises (SMEs) and the private sector in general in the Euratom Programme. Quantitative and qualitative assessments of SME participation shall be undertaken as part of the evaluation and monitoring arrangements.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

## Article 16

### **Public-private and public-public partnerships**

To attain the objectives set out in Article 3, specific activities of the Euratom Programme may be implemented through:

- (a) Joint Undertakings established on the basis of Chapter 5 of the Treaty;
- (b) public-public partnerships based on the 'Programme co-fund actions' funding scheme;
- (c) contractual public-private partnerships, as referred in Article 25 of Regulation (EU) No 1291/2013.

## Article 17

### **International cooperation with third countries and international organisations**

1 Entities established in third countries and international organisations shall be eligible to participate in indirect actions of the Euratom Programme under the conditions set out in Regulation (EU) No 1290/2013. Exceptions to the general principle in that regard are set out in Article 7 of this Regulation. International cooperation with third countries and international organisations shall be promoted by the Euratom Programme with a view to:

- a strengthening the Union's excellence and attractiveness in research and innovation as well as its economic and industrial competitiveness;
- b tackling effectively common societal challenges;
- c supporting the Union's external and development policy objectives, complementing external and development programmes. Synergies with other Union policies shall be sought.

2 Targeted actions with the objective of promoting cooperation with specific third countries or groups of third countries shall be implemented on the basis of a strategic approach as well as common interest, priorities and mutual benefit, taking into account their scientific and technological capabilities and market opportunities, and the expected impact.

Reciprocal access to third country programmes should be encouraged. In order to maximise impact, coordination and synergies with initiatives of Member States and associated countries shall be promoted. The nature of the cooperation may vary according to the specific partner countries.

Cooperation priorities shall take into account developments in Union policy opportunities for cooperation with third countries, and the fair and equitable treatment of intellectual property rights.

## Article 18

### **Information, communication, exploitation and dissemination**

1 When implementing the Euratom Programme, dissemination and communication activities shall be considered an integral part of the actions supported by the Euratom Programme.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

- 2 Communication activities may include:
- a initiatives aimed at widening awareness and facilitating access to funding under the Euratom Programme, in particular for those regions or types of participant that have a relatively low participation;
  - b targeted assistance to projects and consortia to provide them with access to the necessary skills to optimise the communication, exploitation and dissemination of results;
  - c initiatives to foster dialogue and debate on scientific, technological and innovation-related issues with the public, and to take advantage of social media and other innovative technologies and methodologies;
  - d communication of the Union's political priorities provided that they are related to the aims of this Regulation; in particular, the Commission shall provide timely and thorough information to Member States.
- 3 Subject to the Treaty and relevant Union legislation, dissemination activities may include:
- a actions which bring together results from a range of projects, including those that may be funded from other sources, to provide user-friendly databases and reports that summarise key findings;
  - b dissemination of results to policy makers, including standardisation bodies, to promote the use of policy-relevant results by the appropriate bodies at international, Union, national and regional level.

## CHAPTER III

### Control

#### Article 19

#### Control and audit

1 The control system set up for the implementation of this Regulation shall be designed so as to provide reasonable assurance of achieving adequate management of the risks relating to the effectiveness and efficiency of the operations as well as the legality and regularity of the underlying transactions, taking into account the multi-annual character of programmes as well as the nature of the payments concerned.

2 The control system shall ensure an appropriate balance between trust and control, taking into account administrative and other costs of controls at all levels, especially for participants, so that the Euratom Programme objectives can be achieved and the most excellent researchers and most innovative enterprises can be attracted to it.

3 As part of the control system, the audit strategy for expenditure in the indirect actions under the Euratom Programme shall be based on the financial audit of a representative sample of expenditure across the whole Programme. Such representative sample shall be complemented by a selection based on an assessment of the risks related to expenditure.

Audits of expenditure in the indirect actions under the Euratom Programme shall be carried out in a coherent manner in accordance with the principles of economy, efficiency and effectiveness in order to minimise the audit burden of the participants.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

## *Article 20*

### **Protection of the financial interests of the Union**

1 The Commission shall take appropriate measures ensuring that, when actions financed under this Regulation are implemented, the financial interests of the Union are protected by the application of preventive measures against fraud, corruption and any other illegal activities, by effective checks and, where irregularities are detected, by the recovery of the amounts wrongly paid and, where appropriate, by effective, proportionate and dissuasive administrative and financial penalties.

2 The Commission or its representatives and the Court of Auditors shall have the power of audit, on the basis of documents and on-the-spot, over all grant beneficiaries, contractors and subcontractors who have received Union funds under this Regulation.

Without prejudice to paragraph 3, audits by the Commission may be carried out up to two years after the final payment.

3 The European Anti-Fraud Office (OLAF) may carry out investigations, including on-the-spot checks and inspections in accordance with the provisions and procedures laid down in Regulation (EU, Euratom) No 883/2013 of the European Parliament and of the Council<sup>(23)</sup> and Council Regulation (Euratom, EC) No 2185/96<sup>(24)</sup>, with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant agreement or grant decision or a contract funded under the Euratom Programme.

4 Without prejudice to paragraphs 1, 2 and 3, cooperation agreements with third countries and with international organisations, contracts, grant agreements and grant decisions resulting from the implementation of this Regulation shall contain provisions expressly empowering the Commission, the Court of Auditors and the OLAF to conduct such audits and investigations, according to their respective competences.

## *CHAPTER IV*

### ***Monitoring and evaluation***

#### *Article 21*

### **Monitoring**

1 The Commission shall annually monitor the implementation, including progress and achievements, of the Euratom Programme. The Commission shall provide the Committee, referred to in Article 12, with information in this regard.

2 The Commission shall report and make publicly available the results of the monitoring referred to in paragraph 1.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

## Article 22

### Evaluation

1 Evaluations shall be carried out in a sufficiently timely manner to feed into the decision-making process.

By 31 May 2017, and taking into account the ex-post evaluation of the Seventh Euratom Framework Programme established by Decision 2006/970/Euratom and of the Euratom Framework Programme (2012-2013) established by Decision 2012/93/Euratom to be completed by the end of 2015, the Commission shall carry out, with the assistance of independent experts selected on the basis of a transparent process, an interim evaluation of the Euratom Programme on the achievements, at the level of results and progress towards impacts, of the objectives and continued relevance of all the measures, the efficiency and use of resources, the scope for further simplification, and European added value. The evaluation shall also take into account the contribution of the measures to the Union priorities of smart, sustainable and inclusive growth, results on the long-term impact of the predecessor measures and the degree of synergy and interaction with other Union funding programmes, including the Structural Funds.

By 31 December 2022, the Commission shall carry out, with the assistance of independent experts selected on the basis of a transparent process, an ex-post evaluation of the Euratom Programme. Such evaluation shall cover the rationale, implementation and achievements, as well as the longer-term impacts and sustainability of the measures, to feed into a decision on a possible renewal, modification or suspension of a subsequent measure.

2 Without prejudice to paragraph 1, direct and indirect actions of the Euratom Programme shall be subject to separate evaluations.

3 The evaluations referred to in paragraphs 1 and 2 shall assess the progress towards the objectives set out in Article 3, taking into account the relevant performance indicators defined in Annex II.

4 Where appropriate and available, Member States shall provide the Commission with data and information necessary for the monitoring and evaluation of the measures concerned.

5 The Commission shall communicate the conclusions of the evaluations referred to in paragraphs 1 and 2, accompanied by its observations, to the European Parliament, the Council and the European Economic and Social Committee.

## TITLE III

### FINAL AND TRANSITIONAL PROVISIONS

## Article 23

### Repeal and transitional provisions

1 The Decision of 16 December 1980 setting up the Consultative Committee for the Fusion Programme, Decision 84/338/Euratom, ECSC, EEC, Decision 2006/970/Euratom, Decision 2006/976/Euratom, Decision 2006/977/Euratom, Regulation (Euratom)

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

No 1908/2006, Decision 2012/93/Euratom, Regulation (Euratom) No 139/2012, Decision 2012/94/Euratom and Decision 2012/95/Euratom are repealed with effect from 1 January 2014.

2 Activities benefiting from the Community financial contributions under programmes established by the Decisions referred to in paragraph 1 and related financial obligations shall continue to be governed by the rules applicable to those programmes until their completion.

3 The financial allocation referred to in Article 4 may also cover the technical and administrative assistance expenses necessary to ensure the transition between the Euratom Programme and the measures adopted under Decision 2012/93/Euratom, Decision 2012/94/Euratom and Decision 2012/95/Euratom.

4 In order to ensure the continuity of Community support to fusion research, expenditure incurred from 1 January 2014 by the beneficiaries of the Programme co-fund action referred to in point (i) of Annex I shall be eligible for Community support.

#### *Article 24*

#### **Entry into force**

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 16 December 2013.

*For the Council*

*The President*

V. JUKNA

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

## ANNEX I

### ACTIVITIES

#### **Rationale for the Euratom Programme — paving the way to 2020**

By achieving the objectives set out in Article 3, the Euratom Programme will reinforce outcomes under the three priorities of the 'Horizon 2020' Framework Programme, namely *excellent science, industrial leadership and societal challenges*.

Nuclear power constitutes an element in the debate on combating climate change and reducing Europe's dependence on imported energy. In the broader context of finding a sustainable energy-mix for the future, the Euratom Programme will also contribute through its research activities to the debate on the benefits and the limitations of nuclear fission energy for a low-carbon economy. Through ensuring continuous improvement of nuclear safety, more advanced nuclear technologies could also offer the prospect of significant improvements in efficiency and use of resources and producing less waste than current designs. Nuclear safety aspects will receive the greatest possible attention.

The Euratom Programme will strengthen the research and innovation framework in the nuclear field and coordinate Member States' research efforts, thereby avoiding duplication, retaining critical mass in key areas and ensuring that public funding is used in an optimal way. The coordination will, however, not prevent Member States from having programmes to fulfil national needs.

The strategy to develop fusion as a credible option for commercial carbon-free energy production will follow a roadmap with milestones towards the goal of electricity production by 2050. To implement that strategy, a restructuring of fusion-related work in the Union, including governance, funding and management, must be carried out to ensure a shift of emphasis from pure research to designing, building and operating future facilities such as ITER, DEMO and beyond. That will require a close cooperation between the entire Union fusion community, the Commission and the national funding agencies.

In order to maintain the Union expertise necessary for achieving those goals, the Euratom Programme must further enhance its role in training through the establishment of training facilities of pan-European interest that will deliver dedicated programmes. That will continue to promote the European Research Area and the further integration of new Member States and associated countries.

#### **Activities necessary to achieve the programme objectives**

##### *Indirect actions*

In order to ensure that the indirect actions of the Euratom Programme mutually reinforce research efforts of the Member States and the private sector, the priorities of the work programmes are to be established on the basis of appropriate inputs from national public authorities and nuclear research stakeholders grouped in bodies or frameworks such as technology platforms and technical forums for nuclear systems and safety, management of ultimate waste and radiation protection/low-dose risk, fusion research, or any relevant organisation or forum of nuclear stakeholders.

- (a) Supporting safety of nuclear systems (Societal challenges, Excellent science, Industrial leadership)

In line with the general objective, support to joint research activities concerning the safe operation and decommissioning of reactor systems (including fuel cycle facilities) in use in the Union or, to the extent necessary in order to maintain broad nuclear safety expertise in the Union,

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

those reactor types which may be used in the future, focusing exclusively on safety aspects, including all aspects of the fuel cycle such as partitioning and transmutation.

- (b) Contributing to the development of safe, longer term solutions for the management of ultimate nuclear waste, including final geological disposal as well as partitioning and transmutation (Excellent science, Societal challenges)

Joint and/or coordinated research activities on remaining key aspects of geological disposal of spent fuel and long-lived radioactive waste with, as appropriate, demonstration of technologies and safety. Those activities are to promote the development of a common Union view on the main issues related to waste management from discharge of fuel to disposal.

Research activities related to management of other radioactive waste streams for which industrially mature processes currently do not exist.

- (c) Supporting the development and sustainability of nuclear expertise and excellence in the Union (Excellent science)

Promoting joint training and mobility activities between research centres and industry, and between different Member and Associated States, as well as support for maintaining multi-disciplinary nuclear competences in order to guarantee the availability of suitably qualified researchers, engineers and employees in the nuclear sector in the Union in the long term.

- (d) Supporting radiation protection and development of medical applications of radiation, including, inter alia, the secure and safe supply and use of radioisotopes (Excellent science, Societal challenges)

Joint and/or coordinated research activities, in particular those regarding the risks from low doses from industrial, medical or environmental exposure, on emergency management in relation to accidents involving radiation, and on radioecology, to provide a pan-European scientific and technological basis for a robust, equitable and socially acceptable system of protection.

Research activities on medical applications of ionising radiation and addressing the operational safety aspects of radiation protection and their utilisation.

- (e) Moving towards demonstration of feasibility of fusion as a power source by exploiting existing and future fusion facilities (Industrial leadership, Societal challenges)

Supporting common research activities undertaken by members of the European Fusion Development Agreement and any of the entities referred to under paragraph (i) to ensure the swift start of high performance operation of ITER including the use of relevant facilities (including JET, the Joint European Torus), of integrated modelling using, among others, high performance computers, and training activities to prepare the next generation of researchers and engineers.

- (f) Laying the foundations for future fusion power plants by developing materials, technologies and conceptual design (Industrial leadership, Societal challenges)

Supporting joint activities undertaken by members of the European Fusion Development Agreement and any of the entities referred to under paragraph (i) to develop and qualify materials for a demonstration power plant requiring, inter alia, preparatory work for an appropriate material test facility and negotiations for the Union's participation in a suitable international framework for that facility. Such development and qualifications are to make use of all possible levels of the experimental, computational and theoretical capacities available.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

Supporting joint research activities undertaken by members of the European Fusion Development Agreement and any of the entities referred to under paragraph (i) that will address reactor operation issues and will develop and demonstrate all relevant technologies for a fusion demonstration power plant. Those activities include the preparation of complete demonstration power plant conceptual designs and exploration of the potential of stellarators as a power plant technology.

(g) Promoting innovation and industry competitiveness (Industrial leadership)

Implementing or supporting knowledge management and technology transfer from the research co-funded by the Euratom Programme to industry exploiting all innovative aspects of the research.

Promoting innovation through, inter alia, open access to scientific publications, a database for knowledge management and dissemination and promoting technology topics in educational programmes.

In the long term, the Euratom Programme is to support the preparation and development of a competitive nuclear fusion industrial sector facilitating the involvement of the private sector as well as SMEs where appropriate, in particular through the implementation of a technology road map to a fusion power plant with active industrial involvement in the design and development projects.

(h) Ensuring availability and use of research infrastructures of pan-European relevance (Excellent science)

Activities supporting the construction, refurbishment, use and continued availability of key research infrastructures under the Euratom Programme, as well as appropriate access to those infrastructures and cooperation between them.

(i) European Fusion Programme

A grant (Programme co-fund action) is to be awarded to the legal entities established or designated by Member States and any third country associated to the Euratom Programme and that will develop a joint programme of activities implementing the roadmap towards the goal of electricity production by 2050. That grant may include resources in kind from the Community, such as scientific and technical exploitation of the JET facility in accordance with Article 10 of the Treaty, or the secondment of Commission staff.

*JRC direct actions*

The priorities for direct actions are to be established through consultation of the policy Directorates-General of the Commission and of the JRC Board of Governors.

The nuclear activities of the JRC must aim to support the implementation of Council Directives 2009/71/Euratom<sup>(25)</sup> and 2011/70/Euratom<sup>(26)</sup>, as well as Council Conclusions giving priority to the highest standards for nuclear safety in the Union and internationally.

The JRC must notably contribute to the nuclear safety research needed for safe, secure and peaceful use of nuclear energy and other non fission applications. The JRC will provide a scientific basis for the relevant Union policies and, where necessary, react within the limits of its mission and competence to nuclear events, incidents and accidents. To that effect, the JRC will carry out research and assessments, provide references and standards and deliver dedicated training and education. Synergies with relevant cross-cutting initiatives will be sought as appropriate, with the aim of optimizing human and financial resources and to avoid duplication of nuclear research and development in the European Union. The JRC activities in these areas

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

will be conducted taking into account relevant initiatives at the regional, Member State or at European Union level, within the perspective of shaping the European Research Area.

- (a) Improving nuclear safety including: nuclear reactor and fuel safety, waste management including final geological disposal as well as partitioning and transmutation; decommissioning, and emergency preparedness

The JRC will contribute to the development of tools and methods to achieve high safety standards for nuclear installations and fuel cycles relevant to Europe. Those tools and methods will include:

- (1) severe accident analyses modelling and methodologies for assessment of nuclear installations' operational safety margins; supporting the establishment of a common European approach to the evaluation of advanced fuel cycles and designs; and investigation and dissemination of the lessons learnt from operational experience. The JRC will further pursue its 'European Clearinghouse on NPP Operational Experience Feedback' to focus its activities on post-Fukushima nuclear safety challenges, appealing to the Members States' competences in this area;
  - (2) minimisation of the scientific uncertainties in the prediction of long-term behaviour of nuclear waste and of the dispersion of radionuclides in the environment; and key aspects of research on decommissioning of nuclear installations;
  - (3) exchange with relevant stakeholders for strengthening Union capacity to respond to nuclear accidents and incidents by research on alert systems and models for radiological dispersion in the air, and by mobilising resources and expertise for analysing and modelling nuclear accidents.
- (b) Improving nuclear security including: nuclear safeguards, non-proliferation, combating illicit trafficking, and nuclear forensics

The area of non-proliferation must receive the greatest possible attention. The JRC will:

- (1) develop enhanced methodologies and detection/verification methods and technologies to support the Community safeguards and strengthen international safeguards;
  - (2) develop and apply enhanced methods and technology to prevent, detect and respond to nuclear and radioactive incidents, including qualification of detection technology and development of nuclear forensics methods and techniques in the fight against illicit trafficking in synergies with the global CBRN (Chemical, Biological, Radiological, Nuclear) framework;
  - (3) support the implementation of the Treaty on the Non-Proliferation of Nuclear Weapons and Union-related strategies through analysis studies and follow-up of the technical evolution of export control regimes to support relevant Commission and Union services.
- (c) Increasing excellence in the nuclear science base for standardisation

The JRC will further develop the scientific basis for nuclear safety and security. Emphasis will be given to research on fundamental properties and behaviour of actinides, structural and nuclear materials. In supporting Union standardisation, the JRC will provide state-of-the-art nuclear standards, reference data and measurements, including the development and implementation of relevant databases and assessment tools. The JRC will support the further development of medical applications, namely new cancer therapies based on alpha irradiation.

- (d) Fostering knowledge management, education and training

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

The JRC must stay abreast of new developments in research and instrumentation, safety and environmental regulations. To that effect, a rolling investment plan for the scientific infrastructures must be implemented.

In order to maintain the Union at the forefront of nuclear safety and security, the JRC must develop knowledge management tools, monitor Union trends in human resources through its Nuclear Human Resources Observatory and deliver dedicated training and education programmes, covering also decommissioning aspects.

(e) Supporting the policy of the Union on nuclear safety and security

The JRC must foster its expertise and excellence in order to provide independent scientific and technical evidence which might be necessary to support Union policy on nuclear safety and security.

As the Euratom Implementing Agent for the Generation IV International Forum (GIF), the JRC will continue to coordinate the Community contribution to GIF. The JRC will pursue and further develop international research cooperation with key partner countries and international organizations (IAEA, OECD/NEA) in order to promote the Union's nuclear safety and security policies.

*Cross-cutting activities within the Euratom Programme*

In order to achieve its general objectives, the Euratom Programme will support complementary activities (direct and indirect, coordination and stimulating joint programming) that ensure synergy of research efforts in solving common challenges (such as materials, coolant technology, reference nuclear data, modelling and simulation, remote handling, waste management, radiation protection).

*Cross-cutting activities and interfaces with the Horizon 2020 Framework Programme*

In order to achieve the objectives of the Euratom Programme, appropriate links and interfaces, such as joint calls, will be ensured with the Specific Programme of the Horizon 2020 Framework Programme.

The Euratom Programme may contribute to the Debt facility and Equity facility developed under the Horizon 2020 Framework Programme that will be widened to cover the objectives referred to in Article 3.

*International cooperation with third countries and international organisations*

International cooperation in nuclear research and innovation, based on shared goals and mutual trust, must continue, with the aim of providing clear and significant benefits for the Union and its environment. As a contribution to the achievement of the specific objectives set out in Article 3, the Community will seek to reinforce the Union's scientific and technical expertise through international cooperation agreements and to promote the access of the Union nuclear industry to new emerging markets.

International cooperation activities will be promoted through multilateral frameworks (such as IAEA, OECD, ITER, GIF), and by the existing or new bilateral cooperation with countries having strong R&D and industrial bases and research installations under operation, design or construction.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

## ANNEX II

### PERFORMANCE INDICATORS

This Annex presents for each of the specific objectives of the Euratom Programme a number of key performance indicators for assessing results and impacts that may be refined during the implementation of the Euratom Programme.

#### 1. Indicators for indirect actions

- (a) Supporting safety of nuclear systems
  - The number of projects (joint research and/or coordinated actions) likely to lead to a demonstrable improvement in nuclear safety practice in Europe.
- (b) Contributing to the development of safe, longer term solutions for the management of ultimate nuclear waste, including final geological disposal as well as partitioning and transmutation
  - The number of projects contributing to the development of safe long term solutions for the management of ultimate nuclear waste.
- (c) Supporting the development and sustainability of nuclear expertise and excellence in the Union
  - Training through research - the number of PhD students and postdoctoral researchers supported through the Euratom fission projects.
  - The number of fellows and trainees in the Euratom fusion programme.
- (d) Supporting radiation protection and development of medical applications of radiation, including, inter alia, the secure and safe supply and use of radioisotopes
  - The number of projects likely to have a demonstrable impact on regulatory practice regarding radiation protection and on development of medical applications of radiation.
- (e) Moving towards demonstration of feasibility of fusion as a power source by exploiting existing and future fusion facilities
  - The number of publications in peer-reviewed high impact journals.
- (f) Laying the foundations for future fusion power plants by developing materials, technologies and conceptual design
  - The percentage of the Fusion Roadmap's milestones, established for the period 2014-2018, reached by the Euratom Programme.
- (g) Promoting innovation and industry competitiveness
  - The number of spin-offs from the fusion research under the Euratom Programme.
  - The patents applications generated and patents awarded on the basis of research activities supported by the Euratom Programme.
- (h) Ensuring availability and use of research infrastructures of pan-European relevance
  - The number of researchers having access to research infrastructures through Euratom Programme support.

#### 2. Indicators for direct actions

- (a) Impact indicator for JRC policy support
  - The number of occurrences of tangible specific impacts on Union policies resulting from technical and scientific policy support provided by the JRC.

---

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

---

- (b) JRC scientific productivity indicator
- The number of peer reviewed publications.

The indicators referred to in points (a) and (b) may be represented according to the following Community objectives of direct actions:

- Improving nuclear safety including: nuclear reactor and fuel safety, waste management, including final geological disposal as well as partitioning and transmutation; decommissioning; and emergency preparedness;
- Improving nuclear security including: nuclear safeguards, non-proliferation, combating illicit trafficking, and nuclear forensics;
- Increasing excellence in the nuclear science base for standardisation;
- Fostering knowledge management, education and training;
- Supporting the policy of the Union on nuclear safety and security.

*Status: Point in time view as at 16/12/2013.*

*Changes to legislation: There are currently no known outstanding effects for the Council Regulation (Euratom) No 1314/2013 (repealed). (See end of Document for details)*

- (1) [OJ C 181, 21.6.2012, p. 111.](#)
- (2) Regulation (EU) No 1291/2013 of the European Parliament and of the Council of 17 December 2013 establishing Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020) and repealing Decision No 1982/2006/EC (See page 104 of this Official Journal).
