

Regulation (EU) 2016/426 of the European Parliament and of the
Council of 9 March 2016 on appliances burning gaseous fuels
and repealing Directive 2009/142/EC (Text with EEA relevance)

REGULATION (EU) 2016/426 OF THE
EUROPEAN PARLIAMENT AND OF THE COUNCIL

of 9 March 2016

on appliances burning gaseous fuels and repealing Directive 2009/142/EC

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee⁽¹⁾,

Acting in accordance with the ordinary legislative procedure⁽²⁾,

Whereas:

- (1) Directive 2009/142/EC of the European Parliament and of the Council⁽³⁾ lays down rules for the placing on the market and the putting into service of appliances burning gaseous fuels ('appliances').
- (2) Directive 2009/142/EC is based on the 'new approach' principles, as set out in the Council Resolution of 7 May 1985 on a new approach to technical harmonisation and standards⁽⁴⁾. Thus, it sets out only the essential requirements applying to appliances, whereas technical details are adopted by the European Committee for Standardisation (CEN) and the European Committee for Electrotechnical Standardisation (Cenelec) in accordance with Regulation (EU) No 1025/2012 of the European Parliament and of the Council⁽⁵⁾. Conformity with the harmonised standards so set, the reference numbers of which are published in the *Official Journal of the European Union*, provides a presumption of conformity with the requirements of Directive 2009/142/EC. Experience has shown that those basic principles have worked well in that sector and should be maintained and even further promoted.
- (3) Experience acquired from the implementation of Directive 2009/142/EC has shown the need to modify some of its provisions in order to clarify and update them and thus ensure legal certainty as regards the definitions relating to its scope, the content of the Member States' communications of the types of gas and corresponding supply pressures used on their territory and certain essential requirements.

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

- (4) Since the scope, essential requirements and conformity assessment procedures have to be identical in all Member States, there is almost no flexibility in transposing a directive based on the new approach principles into national law. In order to simplify the regulatory framework, Directive 2009/142/EC should be replaced by a regulation, which is the appropriate legal instrument as it imposes clear and detailed rules which do not give room for divergent transposition by Member States and thus ensures uniform implementation throughout the Union.
- (5) Decision No 768/2008/EC of the European Parliament and of the Council⁽⁶⁾ lays down common principles and reference provisions intended to apply across sectoral legislation in order to provide a coherent basis for revision or recasts of that legislation. In order to ensure consistency with other sectoral product legislation, Directive 2009/142/EC should be adapted to that Decision.
- (6) Regulation (EC) No 765/2008 of the European Parliament and of the Council⁽⁷⁾ lays down rules on the accreditation of conformity assessment bodies, provides a framework for the market surveillance of products and for controls on products from third countries, and lays down the general principles of the CE marking.
- (7) The scope of this Regulation should reflect the scope of Directive 2009/142/EC. This Regulation should apply to domestic and non-domestic appliances intended for a number of specified applications and to fittings designed to be incorporated into such appliances.
- (8) This Regulation covers appliances and fittings which are new to the Union market when they are placed on the market; that is to say, they are either new appliances and fittings made by a manufacturer established in the Union or appliances and fittings, whether new or second-hand, imported from a third country.
- (9) Appliances possessing a historic or artistic value within the meaning of Article 36 of the Treaty on the Functioning of the European Union (TFEU) and not put into service, such as antique and other appliances serving exhibition or collection purposes, should not be considered as appliances covered by this Regulation.
- (10) This Regulation should apply to all forms of supply, including distance selling.
- (11) This Regulation should aim to ensure the functioning of the internal market of appliances and of fittings as regards gas safety risks and energy efficiency.
- (12) This Regulation should not apply in respect of aspects covered more specifically by other Union harmonisation legislation. This includes the measures adopted pursuant to Directive 2009/125/EC of the European Parliament and of the Council⁽⁸⁾.
- (13) This Regulation should prevent Member States from imposing stricter requirements on health, safety and energy conservation which would prohibit, restrict or impede the making available on the market and the putting into service of appliances which comply with this Regulation. However, this should not affect the possibility for Member States, when implementing other Union acts, to impose requirements which affect the energy efficiency of products, including appliances, as long as such measures are compatible with the TFEU.

- (14) Directive 2009/28/EC of the European Parliament and of the Council⁽⁹⁾ requires Member States to introduce in their building regulations and codes appropriate measures in order to increase the share of all kinds of energy from renewable sources in the building sector. Directive 2010/31/EU of the European Parliament and of the Council⁽¹⁰⁾ requires Member States to set minimum energy performance requirements for buildings and building elements and system requirements in respect of the overall energy performance of the technical building systems which are installed in existing buildings. Directive 2012/27/EU of the European Parliament and of the Council⁽¹¹⁾ requires Member States to take sufficient measures to progressively reduce energy consumption in different areas, including in buildings.
- (15) This Regulation should not affect the obligation for Member States to adopt measures with respect to the promotion of the use of energy from renewable sources and to the energy efficiency of buildings, in accordance with Directives 2009/28/EC, 2010/31/EU and 2012/27/EU. It is consistent with the objectives of those Directives that national measures may in certain circumstances limit the installation of appliances which comply with the rational use of energy requirement of this Regulation, provided that such measures do not constitute an unjustifiable market barrier.
- (16) Member States should take the necessary steps to ensure that appliances are made available on the market and put into service only where they do not compromise the health and safety of persons, domestic animals or property, when normally used.
- (17) This Regulation should not affect the Member States' entitlement to lay down rules concerning commissioning or periodic inspections of appliances or other measures such as installer training or certification, in order to ensure the correct installation, use and maintenance of appliances, including precautionary safety measures. Those rules and measures are essential in preventing gas poisoning, including from carbon monoxide (CO), and the leakage of any substances harmful to health and safety.
- (18) This Regulation should not affect the Member States' entitlement to lay down requirements as they may deem necessary concerning installation aspects, space ventilation conditions and aspects relating to the safety of the building itself and its energy performance, provided that those requirements do not impose design requirements on appliances.
- (19) As this Regulation does not cover risks caused by appliances in the case of incorrect installation, maintenance or use, Member States should be encouraged to take measures to ensure that the public is made aware of the health and safety risks related to combustion products and the need for proper precautionary safety measures, inter alia in relation to emissions of carbon monoxide.
- (20) Although this Regulation does not regulate the gas supply conditions in the Member States, it should take into account the fact that different conditions as regards types of gas and supply pressures are in force in the Member States in the absence of harmonisation of the technical characteristics of the gaseous fuel. The composition and specifications of the types of gas and the supply pressures at the place where an appliance is put into service is very important for its safe and correct functioning,

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

therefore that aspect should be taken into consideration at the design phase of the appliance in order to ensure its compatibility with the gas type(s) and supply pressure(s) it is intended for.

- (21) In order to avoid barriers to trade with regard to appliances on grounds relating to the fact that the gas supply conditions are not yet harmonised and to ensure that economic operators are sufficiently informed, Member States should communicate to the other Member States and to the Commission the types of gas and corresponding supply pressures used on their territory and any changes thereof in good time.
- (22) The communication of the gas types and supply pressures by Member States should contain the necessary information for economic operators. In that framework, the primary source of the gaseous fuel supplied is not relevant for the characteristics, the performance and the compatibility of appliances with the communicated gas supply conditions.
- (23) When determining the gas families and gas groups used on their territory, Member States are encouraged to take into account the ongoing standardisation work concerning gas qualities and thus ensure, across the Union, a coherent and coordinated approach towards harmonisation of gaseous fuels via standardisation.
- (24) When, in accordance with Directive 2009/73/EC of the European Parliament and of the Council⁽¹²⁾ and the ongoing standardisation work of CEN on gas quality specifications, Member States take concrete measures for a wider use of biogas by injecting such gas into the gas distribution network or by distributing such gas through isolated systems, they should ensure that they update in a timely manner their communication of the types of gas in the event that the quality of the supplied gas does not remain within the already communicated quality range.
- (25) When Member States establish their national action plans in accordance with Directive 2009/28/EC in order to comply with their obligation to increase the percentage of renewable energies and in particular biogas in the total energy consumption, they are encouraged to consider the possibilities of injecting such gases into the gas distribution network.
- (26) Member States should take the necessary measures to ensure that the gas supply conditions do not constitute barriers to trade and that they do not restrict the putting into service of appliances that are compatible with the local gas supply conditions.
- (27) Appliances covered by this Regulation and complying with it should benefit from the principle of free movement of goods. Such appliances should be allowed to be put into service provided that they are compatible with the local gas supply conditions.
- (28) The appliance category marking indicated on the appliance or its data plate establishes a direct link with the gas families and/or gas groups for which an appliance has been designed to burn safely at the desired performance level and thus ensures the compatibility of the appliance with the local gas supply conditions.
- (29) The essential requirements laid down in this Regulation should be observed in order to ensure that appliances are safe when normally used at the desired performance level.

- (30) The essential requirements should be interpreted and applied so as to take account of the state of the art at the time of design and manufacture as well as of technical and economic considerations which are consistent with a high degree of health and safety protection and rational use of energy.
- (31) Economic operators should be responsible for the compliance of appliances and of fittings with the requirements of this Regulation, in relation to their respective roles in the supply chain, so as to ensure a high level of protection of public interests, such as health and safety of persons and domestic animals, protection of consumers and of property, and rational use of energy, and to guarantee fair competition on the Union market.
- (32) All economic operators intervening in the supply and distribution chain should take appropriate measures to ensure that they only make available on the market appliances or fittings which are in conformity with this Regulation. It is necessary to provide for a clear and proportionate distribution of obligations which correspond to the role of each economic operator in the supply and distribution chain.
- (33) The manufacturer, having detailed knowledge of the design and production process, is best placed to carry out the conformity assessment procedure. Conformity assessment should therefore remain solely the obligation of the manufacturer.
- (34) The manufacturer should provide sufficient and detailed information on the intended use of the appliance so as to allow its correct and safe installation and putting into service, use and maintenance. Such information may need to include the technical specifications of the interface between the appliance and its installation environment.
- (35) This Regulation should not apply to any natural person who manufactures an appliance on a non-professional basis and uses it exclusively for his own purposes.
- (36) In order to facilitate communication between economic operators, national market surveillance authorities and consumers, Member States should encourage economic operators to include a website address in addition to the postal address.
- (37) It is necessary to ensure that appliances and fittings from third countries entering the Union market comply with the requirements of this Regulation, and in particular that appropriate conformity assessment procedures have been carried out by manufacturers with regard to those appliances and fittings. Provision should therefore be made for importers to make sure that the appliances and fittings they place on the market comply with the requirements of this Regulation and that they do not place on the market appliances and fittings which do not comply with such requirements or present a risk. Provision should also be made for importers to make sure that conformity assessment procedures have been carried out and that the CE marking on appliances and fittings and documentation drawn up by manufacturers are available for inspection by the competent national authorities.
- (38) The distributor makes an appliance or a fitting available on the market after it has been placed on the market by the manufacturer or the importer and should act with due

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

care to ensure that its handling of the appliance or fitting does not adversely affect its compliance.

- (39) When placing an appliance or a fitting on the market, every importer should indicate on the appliance or fitting his name, registered trade name or registered trade mark and the postal address at which he can be contacted. Exceptions should be provided for in cases where the size or nature of the appliance or fitting does not allow it. This includes cases where the importer would have to open the packaging to put his name and address on the appliance or fitting.
- (40) Any economic operator that either places an appliance or a fitting on the market under his own name or trademark or modifies an appliance or a fitting in such a way that compliance with the requirements of this Regulation may be affected should be considered to be the manufacturer and should assume the obligations of the manufacturer.
- (41) Distributors and importers, being close to the market place, should be involved in market surveillance tasks carried out by the competent national authorities, and should be prepared to participate actively, providing those authorities with all necessary information relating to the appliance or fitting concerned.
- (42) Ensuring traceability of an appliance or a fitting throughout the whole supply chain helps to make market surveillance simpler and more efficient. An efficient traceability system facilitates the market surveillance authorities' task of tracing economic operators who made non-compliant appliances or fittings available on the market. When keeping the information required under this Regulation for the identification of other economic operators, economic operators should not be required to update such information in respect of other economic operators who have either supplied them with an appliance or a fitting or to whom they have supplied an appliance or a fitting.
- (43) This Regulation should be limited to the expression of the essential requirements. In order to facilitate conformity assessment with those requirements it is necessary to provide for presumption of conformity for appliances and fittings which are in conformity with harmonised standards that are adopted in accordance with Regulation (EU) No 1025/2012 for the purpose of expressing detailed technical specifications of those requirements, especially with regard to the design, manufacture, operation, testing, the rational use of energy and installation of appliances.
- (44) Regulation (EU) No 1025/2012 provides for a procedure for objections to harmonised standards where those standards do not entirely satisfy the requirements of this Regulation.
- (45) In order to enable economic operators to demonstrate and the competent authorities to ensure that appliances and fittings made available on the market conform to the essential requirements, it is necessary to provide for conformity assessment procedures. Decision No 768/2008/EC establishes modules for conformity assessment procedures, which include procedures from the least to the most stringent, in proportion to the level of risk involved and the level of safety required. In order to ensure inter-sectoral coherence

and to avoid ad hoc variants, conformity assessment procedures should be chosen from among those modules.

- (46) Manufacturers should draw up an EU declaration of conformity to provide information required under this Regulation on the conformity of an appliance or a fitting with the requirements of this Regulation and of other relevant Union harmonisation legislation.
- (47) To ensure effective access to information for market surveillance purposes, the information required to identify all applicable Union acts for an appliance or a fitting should be available in a single EU declaration of conformity. In order to reduce the administrative burden on economic operators, that single EU declaration of conformity may be a dossier made up of relevant individual declarations of conformity.
- (48) The CE marking, indicating the conformity of an appliance or a fitting, is the visible consequence of a whole process comprising conformity assessment in a broad sense. General principles governing the CE marking and its relationship with other markings are set out in Regulation (EC) No 765/2008. Rules governing the affixing of the CE marking on appliances and fittings should be laid down in this Regulation. Exceptions should be provided for in cases where the size or nature of the appliance or fitting does not allow the CE marking to be affixed to it.
- (49) Fittings are not appliances but intermediate products intended for appliance manufacturers and designed to be incorporated into an appliance. However, fittings should satisfy the essential requirements so as to fulfil correctly their intended purpose when incorporated into an appliance or assembled to constitute an appliance. With a view to simplification and in order to avoid any confusion and misunderstanding for manufacturers in meeting their obligations, it is considered justified that fittings should also bear the CE marking.
- (50) A check on compliance of appliances and of fittings with the essential requirements is necessary in order to provide effective protection of the health and safety of persons, of domestic animals and of property.
- (51) In order to ensure compliance of appliances and fittings with the essential requirements, it is necessary to lay down appropriate conformity assessment procedures to be followed by the manufacturer. Those procedures should be set from the conformity assessment modules laid down in Decision No 768/2008/EC.
- (52) The conformity assessment procedures set out in this Regulation require the intervention of conformity assessment bodies, which are notified by the Member States to the Commission.
- (53) Experience has shown that the criteria set out in Directive 2009/142/EC, that conformity assessment bodies have to fulfil to be notified to the Commission, are not sufficient to ensure a uniformly high level of performance of notified bodies throughout the Union. It is, however, essential that all notified bodies perform their functions to the same level and under conditions of fair competition. That requires the setting of obligatory requirements for conformity assessment bodies wishing to be notified in order to provide conformity assessment services.

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

- (54) In order to ensure a consistent level of conformity assessment quality, it is also necessary to set requirements for notifying authorities and other bodies involved in the assessment, notification and monitoring of notified bodies.
- (55) If a conformity assessment body demonstrates conformity with the criteria laid down in harmonised standards, it should be presumed to comply with the corresponding requirements set out in this Regulation.
- (56) The system set out in this Regulation should be complemented by the accreditation system provided for in Regulation (EC) No 765/2008. Since accreditation is an essential means of verifying the competence of conformity assessment bodies, it should also be used for the purposes of notification.
- (57) Transparent accreditation as provided for in Regulation (EC) No 765/2008, ensuring the necessary level of confidence in certificates of conformity, should be considered by the national public authorities throughout the Union as the preferred means of demonstrating the technical competence of conformity assessment bodies. However, national authorities may consider that they possess the appropriate means of carrying out that evaluation themselves. In such cases, in order to ensure the appropriate level of credibility of evaluations carried out by other national authorities, they should provide the Commission and the other Member States with the necessary documentary evidence demonstrating the compliance of the conformity assessment bodies evaluated with the relevant regulatory requirements.
- (58) Conformity assessment bodies frequently subcontract parts of their activities linked to the assessment of conformity or have recourse to a subsidiary. In order to safeguard the level of protection required for the appliances and the fittings to be placed on the Union market, it is essential that conformity assessment subcontractors and subsidiaries fulfil the same requirements as notified bodies in relation to the performance of conformity assessment tasks. Therefore, it is important that the assessment of the competence and the performance of bodies to be notified, and the monitoring of bodies already notified, cover also activities carried out by subcontractors and subsidiaries.
- (59) It is necessary to increase the efficiency and transparency of the notification procedure and, in particular, to adapt it to new technologies so as to enable online notification.
- (60) Since notified bodies may offer their services throughout the Union, it is appropriate to give the other Member States and the Commission the opportunity to raise objections concerning a notified body. It is therefore important to provide for a period during which any doubts or concerns as to the competence of conformity assessment bodies can be clarified before they start operating as notified bodies.
- (61) In the interests of competitiveness, it is crucial that notified bodies apply the conformity assessment procedures without creating unnecessary burdens for economic operators. For the same reason, and to ensure equal treatment of economic operators, consistency in the technical application of the conformity assessment procedures needs to be ensured. That can best be achieved through appropriate coordination and cooperation between notified bodies.

- (62) Interested parties should have the right to appeal against the result of a conformity assessment carried out by a notified body. For that reason, it is important to ensure that an appeal procedure against decisions taken by notified bodies is available.
- (63) In order to ensure legal certainty, it is necessary to clarify that rules on Union market surveillance and control of products entering the Union market provided for in Regulation (EC) No 765/2008 apply to appliances and fittings covered by this Regulation. This Regulation should not prevent Member States from choosing the competent authorities to carry out those tasks.
- (64) Directive 2009/142/EC already provides for a safeguard procedure which is necessary to allow for the possibility of contesting the conformity of an appliance or fitting. In order to increase transparency and to reduce processing time, it is necessary to improve the existing safeguard procedure, with a view to making it more efficient and drawing on the expertise available in Member States.
- (65) The existing system should be supplemented by a procedure under which interested parties are informed of measures intended to be taken with regard to appliances and fittings presenting a risk to the health or safety of persons or to domestic animals or property. It should also allow market surveillance authorities, in cooperation with the relevant economic operators, to act at an earlier stage in respect of such appliances and fittings.
- (66) Where the Member States and the Commission agree as to the justification of a measure taken by a Member State, no further involvement of the Commission should be required, except where non-compliance can be attributed to shortcomings of a harmonised standard.
- (67) The power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of the content of the Member States' communications on the gas supply conditions on their territory. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level. The Commission, when preparing and drawing up delegated acts, should ensure a simultaneous, timely and appropriate transmission of relevant documents to the European Parliament and to the Council.
- (68) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council⁽¹³⁾.
- (69) The advisory procedure should be used for the adoption of implementing acts requesting the notifying Member State to take the necessary corrective measures in respect of notified bodies that do not meet or no longer meet the requirements for their notification.
- (70) The examination procedure should be used for the adoption of implementing acts to define the form for the Member States' communications on the gas supply conditions on their territory.

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

- (71) The examination procedure should also be used for the adoption of implementing acts with respect to compliant appliances and fittings which present a risk to the health or safety of persons or to domestic animals or property.
- (72) The Commission should adopt immediately applicable implementing acts where, in duly justified cases relating to compliant appliances or fittings which present a risk to the health or safety of persons, imperative grounds of urgency so require.
- (73) In line with established practice, the committee set up by this Regulation can play a useful role in examining matters concerning the application of this Regulation raised either by its chair or by a representative of a Member State in accordance with its rules of procedure.
- (74) When matters relating to this Regulation, other than its implementation or infringements, are being examined, i.e. in a Commission expert group, the European Parliament should, in line with existing practice, receive full information and documentation and, where appropriate, an invitation to attend such meetings.
- (75) The Commission should, by means of implementing acts and, given their special nature, acting without the application of Regulation (EU) No 182/2011, determine whether measures taken by Member States in respect of non-compliant appliances or fittings are justified or not.
- (76) It is necessary to provide for reasonable transitional arrangements that allow the making available on the market and the putting into service without the need to comply with further product requirements, of appliances and fittings that have already been placed on the market in accordance with Directive 2009/142/EC before the date of application of this Regulation. Distributors should therefore be able to supply appliances and fittings that have been placed on the market, namely stock that is already in the distribution chain, before the date of application of this Regulation.
- (77) Member States should lay down rules on penalties applicable to infringements of this Regulation and ensure that those rules are enforced. The penalties provided for should be effective, proportionate and dissuasive.
- (78) Since the objective of this Regulation, namely to ensure that appliances and fittings on the Union market fulfil the requirements providing for a high level of protection of health and safety of persons, of domestic animals and of property and for rational use of energy, while guaranteeing the functioning of the internal market, cannot be sufficiently achieved by the Member States, but can rather, by reason of its scale and effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.
- (79) Directive 2009/142/EC should therefore be repealed,

CHAPTER I

GENERAL PROVISIONS

Article 1

Scope

- 1 This Regulation applies to appliances and fittings.
- 2 For the purposes of this Regulation, an appliance is considered to be ‘normally used’ where the following conditions are met:

a it is correctly installed and regularly serviced in accordance with the manufacturer's instructions;

b it is used with a normal variation in the gas quality and a normal fluctuation in the supply pressure as set out by [^{F1}the Secretary of State under] Article 4(1);

c it is used in accordance with its intended purpose or in a way which can be reasonably foreseen.
- 3 This Regulation does not apply to appliances specifically designed:

a for use in industrial processes carried out on industrial premises;

b for use on aircrafts and railways;

c for research purposes for temporary use in laboratories.
- For the purposes of this paragraph, an appliance is considered to be ‘specifically designed’ when the design is only intended to address a specific need for a specific process or use.
- 4 Where, for appliances or fittings, the aspects covered by this Regulation are covered more specifically by other [^{F2}enactments], this Regulation does not apply or ceases to apply to such appliances or fittings in respect of those aspects.
- 5 The rational use of energy essential requirement laid down in point 3.5 of Annex I to this Regulation does not apply to appliances covered by [^{F3}an implementing measure within the meaning given in the Ecodesign for Energy-Related Products Regulations 2010].
- ^{F4}6

Article 2

Definitions

For the purposes of this Regulation the following definitions apply:

- (1) ‘appliances’ means appliances burning gaseous fuels used for cooking, refrigeration, air-conditioning, space heating, hot water production, lighting or washing, and also forced draught burners and heating bodies to be equipped with such burners;
- (2) ‘fittings’ means safety devices, controlling devices or regulating devices and sub-assemblies thereof, designed to be incorporated into an appliance or to be assembled to constitute an appliance;
- (3) ‘burning’ means a process in which gaseous fuel reacts with oxygen producing heat or light;
- (4) ‘washing’ means the entire washing process, including drying and ironing;
- (5) ‘cooking’ means the art or practice of preparing or warming food for consumption with the use of heat and employing a wide range of methods;
- (6) ‘gaseous fuel’ means any fuel which is in a gaseous state at a temperature of 15 °C under an absolute pressure of 1 bar;
- (7) ‘industrial process’ means the extraction, growth, refining, processing, production, manufacture or preparation of materials, plants, livestock, animal products, food or other products with a view to their commercial use;
- (8) ‘industrial premises’ means any place where the main activity carried out is an industrial process that would be subject to specific national health and safety regulations;
- (9) ‘gas family’ means a group of gaseous fuels with similar burning behaviour linked together by a range of Wobbe indices;
- (10) ‘gas group’ means a specified range of Wobbe indices within that of the gas family concerned;
- (11) ‘Wobbe index’ means an indicator of the interchangeability of fuel gases used to compare the combustion energy output of different composition fuel gases in an appliance;
- (12) ‘appliance category’ means the identification of gas families and/or gas groups that an appliance is designed to burn safely and at the desired performance level, as indicated by the appliance category marking;
- (13) ‘energy efficiency’ means the ratio of output of performance of an appliance to input of energy;
- (14) ‘making available on the market’ means any supply of an appliance or a fitting for distribution or use on the [F5market of Great Britain] in the course of a commercial activity, whether in return for payment or free of charge;
- (15) ‘placing on the market’ means the first making available of an appliance or a fitting on the [F6market of Great Britain];

- (16) ‘putting into service’ means the first use of an appliance in [^{F7}Great Britain] by its end-user;
- (17) ‘manufacturer’ means any natural or legal person who manufactures an appliance or a fitting or who has an appliance or a fitting designed or manufactured, and markets that appliance or fitting under his name or trademark or uses the appliance for his own purposes;
- (18) ‘authorised representative’ means any natural or legal person established within the [^{F8}United Kingdom] who has received a written mandate from a manufacturer to act on his behalf in relation to specified tasks;
- (19) [^{F9} “importer” means a person who—
- a is established in the United Kingdom and places an appliance or fitting from a country outside of the United Kingdom on the market; or

Gas supply conditions

1 The Secretary of State must publish information, in accordance with Annex II, about the types of gas and corresponding supply pressures of gaseous fuels used in the United Kingdom.

2 The information that is published under paragraph 1, may be—

- a published in such form and manner as the Secretary of State considers appropriate;
- b reviewed by the Secretary of State at any time, and if it is revised following such a review, the Secretary of State must publish revised information as soon as reasonably practicable following that review.

3 Where the Secretary of State considers it necessary to do so to take account of any technical developments with regard to gas supply conditions, the Secretary of State may by regulations amend the content of the information regarding gas supply conditions as set out in Annex II.

4 Before making regulations under this Article, the Secretary of State must consult such persons as the Secretary of State considers appropriate.

5 Where regulations are made under this Article, the Secretary of State must, as soon as reasonably practicable after those regulations come into force, publish revised information in accordance with Annex II as amended by those regulations.

6 Regulations made under this Article may—

- a make different provisions for different cases; and
- b make such supplemental, consequential and transitional provisions as the Secretary of State considers appropriate.

7 Regulations made under this Article are to be made by statutory instrument subject to annulment in pursuance of a resolution of either House of Parliament.]

[^{F21}Article 6A

Designated standard

1 Subject to paragraphs 6 and 7, in this Regulation a “designated standard” means a technical specification which is—

- a adopted by a recognised standardisation body [^{F22}or an international standardising body], for repeated or continuous application, with which compliance is not compulsory; and
- b designated by the Secretary of State, by publishing the reference to the standard and maintaining that publication in a manner the Secretary of State considers appropriate.

2 For the purposes of paragraph 1, “technical specification” means a document that prescribes technical requirements to be fulfilled by a product, process, service or system and which lays down one or more of the following—

- a the characteristics required of a product, including—
 - i levels of quality, performance, interoperability, environmental protection, health, safety or dimensions, and
 - ii the requirements applicable to the product as regards the name under which the product is sold, terminology, symbols, testing and test methods, packaging, marking or labelling and conformity assessment procedures; and
- b production methods and processes relating to the product, where these have an effect on the characteristics of the product.

3 For the purposes of this Article, a “recognised standardisation body” means any one of the following organisations—

- a the European Committee for Standardisation (CEN);
- b the European Committee for Electrotechnical Standardisation (Cenelec);
- c the European Telecommunications Standards Institute (ETSI);
- d the British Standards Institution (BSI).

3A. [^{F23}In this Article “international standardising body” has the same meaning as it has for the purposes of the Agreement on Technical Barriers to Trade, part of Annex 1A to the agreement establishing the World Trade Organisation signed at Marrakesh on 15 April 1994 (as modified from time to time).]

4 When considering whether the manner of publication of a reference is appropriate in accordance with paragraph 1(b), the Secretary of State must have regard to whether the publication will draw the standard to the attention of any person who may have an interest in the standard.

5 Before publishing the reference to a technical specification adopted by the British Standards Institution, the Secretary of State must have regard to whether the technical specification is consistent with [^{F24}such] technical specifications adopted by the other recognised standardisation bodies [^{F25}or by international standardising bodies as the Secretary of State considers to be relevant].

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

6 The Secretary of State may remove from publication the reference to a standard which has been published in accordance with paragraph 1(b).

7 Where the Secretary of State removes the reference to a standard from publication, that standard is no longer a designated standard.

8 In this Article, a reference to a “product” is a reference to an appliance or fitting to which this Regulation applies.

9 The Secretary of State may, by regulations, amend paragraph 3 to reflect any changes in the name or structure of the recognised standardisation bodies.

10 Regulations made under paragraph 9 must be made by statutory instrument, subject to annulment in pursuance of a resolution of either House of Parliament.]

CHAPTER II

OBLIGATIONS OF ECONOMIC OPERATORS

Article 7

Obligations of manufacturers

1 When placing their appliances or fittings on the market or when using the appliances for their own purposes, manufacturers shall ensure that they have been designed and manufactured in accordance with the essential requirements set out in Annex I.

2 Manufacturers shall draw up the technical documentation referred to in Annex III (‘technical documentation’) and carry out the relevant conformity assessment procedure referred to in Article 14 or have it carried out.

Where compliance of an appliance or a fitting with the applicable requirements has been demonstrated by the procedure referred to in the first subparagraph, manufacturers shall draw up [^{F26}a] declaration of conformity and affix the [^{F27}UK] marking.

3 Manufacturers shall keep the technical documentation and the ^{F28}... declaration of conformity for 10 years after the appliance or the fitting has been placed on the market.

4 Manufacturers shall ensure that procedures are in place for series production to remain in conformity with this Regulation. Changes in appliance or fitting design or characteristics and changes in the [F²⁹designated] standards or in other technical specifications by reference to which the conformity of the appliance or the fitting is declared shall be adequately taken into account.

When deemed appropriate with regard to the risks presented by an appliance, manufacturers shall, to protect the health and safety of consumers and other users, carry out sample testing of appliances made available on the market, investigate, and, if necessary, keep a register of complaints, of non-conforming appliances and fittings and recalls of such appliances and fittings, and shall keep distributors informed of any such monitoring.

5 Manufacturers shall ensure that their appliances and fittings bear a type, batch or serial number or other element allowing their identification, and the inscriptions provided for in Annex IV.

Where the size or nature of the appliance or the fitting does not allow it, manufacturers shall ensure that the required information is provided on the packaging or in a document accompanying the appliance or the fitting.

6 Manufacturers shall indicate on the appliance their name, registered trade name or registered trade mark, and the postal address at which they can be contacted or, where that is not possible, on the packaging or in a document accompanying the appliance. The address shall indicate a single point at which the manufacturer can be contacted. The contact details shall be in a language easily understood by consumers and other end-users and the [F³⁰market surveillance authority].

Manufacturers shall indicate on the fitting their name, registered trade name or registered trade mark, and the postal address at which they can be contacted or, where that is not possible, on the packaging or in a document accompanying the fitting. The address shall indicate a single point at which the manufacturer can be contacted. The contact details shall be in a language easily understood by appliance manufacturers and the [F³⁰market surveillance authority].

7 Manufacturers shall ensure that the appliance is accompanied by instructions and safety information in accordance with point 1.5 of Annex I, [F³¹that are clear, legible and in easily understandable English].

Manufacturers shall ensure that the fitting is accompanied by a copy of the F³²... declaration of conformity containing, inter alia, instructions for incorporation or assembly, adjustment, operation and maintenance in accordance with point 1.7 of Annex I, [F³¹that are clear, legible and in easily understandable English].

However, where a large number of fittings are delivered to a single user, the batch or consignment concerned may be accompanied by a single copy of the F³²... declaration of conformity.

8 Manufacturers who consider or have reason to believe that an appliance or a fitting which they have placed on the market is not in conformity with this Regulation shall immediately take the corrective measures necessary to bring that appliance or fitting into conformity, to withdraw it or recall it, if appropriate. Furthermore, where the appliance or the fitting presents a risk, manufacturers shall immediately inform the [F³³enforcement authority] to that effect, giving details, in particular, of the non-compliance and of any corrective measures taken.

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

9 Manufacturers shall, further to a reasoned request from [^{F34}the enforcement authority], provide it with all the information and documentation necessary to demonstrate the conformity of the appliance or the fitting with this Regulation, in a language which can be easily understood by that authority. That information and documentation may be provided in paper or electronic form. They shall cooperate with that authority, at its request, on any action taken to eliminate the risks posed by appliances or fittings which they have placed on the market.

Authorised representatives

1 A manufacturer may, by a written mandate, appoint [^{F35}a person established in the United Kingdom as their]^{F36}... authorised representative.

The obligations laid down in Article 7(1) and the obligation to draw up technical documentation shall not form part of the authorised representative's mandate.

2 An authorised representative shall perform the tasks specified in the mandate received from the manufacturer. The mandate shall allow the authorised representative to do at least the following:

- a keep the ^{F37}... declaration of conformity and the technical documentation at the disposal of [^{F38}the market surveillance authority] for 10 years after the appliance or the fitting has been placed on the market;
- b further to a reasoned request from [^{F39}the enforcement authority], provide that authority with all the information and documentation necessary to demonstrate the conformity of the appliance or the fitting;
- c cooperate with the [^{F40}enforcement authority], at their request, on any action taken to eliminate the risks posed by appliances or fittings covered by the authorised representative's mandate.

Article 9

Obligations of importers

- 1 Importers shall place only compliant appliances or fittings on the market.
- 2 Before placing an appliance on the market, importers shall ensure that the appropriate conformity assessment procedure referred to in Article 14 has been carried out by the manufacturer. They shall ensure that the manufacturer has drawn up the technical documentation, that the appliance bears the [^{F41}UK] marking and is accompanied by instructions and safety information in accordance with point 1.5 of Annex I, and that the manufacturer has complied with the requirements set out in Article 7(5) and (6).

Before placing a fitting on the market, importers shall ensure that the appropriate conformity assessment procedure referred to in Article 14 has been carried out by the manufacturer. They shall ensure that the manufacturer has drawn up the technical documentation, that the fitting bears the [^{F41}UK] marking and is accompanied by a copy of the ^{F42}... declaration of conformity containing, inter alia, instructions for incorporation or assembly, adjustment, operation and maintenance in accordance with point 1.7 of Annex I, and that the manufacturer has complied with the requirements set out in Article 7(5) and (6).

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

Where an importer considers or has reason to believe that an appliance or a fitting is not in conformity with the essential requirements set out in Annex I, he shall not place the appliance or the fitting on the market until it has been brought into conformity. Furthermore, where the appliance or the fitting presents a risk, the importer shall inform the manufacturer and the market surveillance [^{F43}authority] to that effect.

3 Importers shall indicate on the appliance their name, registered trade name or registered trade mark, and the postal address at which they can be contacted ^{F44}.... The contact details shall be in a language easily understood by consumers and other end-users and the market surveillance [^{F45}authority].

Importers shall indicate on the fitting their name, registered trade name or registered trade mark, and the postal address at which they can be contacted ^{F44}... The contact details shall be in a language easily understood by appliance manufacturers and the market surveillance [^{F45}authority].

[^{F46}The obligation set out in the first and second subparagraphs of this paragraph 3 to indicate information on the appliance or fitting does not apply where—

- a either—
 - i it is not possible to indicate that information on the appliance or fitting, or
 - ii the importer has imported the appliance or fitting from an EEA state or Switzerland and places it on the market within the period of [^{F47}seven years] beginning with IP completion day, and
- b before placing the appliance or fitting on the market, the importer sets out the information referred to in the first and second subparagraphs on the packaging of the appliance or fitting or in a document accompanying the appliance or fitting.]

4 Importers shall ensure that the appliance is accompanied by instructions and safety information in accordance with point 1.5 of Annex I, [^{F48}that are clear, legible and in easily understandable English].

Importers shall ensure that the fitting is accompanied by a copy of the ^{F49}... declaration of conformity containing, inter alia, instructions for incorporation or assembly, adjustment, operation and maintenance in accordance with point 1.7 of Annex I, [^{F48}that are clear, legible and in easily understandable English].

5 Importers shall ensure that, while an appliance or a fitting is under their responsibility, storage or transport conditions do not jeopardise its compliance with the essential requirements set out in Annex I.

6 When deemed appropriate with regard to the risks presented by an appliance, importers shall, to protect the health and safety of consumers and other users, carry out sample testing of appliances made available on the market, investigate, and, if necessary, keep a register of complaints, of non-conforming appliances and fittings and recalls of such appliances and fittings, and shall keep distributors informed of any such monitoring.

7 Importers who consider or have reason to believe that an appliance or a fitting which they have placed on the market is not in conformity with this Regulation shall immediately take the corrective measures necessary to bring that appliance or fitting into conformity, to withdraw it or recall it, if appropriate. Furthermore, where the appliance or the fitting presents a risk, importers shall immediately inform the [^{F50}enforcement authority] to that effect, giving details, in particular, of the non-compliance and of any corrective measures taken.

8 Importers shall, for 10 years after the appliance or the fitting has been placed on the market, keep a copy of the ^{F51}... declaration of conformity at the disposal of the market

surveillance [^{F52}authority] and ensure that the technical documentation can be made available to [^{F53}that authority], upon request.

9 Importers shall, further to a reasoned request from [^{F54}the enforcement authority], provide it with all the information and documentation necessary to demonstrate the conformity of an appliance or a fitting in a language which can be easily understood by that authority. That information and documentation may be provided in paper or electronic form. They shall cooperate with that authority, at its request, on any action taken to eliminate the risks posed by appliances or fittings which they have placed on the market.

Article 10

Obligations of distributors

1 When making an appliance or a fitting available on the market distributors shall act with due care in relation to the requirements of this Regulation.

2 Before making an appliance available on the market, distributors shall verify that the appliance bears the [^{F55}UK] marking and that it is accompanied by instructions and safety information in accordance with point 1.5 of Annex I, [^{F56}that are clear, legible and in easily understandable English], and that the manufacturer and the importer have complied with the requirements set out in Article 7(5) and (6) and Article 9(3) respectively.

Before making a fitting available on the market, distributors shall verify that the fitting bears the [^{F57}UK] marking and that it is accompanied by a copy of the ^{F58}... declaration of conformity containing, inter alia, instructions for incorporation or assembly, adjustment, operation and maintenance in accordance with point 1.7 of Annex I, [^{F59}that are clear, legible and in easily understandable English], and that the manufacturer and the importer have complied with the requirements set out in Article 7(5) and (6) and Article 9(3) respectively.

Where a distributor considers or has reason to believe that an appliance or a fitting is not in conformity with the essential requirements set out in Annex I, he shall not make the appliance or the fitting available on the market until it has been brought into conformity. Furthermore, where the appliance or the fitting presents a risk, the distributor shall inform the manufacturer or the importer to that effect as well as the market surveillance [^{F60}authority].

3 Distributors shall ensure that, while an appliance or a fitting is under their responsibility, storage or transport conditions do not jeopardise its compliance with the essential requirements set out in Annex I.

4 Distributors who consider or have reason to believe that an appliance or a fitting which they have made available on the market is not in conformity with this Regulation shall make sure that the corrective measures necessary to bring that appliance or fitting into conformity, to withdraw it or recall it, if appropriate, are taken. Furthermore, where the appliance or the fitting presents a risk, distributors shall immediately inform the [^{F61}enforcement authority] to that effect, giving details, in particular, of the non-compliance and of any corrective measures taken.

5 Distributors shall, further to a reasoned request from [^{F62}the enforcement authority], provide it with all the information and documentation necessary to demonstrate the conformity of an appliance or a fitting. That information and documentation may be provided in paper or electronic form. They shall cooperate with that authority, at its request, on any action taken to eliminate the risks posed by appliances or fittings which they have made available on the market.

Rules and conditions for affixing the [F79UK] marking

[F80A1 Paragraph 1 is subject to paragraph (1A).]

1 The [F81UK] marking shall be affixed visibly, legibly and indelibly to the appliance and the fitting or to their data plate as far as relevant. Where that is not possible or not warranted on account of the nature of the appliance or the fitting, it shall be affixed to the packaging and to the documents accompanying the appliance or the fitting.

[F821A For a period of [F83seven years] beginning with IP completion day, paragraph 1 does not apply where the UK marking is affixed visibly, legibly and indelibly to—

- a a label affixed to the appliance and fitting or their data plate; or
- b a document accompanying the appliance and fitting or their data plate.]

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

2 The [F84UK] marking shall be affixed before the appliance or the fitting is placed on the market.

3 The [F85UK] marking shall be followed by the identification number of the [F86approved] body involved in the production control phase of the appliance or of the fitting and by the last two digits of the year in which the [F85UK] marking was affixed. The identification number of the [F86approved] body shall be affixed by the body itself or, under its instructions, by the manufacturer or his authorised representative.

4 The [F87UK] marking and the identification number referred to in paragraph 3 may be followed by any other mark indicating a special risk or use.

CHAPTER IV

[^{F89} **APPROVAL OF CONFORMITY ASSESSMENT BODIES**]

[^{F90} Article 19

Approved bodies

- 1 An approved body is a conformity assessment body which—
- a has been approved by the Secretary of State pursuant to the procedure set out in Article 20 (approval of conformity assessment bodies); or
 - b immediately before IP completion day was a notified body in respect of which the Secretary of State had taken no action under Article 29 (changes to notifications) of Regulation 2016/426 (pre-exit), to suspend or withdraw the body's status as a notified body.
- 2 Paragraph 1 has effect subject to Article 29 (restriction, suspension or withdrawal of approval).
- 3 In this Chapter—
- “notified body” means a body—
 - (a) which the Secretary of State had, before IP completion day, notified to the European Commission and the member States of the European Union in accordance with Article 19 of Regulation 2016/426 (pre-exit); and
 - (b) in respect of which no objections had been raised, as referred to in Article 27(5) of Regulation 2016/426 (pre-exit);
 - “approved body requirements” means the requirements set out in Article 23.]

[^{F91} Article 20

Approval of conformity assessment bodies

- 1 The Secretary of State may approve only those conformity assessment bodies that qualify for approval.
- 2 A conformity assessment body qualifies for approval if the first and second conditions below are met.
- 3 The first condition is that the conformity assessment body has applied to the Secretary of State to become an approved body and that application is accompanied by—

- a a description of—
 - i the conformity assessment activities that the conformity assessment body intends to carry out;
 - ii the conformity assessment procedure in respect of which the conformity assessment body claims to be competent; and
 - iii the category of appliance or fitting in respect of which the conformity assessment body claims to be competent; and
- b either—
 - i an accreditation certificate; or
 - ii the documentary evidence necessary for the Secretary of State to verify, recognise and regularly monitor the conformity assessment body's compliance with the approved body requirements.

4 The second condition is that the Secretary of State is satisfied that the conformity assessment body meets the approved body requirements.

5 For the purposes of paragraph 4, the Secretary of State may accept an accreditation certificate provided in accordance with paragraph 3(b)(i), as sufficient evidence that the conformity assessment body meets the approved body requirements.

6 When deciding whether to approve a conformity assessment body that qualifies for approval, the Secretary of State may—

- a have regard to any other matter which appears to the Secretary of State to be relevant; and
- b set conditions that the conformity assessment body must meet.

7 For the purposes of this Article, “accreditation certificate” means a certificate issued by the UK national accreditation body, attesting that a conformity assessment body meets the approved body requirements.]

Article 23

[^{F94}Approved Body Requirements]

1 For the purposes of [^{F95}approval], a conformity assessment body shall meet the requirements laid down in paragraphs 2 to 11.

2 A conformity assessment body shall be established [^{F96}in the United Kingdom] and have legal personality.

3 A conformity assessment body shall be a third-party body independent of the organisation or the appliance or the fitting it assesses.

A body belonging to a business association or professional federation representing undertakings involved in the design, manufacturing, provision, assembly, use or maintenance of appliances or fittings which it assesses, may, on the condition that its independence and the absence of any conflict of interest are demonstrated, be considered such a body.

4 A conformity assessment body, its top level management and the personnel responsible for carrying out the conformity assessment tasks shall not be the designer, manufacturer, supplier, installer, purchaser, owner, user or maintainer of the appliances or the fittings which they assess, nor the representative of any of those parties. This shall not preclude the use of assessed appliances or fittings that are necessary for the operations of the conformity assessment body or the use of such appliances or fittings for personal purposes.

A conformity assessment body, its top level management and the personnel responsible for carrying out the conformity assessment tasks shall not be directly involved in the

design, manufacture or construction, the marketing, installation, use or maintenance of those appliances or fittings, or represent the parties engaged in those activities. They shall not engage in any activity that may conflict with their independence of judgement or integrity in relation to conformity assessment activities for which they are [F97 approved]. This shall in particular apply to consultancy services.

Conformity assessment bodies shall ensure that the activities of their subsidiaries or subcontractors do not affect the confidentiality, objectivity or impartiality of their conformity assessment activities.

5 Conformity assessment bodies and their personnel shall carry out the conformity assessment activities with the highest degree of professional integrity and the requisite technical competence in the specific field and shall be free from all pressures and inducements, particularly financial, which might influence their judgement or the results of their conformity assessment activities, especially as regards persons or groups of persons with an interest in the results of those activities.

6 A conformity assessment body shall be capable of carrying out all the conformity assessment tasks assigned to it by Annex III and in relation to which it has been [F98 approved], whether those tasks are carried out by the conformity assessment body itself or on its behalf and under its responsibility.

At all times, and for each conformity assessment procedure and each kind or category of appliances or fittings in relation to which it has been [F98 approved], a conformity assessment body shall have at its disposal the necessary:

- a personnel with technical knowledge and sufficient and appropriate experience to perform the conformity assessment tasks;
- b descriptions of procedures in accordance with which conformity assessment is carried out, ensuring the transparency and the ability of reproduction of those procedures. It shall have appropriate policies and procedures in place that distinguish between tasks it carries out as [F99 an approved body] and other activities;
- c procedures for the performance of activities which take due account of the size of an undertaking, the sector in which it operates, its structure, the degree of complexity of the appliance or fitting technology in question and the mass or serial nature of the production process.

A conformity assessment body shall have the means necessary to perform the technical and administrative tasks connected with the conformity assessment activities in an appropriate manner and shall have access to all necessary equipment or facilities.

7 The personnel responsible for carrying out conformity assessment tasks shall have the following:

- a sound technical and vocational training covering all the conformity assessment activities in relation to which the conformity assessment body has been [F100 approved];
- b satisfactory knowledge of the requirements of the assessments they carry out and adequate authority to carry out those assessments;
- c appropriate knowledge and understanding of the essential requirements set out in Annex I, of the applicable [F101 designated] standards and of the relevant provisions of [F102 this Regulation and any other relevant United Kingdom legislation];
- d the ability to draw up certificates, records and reports demonstrating that assessments have been carried out.

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

8 The impartiality of the conformity assessment bodies, their top level management and of the personnel responsible for carrying out the conformity assessment tasks shall be guaranteed.

The remuneration of the top level management and of the personnel responsible for carrying out the conformity assessment tasks of a conformity assessment body shall not depend on the number of assessments carried out or on the results of those assessments.

9 Conformity assessment bodies shall take out liability insurance unless [^{F103}the Secretary of State] is directly responsible for the conformity assessment.

10 The personnel of a conformity assessment body shall observe professional secrecy with regard to all information obtained in carrying out their tasks under Annex III or any provision of [^{F104}United Kingdom] law giving effect to it, except in relation to the [^{F105}enforcement authority]. Proprietary rights shall be protected.

11 Conformity assessment bodies shall participate in, or ensure that their personnel responsible for carrying out the conformity assessment tasks are informed of, the relevant standardisation activities and the activities of [^{F106}any approved] body coordination group established [^{F107}by the Secretary of State] and shall apply as general guidance the administrative decisions and documents produced as a result of the work of that group.

Presumption of conformity of approved bodies

1 Where a conformity assessment body demonstrates its conformity with the criteria laid down in a designated standard (or part of such a standard), the Secretary of State must presume that the conformity assessment body meets the approved body requirements covered by that standard (or the part of that standard).

2 The presumption in paragraph 1 is rebuttable.]

F¹⁰⁹ Article 25

Subsidiaries of, and subcontracting by, approved bodies

1 An approved body may subcontract specific conformity assessment activities, or use a subsidiary to carry out such activities provided—

- a the body is satisfied that the subcontractor or subsidiary meets the approved body requirements;
- b the body has informed the Secretary of State that it is satisfied that the subcontractor or subsidiary meets those requirements; and
- c the economic operator for whom the activities are to be carried out has consented to the activities being carried out by that person.

2 The approved body which subcontracts specific conformity assessment activities or uses a subsidiary to carry out such activities remains responsible for the proper performance of those activities (irrespective of where the subcontractor or subsidiary is established).

3 Where an approved body subcontracts, or uses a subsidiary to carry out, a specific conformity assessment activity, the approved body must, for a period of 10 years beginning on the day on which the activity is first carried out, keep available for inspection by the Secretary of State all relevant documentation concerning—

Article 31

Operational obligations of [^{F115}approved] bodies

1 [^{F116}Approved] bodies shall carry out conformity assessments in accordance with the conformity assessment procedures provided for in Annex III.

[^{F117}1A Subject to the terms of its appointment, an approved body must carry out the conformity assessment activities and procedures in respect of which —

- a the body's approval was given under Article 20; or
- b the body's notification as a notified body was made.]

2 Conformity assessments shall be carried out in a proportionate manner, avoiding unnecessary burdens for economic operators.

Conformity assessment bodies shall perform their activities taking due account of the size of an undertaking, the sector in which it operates, its structure, the degree of complexity of the appliance or fitting technology in question and the mass or serial nature of the production process.

In so doing they shall nevertheless respect the degree of rigour and the level of protection required for the compliance of the appliance or the fitting with this Regulation.

3 Where [^{F118}an approved] body finds that the essential requirements set out in Annex I or corresponding [^{F119}designated] standards or other technical specifications have not been met by a manufacturer, it shall require that manufacturer to take appropriate corrective measures and shall not issue a certificate or approval decision.

4 Where, in the course of the monitoring of conformity following the issue of a certificate or approval decision, [^{F120}an approved] body finds that an appliance or a fitting no longer complies, it shall require the manufacturer to take appropriate corrective measures and shall suspend or withdraw the certificate or the approval decision, if necessary.

5 Where corrective measures are not taken or do not have the required effect, the [^{F121}approved] body shall restrict, suspend or withdraw any certificates or approval decisions, as appropriate.

F164 Article 44

Transitional provision in relation to EU exit

- 1
- In this Article, “pre-exit period” means the period beginning with 21 April 2018 and ending immediately before IP completion day.
- 2
- Subject to paragraph 3, where an appliance or fitting was made available on the market during the pre-exit period, despite the amendments made by Schedule 36 of the Product Safety and Metrology etc. (Amendment etc.) (EU Exit) Regulations 2019, any obligation to which a person was subject under Regulation 2016/426 (pre-exit), continues to have effect as it did immediately before IP completion day, in relation to that appliance or fitting.
- 3
- Paragraph 2 does not apply to—

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

- a any obligation of the enforcement authority to inform the European Commission or the member States of any matter, or
- b any obligation to take action outside of the United Kingdom in respect of that appliance or fitting.

4 Where during the pre-exit period—

- a an appliance or fitting has not been placed on the market; and
- b a manufacturer has taken any action under Article 14 of Regulation 2016/426 (pre-exit) in relation to that appliance or fitting,

that action has effect as if it had been done under Article 14 of this Regulation.

[^{F165} Subject to paragraph 6, where before 11pm on 31st December 2024—

- a an appliance or fitting has not been placed on the market; and
- b a manufacturer has taken any action under the conformity assessment procedure that applies to that appliance or fitting in accordance with Article 14 of Regulation 2016/426 (pre-exit)

that action has effect as if it had been done under the applicable conformity assessment procedure referred to in Article 14 of this Regulation.

6 Paragraph 5 does not apply—

- a after the expiry of the validity of any certificate issued pursuant to the applicable conformity assessment procedure; and
- b in any event, after 31st December 2027.]]

ANNEX I

ESSENTIAL REQUIREMENTS

PRELIMINARY OBSERVATIONS:

1. The essential requirements laid down in this Regulation are compulsory.
2. The essential requirements are to be interpreted and applied in such a way as to take into account the state of the art and current practice at the time of design and manufacture as well as technical and economic considerations which are consistent with a high degree of energy efficiency and of health and safety protection.

1. GENERAL REQUIREMENTS

- 1.1. Appliances shall be so designed and constructed as to operate safely and present no danger to persons, domestic animals or property, when normally used.

Fittings shall be so designed and constructed as to fulfil correctly their intended purpose when incorporated into an appliance or assembled to constitute an appliance.

- 1.2. The manufacturer is under an obligation to analyse the risks in order to identify those which apply to his appliance or fitting. He shall then design and construct it taking into account its risk assessment.
- 1.3. In selecting the most appropriate solutions, the manufacturer shall apply the principles set out below, in the following order:
 - (a) eliminate or reduce risks as far as possible (inherently safe design and construction);
 - (b) take the necessary protection measures in relation to risks that cannot be eliminated;
 - (c) inform users of the residual risks due to any shortcomings of the protection measures adopted and indicate whether any particular precautions are required.
- 1.4. When designing and constructing the appliance, and when drafting the instructions, the manufacturer shall envisage not only the intended use of the appliance, but also the reasonably foreseeable uses.
- 1.5. All appliances shall:
 - (a) be accompanied by instructions for installation intended for the installer;
 - (b) be accompanied by instructions for use and servicing, intended for the user;
 - (c) bear appropriate warning notices, which shall also appear on the packaging.
- 1.6.1. The instructions for installation intended for the installer shall contain all the instructions for installation, adjustment and servicing required to ensure that those operations are correctly performed so that the appliance may be used safely.

The instructions for installation intended for the installer shall include also information on the technical specifications of the interface between the appliance and its installation environment allowing its correct connection to the gas supply network, the supply of auxiliary energy, the combustion air supply and the flue gas evacuation system.

- 1.6.2. The instructions for use and servicing intended for the user shall contain all the information required for safe use and in particular shall draw the user's attention to any restrictions on use.

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

The manufacturers shall note in the instructions where additional care is needed or where it would be advisable that any of the above work be carried out by a professional. This shall be without prejudice to national requirements to that effect.

The manufacturer of the appliance shall include in the instructions accompanying the appliance all necessary information for adjustment, operation and maintenance of the fittings as part of the finished appliance, as appropriate.

- 1.6.3. The warning notices on the appliance and its packaging shall clearly state the type of gas to be used, the gas supply pressure, the appliance category and any restrictions on use, in particular the restriction whereby the appliance shall be installed only in areas where there is sufficient ventilation so as to ensure that the risks presented by it are minimised.
- 1.7. The instructions for incorporation of the fitting into an appliance or its assembly in order to constitute an appliance and for its adjustment, operation and maintenance shall be provided with the fittings concerned as part of the ^{F171}... declaration of conformity.

Textual Amendments

F171 Word in Annex 1 para. 1.7 omitted (31.12.2020) by virtue of [The Product Safety and Metrology etc. \(Amendment etc.\) \(EU Exit\) Regulations 2019 \(S.I. 2019/696\)](#), reg. 1, [Sch. 36 para. 2\(44\)\(a\)](#) (as amended by [S.I. 2020/676](#), regs. 1(1), 2); 2020 c. 1, Sch. 5 para. 1(1)

2. MATERIALS

Materials for appliances or fittings shall be appropriate for their intended purpose and shall withstand the mechanical, chemical and thermal conditions to which they will foreseeably be subjected.

3. DESIGN AND CONSTRUCTION

The obligations arising for appliances from the essential requirements set out in this point apply also to fittings, as far as relevant.

3.1. General

- 3.1.1. Appliances shall be so designed and constructed that, when normally used, no instability, distortion, breakage or wear likely to impair their safety may occur.
- 3.1.2. Condensation produced at the start-up and/or during use shall not affect the safety of appliances.
- 3.1.3. Appliances shall be so designed and constructed as to minimise the risk of explosion in the event of a fire of external origin.
- 3.1.4. Appliances shall be so designed and constructed that water and inappropriate air penetration into the gas circuit does not occur.
- 3.1.5. In the event of a normal fluctuation of auxiliary energy, appliances shall continue to operate safely.
- 3.1.6. Abnormal fluctuation or failure of auxiliary energy or its restoration shall not lead to an unsafe situation.
- 3.1.7. Appliances shall be so designed and constructed as to obviate any gas-related risks due to hazards of electrical origin. As far as relevant, the results of the conformity

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

F175 Words in Annex 1 para. 3.1.8 substituted (31.12.2020) by [The Product Safety and Metrology etc. \(Amendment etc.\) \(EU Exit\) Regulations 2019 \(S.I. 2019/696\)](#), reg. 1, **Sch. 36 para. 2(44)(c)(ii)** (as amended by [S.I. 2020/676](#), regs. 1(1), 2); 2020 c. 1, Sch. 5 para. 1(1)

- 3.1.9. All pressurised parts of an appliance shall withstand the mechanical and thermal stresses to which they are subjected without any deformation affecting safety.
- 3.1.10. Appliances shall be so designed and constructed that failure of a safety, controlling or regulating device may not lead to an unsafe situation.
- 3.1.11. If an appliance is equipped with safety and controlling devices, the functioning of the safety devices shall not be overruled by that of the controlling devices.
- 3.1.12. All parts of appliances which are set or adjusted at the stage of manufacture and which should not be manipulated by the user or the installer shall be appropriately protected.
- 3.1.13. Levers and other controlling and setting devices shall be clearly marked and give appropriate instructions so as to prevent any error in operation/use. Their design shall be such as to preclude accidental operation.
- 3.2. Unburned gas release
- 3.2.1. Appliances shall be so designed and constructed that the gas leakage rate is not dangerous.
- 3.2.2. Appliances shall be so designed and constructed that gas release at any state of operation is limited in order to avoid a dangerous accumulation of unburned gas in the appliance.

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

3.2.3. Appliances intended to be used in indoor spaces and rooms shall be so designed and constructed as to prevent the release of unburned gas in all situations which could lead to a dangerous accumulation of unburned gas in such spaces and rooms.

3.2.4. Appliances designed and constructed to burn gas containing carbon monoxide or other toxic components shall not present a danger to the health of persons and domestic animals exposed.

3.3. Ignition

Appliances shall be so designed and constructed that, when normally used, ignition and re-ignition is smooth and cross-lighting is assured.

3.4. Combustion

3.4.1. Appliances shall be so designed and constructed that, when normally used, the combustion process is stable and combustion products do not contain unacceptable concentrations of substances harmful to health.

3.4.2. Appliances shall be so designed and constructed that, when normally used, there will be no accidental release of combustion products.

3.4.3. Appliances connected to a flue for the dispersal of combustion products shall be so designed and constructed that in abnormal draught conditions there is no release of combustion products in a dangerous quantity into the indoor spaces or rooms concerned.

3.4.4. Appliances shall be so designed and constructed that, when normally used, they do not cause a concentration of carbon monoxide or other substances harmful to health, such as they would be likely to present a danger to the health of persons and domestic animals exposed.

3.5. Rational use of energy

Appliances shall be so designed and constructed as to ensure rational use of energy, reflecting the state of the art and taking into account safety aspects.

3.6. Temperature

3.6.1. Parts of appliances which are intended to be installed or placed in close proximity to surfaces shall not reach temperatures which present a danger.

3.6.2. The surface temperature of parts of appliances intended to be handled during normal use shall not present a danger to the user.

3.6.3. The surface temperatures of external parts of appliances, with the exception of surfaces or parts which are associated with the transmission of heat, shall not under operating conditions present a danger to the health and safety of persons exposed and in particular to children and elderly people, for whom an appropriate reaction time shall be taken into account.

3.7. Contact with food and water intended for human consumption

Without prejudice to Regulations (EC) No 1935/2004⁽¹⁴⁾ and (EU) No 305/2011⁽¹⁵⁾ of the European Parliament and of the Council, materials and parts used in the construction of an appliance which may come into contact with food or water intended for human consumption

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

as defined in Article 2 of Council Directive 98/83/EC⁽¹⁶⁾, shall not impair quality of the food or water.

ANNEX III

CONFORMITY ASSESSMENT PROCEDURES FOR APPLIANCES AND FITTINGS

1. MODULE B: ^{F179}... TYPE-EXAMINATION — PRODUCTION TYPE
- 1.1. ^{F180}... type-examination is the part of a conformity assessment procedure in which [^{F181}an approved] body examines the technical design of an appliance or a fitting and verifies and attests that the technical design of the appliance or the fitting meets the requirements of this Regulation that apply to it.

Textual Amendments

Changes to legislation: There are currently no known outstanding effects for the Regulation (EU) 2016/426 of the European Parliament and of the Council. (See end of Document for details)

- 1.2. ^{F182}... type-examination shall be carried out by assessment of the adequacy of the technical design of the appliance or the fitting through examination of the technical documentation and supporting evidence referred to in point 1.3, plus examination of a specimen, representative of the production envisaged, of the complete appliance or fitting (production type).

Textual Amendments

F182 Word in Annex 3 para. 1.2 omitted (31.12.2020) by virtue of [The Product Safety and Metrology etc. \(Amendment etc.\) \(EU Exit\) Regulations 2019 \(S.I. 2019/696\)](#), reg. 1, [Sch. 36 para. 2\(46\)\(a\)](#) (as amended by [S.I. 2020/676](#), regs. 1(1), 2); 2020 c. 1, Sch. 5 para. 1(1)

- 1.3. The manufacturer shall lodge an application for ^{F183}... type-examination with [^{F184}a single approved] body of his choice.

Textual Amendments

F183 Word in Annex 3 para. 1.3 omitted (31.12.2020) by virtue of [The Product Safety and Metrology etc. \(Amendment etc.\) \(EU Exit\) Regulations 2019 \(S.I. 2019/696\)](#), reg. 1, [Sch. 36 para. 2\(46\)\(a\)](#) (as amended by [S.I. 2020/676](#), regs. 1(1), 2); 2020 c. 1, Sch. 5 para. 1(1)

- 1.3.1. The application shall include the following:
- (a) the name and address of the manufacturer and, if the application is lodged by the authorised representative, his name and address as well;
 - (b) a written declaration that the same application has not been lodged with any other [^{F185}approved] body;
 - (c) the technical documentation. The technical documentation shall make it possible to assess the appliance's or fitting's conformity with the applicable requirements of this Regulation and shall include an adequate analysis and assessment of the risk(s). The technical documentation shall specify the applicable requirements and cover, as far as relevant for the assessment, the design, manufacture and operation of the appliance or the fitting. The technical documentation shall contain, wherever applicable, at least the following elements:
 - (1) a general description of the appliance or the fitting;
 - (2) conceptual design and manufacturing drawings and schemes of components, sub-assemblies, circuits, etc.;
 - (3) descriptions and explanations necessary for the understanding of those drawings and schemes and the operation of the appliance or the fitting;
 - (4) a list of the [^{F186}designated] standards applied in full or in part ^{F187}... and, where those [^{F186}designated] standards have not been applied, descriptions of the solutions adopted to meet the essential requirements of this Regulation, including a list of other relevant technical specifications applied. In the event

- of partly applied [^{F186}designated] standards, the technical documentation shall specify the parts which have been applied;
- (5) results of design calculations made, examinations carried out, etc.;
 - (6) test reports;
 - (7) instructions for installation and use of the appliance;
 - (8) the ^{F188}... declaration of conformity of the fitting containing the instructions on how the fitting should be incorporated into an appliance or assembled to constitute an appliance;
- (d) the specimens representative of the production envisaged. The [^{F189}approved] body may request further specimens where needed for carrying out the test programme;
- (e) the supporting evidence for the adequacy of the technical design solution. This supporting evidence shall mention any documents that have been used, in particular where the relevant [^{F190}designated] standards have not been applied in full. The supporting evidence shall include, where necessary, the results of tests carried out in accordance with other relevant technical specifications by the appropriate laboratory of the manufacturer, or by another testing laboratory on his behalf and under his responsibility.
