On 22 August 2020, he was transported to a hospital in Berlin, Germany. A specialised laboratory in Germany subsequently found clear evidence, also corroborated by laboratories in France and Sweden, that Alexei Navalny had been poisoned with a toxic nerve agent of the Novichok group. This toxic agent is accessible only to State authorities in the Russian Federation.</p> <p>As a consequence of the overall responsibility of the Ministry of Defence for the safe storage and destruction of chemical weapons, the use of such chemical weapons in the territory of the Russian Federation could only be as a result of intent or negligence by the Ministry of Defence and its political leadership.</p> <p>Given his senior leadership role in the Ministry of Defence of the Russian Federation, Aleksei Krivoruchko is therefore responsible for assisting the persons who carried out or were involved in the poisoning of Alexei Navalny with the Novichok nerve agent, which constitutes a use of chemical weapons under the Chemical Weapons Convention.</p>	15.10.2020
