COMMISSION IMPLEMENTING REGULATION (EU) 2018/1624

of 23 October 2018

laying down implementing technical standards with regard to procedures and standard forms and templates for the provision of information for the purposes of resolution plans for credit institutions and investment firms pursuant to Directive 2014/59/EU of the European Parliament and of the Council, and repealing Commission Implementing Regulation (EU) 2016/1066

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Directive 2014/59/EU of the European Parliament and of the Council establishing a framework for the recovery and resolution of credit institutions and investment firms and amending Council Directive 82/891/EEC, and Directives 2001/24/EC, 2002/47/EC, 2004/25/EC, 2005/56/EC, 2007/36/EC, 2011/35/EU, 2012/30/EU and 2013/36/EU, and Regulations (EU) No 1093/2010 and (EU) No 648/2012, of the European Parliament and of the Council⁽¹⁾, and in particular Article 11(3) thereof,

Whereas:

- (1) Commission Implementing Regulation (EU) 2016/1066⁽²⁾ specifies the procedure and introduces a minimum set of templates for the provision of information to resolution authorities by credit institutions or investment firms ('institutions') for the purpose of drawing up and implementing resolution plans for institutions. Since the adoption of Implementing Regulation (EU) 2016/1066, resolution authorities have gained experience in the area of resolution planning. In light of that experience, it is necessary to update the minimum set of templates for the collection of information for resolution planning purposes.
- (2) Implementing Regulation (EU) 2016/1066 also aims to design the procedure and the minimum set of templates for the provision of information to resolution authorities by institutions in a way that enables the resolution authorities to collect that information in a consistent manner across the Union and to facilitate the exchange of information among the relevant authorities. However, experience has shown that a harmonised approach to the collection of that information has only been partially achieved. It is therefore necessary to ensure that resolution authorities collect a minimum core of information relating to an institution or group across the Union on a regular basis. This does not

- prevent the resolution authority from collecting any additional information they deem necessary to draw up and implement resolution plans or to determine, as set out in Article 4 of Directive 2014/59/EU, simplified information obligations.
- (3) In order to ensure that resolution plans are based on a minimum set of data of consistently high quality and precision, the data items set out in the reporting templates introduced by Implementing Regulation (EU) 2016/1066 should be transformed into a single data point model, as is the practice in supervisory reporting. The single data point model should consist of a structural representation of the data items, and identify all relevant business concepts for the purpose of uniform reporting for resolution planning and should contain all of the relevant specifications necessary for further developing uniform IT reporting solutions.
 - (4) In order to safeguard the quality, consistency and accuracy of data items reported by institutions, the data items should be subject to common validation rules.
 - (5) Due to their very nature, validation rules and data point definitions are updated regularly in order to ensure they comply, at all times, with applicable regulatory, analytical and information technology requirements. However, the time presently required to adopt and publish the detailed single data point model and validation rules means that it is not possible to carry out modifications in a sufficiently rapid and timely manner that would ensure permanent provision of uniform information regarding resolution plans in the Union. Therefore, stringent qualitative criteria should be established for the detailed single data point model and the detailed common validation rules which will be published electronically by the European Banking Authority (EBA) on its website.
 - (6) In accordance with Article 11(2) of Directive 2014/59/EU, competent and resolution authorities should cooperate in order to minimise duplicated information requirements. For that purpose, Implementing Regulation (EU) 2016/1066 introduces a cooperation procedure between competent and resolution authorities, which should be maintained so that competent and resolution authorities jointly verify whether some or all of the requested information is already available to the competent authority. Where the information is available to the competent authority, it is appropriate that it transmits it to the resolution authority directly.
 - (7) Given the extent of the necessary amendments to Implementing Regulation (EU) 2016/1066, it is preferable, for reasons of legal certainty and clarity, to adopt a new Implementing Regulation and, therefore, to repeal Implementing Regulation (EU) 2016/1066.
 - (8) This Regulation is based on the implementing technical standards submitted by the EBA to the Commission.
 - (9) The EBA has conducted open public consultations on the implementing technical standards on which this Regulation is based, analysed the potential related costs and benefits and requested the opinion of the Banking Stakeholder Group established in accordance with Article 37 of Regulation (EU) No 1093/2010 of the European Parliament and of the Council⁽³⁾,

II.2 Z 02.00 — Liability Structure (LIAB)

II.2.1 General remarks

15. This template requires granular information on the liability structure of the entity or group. Liabilities are broken down by liabilities excluded from bail-in and liabilities not excluded from bail-in. Further breakdowns by liability classes, counterparty classes and maturity are provided.
16. Where a maturity breakdown is set out in this template, the residual maturity shall be the time until the contractual maturity or, when there is an explicit or implicit, contractual or statutory, right for the holder of an instrument to early reimbursement, until the first date where such a right arises. Interim payments of principal shall be split into the corresponding maturity buckets. Where applicable, the maturity shall be considered separately for both the principal amount and accrued interest.
17. By default, amounts reported in this template shall be outstanding amounts. The outstanding amount of a claim or instrument is the sum of the principal amount of, and accrued interest on, the claim or instrument. The outstanding amount due is equal to the value of the claim which the creditor could file under insolvency proceedings.
18. By way of derogation from the previous paragraph, balance sheet liabilities arising from derivatives (reported in row 0330) shall be reported in the form of carrying amounts. The carrying amount shall be the carrying amount as defined for FINREP purposes, either under IFRS or nGAAP, as applicable. Otherwise, figures under nGAAP reporting schemes shall be used.

II.7 Critical functions and core business lines

II.7.1 General remarks

32. The four templates of this section provide key data and qualitative assessments of the impact, substitutability and criticality of economic functions the group is providing, supplemented by a mapping of those critical functions to core business lines and legal entities.
33. More specifically, the templates are dedicated to the following topics:
34. Template Z 07.01 — Criticality assessment of economic functions (FUNC 1) identifies, based on quantitative and qualitative indicators, the non-critical and critical functions performed by the group for each Member State in which the group is active;
35. Template Z 07.02 — Mapping of critical functions by legal entity (FUNC 2) maps the critical functions identified to legal entities and assesses whether each legal entity is considered material to the performance of the critical function or not;
36. Z 07.03 — Mapping of Core Business Lines by legal entity (FUNC 3) provides a full list of core business lines and maps them to legal entities;
37. Template Z 07.04 — Mapping of critical functions to core business lines (FUNC 4) maps the identified critical functions to business lines.
38. Pursuant to Article 2(1) point 35 of the Directive 2014/59/EU, critical functions means activities, services or operations the discontinuance of which is likely in one or more Member States, to lead to the disruption of services that are essential to the real economy or to disrupt financial stability due to the size, market share, external and internal interconnectedness, complexity or cross-border activities of an institution or group, with particular regard to the substitutability of those activities, services or operations.
39. Pursuant to Article 6(1) of Commission Regulation (EU) 2016/778⁽¹⁰⁾, a function shall be considered critical, when it meets both of the following:

Status: Point in time view as at 31/12/2020.

Changes to legislation: There are outstanding changes not yet made to Commission Implementing Regulation (EU) 2018/1624.

Any changes that have already been made to the legislation appear in the content and are referenced with annotations.

Pt. 3. These amendments are not currently available on

legislation.gov.uk. The function is provided by an institution to third parties not affiliated to the institution or group; and

2. a sudden disruption would likely have a material negative impact on the third parties, give rise to contagion or undermine the general confidence of market participants due to the systemic relevance of the function for the third parties and the systemic relevance of the institution or group in providing the function.
40. Pursuant to Article 2(1), point (36) of the Directive 2014/59/EU, 'core business lines' means business lines and associated services which represent material sources of revenue, profit or franchise value for an institution or for a group of which an institution forms part.
41. For the purposes of this template, economic functions shall refer to the functions listed in the table below.
42. For each category of economic functions, an economic function 'other' may be chosen if the function is not captured by the other predefined functions.
43. Counterparties referred to in rows 0010 to 0070 and rows 0080 to 0150 are defined identically to counterparty sectors as provided in FINREP, Annex V, Part 1, chapter 6. 'SMEs' refers to SMEs as defined in FINREP, Annex V, Part 1, paragraph 5, point (i).
