

Council Regulation (EU) 2018/511 of 23 March 2018 amending
Regulation (EU) 2018/120 as regards certain fishing opportunities

COUNCIL REGULATION (EU) 2018/511
of 23 March 2018

amending Regulation (EU) 2018/120 as regards certain fishing opportunities

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 43(3) thereof,

Having regard to the proposal from the European Commission,

Whereas:

- (1) Council Regulation (EU) 2018/120⁽¹⁾ fixes the fishing opportunities for 2018 for certain fish stocks and groups of fish stocks applicable in Union waters and, for Union vessels, in certain non-Union waters.
- (2) Certain reporting codes should be modified in order to allow for accurate reporting of catches. Certain references to the footnotes and their wording should be corrected.
- (3) In Regulation (EU) 2018/120, the total allowable catch (TAC) for sandeel in ICES divisions 2a and 3a and ICES subarea 4 was set at zero. Sandeel is a short-lived species and the relevant scientific advice becomes available in the second half of February, while fishing activities start in April.
- (4) The catch limits for sandeel in ICES divisions 2a and 3a and ICES subarea 4 should now be amended in line with the latest scientific advice from the International Council for the Exploration of the Sea (ICES), issued on 23 February 2018.
- (5) For sandeel fisheries, ICES divisions 2a and 3a and ICES subarea 4 are divided into management areas, on the basis of scientific advice. Management area 3r is mainly located in Norwegian waters. However, it also includes Union waters, and some important fishing banks straddled across management areas 2r and 3r. ICES advice sets out that on average 8 % of catches in management area 3r are taken in Union waters. Catch limits for Union waters of management area 3r should be established in accordance with that advice.
- (6) The TAC for cod in ICES subarea 1 and division 2b should be amended to correctly reflect the fishing opportunities available for Union vessels in that area.
- (7) The maximum number of longliners allowed for Malta in the ICCAT Convention area that may be authorised to fish for, retain on board, tranship, transport, or land bluefin tuna in the eastern Atlantic and Mediterranean should be amended, to take account of the increased number of vessels that are so authorised.
- (8) Regulation (EU) 2018/120 should therefore be amended accordingly.

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EU) 2018/511. (See end of Document for details)

- (9) The catch limits provided for in Regulation (EU) 2018/120 apply from 1 January 2018. The provisions introduced by this Regulation concerning catch limits should therefore also apply from that date. Such retroactive application is without prejudice to the principles of legal certainty and protection of legitimate expectations as the fishing opportunities concerned have not yet been exhausted,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes IA, IB and IV to Regulation (EU) 2018/120 are amended in accordance with the Annex to this Regulation.

Article 2

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2018.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 23 March 2018.

For the Council

The President

E. ZAHARIEVA

Changes to legislation: There are currently no known outstanding effects for the Council Regulation (EU) 2018/511. (See end of Document for details)
