

## ANNEX I

**Product Function Categories (PFCs) of EU fertilising products**

## PART II

**REQUIREMENTS RELATED TO PFCs****PFC 1(B)(I): SOLID ORGANO-MINERAL FERTILISER**

1. A solid organo-mineral fertiliser shall be in solid form.
2. A solid organo-mineral fertiliser shall contain at least one of the following declared primary nutrients: nitrogen (N), phosphorus pentoxide (P<sub>2</sub>O<sub>5</sub>) or potassium oxide (K<sub>2</sub>O).

Where a solid organo-mineral fertiliser contains only one declared primary nutrient, that nutrient content shall be at least the following:

- (a) 2,5 % by mass of total nitrogen (N), out of which 1 % by mass shall be organic nitrogen (N<sub>org</sub>),
- (b) 2 % by mass of total phosphorus pentoxide (P<sub>2</sub>O<sub>5</sub>), or
- (c) 2 % by mass of total potassium oxide (K<sub>2</sub>O).

Where a solid organo-mineral fertiliser contains more than one declared primary nutrient, those nutrient contents shall be at least the following:

- (a) 2 % by mass of total nitrogen (N), out of which 0,5 % by mass shall be organic nitrogen (N<sub>org</sub>),
- (b) 2 % by mass of total phosphorus pentoxide (P<sub>2</sub>O<sub>5</sub>), or
- (c) 2 % by mass of total potassium oxide (K<sub>2</sub>O).

The sum of those nutrient contents shall be at least 8 % by mass.

3. Organic carbon (C<sub>org</sub>) content in a solid organo-mineral fertiliser shall be at least 7,5 % by mass.
4. In a solid organo-mineral fertiliser, each physical unit shall contain organic carbon (C<sub>org</sub>) and all the nutrients in their declared content. A physical unit refers to one of the component pieces of a product, such as granules or pellets.
