COMMISSION IMPLEMENTING REGULATION (EU) 2019/2007

of 18 November 2019

laying down rules for the application of Regulation (EU) 2017/625 of the European Parliament and of the Council as regards the lists of animals, products of animal origin, germinal products, animal by-products and derived products and hay and straw subject to official controls at border control posts and amending Decision 2007/275/EC

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Directive 97/78/EC of 18 December 1997 laying down the principles governing the organisation of veterinary checks on products entering the Community from third countries⁽¹⁾, and in particular Article 3(5) thereof,

Having regard to Regulation (EU) 2017/625 of the European Parliament and of the Council of 15 March 2017 on official controls and other official activities performed to ensure the application of food and feed law, rules on animal health and welfare, plant health and plant protection products, amending Regulations (EC) No 999/2001, (EC) No 396/2005, (EC) No 1069/2009, (EC) No 1107/2009, (EU) No 1151/2012, (EU) No 652/2014, (EU) 2016/429 and (EU) 2016/2031 of the European Parliament and of the Council, Council Regulations (EC) No 1/2005 and (EC) No 1099/2009 and Council Directives 98/58/EC, 1999/74/EC, 2007/43/EC, 2008/119/EC and 2008/120/EC, and repealing Regulations (EC) No 854/2004 and (EC) No 882/2004 of the European Parliament and of the Council, Council Directives 89/608/EEC, 89/662/EEC, 90/425/EEC, 91/496/EEC, 96/23/EC, 96/93/EC and 97/78/EC and Council Decision 92/438/EEC (Official Controls Regulation)⁽²⁾, and in particular point (a) of the first subparagraph of Article 47(2) thereof,

Whereas:

- (1) Regulation (EU) 2017/625 establishes rules on the performance of official controls by the competent authorities of the Member States on animals and goods entering the Union in order to verify the compliance with Union agri-food chain legislation.
- (2) Commission Delegated Regulation (EU) 2019/478⁽³⁾ amended Regulation (EU) 2017/625 by adding hay and straw and foodstuffs containing both products of plant

origin and processed products of animal origin ('composite products') to the categories of goods in point (b) of Article 47(1) of that Regulation.

- (3) In accordance with Regulation (EU) 2017/625, certain categories of animals and goods from third countries should always be presented at a border control post for official controls to be performed prior to their entry into the Union. In addition to animals, products of animal origin, germinal products, animal by-products, hay and straw and composite products are among the categories that should always be presented for official controls at border control posts.
- (4) Regulation (EU) 2017/625 requires the Commission to establish lists of the different animals and products of animal origin, germinal products, animal by-products, hay and straw and composite products to be presented for official controls at border control posts with the indication of their respective Combined Nomenclature (CN) code provided for in Council Regulation (EEC) No 2658/87⁽⁴⁾.
- (5) As derived products are a sub-category of animal by-products, they should be included in the lists and their CN codes should be indicated accordingly.
- (6) Commission Decision 2007/275/EC⁽⁵⁾ lays down provisions concerning animals and products, including composite products, subject to veterinary checks at border inspection posts in accordance with Council Directives 91/496/EEC⁽⁶⁾ and 97/78/EC. New conditions for the entry into the Union of composite products will apply from 21 April 2021 in accordance with Commission Delegated Regulation (EU) 2019/625⁽⁷⁾. It is therefore appropriate that until then the current rules laid down in Decision 2007/275/EC concerning composite products subject to official controls at border control posts continue to apply and that this Regulation does not apply to composite products. In order to avoid overlapping of legal provisions, this Regulation should amend Decision 2007/275/EC by limiting its scope of application to composite products.
- (7) In order to facilitate official controls by the competent authorities at border control posts in accordance with Regulation (EU) 2017/625, the list established in this Regulation should describe, in detail, the animals, products of animal origin, germinal products, animal by-products and derived products and hay and straw subject to such official controls.
- (8) In addition, for certain CN codes, this Regulation lists only part of the animals and products that fall under the relevant heading or subheading. In such cases, this Regulation should give additional details about the relevant animals and products which are subject to official controls at border control posts.
- (9) As the provisions of Regulation (EU) 2017/625 governing the matters covered by this Regulation apply from 14 December 2019, this Regulation should apply from the same date.
- (10) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

ANNEX I

LIST OF ANIMALS, PRODUCTS OF ANIMAL ORIGIN, GERMINAL PRODUCTS, ANIMAL BY-PRODUCTS AND DERIVED PRODUCTS AND HAY AND STRAW SUBJECT TO OFFICIAL CONTROLS AT BORDER CONTROL POSTS AS REFERRED TO IN ARTICLE 3

Notes:

1. **General remarks**

General remarks are added to certain Chapters to clarify, which animals or goods are covered in the relevant chapter. In addition, where necessary, reference is made to specific requirements laid down in Commission Regulation (EU) No 142/2011⁽¹²⁾.

2. **Note to Chapter**

The lists in this Annex are structured in Chapters which correspond to the relevant Chapters in the Combined Nomenclature (CN) as laid down in Annex I to Council Regulation (EEC) No 2658/87⁽¹³⁾.

The Chapter notes are explanations, where necessary extracted, from the Notes to the individual Chapters of the CN.

3. **Extract from the Explanatory Notes and the Classification Opinions of the Harmonized System**

Additional information on the different Chapters has been extracted, where necessary, from the Explanatory Notes and the Classification Opinions of the Harmonized System of the World Customs Organisation.

Tables:

4. **Column (1) — CN code**

This column indicates the CN code. The CN, established by Regulation (EEC) No 2658/87, is based on the International Convention on Harmonized Commodity Description and Coding System (HS) drawn up by the Customs Cooperation Council, now the World Customs Organisation (WCO), adopted by the International Convention, concluded in Brussels on 14 June 1983 and approved on behalf of the European Economic Community by Council Decision 87/369/EEC⁽¹⁴⁾ ('the HS Convention'). The CN reproduces the headings and subheadings of the HS to six digits, with only the seventh and eighth figures creating further subheadings which are specific to it.

Where a four digit code is used: Unless otherwise specified, all products prefixed with or covered by these four digits shall be submitted to official controls at border control posts. In most of these cases, the relevant CN codes included in the Traces system set up by Commission Decision 2004/292/EC⁽¹⁵⁾, are broken down to the six or eight digit code.

Where only certain specified products under any four, six or eight digit code are required to be submitted to official controls and no specific subdivision under this code exists in the CN, the code is marked 'Ex'. In that case, the animals and products covered by this Regulation are determined by the scope of the CN code and by that of the corresponding description in column (2) and the qualification and explanation in column (3).

5. **Column (2) — Description**

The description of the goods is as laid down in the description column of the CN.

Status: Point in time view as at 31/12/2020.

Changes to legislation: There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2019/2007. (See end of Document for details)

Without prejudice to the rules for the interpretation of the CN, the wording for the description of animals and products in column (2) is considered to be of indicative value only, since the goods covered by this Regulation are determined by CN codes.

6. Column (3) — Qualification and explanation

This column gives details of the animals or goods covered. Further information on the animals or goods covered in the different Chapters of the CN can be found in the Explanatory Notes to the Combined Nomenclature of the European Union⁽¹⁶⁾.

Products derived from animal by-products covered by Regulation (EC) No 1069/2009⁽¹⁷⁾ of the European Parliament and of the Council and Regulation (EU) No 142/2011 are not specifically identified in Union law. Official controls shall be carried out on products that are partly processed but remain raw products to be further processed in an approved or registered establishment at destination. Official inspectors at border control posts shall assess and specify, when necessary, if a derived product is sufficiently processed to not require further official controls provided for in Union law.

0602 90 10 Mushroom spawn:

Mushroom spawn is the term given to a net of fragile threads (*Thallus or Mycelium*), often found underground, which lives and grows on the surface of decomposing animal or vegetable matter and develops in the tissues themselves and produces mushrooms.

This subheading also includes a product consisting of mushroom spawn, not fully developed, placed in microscopic amounts on a layer of cereal grains enclosed in a compost of sterilized horse manure (a mixture of straw and horse dung).

The heading also covers similarly treated fractions of animal or vegetable fats and oils.

Hydrogenation, which is effected by bringing the products into contact with pure hydrogen at a suitable temperature and pressure in the presence of a catalyst (usually finely divided nickel), raises the melting points of fats and increases the consistency of oils by transforming unsaturated glycerides (e.g. of oleic, linoleic, etc. acids) into saturated glycerides of higher melting points (e.g. of palmitic, stearic, etc. acids).

Heading 1518 covers inedible mixtures or preparations of animal or vegetable fats or oils or of fractions of different fats or oils of the Chapter, not elsewhere specified or included.

This part covers, *inter alia*, used deep-frying oil containing, for example, rape oil, soya-bean oil and a small quantity of animal fat, for use in the preparation of animal feeds.

The heading also includes hydrogenated, inter-esterified, re#esterified or elaidinised fats and oils or their fractions, where modification involves more than one fat or oil.

Extract from the Harmonized System Explanatory Notes

For the purposes of this heading, the expression “worked” refers to materials which have undergone processes extending beyond the simple preparations permitted in the heading for the raw material in question (see the Explanatory Notes to headings 05.05 to 05.08). Thus, piano-key plates and plates for insertion in butts of firearms fall in headings 92.09 and 93.05 respectively. However, worked materials not identifiable as parts of articles remain classified in this heading (e.g., simple discs, plates or strips for inlaying, etc., or for subsequent use in the manufacture of piano-keys).

Heading 9602 includes sheets of unhardened gelatine cut to shape other than square or rectangular.
