

ANNEX

Technical specifications and procedures

2. Communication protocols

Secure internet protocols, such as Hypertext Transfer Protocol Secure (HTTPS), shall be used for the communication between the portal, the platform, the registers and the optional access points.

Standard communication protocols, such as Simple Object Access Protocol (SOAP), shall be used for the transmission of structured data and metadata.

Changes to legislation:

There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2020/2244, Division 2..
