

2015 CHAPTER 8

PART 3

CONSTRUCTION OR ALTERATION OF CONTROLLED RESERVOIRS

Supervision by construction engineer

PROSPECTIVE

Construction certificate

48.—(1) The construction engineer must give the reservoir manager a construction certificate as soon as is reasonably practicable after being satisfied that the relevant works have been completed to a satisfactory standard.

(2) The construction certificate must in any event be issued not later than the final certificate in respect of the relevant works.

(3) A construction certificate must—

- (a) include an annex containing detailed drawings and descriptions giving full information about the relevant works, including the dimensions, water levels and details of the geological strata or deposits encountered in bore holes, trial holes or excavations made in connection with the works,
- (b) include such other information as the Department may by regulations specify,
- (c) certify that the relevant works have been executed satisfactorily in accordance with the drawings and descriptions included in the annex to the certificate.

Status: *This version of this provision is prospective.*

Changes to legislation: *There are currently no known outstanding effects for the Reservoirs Act (Northern Ireland) 2015, Section 48. (See end of Document for details)*

(4) The construction engineer must, not later than 28 days after giving a construction certificate, give the Department a copy of it (including any annex to it).

Status:

This version of this provision is prospective.

Changes to legislation:

There are currently no known outstanding effects for the Reservoirs Act (Northern Ireland) 2015, Section 48.
